## Dear Patrons & Well Wishers

We are thankful to you for accepting our publications as text and reference materials for pharmacy courses & research. With the encouragements from you, we are striving to bring new books as well as releasing low cost Indian reprints of well known foreign editions.

**MAJOR REFERENCE:** Some of our forthcoming releases are Major Reference. We will be releasing "Compendium of Organic Medicinal Drugs", a highly reference book in six volumes edited by Dr. Raj B. Durairaj and another well know classic "Modern Methods of Plant Analysis" in six volumes is now available at low Indian price of Rs.17,995.00.

**COMPETITIVE BOOKS:** We have released second edition 2012 "Pharmacy Quiz: A Handbook for Competitive Exams". Also, we have released Solved GPAT for 1998-2012 and Microbiology Quiz.

**JOURNALS:** We are happy to inform you that new editorial team consisting of Dr. D. Samba Reddy (Texas A & M University Health Science Center, College of Medicine, College Station, Texas, USA) as chief editor, has taken over "International Journal of Pharmaceutical Sciences and Nanotechnology". Also we are glad that our Chief editor, Dr. D. Sriram of "International Journal of Drug Design and Discovery" has been awarded "Shankutala Amirchand Prize" by ICMR. Our journal website are: [www.ijpsnonline.com](http://www.ijpsnonline.com), [www.ijdddonline.com](http://www.ijdddonline.com).

**AWARD:** We have instituted "Best Research Paper Award" to recognize outstanding achievement in pharmaceutical science as demonstrated by the author in quality and originally of the manuscript published in the International Journal of Pharmaceutical Sciences and Nanotechnology.

**OUR WEBSITE:** We have launched our website [www.bspbooks.net](http://www.bspbooks.net); which is being constantly looked into for improvement. You can download our complete PRICE LIST, BROCHERS & OTHER INFORMATION for promotion to your customer.

We are sure, we can expect all the co-operation & suggestions from you in coming year.

Nikhil Shah & Anil Shah  
Directors

## Essentials of Pharmaceutical Technology

Ajay Semalty, Mona Semalty and M.S.M. Rawat

**Contents:** 1. Bioavailability 2. Dissolution Study 3. Tablets and Tablet Coating 4. Capsules 5. Suspensions 6. Emulsions 7. Oral Controlled Release Products 8. Oral Drug Delivery of Proteins and Peptides 9. Aerosols 10. Parenteral Products 11. Sterile Processing: Quality Assurance and Validation 12. Stability Studies 13. ICH Guidelines on Stability

2011      978-93-81075-34-0      313 pages      PB      Rs. 195.00

## Textbook of Biopharmaceutics and Clinical Pharmacokinetics

Niazi Sarfaraz

**Contents:** 1. Introduction to Biopharmaceutics and Clinical Pharmacokinetics 2. Delivery of Drugs: Introduction and Formulation Factors 3. Delivery of Drugs: Dosage Forms and Their Evaluation 4. Delivery of Drugs: Routes of Administration 5. The Distribution of Drugs 6. The Termination of Drug Action 7. Pharmacokinetic Principles 8. The Pharmacokinetic Basis of Variability in Clinical Response 9. The Clinical Pharmacokinetic Basis of Drug Therapy

Rpt. 2011      978-93-81075-04-3      332 pages      PB      Rs. 350.00

## Advances in Pharmaceutical Technology

Dinda S. C.

**Contents:** 1. Pharmacokinetic Approaches in Designing of Drug Delivery Systems 2. Bio-Degradable Polymers in Drug Delivery Systems 3. Nanotechnology in Drug Delivery 4. Aerosol Technology in Drug Delivery 5. Biotechnology in Drug Delivery 6. Immunotechnology in Drug Delivery 7. Therapeutic Carriers in Drug Delivery 8. Oral Controlled Release Systems 9. Parenteral Controlled Release Systems 10. Trans Dermal Drug Delivery

2011      978-93-81075-06-7      405 pages      HB      Rs. 1795.00

## Sterile Dosage Forms - Their Preparation and Clinical Application, 4<sup>th</sup> Ed.

Salvatore J. Turco

**Contents:** 1. Introduction 2. Composition 3. Characteristics 4. Large Scale Preparation 5. Extemporaneous Preparation 6. Handling and Administration 7. Biopharmaceutic Factors Influencing Drug Availability 8. Large-Volume Sterile Solutions 9. Blood Components and Plasma Expanders 10. Fundamentals of Fluid and Electrolyte Therapy 11. Parenteral Admixtures and Incompatibilities 12. Convenience Parenterals 13. Radiopharmaceuticals 14. Devices 15. Ophthalmic Preparations 16. Allergen Extracts

Rpt. 2011      978-81-84735-60-4      521 pages      PB      Rs. 1095.00

## Pharmaceutics: A Practical Manual for B PHARM & PHARM D Courses

Sindhu Abraham

**Contents:** **Syrups:** 1. Syrup IP, 2. Orange Syrup BPC, 3. Orange Syrup NF, 4. Ephedrine Hydrochloride Syrup NF, 5. Vasaka Syrup IP, 6. Ferrous Phosphate Syrup IP, **Elixirs:** 7. Piperazine Citrate Elixir BPC, 8. Paediatric Paracetamol Elixir BPC, 9. Cascara Elixir BP, **Linctuses:** 10. Simple Linctus BPC, 11. Paediatric Simple Linctus BPC, **Solutions:** 12. Cresol with Soap Solution IP, 13. Aqueous Iodine Solution IP, 14. Strong Iodine Solution IP, 15. Strong Ammonium Acetate Solution IP, 16. Strong Solution of Ferric Chloride BPC, **Liniments:** 17. Turpentine Liniment IP, 18. Camphor Liniment, **Suspensions:** 19. Calamine Lotion IP, 20. Magnesium Hydroxide Mixture BP, **Emulsions:** 21. Liquid Paraffin Emulsion B.P, 22. Cod Liver Oil Emulsion BP, **Powders:** 23. Eutectic Powder, 24. Explosive Powder, 25. Dusting Powder, 26. Insufflation, **Suppositories:** 27. Boric Acid Suppositories, 28. Chloral Hydrate Suppositories, **Incompatibilities:** 29. Mixtures with Physical Incompatibilities, 30. Mixtures with Chemical Incompatibilities, 31. Therapeutic Incompatibilities

2011      978-81-91019-22-3      145 pages      PB      Rs. 125.00

## Advances in Drug Delivery, Volume 1

Y. Madhusudan Rao, A. V. Jithan

**NEW**

### VOLUME I:

1. Controlled Release Products 2. Gastroretentive Drug Delivery Systems 3. Buccal Drug Delivery Systems 4. Multiple Emulsions 5. Nanoemulsions 6. Microspheres 7. P-glycoprotein and CYP3A Limiting Oral Drug Absorption 8. Liquid Crystals 9. Chirality in Drug Development

2010

978-81-7800-254-5

548 pages

HB

Rs. 1795.00

### VOLUME II:

1. Transdermal Drug Delivery 2. Oral Disintegrating Tablets 3. Resealed Erythrocytes 4. Polymeric Nanoparticles 5. Bioadhesives 6. Liver Targeting 7. Monoclonal Antibodies 8. Intracellular Drug Delivery Systems 9. Pulmonary Drug Delivery 10. Hotmelt Extrusion

**COMING SOON**

### VOLUME III:

**Contents:** 1. Iontophoresis 2. Solid lipid nanoparticles 3. Orodispersible films 4. Preformulation 5. Colon targeting 6. Hydrogels 7. Nanomedicines in Healthcare Systems 8. Genomics and Proteomics 9. Liposomes 10. Ocular Drug Delivery

## Techniques of Solubilization of Drugs

Yalkowsky Samuel H.

**NEW**

**Contents:** 1. Solubility and Solubilization of Nonelectrolytes 2. Drug Solubilization in Surfactant Systems 3. Solubilization of Drugs by cosolvents 4. Alteration of Apparent Solubility through Complexation 5. Solubilization by Solid-State Manipulation 6. Drug Derivation as a Means of Solubilization: Physicochemical and Biochemical Strategies

Rpt. 2011

978-93-81075-03-6

224 pages

HB

Rs. 1995.00

## Pharmaceutical Quality Assurance and Management

K. P. Bhusari, U. D. Shivhare, D. C. Goupale

**NEW**

**Contents:** Part I: Guidelines in Pharmaceuticals 1. Introduction to Clinical Pharmacy 2. Audit Guide Line Formats for Pharmaceutical Excipients 3. Good Laboratory Practices 4. Good Clinical Practice Guidelines 5. Hazard and Risk Analysis in Pharmaceutical Products 6. Validation Protocols 7. Pharmaceutical Inspections Part II: Regulations in Pharmaceuticals 8. The Consumer Protection Act, 1986 9. The Environment (Protection) Act, 1986 10. Scale up and Post Approval Changes Part III: Quality Management in Pharmaceuticals 11. Quality Management System for API's (GMP and ISO) 12. Process Analytical Technology 13. Quality Risk Management 14. Quality Management of Cosmetics

2011

978-81-7800-256-9

562 pages

HB

Rs. 1295.00

## OTC Medications

Kamal Dua, Vijay Kumar Sharma, Kavita Pabreja

**NEW**

**Contents:** Unit I: Basics and Concept Unit II: OTC Medication in Special Cases: Vital Considerations Unit III: Pharmacist: an Indispensable Safety Reservoir for OTCs Unit IV: OTC Medications: Recent Developments

2011

978-81-7800-216-3

90 pages

PB

Rs. 90.00

## Pharmacy Administration

G. Vidya Sagar

**Contents:** 1. Introduction to Business 2. Manufacturing Management 3. Social Use of Drugs, Drug Addiction 4. Organisation of Distribution and Marketing 5. Pharmaceutical Industry 6. Insurance 7. Governance in Pharmacy 8. Drug Store Principles and Management

2010

978-81-7800-255-2

436 pages

PB

Rs. 250.00

## Models for Assessing Drug Absorption and Metabolism

Borchardt, Ronald T.; Smith, Philip L.; Wilson, Glynn (Eds.)

**Contents:** 1. General Principles in the Characterization and Use of Model Systems for Biopharmaceutical Studies 2. Methods for Evaluating Intestinal Permeability and Metabolism *in vitro* 3. Cultured Intestinal Epithelial Cell Models 4. Intestinal Rings and Isolated Intestinal Mucosal Cells 5. Models of Drug Absorption *in situ* and in Conscious Animals 6. Model Systems for Intestinal Lymphatic Transport Studies 7. Buccal Tissues and Cell Culture 8. Isolated Hepatocytes 9. Cultured Rat Hepatocytes 10. Isolated Perfused Liver 11. Isolated Renal Brush Border and Basolateral Membrane Vesicles and Cultured Renal Cells 12. Use of an Isolated Perfused Kidney to Assess Renal Clearance of Drugs: Information Obtained in Steadystate and Nonsteady State Experimental Systems 13. Brain Microvessel Endothelial Cell Culture Systems 14. Methods to Study Drug Transport in Isolated Choroid Plexus Tissue and Cultured Cells 15. Brain Perfusion Systems for Studies of Drug Uptake and Metabolism in the Central Nervous System 16. *In Vitro* Nasal Models 17. Models for Investigation of Peptide and Protein Transport across Cultured Mammalian Respiratory Epithelial Barriers 18. Drug Transport across *Xenopus* Alveolar Epithelium *in Vitro* 19. *In Situ* and *in Vivo* Methods for Pulmonary Delivery 20. *In Vitro* Viable Skin Model 21. Isolated Perfused Porcine Skin Flap Systems 22. Vaginal Epithelial Models 23. Ocular Epithelial Models

Rpt. 2010

978-81-8489-850-7

468 pages

PB

Rs. 895.00

## Biopharmaceutics and Pharmacokinetics, 2<sup>nd</sup> Ed.

V. Venkateswarlu

**Contents:** 1. Introduction to Biopharmaceutics 2. Absorption of Drugs from Gastrointestinal Tract 3. Drug Distribution 4. Drug Elimination 5. Pharmacokinetics: Basic Concepts 6. One Compartment Open Model 7. Multi-Compartment Models 8. Multiple-Dose Regimens 9. Nonlinear Pharmacokinetics 10. Non Compartmental Pharmacokinetics 11. Bioavailability and Bioequivalence 12. Biostatistics 13. Biostatistics

2010

978-81-88449-27-9

506 pages

PB

Rs. 275.00

## Biopharmaceutics and Clinical Pharmacokinetics, 4<sup>th</sup> Ed.

Milo Gibaldi

**Contents :** 1. Introduction to Pharmacokinetics 2. Compartmental and Noncompartmental Pharmacokinetics 3. Gastrointestinal Absorption – Biologic Considerations 4. Gastrointestinal Absorption – Physicochemical Considerations 5. Gastrointestinal Absorption – Role of the Dosage Form 6. Nonoral Medication 7. Prolonged-Release Medication 8. Bioavailability 9. Drug Concentrations and Clinical Response 10. Drug Disposition – Distribution 11. Drug Disposition – Elimination 12. Pharmacokinetic Variability – Body Weight, Age, Sex, and Genetic Factors 13. Pharmacokinetic Variability – Disease 14. Pharmacokinetic Variability – Drug Interactions 15. Individualization and Optimization of Drug Dosing Regimens

Rpt. 2008

81-88449-06-7

406 pages

PB

Rs. \*375.00

## Basic Pharmacokinetics

Mohsen A. Hedaya

**Contents :** 1. Introduction to biopharmaceutics and pharmacokinetics 2. Drug pharmacokinetics following single intravenous administration 3. Drug absorption following oral administration : biopharmaceutical considerations 4. Drug pharmacokinetics following single oral drug administration : rate of drug absorption 5. Drug pharmacokinetics following single oral drug administration : extent of drug absorption 6. Steady-state principle and drug pharmacokinetics during constant-rate intravenous infusion 7. Steady state during multiple drug administrations 8. Renal drug elimination 9. Metabolite pharmacokinetics 10. Disease state and drug pharmacokinetics 11. Nonlinear pharmacokinetics 12. Multicompartment pharmacokinetic models 13. Drug pharmacokinetics following administration by intermittent intravenous infusion 14. Noncompartmental approach to pharmacokinetic data analysis 15. Physiological approach to hepatic clearance 16. Pharmacokinetic-pharmacodynamic relationship 17. Therapeutic drug monitoring 18. Solutions to practice problems

Rpt. 2010

978-14200-467-17

300 pages

PB

Rs. 495.00

## Pharmacokinetic Analysis: A Practical Approach

Peter I-D Lee

**Contents:** SECTION I. Basics and Methods 1. Introduction 2. Constant Approach 3. Evaluation of Time Constants by Visual Inspection of Concentration-Time Profiles 4. Scaling of Time Constants among Different Animal Species 5. Influence of Administration Route on Pharmacokinetics - Bioavailability 6. Influence of Formulation on Pharmacokinetics - Bioequivalence 7. Influence of Dosage on Pharmacokinetics-Dose Proportionality 8. Pharmacokinetics of Sustained Release and Immediate Release Formulations SECTION III. Absorption, Distribution, Metabolism, and Pharmacodynamics 9. Absorption of Drugs in the Gastrointestinal Tract 10. Drug distribution into Tissue-Tissue Penetration 11. Pharmacokinetics of Metabolites 12. Relationship between Pharmacokinetics and Pharmacodynamics SECTION IV. Interactions 13. Influence of Food on Pharmacokinetics 14. Effects of Drug Interactions on Pharmacokinetics SECTION V. Special Populations 15. Influence of Age on Pharmacokinetics 16. Difference in Pharmacokinetics between Genders 17. Special Pharmacokinetic Considerations in Renal Impairment 18. Special Pharmacokinetic Considerations in Hepatic Impairment 19. Special Pharmacokinetic Considerations in Other Diseases 20. Absorption of Drugs in the Gastrointestinal Tract

Rpt. 2010

568 pages

PB

Rs. 995.00

## Pharmacokinetic Principles of Dosing Adjustments: Understanding the Basics

Ronald D. Schoenwald

**Contents:** 1. Basic Concepts 2. Pharmacokinetic Processes 3. Kinetic Processes Applied to the Whole Body 4. Disposition Parameters of the One-Compartment Model 5. Parameters Used In Adjusting Doses 6. Parenteral Dosing Adjustments 7. Oral Dosing 8. Bioavailability/Bioequivalence 9. Multiple Dosing Regimens 10. Advanced Considerations 11. An Introduction to Nonlinear Pharmacokinetics

Rpt. 2010

978-1-56676-899-3

272 pages

PB

Rs. 595.00

## Pharmacokinetics for the Pharmaceutical Scientist

John G. Wagner

**Contents :** 1. Simple Linear Models 2. More Complicated Linear Models 3. Complicated Linear Models 4. Linear Multicompartment Disposition Parameters from Downslope Extravascular C, t Data 5. Noncompartmental and System Analysis 6. Linear Multiple Dose Equations 7. Simple Nonlinear Models 8. More Complicated Nonlinear Models 9. Urinary Excretion 10. Absorption Analysis and Bioavailability 11. Physiological Pharmacokinetics 12. Relationship between Physiologically Based Flow Models and Usual Compartment Models 13. Protein Binding 14. Pharmacokinetic-Pharmacodynamic Modelling 15. Metabolic Kinetics 16. Laplace Derivation of Linear Pharmacokinetic Equations 17. Measures of Fit

## Handbook of Cosmetic Science and Technology

Andre Barel, Marc Paye, Howard I Maibach

**Contents:** Part I: Target Organs for Cosmetic Products Part II: Cosmetic Vehicles Part III: Cosmetic Ingredients Part IV: Cosmetic Products Part V: Testing of Cosmetic Products Part VI: Regulatory and Safety Considerations

Rpt. 2008

1-57444-824-2

904 pages

HB

Rs. 2495.00

## Cosmetics: Science and Technology, 2<sup>nd</sup> Ed., 3 Vol. Set

Balsam S.M. and Sagarin Edward

*Cosmetics: Science and Technology* has many predecessors and among its contemporaries does not pretend to preempt the field. The burgeoning of a science of cosmetics, a technology of cosmetics, without the abandonment of what must in part remain a craft, a skill and an art, brought forth several excellent books in various languages, which sought to summarise the state of the knowledge. Among these *Cosmetics: Science and Technology*, published for the first time in 1957, was unique in that it was a collective effort of 61 specialists in the field. In this aspect lies both the potential strength and possible hazard of such an undertaking. The first edition – a heavy volume of more than 1400 pages, was reviewed widely and enthusiastically by science and trade journals and was warmly received by members of the profession. In reviewing the chapters for the second edition, some authors considered it necessary to start a new, with a completely different approach, based on the research findings. Some changes that have occurred are not reflected in science and technology, but are, rather in fashion and fad. Such changes concern the chemist in so far as the products are affected by the fancy of the day,

but they are irrelevant to a description of the state of the science. Volume 1 contains descriptive material on the manufacture and formulation of fifteen different products and classes of products. Volume 2 contains descriptive material on the manufacture and formulation of eighteen different products and classes of products. Volume 3 contains chapters on the physiology of the skin and hair, the physiology of sweat, the use of colours in cosmetics, problems of quality control, presentation and psychological testing, historical information and legal information.

### Salient Features

- Rewrote the chapters to bring them up-to-date
- Regulations of colours and colour additives have been expanded, bringing about toxicological studies
- Bacteriological aspects of cosmetic products have been explored and studied

**Contents: Volume 1:** Cleansing Creams and Lotions - Emollient Creams and Lotions - Hormone Creams, Baby Toiletries - Hand Creams and Lotions - Skin Lighteners and Bleach Creams - Suntan Preparations, Beauty Masks - Foundation Makeup, Face Powders - Rouge, Lipsticks, Eye Makeup, - Dentifrices, Mouthwashes **Volume 2 :** Shaving Preparations - Preshave and Aftershave Preparations - Depilatories, Shampoos - Hair-Grooming Preparations - Permanent Waving products, Hair Straighteners - Bleaches and Related Products - Hair Conditioners and Related Products - Antiperspirants and Deodorants, Aerosol Cosmetics - Aerosol Hair Products, Bath Preparations - Nail Lacquers and Removers - Fingernail Elongators and Accessory Nail Preparations - Eye Lotions, Fragrance - Emulsified and Solid Fragrances **Volume 3 :** Status and Structure of the Cosmetics Industry - Historical Development of the Cosmetics Industry - Physiology of the Skin and Its Appendages - The Physiology and Pharmacology of Sweating - Sensitivity Testing, Quality Control - Preservation of Cosmetics - Self-Regulation in the Cosmetic Industry-A View from a Scientific Vantage Point - Legal Consideration and Regulatory - Procedures Governing Cosmetics - Color in Cosmetics, Emulsification - Processing of Alcoholic Fragrance Solutions - Performance and Psychometric - Evaluation of Cosmetics

Rpt. 2008

Set Price: Rs. 7500.00

## Advances in Pharmaceutical Sciences, 4 Vol. Set

H.S.Bean, A.H. Beckektt and J.E.Carless, Chelsea College of Science and Technology, London.

Considerable progress has been made during the last one or two decades in the field of pharmaceuticals, and yet there is still very little literature dealing specifically with the area of knowledge. Undoubtedly this because pharmaceuticals embraces a wide range of disciplines, and much information of value to the pharmacist appears in journals having no obvious connection with pharmacy. The aim of this set is to concentrate on areas of specific interest to the pharmaceuticals; for example, this will consider the physical aspects of pharmaceuticals, pharmaceutical microbiology and the influence of formulation on product stability and efficacy. The articles will be an appraisal of a subject rather than a mere factual abstraction of the literature. The authors are experts in their field and have been encouraged to include the results of their experience.

**Contents: Volume - 1:** 1. Solubility in Systems Containing Surface-active Agents 2. Preservation of Emulsions against Microbial Attack 3. Contemporary Trends in Heat Sterilization **Volume - 2:** 1. Kinetics and Mechanics in Stability of Drugs 2. Particle-size Analysis 3. The Flow Properties of Powders 4. Water Determination and its Significance in Pharmaceutical Practice **Volume - 3:** 1. Recent Advances in Tablet Technology 2. The Formulation of Aspirin 3. Cohesive Pharmaceutical Powders **Volume - 4:** 1. Rheology of Pharmaceutical Semisolids 2. Determination of Thermodynamics of Functional Group in Solutions of Drug Molecules 3. Radio Pharmaceutical 4. Rectal Administration of Drugs

Indian Rpt. 2009

978-81-312-1787-0

HB

Set Price: Rs. 7500.00

## Pharmaceutical Dissolution Testing

Jennifer J. Dressman and Johannes Kramer

**Contents:** 1. Historical Development of Dissolution Testing 2. Compendial Testing Equipment: Qualification, and Sources of Error 3. Compendial Requirements of Dissolution Testing-European Pharmacopoeia, Japanese Pharmacopoeia, United States Pharmacopoeia 4. The Role of Dissolution Testing in the Regulation of Pharmaceuticals: The FDA Perspective 5. Gastrointestinal Transit and Drug Absorption 6. Physiological Parameters Relevant to Dissolution Testing: Hydrodynamic Considerations 7. Development of Dissolution Tests on the Basis of Gastrointestinal Physiology 8. Orally Administered Drug Products: Dissolution Data Analysis with a View to *In Vitro-In Vivo* Correlation 9. Interpretation of *In Vitro-In Vivo* Time Profiles in Terms of Extents, Rates, and Shape 10. Study Design Considerations for IVIVC Studies 11. Dissolution Method Development with a View to Quality Control 12. Dissolution Methods Development: An Industry Perspective 13. Design and Qualification of

Automated Dissolution Systems 14. Bioavailability of Ingredients in Dietary Supplements: A Practical Approach to the *In Vitro* Demonstration of the Availability of Ingredients in Dietary Supplements

Rpt. 2011

## Pharmaceutical Chemistry

## Compendium of Organic Medical Drugs: 6 Vol. Set (With Detailed Synthetic Routes)

**COMING SOON**

Raj B. Durairaj and Magesh Sathaiah

Globally, the prescription drug industry is more competitive and dynamic. Every year new drugs are introduced based on the novel drug chemistries developed by Pharmaceutical companies. In addition, generic drugs are also introduced based on the information obtained from expired patents for the well known brand name drugs. Pharmaceutical and chemical companies are constantly developing new and improved processes to manufacture pharmaceutical raw materials, active intermediates and final drug compounds in cost effective ways to lower the cost of medical drugs. Cost effective manufacturing of drug intermediates and drug compounds primarily depend on employing efficient and economical synthesis procedures in their preparations. Compendium of Organic Medical Drugs (6 Volume Books) provides detailed information on the organic chemistry of top selling medical drugs to treat people suffering from various diseases worldwide. Each book contains the details on various chemistries involved in developing these prescription and generic drugs. Specific details include the synthetic pathways or reaction schemes, complete preparative procedures to manufacture these drug compounds either directly from their raw materials or active intermediates, drug compound physical properties, brand and generic names, pharmacological data, toxicity data and applications. Our "Compendium of Organic Medical Drugs" book series could provide valuable information for the chemical producers and scientists involved in the manufacture of intermediates and active pharmaceutical ingredients (API) for the drug industry. For people interested in new pharmaceutical businesses, our books could act as the starting point for their earlier investigations and potentially look for new opportunities in the prescription or generic drug businesses. In addition to chemical and pharmaceutical industry professionals, the synthetic organic chemistries outlined in these books can be valuable to people who might be interested to know the details of drugs syntheses and their manufacturing procedures. The Compendium of Organic Medical Drugs book series can be used as a standard reference for all those working in pharmaceutical science and also, recognized as text books for Universities and Colleges offering either Degrees or Diplomas in the field of Pharmaceutical Medicine. This comprehensive book series is an invaluable resource for anyone in the global pharmaceutical industry and educational institutions, and an excellent platform for drug companies to benchmark their products and for generic companies to formulate drugs coming off patent. The Compendium of Organic Medical books will appeal to both newcomers and experienced scientists in the field research and development departments in the pharmaceutical industry.

**Contents: VOLUME 1: RESPIRATORY SYSTEM AND GASTROINTESTINAL DRUGS** 1. Anti-Inflammatories/Allergies 2. Antitussive 3. Anti-Asthma 4. Anti-emetics 5. Anti-IBS drug 6. Anti-ulcer drugs **VOLUME 2: CENTRAL NERVOUS SYSTEM (CNS) DRUGS** 1. Anti-Convulsants Drugs 2. Anti-Depressant 3. Anti-Schizophrenia Drugs 4. Anti-Parkinson Drugs **5A. CNS Stimulants 5B. Sedatives 5C. Anti-Alzheimer Drugs 5D. Anesthetics 5E. Anti-Anxiety Drugs 5F. Anti-ADHD 5G. Anti-Migraine 5H. Drug for Stroke** **VOLUME 3: MUSCULOSKELETAL DRUGS** 1. Anti-Inflammatory/Analgesics 2. Anti-Osteoporotic Drugs 3. Drug for Gout 4. Muscle Relaxants **VOLUME 4: CARDIOVASCULAR DRUGS** 1. Angiotensin Converting Enzyme (ACE) 2. Angiotensin Receptor Blockers (ARB) 3. Beta Blockers 4. Calcium Channel Blockers 5. Lipid Lowering Drugs 6. Diuretics 7. Anti-Diabetic Drug **8A. Centrally Acting Alpha-Agonist 8B. Anti-Angina Drug 8C. Anti-Arrhythmics 8D. Anti-Coagulant Drug 8E. Anti-Platelet Drug** **VOLUME 5: ANTI-MICROBIALS DRUGS** 1. Antibiotics 2. Antifungals 3. Anti-Viral 4. HIV/AIDS **VOLUME 6: CHEMISTRY OF CHEMOTHERAPEUTICS AND HUMAN HEALTH DRUGS** 1. Chemotherapeutics 2. Men's Health 3. Women's Health 4. BPH/Urination **5A. Ophthalmologic / Glaucoma Drugs 5B. Anti-Thyroid Drug 5C. Immunosuppressant 5D. Opiate Detoxification 5E. Vitamins**

## Advanced Medicinal Chemistry - A Laboratory Guide

M. Raghu Prasad and A. Raghuram Rao

**NEW**

**Contents:** 1. Isolation of natural products of medicinal interest 2. Solvent Purification Techniques 3. Synthesis of Drug Intermediates and Drug Candidates 4. Quantitative Estimation of Drug in Various Formulations 5. Analysis of Oils and Fats 6. Interpretation of Different Spectra 7. Essentials of Bioinformatics and Molecular Modeling

## Foundations of Molecular Pharmacology, 2 Vol. Set

Vol. 1: Medicinal and Pharmaceutical Chemistry

Vol. 2: The Chemical Basis of Drug Action

J.B. Stenlake

This book has emerged from some thirty years of teaching undergraduate courses and conducting research in medicinal and pharmaceutical chemistry. It is conceived essentially as a foundation course in the basic principles of organic chemistry applied to the study of medicinal agents and the formulations in which they are used. It is intended primarily to cater for the needs of undergraduate students of pharmacy and medicinal chemistry. To reinforce the continuity of the subject between the two volumes, the author has provided a system of cross-referencing between chapters, both within and between the two volumes. The basic philosophy underlying the text is that those concerned with the design and use of drugs and medicines are interested fundamentally in properties rather than in methods of manufacture. Attention is focused in Volume 1 on the physical and chemical properties of medicinal agents, pharmaceutical additives and cellular components, that determine the way in which they interact with each other. To achieve this end, substantial accounts of

relevant intermediary tissue metabolism, drug transport and metabolism, and other factors affecting both stability and availability of drugs from dosage forms have been brought together in the general body of the text. This approach emphasizes the close similarity between chemical and biochemical transformations, and should help to give students and others engaged in the design of new drugs a better understanding of the fundamental mechanisms which control interactions between drugs and body chemistry. The more general, but essentially similar approach to the Chemical Basis of Drug Action adopted in Volume 2, which reinforces the basic principles for the specialist, should also appeal in its own right to clinical pharmacologists and others whose interests lie rather more in the action and use of drugs than in their design. Since this book is designed to assist in the education of students, many of whom will be engaged in later life in the handling and use of drugs in practice, examples are deliberately drawn from drugs in current use.

**Contents:** : **Volume I:** 1. The characteristics of Drug-Receptor Interaction 2. Bonding and Biological Activity 3. Stereochemical Factors in Biological Action 3. Drug Ingestion, Transport and Excretion 5. Drug Metabolism

**Volume II:** 1. Introduction 2. The Making and Breaking of Bonds 3. Alkanes (Paraffinic Hydrocarbons) 4. Alkenes (Olefines) 5. Benzenoid Aromatic Hydrocarbons 6. Alkynes 7. Monohydric Alcohols 8. Phenols 9. Halogenated Hydrocarbons and Esters of Inorganic Acids 10. Aldehydes and Ketones 11. Monocarboxylic acids and Esters 12. Dibasic Acids 13. Oxo- and Hydroxy-Carboxylic Acids 14. Organo-Sulphur Compounds 15. Nitro Compounds 16. Amines and Quaternary Ammonium Salts 17. Carbamic Acid Derivatives 18. Amino Acids 19. Peptides and Proteins 20. Glycols and Polyols 21. Carbohydrates 22. Fused-ring Hydrocarbons 23. Heterocyclic compounds

## Drug Design: Medicinal Chemistry, 10 Vol. Set (A Series of Monographs)

Edited by: E.J. Ariens

**Contents: Volume I:** 1. A General Introduction to the Field of Drug Design 2. Quantitative Structure–Activity Relationships in Drug Design 3. Physicochemical Approaches to the Rational Development of New Drugs 4. A Molecular Orbital Approach to Quatitative Drug Design 5. Electronics Aspects of Drug Action 6. The Role of Biopharmaceutics in the Design of Drug Products 7. Significance of Pharmacokinetics for Drug Design and the Planning of Dosage Regimens **Volume II:** 1. Modulation of Pharmacokinetics by Molecular Manipulation 2. Factors in the Design of Reversible and Irreversible Enzyme Inhibitors 3. The Design of Organophosphate and Carbamate Inhibitors of Cholinesterases 4. The Design of Reactivators for Irreversibly Blocked Acetylcholinesterase 5. Inhibition of Protein

Biosynthesis: Its Significance in Drug Design 6. Enzymes and their Synthesis as a Target for Antibiotic Action 7. The Rational Design of Antiviral Agents 8. Design of Penicillins 9. The Design of Peptide Hormone Analogs 10. Recent Advances in the Design of Diuretics 11. Design of Biologically Active Steroids 12. Rational Elements in the Development of Superior Neuromuscular Blocking Agents 13. The Design of Tumor-Inhibitory Alkylating Drugs **Volume III:** 1. Microbial Conversion as a Tool in the Preparation of Drugs 2. The Use of Linear Free Energy Parameters and Other Experimental Constants in Structure–Activity Studies 3. **Anticoagulants** Structurally and Functionally Related to Vitamin K 4. Design of  $\beta$ -Blocking Drugs 5. The Design of Biologically Active Acridines 6. The Design of Local Anesthetics 7. Design of Insect Chemosterilants 8. Molecular Approach for Designing Inhibitors to Enzymes Involved in Blood Clotting **Volume IV:** 1. Biopharmaceutics as a Basis for the Design of Drug Products 2. Peroral Solid Dosage Forms with Prolonged Action 3. Parenteral Dosage Forms with Prolonged Action 4. Design of Topical Drug Products: Pharmaceutics 5. Design of Topical Drug Products: Biopharmaceutics 6. The Design of Sunscreen Preparations 7. Litholytic Agents: Preventive and Curative for Nephrolithiasis 8. The Design of Biologically Active Nucleosides 9. The Design of Insecticidal Chlorohydrocarbon Derivatives **Volume V:** 1. Utilization of Operational Schemes for Analog Synthesis in Drug Design 2. The Design of Enzyme Inhibitors: Transition State Analogs 3. Structure–Absorption–Distribution Relationships: Significance for Drug Design 4. The Role of Charge-Transfer Processes in the Action of Bioactive Materials 5. Approaches to the Rational Combination of Antimetabolites for Cancer Chemotherapy 6. Physicochemical, Quantum Chemical, and Other Theoretical Techniques for the Understanding of the Mechanism of Action of CNS Agents: Psychoactive Drugs, Narcotics, and Narcotic Antagonists and Anesthetics **Volume VI:** 1. Diphenhydramine Derivatives: Through Manipulation toward Design 2. The Design of Antiradiation Agents 3. Rational Approach to Proteinase Inhibitors 4. The Design of Organ-Imaging Radiopharmaceuticals 5. Design of X-Ray Contrast Media 6. Agricultural Pesticides: Chemical and Physical Methods of Formulation **Volume VII:** 1. The Design of Artificial Blood Substitutes 2. Insect Pheromones as a Basis for the Development of More Effective Selective Pest Control Agents 3. The Design of Auxin-Type Herbicides 4. Development and Application of New Steric Substituent Parameters in Drug Design 5. Computer Technology in Drug Design **Volume VIII:** 1. Advances in the Methodology of Quantitative Drug Design 2. The Application of Pattern Recognition to Drug Design 3. The Design of Controlled Drug Delivery Systems 4. Receptor Binding as a Tool in the Development of New Bioactive Steroids 5. The Design of Synthetic Sweeteners 6. The Prospective Assessment of Environmental Effects of Chemicals 7. Design of Selective Ion Binding Macrocyclic Compounds and Their Biological Applications **Volume IX:** 1. Design of Safer Chemicals 2. Consequences of the Hansch Paradigm for the Pharmaceutical Industry 3. A Physical Chemical Basis for the Design of Orally Active Prodrugs 4. The Masca Model of Pharmacochimistry I. Multivariate Statistics 5. Rationales in the Design of Rectal and Vaginal Delivery Forms of Drugs 6. Interactive Graphics in Medicinal Chemistry 7. Logico-Structural Approach to Computer-Assisted Drug Design **Volume X:** 1. Practical Procedures in Drug Design 2. Structural Aspects of the Structure–Activity Relationships of Neuroleptics: Principles and Methods 3. Bridging the Gap between Bioactive Peptides and Nonpeptides: Some Perspectives in Design 4. Dynamic Systems Analysis as a Basis for Drug Design: Application to Antihypertensive Drug Action 5. Polymeric Drug Delivery Systems 6. The Design of Biocompatible Polymers 7. The Design of Insect Repellents 8. Multivariate Data Analysis in Structure–Activity Relationships 9. The Masca Model of Pharmacochimistry II. Rational Empiricisms in the Multivariate Analysis of Opioids

**Modern Methods of Pharmaceutical Analysis, 2<sup>nd</sup> Ed. 2 Vol. Set**

Roger E. Schirmer

During the development of a new drug product, detailed chemical studies must be made of raw materials, synthetic intermediates, the drug substance itself, and the final formulated product. These studies must identify types and levels of impurities, degradation products, degradation rates, and analytical methods suitable for monitoring these factors. The information resulting from these studies is used to identify potential sources of safety problems in the product, to meet the requirements of foreign and domestic regulatory agencies, and as a basis for establishing quality control procedures and specifications for the product. The analytical effort required to provide this information can be divided into a number of tasks. The requirements for specificity, precision, accuracy, and the degree of complexity acceptable in the analytical procedure vary considerably from task to task and therefore require a variety of analytical techniques to satisfy them. The set of analytical procedures developed to control the quality of the final marketed product must include both qualitative and

quantitative methods in order to assure the identity and purity of the product. Several categories of tests are usually included in a product specification.

## Modern Toxicology: An Authoritative and Comprehensive Resource for Toxicology 3 Volume set

P. K. Gupta

Modern Toxicology, 3 volume set, is the first complete reference written specifically for students having interest in toxicology bringing together all aspects of modern toxicology. It provides an advanced text covering the basic and clinical principals of organ and reproduction toxicology, adverse effects of xenobiotics, and immuno-toxicology and clinical aspects of a wide range of poisons and poisonings in animals and humans beings. Thus these volumes are intended to give a better understanding for use in formal courses in the graduate programs in toxicology or self-study by those individuals who wish to be accredited by various organizations concerned with toxicology who are required to have a multi-disciplinary knowledge in areas like environmental health, clinical and forensic toxicology (detection of intentional or unintentional toxic substances) or in industry (assessment of hazards of new compounds), government agencies, in private commercial laboratories; in material science toxicology (biomedical and engineering disciplines), as educators (courses in pharmacy, medicine, dentistry, agricultural, and veterinary practice); and finally for collection, storing, and retrieving toxicology information. In brief this set represents the collective wisdom of several internationally known toxicologists, and offers a unique text/reference source for those involved in various specialized sections of toxicology. Contributing authors for chapters of the 3 volume set are the most qualified and well-experienced authorities in their respective areas of toxicology.

### Salient Features

- Chapters are fully illustrated and extensively referenced
- Language is simple to follow and format is designed to easily understand
- Represents the collective expertise of several internationally known toxicologists
- Offers a unique text/reference source for those involved in various specialized sections of toxicology
- Useful to those who involved in biomedical areas and Agriculture, Food Technology, Pharmacy, Veterinary Medicine and related disciplines
- Also Biologists, Pathologists, Ecologists and Environmentalists will find this volume as useful reference book

**Contents:** **VOLUME I Basis of Organ and Reproduction Toxicity:** 1. Introduction and Brief History 2. Natural Laws Concerning Toxicology 3. Absorption, Distribution and Excretion of Xenobiotics 4. Biotransformation of Xenobiotics 5. Kinetic - analysis of Xenobiotics 6. Behavioral and Neurotoxicity 7. Pulmonary Toxicology 8. Hepatic - Toxicity 9. Reproduction Toxicity and Teratogenicity 10. Carcinogenicity and Mutagenicity **VOLUME II The adverse Effects of Xenobiotics:** 1. Pesticides 2. Metals 3. Food Additives: Abenefit/ Risk Dilemma 4. Animal and Plant Toxins 5. Mycotoxins 6. Combustion Toxicology 7. Toxicology of Synthetic Biomaterials 8. Environmental Toxicology **VOLUME III Immuno and Clinical Toxicology:** 1. Immune System 2. Hypersensitivity and Occupational Allergy 3. Immuno Suppression 4. Principles of Non-specific therapy 5. Mechanism of Antidotal Therapy 6. Common Poisons

## Screening Methods in Pharmacology, 2 Vol. Set

Robert A. Turner

This book assembles most of the methods for screening substances for pharmacological activity and includes discussions of the organization of screening programs. While screening is widely practiced in pharmacology laboratories, a definition of its meaning is perhaps worthy of attention. The term screening indicates the use of a combination of tests for the purpose of making a decision. The results of the tests provide information on the presence of certain pharmacological properties. A decision whether the tested substance should be studied further may be founded on that information. Incidentally, the direction of further study may also be determined by this information. The operation of retaining from a group of substances those possessing a certain property is fundamental. Screening is the most efficient method of detection and of decision-making in any empirical operation. The finding of substances with a pharmacological property is empirical because no general theory correlating such a property with molecular structure exists. The author tried to collect the simplest and most widely used methods. Absolute completeness has not been attempted, but for the determination of some of the activities (e.g., analgesics), several methods have been described where necessary. Most of the common methods are included and are of such a diversity that new methods

will occur to the reader for use in his own studies. Acquaintance with the methods described to aid adaptation of new methods to the problem at hand. Wherever possible, methods have been chosen which could become quantitative if small changes were made in the procedure, such as the use of larger groups of animals.

Guiding principles determining the presentation of the methods are described as follows:

- A complete and carefully described procedure is given, which includes particularly modifications of the original method, so that unnecessary manipulations are eliminated while the accuracy is sustained.
- The application of the method is described for both well-known drugs and new substances; an active, new substance is detected through the use of the method; a discussion is provided of other methods of screening for the activity and of the reasons for preferring the method given.
- The reliability of the method and its limitations are stated.

### Features

- The present work is obviously directed to those whose occupation is to search for new pharmaceuticals.
- A variety of investigators in the fields of pharmacology, physiology, toxicology, and therapeutics may also find useful methods for their research.
- Chemists in the pharmaceutical industry who read this book will be aided in their understanding of the basis for testing the compounds that they synthesize and in their understanding of the programs of testing that the pharmacologist has devised.

**Contents: Volume - I :** 1. Introduction 2. A Brief Review of the Biochemistry of the Nervous System 3. The Organization of Screening 4. General Methods 5. Quantal Responses, Calculation of the ED<sub>50</sub> 6. Depressants of the Central Nervous System 7. Ataractic (Tranquilizing, Neuroleptic) Agents 8. Analgesics 9. Oxytocic Agents 10. ## Modern Methods of Plant Analysis, 7 Vol. set

K. Paech and M.V. Tracey

Many outstanding advances in modern biology have been made as a result of the invention and application of efficient methods. This does not necessarily mean that we are living in an age of methods but every stride towards the solution of an important biological problem has been, and will have to be, prepared by the forging of the appropriate method. There are not very many 'classical' techniques that have become part of the standard equipment of biological research. Again and again chemistry and physics provide more specific, more exact, and more convenient analytical devices that are taken over by biochemists and modified to suit plant material. If published in purely analytical journals these recent methods are hidden in a welter of other methods applying to all fields of analysis from petroleum to heavy metal alloys. When they

appear in the methods section of papers on specialized biochemical subjects they may be obscured by a title and discussion giving no hint of the presence of a valuable method or of its general applicability. As a result new methods very often do not immediately reach those manifold groups of research workers to whom they would be of the greatest use.

These are the considerations that led to the plan of this handbook. We are convinced that there is a real need for a collection of reliable up-to-date methods for plant analysis in large areas of applied biology ranging from agricultural and horticultural experiment stations to pharmaceutical and technical institutions concerned with raw materials of plant origin.

A part from the study of plant metabolism in which analytical methods are essential many branches of pure botany, originally not concerned with the chemical composition of plants, have developed in such a way as to depend on accurate knowledge of the nature and amounts of plant constituents. This applies among others to genetics, the physiology of growth, and taxonomy. The scattered publication of analytical methods and lack of experience in judging chemical methods makes it hazardous for many of the newcomers in the field of plant analysis to find or select the best available methods for their purposes. The collection offered in this handbook may help to pave the way for tackling problems in those fields of pure botany where chemical components are useful as indicators of the varied activities of the living plant cell.

It is not in the scope of this work to produce a handbook of plant metabolism or a biochemical system of plant substances. Had it been, then the structure of the book and the arrangement of the contents would have been more logical than that which has been imposed by the purely analytical considerations that prevail in the present work, for example, mineral substances could not have been separated from many other sections. The ambition of the editors, however, was to produce a laboratory manual of the highest standard possible.

The authors of the various chapters undertake the task of discussing the detailed techniques of analysis in such a way that the user of these volumes will be able to make the greatest use of the authors' experience and knowledge of experimental biochemistry. The purpose of the work is furthered by the fact that the authors have avoided discussing problems of the biogenesis and metabolism of the substances with which they are concerned, tempting and fruitful though these physiological considerations may have appeared to them.

Volume I concerned with analytical methods of general application. Volume VI is concerned with adding to the range of groups of compounds dealt with in Volumes II-IV. Volume V has been planned to supplement and bring up to date the original Vol. I. The work as originally planned did not include a consideration of methods for the detection and assay of enzymes. The scope of the work has now been enlarged and in Volume VI will also be found a treatment of general methods of enzyme chemistry while in Vol. VII individual groups of enzymes are covered.

### Contents:

**Volume - I** • General methods for separation • Making and Handling Extracts • Electrical-Transport methods • Colorimetric, Absorptimetric and Fluorimetric methods • Principles of Biological assay • Methods of involving labelled atoms • Estimation of pH values • Oxidation-Reduction potentials • Gasometric analysis in plant investigation • Cytochemical methods • Mineral components and ash analysis

**Volume - II** • Mono- and Oligosaccharides and Acidic Monosaccharide Derivatives • Acyclic Sugar Alcohols • Phosphorylated Sugars • Starch, Glycogen, Fructosans and Similar Polysaccharides • Cellulose and Hemicelluloses • Pectin • Chitin • The Analysis of Plant Gums and Mucilages • Glycosides as a General Group • Fats and Other Lipids Volatile Alcohols, Aldehydes, Ketones and Esters • Volatile Acids • Non Volatile Mono-, Di- and Triarboxylic Acids • Lactones

**Volume - III** • Pyrethring and Allied Compounds • Triterpene und Triterpen-Saponine • Carotenoids • The Determination of Rubber and Gutta in Plants • Simple Benzene Derivatives • Natural Tropolones • Natural Phenylpropane Derivatives • Lignans • Growth substances in Higher plants • Antibiotics

**Volume - IV** • Peptides (Bound Amino Acids) and Free Amino Acids • Proteins • Seed Proteins • Methods of Determining the Nutritive value of Proteins • Urea and Ureides • Chlorophylls: Analysis in Plant Material • Haematin Compounds • Nucleic Acids, their Components and Related Compounds • Adenosine Diphosphate, Adenosine Triphosphate • Codehydrasen I und II (Diphospho-pyridin-nucleotid und Triphospho-pyridin-nucleotid) • Thiamine and its Derivatives • The Alkaloids • Amine und Betaine • Melanins

**Volume - V** • Emission and Atomic Absorption Spectrochemical Methods • Mass Spectrometric Methods • Plant Spectra: Absorption and Action • Vapour Phase Chromatography • Ion-Exchange Chromatography • Paper Chromatography on a Preparative Scale • Determination of Size, Shape and Homogeneity of Macromolecules in Solution • Optical Rotatory Dispersion • Its Application to Protein Conformation • Tissue and Single cell Cultures of Higher Plants as a Basic Experimental Method • Immunological Methods • Polarography and Tensammetry • Fallout Contamination in Plants

**Volume - VI** • Determination of Sulfhydryl Groups • Humulones, Lupulones and Other Constituents of Hops • Lichen Substances • Kinetin and Kinetin-Like Compounds I • General Methods of Enzymology • Interpretation of Results II • General Methods of Preparation and Purification • General Methods of Preparation • General Aspects of Enzyme Purification and Characterization • Purification of Enzymes by Ion Exchange Chromatography • Estimation of Metabolites by Enzymes • Enzymic Assays of Amino Acids and Keto Acids

**Volume - VII** • Enzymes of phosphate metabolism • Enzymes of inorganic nitrogen metabolism • Enzymes of vitamin metabolism • Enzymes involved in the synthesis and breakdown of Indoleacetic acid • Enzymes of aromatic biosynthesis • Enzymes of amino acid metabolism • Enzymes of peptide and protein metabolism • Enzymes of synthesis of purine and pyrimidine nucleotides • Enzymes of fat metabolism • Enzymes of carbohydrate synthesis • Enzymes of glycolysis • Enzymes of the pentose phosphate cycle • Enzyme systems in photosynthesis • Enzymes of the Krebs cycle, the Glyoxalate cycle and related enzymes • Enzymes of terminal respiration • Summary of Recommendations on Enzyme Terminology

**American Herbal Pharmacopoeia:****Botanical Pharmacognosy-Microscopic Characterization of Botanical Medicines**

Roy Upton

**Contents:** Introduction to Botanical Microscopy: 1. Pharmacognosy: From Dioscorides to Modern Herbal Medicines 2. What's in a Name? Nomenclature of Botanical Materials 3. To Be or Not To Be? A Focus on Botanical Adulteration 4. Microscopy for Identification of Botanical Raw Materials: Uses and Limitations 5. Setting Up a Microscopy Lab 6. Major Plant Groups 7. Structures of the Primary Plant Body and Basic Plant Anatomy 8. Diagnostic Characteristics of Tissues 9. Organization of Tissues in Medicinal Plant Parts 10. Preparation of Samples for Microscopic Analysis

2010	978-1-4200732-6-3	800 pages	HB	£ 108.00
------	-------------------	-----------	----	----------

**Herbal Medicine: Development and Validation of Plant-derived Medicines for Human Health**

Bagetta Giacinto

While discussion concerning the validity of the plant approach to nutrition and disease treatment continues, the explosion of natural product use has generated concern regarding their effectiveness and possible danger. Using a rational, sequential approach, this book explores the development of efficacious medicinal herbal products. Expert contributors from the fields of natural products research and drug discovery bring awareness to the many problems facing the development of such products, such as quality control, pharmacokinetic and pharmacodynamic issues. The text addresses botanical, phytochemical, PD-PK, as well as analytical and clinical issues.

2011	978-1439837689	300 pages	HB	£ 89.00
------	----------------	-----------	----	---------

**Modern Phytochemical Methods**

Nikolaus H. Fischer, Murray B. Isman and Helen A. Stafford

**Contents:** 1. New Developments in the Separation of Natural Products 2. Recent Advances in High-Performance Liquid Chromatography of Volatile Natural Products 3. Enantioselective Separations in Phytochemistry 4. Supercritical Fluid Chromatography for the Analysis of Natural Products 5. Immobilized Artificial Membrane Chromatography 6. Mass Spectrometry in the Chemistry of Natural Products 7. Structure Elucidation of Natural Products by Mass Spectroscopy 8. Modern NMR Method in Phytochemical Studies 9. Trichrome Microsampling of Sesquiterpene Lactones for the Use of Systematic Studies 10. Biosynthetic Methods for Plant Natural Products: New Procedures for the Study of Glandular Trichrome Constituents 11. Quantitative Structure-Activity Relationship Analysis of Natural Products: Phototoxic Thiophenes.

2010	978-81-84895-35-3	407 pages	PB	Rs. 795.00
------	-------------------	-----------	----	------------

**Phytochemical Methods: A Guide to Modern Techniques of Plant Analysis 3<sup>rd</sup> Ed.**

Harborne A.J.

**Contents :** 1. Methods of Plant Analysis 2. Phenolic Compounds 3. The Terpenoids 4. Organic Acids, Lipids and Related Compounds 5. Nitrogen Compounds 6. Sugars and Their Derivatives 7. Macromolecules

Rpt. 2008	978-81-8128-310-8	320 pages	PB	Rs. 695.00
-----------	-------------------	-----------	----	------------

**Biosynthesis of Natural Products**

Paolo Manitto

**Contents :** 1. Primary and Secondary Metabolism 2. Enzyme Reactions 3. Primary and Intermediate Metabolism 4. The Polyketides 5. The Isoprenoids 6. Biosynthesis of Steroids 7. The Shikimate Pathway 8. Phenyl-Propanida

Rpt. 2010	978-81-26525-19-5	548 pages	PB	Rs. 895.00
-----------	-------------------	-----------	----	------------

**A Textbook of Pharmacognosy**

N.P.S. Sengar, Ritesh Agrawal and Ashwini Singh

**Contents:** 1. Introduction of Pharmacognosy 2. Biogenesis of Phytopharmaceuticals and Basic Metabolic Pathways 3. Chemical Nature of Phytoconstituents 4. Radio-Tracer Techniques 5. Phyto-Chemical Screening 6. Marine Pharmacognosy 7. Aromatic Plants and their Utilization 8. Plant Tissue Culture 9. Herbs as Health Foods 10. Concept of Stereoisomerisms 11. Production and Analysis of Various Phytoconstituents 12. Chemistry, Biogenesis and Pharmacological Activity of Natural Products 13. Chromatographic Evaluation of Herbal Drugs 14. Spectral Analysis of Herbal Drugs

2009	978-81-88449-81-4	244 pages	PB	Rs. 195.00

## Minor Forest Produce used in Pharmaceutical and other Industries

T. Krishna Murthy

The book is first of its kind to cover comprehensive treasure of information on a wide variety of forest products i.e., medicinal plants, essential oils, tanning materials, natural organic colouring materials, katha and cutch. Besides dealing with general importance, occurrence, extraction, processing, storage and uses of the products, group-wise, the books gives a list in alphabetical order of the more important product yielding plants with their botanical, English and local names, their rough distribution, in the country, their agro-silvicultural practices, exploitation, processing and utilisation of more important species under each group. The book is profoundly illustrated with coloured images. **This book is useful** • Pharmaceutical and other industries so far as proper exploitation, production, harvesting and utilisation • Growers, processing and marketing agencies

- Students of pharmacy and Biotechnology

**Contents: PART - I** 1. Introduction 2. Collection Methods and Marketing of Minor Forest Produce 3. Prospects of Development **PART - II** 4. Medicinal Plants 5. Essential Oils 6. Spices, Condiments and Savory Plants 7. Edible Wild Plants 8. Gums, Resins and Oleoresins 9. Fatty Oils 10. Tanning Materials 11. Natural Organic Colouring Materials 12. Sources of Katha and Cutch

2009 978-81-88449-84-9 344 pages HB Rs. 1795.00

## Role of Dietary Fibers and Nutraceuticals in Preventing Diseases

K. T. Augusti

**Contents:** 1. Dietary Fiber and Essential Macronutrient 2. Sources of Nutraceuticals and the Chemistry of their Functions 3. Terpenes, Carotenoids and Phytosterols 4. Phenolics of the Functional Foods 5. Nutraceuticals of Alliums 6. Nutraceuticals Vs Diseases 7. Role of Allium Principles as Anticancer Agents 8. Cancer and Ageing – Causation and Prevention 9. Laboratory Experiment 10. Certain Functional Foods in the Prevention of Diseases

2009 978-81-88449-72-5 525 pages HB Rs. 1995.00

## Pharmacognosy Practical

### Practical Pharmacognosy, 4<sup>th</sup> Ed.

T. E. Wallis

**Contents: Part-I** Schedules of instructions for the examination of Drugs **Part-II** Drug Description and Habitats **Part-III** Histological Schedules **Part-IV** Quantitative Analysis **Part-V** The Examination of Powdered Drugs

Rpt. 2011 978-93-81075-02-9 235 pages PB Rs. 175.00

### Natural Products: A Practical Manual

P. Praveen Kumar

**Contents:** 1. Carbohydrates 2. Terpenoids 3. Alkaloids 4. Proteins 5. Lipids 6. Flavonoids 7. Vitamins 8. Analysis of Fixed Oils or Fats 9. Estimation of Nitrogen (Kjeldahl's Method) 10. Estimation of Carbonyl Group 11. Estimation of Hydroxyl Group 12. Interpretation of IR Spectroscopy 13. Interpretation of H<sup>1</sup>NMR Spectroscopy

2009 978-81-88449-79-2 121 pages PB Rs. 100.00

## Pharmaceutical Microbiology

### Principles of Pharmaceutical Microbiology

Ravi Kumar

**Contents:** 1. Introduction to Microbiology 2. Different Groups of Microorganisms 3. Nutrition and Growth 4. Control of Microorganisms 5. Immunology 6. Bacterial Genetics 7. Epidemiology of Diseases 8. Microorganisms and Their Environment 9. Applications of Microbes in Pharmaceutical Industry 10. Microbiological Assays 11. Microbial Spoilage and Preservation of Pharmaceutical Products 12. Miscellaneous Topics

## Pharmaceutical Microbiology Practical

### Manual of Practical Microbiology

Jojula Malathi & Vishnudas Jyostna

**Contents:** 1. Laboratory Safety and Instrumentation 2. Cultivation of Bacteria 3. Isolation Techniques of Bacteria 4. Bacterial Cytology 5. Biochemical Tests IMVIC Tests 6. Microbial Activity 7. Fungi

2009 978-81-88449-69-5 114 pages PB Rs. 100.00

## Biotechnology / Biochemistry

**Handbook of Enzyme Biotechnology**

Alan Wiseman

**Contents:** **Part I:** Principles of Enzyme Production and Utilization **1.** Introduction to Principles **2.** Principles of Industrial Enzymology **3.** Large-scale Production of Enzymes: Techniques in Fermentation **4.** Large-Scale Extraction and Purification of Enzymes **5.** Principles of Immobilized-Enzyme Technology **6.** Enzyme Utilization in Industrial Processes **Part II:** Data for Industrial Application of Enzymes **1.** Introduction to Data **2.** Enzyme Data **3.** Fermentation Data and Equipment (and their Manufacturers) **4.** Practical Aspects of Large-Scale Enzyme Purification **5.** Data on Techniques for Enzyme Immobilization **6.** Industrial Practice with Enzymes

Rpt. 2010

## PHARMACY QUIZ A Handbook for Pharmacy Competitive Exams

### GPAT: Graduate Pharmacy Aptitude Test

### GATE • FPGEE • PHARMACET • PG Admission • Pharmacy Jobs

## Second Edition

Dr. D. Samba Reddy

**Highlights** • Model paper for GPAT included • More than 8,000 very-important objective questions & answers • Broad and critical questions written by an expert author with 20-years experience • Appendix notes and tables for rapid review of vital information for exams • Comprehensive coverage of all pharmaceutical and basic biomedical subjects • Logically organized drug lists and classifications for easy reading and memory • Powerful resource of pharmaceutical data, facts and pathophysiological information • Ideal book for students preparing for pharmacy competitive exams and board exams.

- 1. Pharmacology and Toxicology:** Multiple-Choice Questions (800) • Matching-Set Questions (400) • Objective -Type Questions (800) • Appendix Notes for Competitive Exams • ANSWER KEY
- 2. Pharmacognosy and Natural Products :** Multiple-Choice Questions (100) • Objective-Type Questions (500) Appendix Notes for Competitive Exams • Pharmacognosy Glossary • Chemical Tests of Crude Drugs • Pharmacognostic Review of Herbal Drugs • Drug-Interactions between Herbal Drugs and Prescription Drugs • Chemical Structures of Herbal Drug Active Constituents • ANSWER KEY
- 3. Medicinal and Pharmaceutical Chemistry** • Multiple-Choice Questions (300) • Objective-Type Questions (1200) • Appendix Notes for Competitive Exams • ANSWER KEY
- 4. Pharmaceutics Pharmaceutical Technology** • Multiple-Choice Questions (600) • Objective-Type Questions (1050) • Appendix Notes for Competitive Exams • ANSWER KEY
- 5. Pharmacy Law and Regulations** • Multiple-Choice Questions (30) • Objective-Type Questions (125) • Appendix Notes for Competitive Exams • ANSWER KEY
- 6. Biochemistry and Clinical Investigation** • Multiple-Choice Questions (350) • Objective-Type Questions (500) • Appendix Notes for Competitive Exams • ANSWER KEY
- 7. Physiology and Pathology** • Multiple-Choice Questions (600) • Objective-Type Questions (350) • Appendix Notes for Competitive Exams • ANSWER KEY
- 8. Dispensing and Clinical Pharmacy** • Multiple-Choice Questions (500) • Objective-Type Questions (200) • Appendix Notes for Competitive Exams • ANSWER KEY
- 9. Microbiology and Public Health** • Multiple-Choice Questions (250) • Objective-Type Questions (150) • Appendix Notes for Competitive Exams • ANSWER KEY
- 10. GPAT Model Papers and Books** • GPAT Syllabus • GPAT Model Paper • FPGEE Syllabus • FPGEE Model Paper • Important Pharmacy Reference Books

**Contents:** 1. Introduction 2. Planning 3. Execution 4. Analysis 5. Writing up 6. Ethics 7. Tools and Resources 8. Appendices

2012

978-93-81075-65-4

228 pp

Rs. 250.00

## Research Methodology and Quantitative Methods

G. Nageswara rao

**Contents:** 1. Introduction, 2. Research Process, 3. Methods and Materials, 4. Sampling Methods, 5. Scale Construction Methods, 6. Elementary Decision Theory, 7. Collection of Data, 8. Data Organization, 9. Measures of Central Tendency and Dispersion, 10. Tests of Hypotheses, 11. Chi-square Distribution, 12. Correlation and Regression, 13. Analysis of Variance, 14. Time Series and Index Numbers, 15. Non-Parametric Tests, 16. Elementary Queuing Theory, 17. Multivariate Statistical Methods, 18. Report Writing

2011

978-93-81075-56-2

300 pp

Rs. 250.00

## Art of Writing and Publishing in Pharmaceutical Journals

Ajay Semalty, et al.

**Contents :** Section I : Designing an Article Section II : Journals' Profiles Section III : Appendices I

**Successful Career Soft Skills and Business English Personality Development and Career Path**

Varanasi Bhaskara Rao and Y. Kameswari

**Contents:** Part A : Successful Career and Soft Skills, Introduction, **Section I** : From Nowhere To Somewhere 1. Set Forth the Journey, 2. Unique Path, **Section II** : Wherefore You Know Where, 1. Choice of Career, 2. Control of Careers, 3. Enterprise, Entrepreneurship and Ethics, **Section III** : Where on – To Weather, Not Wither, 1. Steering Through, Soaring High, 2. Swerve and Sever **Section IV** : From Here To Eternity, 1. Fitness, 2. Utility, 3. Legacy, Epilogue, Appendix I, Appendix II, Appendix III, Appendix IV, Appendix V, Appendix VI, **Part B** : Business English, **Section V** : British Legacy – Use of English, 1. Where does Indian English stand?, 2. Communication – Written and Oral, 3. Conversations in writing, 4. Report writing

2010 978-81-7800-239-2 500 pages Rs. 350.00

**A Handbook of English for Professionals, 2<sup>nd</sup> Ed.**

P. Eliah

**Contents :** Unit - I **Grammar** : 1. Parts of Speech 2. Punctuation Unit - II **Composition** : 1. Features of a Good Sentence 2. Paragraph 3. Essay 4. Synopsis 5. Report Writing 6. Letter Writing 7. Note Taking 8. Concord 9. Common Errors 10. Listening Skills 11. Fast Reading Skills 12. Reading Comprehension Unit - III **Vocabulary Development** : 1. Spelling and Pronunciation 2. Prefixes and Suffixes 3. Synonyms and Antonyms 4. Words and Expressions to Avoid 5. Analogy Unit - IV **Speaking Skills** : 1. Phonetics 2. Oral Communication Skills Unit - V **Grammar** : 1. Communication 2. Modern Office Technology 3. Idiomatic Expressions 4. Job-Seeking Techniques 5. Building a Team 6. Team Leadership

2009 81-7800-127-6 331 pages PB Rs. 160.00

**Essential Key for Corporate Threshold**

Deepika Nelson

**Contents :** 1. Introduction 2. Self Developmental Skills 3. Communication Skill 4. Interpersonal Skills 5. Resume Writing 6. Cover Letter 7. Problem Solving Skills 8. Correspondence Techniques

2008 81-7800-190-X 215 pages PB Rs. 150.00

## Humanities

### Communicative Competence

Varanasi Bhaskara Rao

**Contents :** 1. Introduction 2. Oral Communication 3. Written Communication 4. Appendices I to V.

2009 81-7800-118-7  
257 pages PB Rs. 225.00

### Personal and Emotional Competence

Varanasi Bhaskara Rao

**Contents :** 1. Personal Effectiveness 2. Work Place Reality 3. Emotional Intelligence

2009 81-7800-119-5  
214 pages PB Rs. 225.00

### Fourth Generation R&D: Managing Knowledge, Technology, and Innovation

MILLER & MORRIS

2008 9788126516124  
347 pages PB Rs. 495.00

### Textbook of Engineering Drawing (With Auto CAD),

4<sup>th</sup> Ed.

VENKAT REDDY K.

2009 978-81-7800-208-8  
502 pages PB Rs. 250.00

## Environmental Sciences

### Municipal Solid Waste Management: Processing, Energy Recovery, Global Examples

P. Jayarama Reddy

**Contents:** 1. Basics, 2. Waste Generation and characterization, 3. Waste Reduction and Recycling, 4. Waste collection and Transfer 5. Composting, 6. Energy from waste, 7. Land filling, 8. MSW Management in India, 9. Private sector Participation in India, 10. MSW management and planning global examples

2011 978-93-81075-39-5 449 pp HB Rs. 2295.00

### Textbook of Environmental Science and Technology, Revised Ed.

M. Anji Reddy

**Contents:** 1. Introduction 2. Natural Resources 3. Ecosystems 4. Biodiversity and Its Conservation 5. Environmental Pollution 6. Solid Waste Management 7. Watershed Management 8. Social Issues and Environment 9. Regional & Sectoral Issues 10. Global Environmental Issues 11. Environmental Geoinformatics and Modelling

2011 978-93-81075-44-9 330 pages PB Rs. 160.00

### Objective Question Bank and Glossary in Environmental Studies

G. Vidya Sagar & Prabhu Prasadini

**Contents:** 1. Environmental Studies – Scope and Importance 2. Natural Resources 3. Ecosystem 4. Biodiversity and its conservation 5. Environmental Pollution 6. Social Issues and the Environment 7. Human Population and the Environment 8. Field Work - Practice Exercises - I - Practice Exercises - II

2009 978-81-7800-186-9 343 pages PB Rs. 150.00

### Handbook of Environmental Laws, Acts, Guidelines, Compliances & Standards, 3<sup>rd</sup> Ed. 2 Vol. Set

Dr. R. K. Trivedy

**Contents: Volume I:** I. Introduction II. Indian Constitution & Environment, Environmental Policy of India & the Legislative Framework III. Institution Mechanism & Environmental Policy IV. Environmental Clearance & Guidelines for Industries V. Environmental Standards VI. Hazardous Wastes VII. Environmental Audit VIII. Water Pollution IX. Air Pollution X. Public Liability Insurance XI. National Environment Appellate Authority XII. National Environment Tribunal XIII. Indian Forest Service XVI. Wildlife **Volume II** XVII. Animal Welfare XVIII. Environment Protection

2010 978-81-7800-221-7 HB (Set of two volumes) Rs. 3500.00

## Environmental Sciences

### An Introduction to Air Pollution, 2<sup>nd</sup> Ed.

**R.K. Trivedy and P.K. Goel**

**Contents :** 1. General 2. Primary Air Pollutants 3. Atmospheric Reactions and Formation of Secondary Pollutants 4. Industrial Sources of Air Pollution 5. Air Pollution From Automobiles 6. Natural and Other Sources of Air Pollution 7. Effects of Air Pollutants on Plants and Microorganisms 8. Effects of Air Pollutants on Man and Animals 9. Air Pollution Effects on Physical Structures and Materials 10. Ozone Layer Depletion 11. Air Pollution Meteorology 12. Climate Change and Greenhouse Effect 13. Acid Rain 14. Air Pollution Control 15. Sampling and Analysis of Air Pollutants 16. Air Quality and Stack Monitoring 17. Biomonitoring of Atmospheric Pollutants 18. Air Quality Management 19. Air Pollution Legislation 20. Environmental Criteria For Siting Industries and Green Belts

2009

81-7800-083-0

284 pages PB Rs. 275.00

### Introduction to Environmental Science

**Y. Anjaneyulu**

**Contents :** 1. Multidisciplinary Nature of Environmental Studies 2. Renewable and Non-Renewable Resources 3. Forest Resources 4. Water Resources 5. Mineral Resources 6. Food Resources 7. Energy Resources 8. Land Resources 9. Role of Individuals in Conservation of Natural Resources and Environmental Management 10. Ecosystems 11. Biodiversity and its Conservation 12. Air Pollution Sources and Effects 13. Water Pollution 14. Soil Pollution 15. Noise Pollution 16. Nuclear Hazards 17. Solid Waste Management 18. Disaster Management 19. Social Issues and the Environment 20. Watershed Management 21. Wasteland Reclamation 22. Atmosphere and Global Climate Changes 23. Environmental Protection Acts 24. Human Population and the Environment 25. Field Projects on Environmental Quality

Rpt. 2009

81-7800-061-X

745 pages

PB

Rs. \*375.00

### Principles of Environmental Studies (Ecology, Economics, Management and Law)

**C. Manoharachary, P. Jayarama Reddy**

**Contents :** 1. Introduction 2. Ecosystems 3. Biodiversity and its Conservation 4. Natural Resources 5. Environmental Valuation 6. Environmental Economics 7. Environmental Pollution 8. Environmental Problems in India 9. Regional and Sectorial Issues 10. Human Population and the Environment 11. Social Issue and the Environment 12. Sustainable Resource Development 13. Institutions of Governance : Evaluation of Environmental Policies and Laws in India

Rpt. 2009

81-7800-131-4

305 pages

PB

Rs. 150.00

### Environmental Impact Assessment Methodologies, 2<sup>nd</sup> Ed.

**Y. Anjaneyulu, Walli Manickam**

**Contents :** 1. Fundamental Approach to Environmental Impact Assessment (EIA) 2. EIA Methodologies 3. Prediction and Assessment of Impacts on Soil and Ground Water Environment 4. Prediction and Assessment of Impacts on Surface Water Environment 5. Prediction and Assessment of Impacts on Biological Environment 6. Prediction and Assessment of Impacts on the Air Environment 7. Prediction and Assessment of Impacts of Noise on the Environment 8. Prediction and Assessment of Impacts of Socio-Economic and Human Health Impacts 9. Environmental Risk Assessment (ERA) and Risk Management in EIA 10. Application of Remote Sensing and GIS for EIA 11. EIA Case Studies

2010

978-81-7800-222-4

428 pages

PB

Rs. 395.00

### Greenhouse Technology and Management, 2<sup>nd</sup> Ed.

**K. Radha Manohar, C. Igathinathane**

**Contents :** 1. Introduction 2. Classification of Greenhouses 3. Plant Response to Greenhouse Environment 4. Environmental Control 5. Greenhouse Ventilation and Computerised Control System 6. Planning of Greenhouse Facility 7. Greenhouse Construction Materials 8. Greenhouse Covering Materials 9. Construction of Typical Greenhouses 10. Construction of Low Cost Wooden Framed Plastic Film Greenhouses 11. Greenhouse Cooling 12. Greenhouse Heating 13. Environmental Requirement of Crops and Pest Control 14. Greenhouse Irrigation Systems 15. Greenhouse Utilisation in Off-Season 16. Simplified Protected Agriculture Techniques-Plastic Mulches 17. Simplified Protected Agriculture Techniques Row Covers 18. Advanced Protected Agriculture Systems Liquid Hydroponics 19. Advanced Protected Agriculture Systems Aggregate Hydroponics 20. Economics of Greenhouse Production

2007

81-7800-136-5

217 pages

HB

Rs. 550.00

### Solid and Hazardous Waste Management

**Dr. M. N. Rao and Dr. Razia Sultana**

**Contents:** 1. Introduction 2. Municipal Solid Waste 3. Plastic Waste 4. Bio-Medical Waste 5. Hazardous Waste 6. Electronic Waste 7. Soil Remediation Technologies 8. Waste Minimization 9. Environment Impact Assessment

**COMING SOON**

## Indian Reprints for Original Edition

Author	Title	Price
Adeyeye	Preformulation in Solid Dosage Form Development (HB)	Rs 4995.00
Agarwal	Introduction to General Pharmacy (PB)	Rs. 150.00
Agarwal / Agarwal	Pharmacology for Undergraduates, 2e (HB)	Rs. 285.00
Agarwal / Khanna	Physical Pharmacy, 2e	Rs. 300.00
Ahmad	Textbook of Pharmaceutical Drug Analysis (PB)	Rs. 170.00
Ahuja	Capillary Electrophoresis Methods for Pharmaceutical Analysis (HB)	Rs. 2095.00
Ahuja	Handbook of Isolation and Characterization of Impurities in Pharmaceuticals (HB)	Rs. 2095.00
Ahuja	HPLC Method Development for Pharmaceuticals (HB)	Rs. 1695.00
Ahuja	Impurities Evaluation of Pharmaceuticals	Rs. 2995.00
Akers	Parenteral Quality Control: Sterility, Pyrogen, Particulate & Package Integrity Testing, 3e (HB)	Rs 1995.00
Alam	Practical Pharmaceutical Analytical Chemistry	Rs. 275.00
Alexeyev V.	Quantitative Analysis	Rs. 195.00
Algar Swamy	Textbook of Medicinal Chemistry Vol I	Rs. 370.00
Algar Swamy	Textbook of Medicinal Chemistry Vol II	Rs. 370.00
Allen	Ansel's Pharmaceutical Dosage Forms & Drug Delivery Systems, 9e (PB)	Rs. 950.00
Allwood	Textbook of Hospital Pharmacy	Rs. 450.00
Ansel	Pharmaceutical Calculations, 13e (PB)	Rs. 625.00
Attwood	Fasttrack Physical Pharmacy (PB)	Rs. 450.00
Augsburger	Pharmaceutical Dosage Forms: Tablets, 3e, <b>3 Vol. Set</b> (HB)	Rs 13485.00
Aulton	Aulton's Pharmaceutics: The Design and Manufacture of Medicine, 3e	£ 14.49
Avis	Biotechnology & Bipharmaceutical Manufacturing, Processing, & Preservation (HB)	Rs. 1995.00
Avis	Biotechnology Quality Assurance & Validation: Drug Manufacturing Technology Series, Vol.4 (HB)	Rs. 1595.00
Avis	Pharmaceutical Dosage Forms: Parenteral Medications, 2e <b>3 Vol. Set</b>	Rs. 10485.00
Baertschi	Pharmaceutical Stress Testing: Predicting Drug Degradation (HB)	Rs 2295.00
Baird	Handbook of Microbiological Quality Control: Pharmaceuticals & Medical Devices (HB)	Rs. 2495.00
Ballington	Pharmacology, 3e <b>With CD</b> (PB)	Rs. 795.00
Ballington	Pharmacy Calculations, 3e <b>With CD</b> (PB)	Rs. 695.00
Ballington	Pharmacy Practice, 3e <b>With CD</b> , (PB)	Rs. 695.00
Bansal	Pharmacology: Questions & Answers (PB)	Rs. 220.00
Barrett	The Handbook of Clinically Tested Herbal Remedies, Vol. 1 (HB)	Rs. 1995.00
Barrett	The Handbook of Clinically Tested Herbal Remedies, Vol. 2 (HB)	Rs. 1995.00
Basu	Essentials of Pharmacology	Rs. 110.00
Beale	Wilson & Gisvold's Textbook of Organic Medicinal & Pharmaceutical Chemistry, 12e (HB)	Rs. 1250.00
Beckett A.H.	Practical Pharmaceutical Chemistry, 4e Part - I	Rs. 255.00
Beckett A.H.	Practical Pharmaceutical Chemistry, 4e Part - II	Rs. 325.00
Bennett	Clinical Pharmacology, 10e (IE) (PB)	£ 17.00
Bentley	Medicinal Plants: Principal Plants Employed in Medicine, <b>4 Vol. Set</b>	Rs. 2500.00
Berry	The Pharmaceutical Regulatory Process, 2e (HB)	Rs. 6995.00
Bhandari / Singh	Pharmaceutical Chemistry - I	Rs. 135.00
Bhandari / Singh	Organic Chemistry	Rs. 135.00
Bhatt	Herbal and Medicinal Plants of India (HB)	Rs. 1400.00
Bhattacharya	Pharmacology, 2/e	Rs. 545.00
Bolton	Pharmaceutical Statistics: Practical and Clinical Applications, 5e	Rs. 3695.00

Author	Title	Price
Bonate	Pharmacokinetic Pharmacodynamic Modeling & Simulation (HB)	Rs 2495.00
Boyer	Modern Experimental Biochemistry 3e	Rs. 535.00
Braithwaite	Chromatographic Methods, 5e (PB)	Rs 1595.00
Brenner	Pharmacology, 3/e	Rs. 760.00
Brittain	Physical Characterization of Pharmaceutical Solid (HB)	Rs 3495.00
Brittain	Polymorphism in Pharmaceutical Solids (HB)	Rs 1995.00
Brittain	Spectroscopy of Pharmaceutical Solids (HB)	Rs 4995.00
Bruice	Organic Chemistry 3e	Rs. 599.00
Cappuccino	Microbiology: A Laboratory Manual, 7e	Rs. 595.00
Cairns	Essentials of Pharmaceutical Chemistry, 3e	Rs. 995.00
Campbell	Biochemistry Illustrated: Biochemistry and Molecular Biology in the Post-Genomic Era	£ 9.25
Carleton	Validation of Pharmaceutical Processes: Sterile Products, 2e	Rs. 4495.00
Carstensen	Advanced Pharmaceutical Solids	Rs. 2495.00
Carstensen	Drug Stability: Principles & Practices, 3e (HB)	Rs 2995.00
Carstensen	Pharmaceutical Principles of Solid Dosage Forms (PB)	Rs. 995.00
Carter	Cooper & Gunn's Dispensing for Pharmaceutical Students, 12e	Rs. 425.00
Carter	Cooper & Gunn's Tutorial Pharmacy, 6e	Rs. 310.00
Cazes	Ewing's Analytical Instrumentation Handbook, 3e (HB)	Rs 6995.00
Chan	Analytical Methods Validation and Instrument Performance Verification (PB)	Rs. 1695.00
Chatten	Pharmaceutical Chemistry: Theory & Application, Vol. 1 (PB)	Rs. 495.00
Chatten	Pharmaceutical Chemistry: Instrumental Techniques, Vol. 2 (PB)	Rs. 695.00
Chien	Novel Drug Delivery Systems, 2e, (HB)	Rs. 3695.00
Chilukuri	Pharmaceutical Product Development: In Vitro-In Vivo Correlation (HB)	Rs 4995.00
Cole	Pharmaceutical Coating Technology (HB)	Rs 3495.00
Cole	Pharmaceutical Production Facilities: Design & Applications, 2e (HB)	Rs. 2495.00
Conn	Handbok of Proteomic Methods (HB)	Rs 2495.00
Craker / Simon	Herbs, Spices, & Medicinal Plants (In 4 vols.) Vol. 1 (Recent Advances in Botany, Horticulture & Pharmacology)	Rs. 1195.00
Craker / Simon	Herbs, Spices, & Medicinal Plants (In 4 Vols.) Vol. 2 (Recent Advances in Botany, Horticulture & Pharmacology)	Rs. 1195.00
Craker / Simon	Herbs, Spices, & Medicinal Plants (In 4 Vols.) Vol. 3 (Recent Advances in Botany, Horticulture & Pharmacology)	Rs. 1195.00
Craker / Simon	Herbs, Spices, & Medicinal Plants (In 4 Vols.) Vol. 4 (Recent Advances in Botany, Horticulture & Pharmacology)	Rs. 1195.00
Crommelin	Pharmaceutical Biotechnology, 3e (PB)	Rs. 2495.00
Cupp	Toxicology & Clinical Pharmacology of Herbal Products (HB)	Rs. 2095.00
DaleRang & Dale's	Pharmacology Review	Rs. 410.00
Dass	Pharmacology (HB)	Rs. 2100.00
Dean	Pharmaceutical Packaging Technology	Rs. 3995.00
Denyer	Hugo & Russell's Pharmaceutical Microbiology, 7e	Rs. 995.00
Dewan S.K.	Organic Spectroscopy (N M R, I R, Mass and U V) (PB)	Rs. 395.00
Dhikav	Smart Study Series: Pharmacology	Rs. 275.00
Dressman	Oral Drug Absorption: Prediction & Assessment, 2e (HB)	Rs. 4995.00
Duke	Handbook of Medicinal Herbs, 2e (HB)	Rs. 2995.00
Ebadi	Pharmacodynamic Basis of Herbal Medicine, 2e (HB)	Rs 3495.00
Ernst	Herbal Medicine: A Concise Overview for Professionals	Rs 395.00
Evans	Trease & Evans Pharmacognosy, 16e (IE) (PB)	£ 15.00
Fernie	Medicinal Plants and Plant-Based Medicines (HB)	Rs. 2250.00
Finkel	Lippincott's Illustrated Reviews Pharmacology, 4e (PB)	Rs 995.00

Author	Title	Price
Florence	Banker Modern Pharmaceutics: Basic Principles and System, Vol. 1, 5e (HB),	Rs 5995.00
Florence	Banker Modern Pharmaceutics: Basic Principles and System, Vol.2, 5e (HB),	Rs 5995.00
Fong	HPLC in the Pharmaceutical Industry (HB)	Rs 1995.00
Furniss	Vogel's Textbook of Practical Organic Chemistry 5e	Rs. 810.00
Gandhi N. / Popli	Pharmaceutical Jurisprudence	Rs. 140.00
Garg/Arya	Experimental Pharmacology for Undergraduate Students	Rs. 190.00
Garratt D.C.	The Quantitative Analysis of Drugs, 3e (PB)	Rs. 630.00
Gaud / Gupta	Practical Pharmaceutics	Rs. 240.00
Gaud / Gupta	Practical Physical Pharmacy	Rs. 235.00
Ghosh	Basic Concepts in Pharmaceutical Research	Rs. 350.00
Ghosh	Theory & Practice of Contemporary Pharmaceutics (HB)	Rs 1995.00
Ghosh L.K.	Handbook of Pharmaceutical Technology	Rs. 350.00
Gibaldi	Pharmacokinetics, 2e (HB)	Rs 2995.00
Gilchrist	Heterocyclic Chemistry 3e	Rs. 415.00
Golan	Principles of Pharmacology: The Pathophysiologic Basis of Drug Therapy, 2e (PB)	Rs 895.00
Grahame-Smith	Oxford Textbook of Clinical Pharmacology & Drug Therapy, 3e (PB)	Rs. 1095.00
Gray N./Bhatia	Instrumental Methods of Analysis (PB)	Rs. 460.00
Greene	Pathology & Therapeutics for Pharmacists: A basis for Clinical Pharmacy Practice, 3e (PB)	Rs. 1495.00
Gringauz	Introduction to Medicinal Chemistry: How Drugs Act and Why	Rs. 1295.00
Grover / Malik	Textbook of Pharmacology for Nurses, 2e	Rs. 230.00
Grover J.K.	Adverse Drug Reactions	Rs. 140.00
Guarino	New Drug Approval Process: Accelerating Global Registrations, 5e (HB)	Rs 3495.00
Gupta	Medicinal & Aromatic Plants: With Colour Plates (HB)	Rs. 1995.00
Gupta	Pharmaceutics-I: General & Dispensing Pharmacy	Rs. 160.00
Gupta A.K.	Hand Book of Health Education and Community Pharmacy	Rs. 170.00
Gupta A.K.	Handbook of Drug Store and Business Management	Rs. 140.00
Gupta A.K.	Introduction to Pharmaceutics, Vol. I , 3e	Rs. 165.00
Gupta A.K.	Introduction to Pharmaceutics, Vol.II (According to the Education Regulation 1991), 4e	Rs. 165.00
Gupta A.K.	Pharmaceutics, Part I : Practical Note Book,	Rs. 115.00
Gupta A.K.	Pharmaceutics, Part II : Practical Note Book	Rs. 160.00
Gupta R.K.	Medicinal and Aromatic Plants with Colour Plates: Traditional and Commercial Uses Agrotechniques Biodiversity Conservation (HB)	Rs. 1995.00
Gupta/ Jain	Pharmaceutics-I: Practical Note Book (HB)	Rs 130.00
Gupta/ Jain	Pharmaceutics-II (Practical Note Book) (HB)	Rs. 120.00
Guy	Transdermal Drug Delivery, 2e, Revised and Expanded	Rs 3495.00
Haider	Pharmaceutical Master Validation Plan: The Ultimate Guide to FDA, GMP, and GLP Compliance <b>With CD Pub.</b>	Rs. 2995.00
Haider	Validation Standard Operating Procedures, 2e, <b>With CD</b> (HB)	Rs 6495.00
Harburn	Quality Control of Packaging Materials in the Pharmaceutical Industry Pub. (HB)	Rs. 1695.00
Harvey	Pharmacology: Lippincott Illustrated Reviews, 3e (PB)	Rs 995.00
Hauss	Oral Lipid-Based Formulations: Enhancing the Bioavailability of Poorly Water-Soluble Drugs (HB)	Rs 4495.00
Hickey	Pharmaceutical Process Engineering, 2e (HB)	Rs 2995.00
Higson	Analytical Chemistry (PB)	Rs. 895.00
Higuchi T.	Pharmaceutical Analysis	Rs. 2195.00
Hillery	Drug Delivery & Targeting: For Pharmacists & Pharmaceutical Scientists ( <b>Org. Price: £ 56.99</b> ) (PB)	Rs 1295.00

Author	Title	Price
