Contents

Preface to Revised Second Edition ..... (vii)

CHAPTER - 1 | Sequence and Series

1.1 Sequence 2
- 1.1.1 Kinds of Sequences 3
- 1.1.2 Bounds of a Sequence and Bounded Sequence 3
- 1.1.3 Limits of a Sequence 4
- 1.1.4 Convergent, Divergent and Oscillatory Sequences 4

1.2 Infinite Series 5
- 1.2.1 Convergent, Divergent and Oscillatory Series 5
- 1.2.2 Geometric Series 5
- 1.2.3 Some Elementary Properties of Infinite Series 6
- 1.2.4 Series of Positive Terms 6
- 1.2.5 Theorem 6

1.3 Tests for the Convergence of an Infinite Series 7
- 1.3.1 P-Series Test 7
- 1.3.2 Comparison Tests 9
- 1.3.3 D' Alembert's Ratio Test 25
- 1.3.4 Raabe's Test 39
- 1.3.5 Cauchy's Root Test 47
- 1.3.6 Integral Test 54
- 1.3.7 Leibneitz Test 58

1.4 Absolute Convergence 62

1.5 Conditional Convergence 63

1.6 Power Series and Interval of Convergence 63

Summary 71

Solved University Questions (JNTU) 74

CHAPTER - 2 | Functions of Single Variables

2.1 Mean Value Thorems 96
2.1.1 Rolle's Theorem 96
2.1.2 Geometrical interpretation of Rolle's theorem 97
2.2 Lagrange's Mean Value Theorem (First mean Value Theorem): 103
2.2.1 Geometrical Interpretation of Langrange's Mean Value Theorem 104
2.3 Cauchy's Mean Value Theorem 109
2.4 Generalized Mean Value Theorems 112
2.4.1 Higher Mean Value Theorem with Lagrange's form of remainder (Taylor's theorem with Lagrange's form of remainder): 112
2.4.2 Higher Mean Value Theorem with Cauchy's form of remainder (Taylor's theorem with Cauchy's form of remainder): 113
2.4.3 Maclaurin's theorem with Lagrange's form of remainder 115
2.4.4 Alternate form of Lagrange's Mean Value theorem 116
2.4.5 Alternate form of Cauchy's Mean value theorem 116
2.5 Functions of Several Variables 121
2.5.1 Concept of a Limit 121
2.5.2 Concept of Continuity 124
2.5.3 Partial Differentiation 127
2.5.4 Composite Functions 140
2.5.5 Homogeneous Function 148
2.5.6 Euler's Theorem 149
2.5.7 General Formula 150
2.6 Jacobian 161
2.6.1 Some Properties of Jacobian 162
2.6.2 Jacobian of Composite Functions 171
2.6.3 Jacobian of Implicit Functions 172
2.6.4 Functional Dependence and Independence of Functions 175
2.7 Taylor's theorem for a Function of Two Variables 183
2.8.1 Maxima and Minima of Functions of Two Variables 189
2.8.2 Lagrange's method of undetermined multipliers : 193
Summary 203
Solved University Questions (JNTU) 205

CHAPTER - 3 | Application of Functions of Single Variables

3.1 Curvature 222

3.2 Radius of Curvature 223

3.2.1 Theorem 223

3.2.2 Cartesian form of the Radius of Curvature 224

3.2.3 Parametric form of Radius of Curvature 225

3.2.4 Polar form of Radius of Curvature 226

3.2.5 Pedal form of Radius of Curvature 228

3.3 Centre of Curvature, Circle of Curvature 244

3.4 Evolutes 252

3.5 Envelopes 260

3.6 Curve Tracing 267

3.6.1 Tracing of curves (polar form) 294

3.6.2 Tracing of curves when the equation is given in parametric form 309

Summary 319

Solved University Questions (JNTU) 321

CHAPTER - 4 | Integration and Its Applications

4.1 Riemann Sums 348

4.1.1 Lower and upper Riemann integrals 349

4.1.2 Riemann integral 349

4.2 Lengths of Plane Curves (Rectification) 349

4.3 Areas 364

4.4 Volume and Surface of Solids of Revolution 376

4.5 Area of the Surface of Revolution 385

4.6 Multiple Integrals 393

4.7 Change of Order of Integration (Change of variables) 403

4.7.1 Changing from Cartesion to Polar co-ordinates 403

4.7.2 Change of order of integration 406

4.7.3 Triple integration 410

Summary 421

Solved University Questions (JNTU) 424

CHAPTER - 5 Differential Equations of First Order and their Applications

5.1 Introduction 476

5.2 Formation of an ordinary D.E 477

5.3 The differential equations of the first order and of the First Degree

5.3.1 Separation of Variables 483

5.3.2 Homogeneous Equations 487

5.3.3 Non-homogeneous Differential Equations 491

5.4 Linear Differential Equations 498

5.4.1 Non-linear Differential Equation of First Order 504

5.5 Exact Differential Equations 510

5.5.1 Integrating factors 513

5.5.2 First method to find an integrating factor: 514

5.5.3 Second Method to Find the Integrating Factor 515

5.5.4 Third Method to Find the Integrating Factor 517

5.5.5 Fourth Method to Find the Integrating Factor 519

5.5.6 Fifth Method for Finding Integrating Factor 521

5.6 Applications to Geometry, Law of Natural Growth and Newton's law of Cooling 524

5.6.1 Orthogonal Trajectories 531

5.6.2 Orthogonal Trajectories : Cartesian Coordinates 531

5.6.3 Orthogonal Trajectories – Polar Coordinates 532

5.6.4 Geometrical Applications 540

5.6.5 Polar Coordinates 541

Summary 550

Solved University Questions (JNTU) 552

CHAPTER - 6 Higher Order Linear Differential Equations and their Applications

6.1 Linear Differential Equation 596

6.1.1 Complementary Function (C.F) 596

6.2 Particular Integral 602

6.2.1 Methods of finding P.I. 606

6.3 Cauchy's Homogenious Linear Equation 623

6.4 Legendre's Linear Equation 629
6.5 Linear Differential Equations of Second Order-Method of Variation of Parameters 632
6.6 Applications 638
6.6.1 Bending of Beams 638
6.6.2 Boundary Conditions 639
6.6.3 Electrical Circuits 651
6.6.4 Simple Harmonic Motion 659
Summary 667
Solved University Questions (JNTU) 669

CHAPTER - 7 | Laplace Transforms

7.1 Introduction 720
7.1.1 Definition 720
7.1.2 Conditions for L.T to exist 721
7.1.3 Linearity Property 721
7.1.4 First shifting, Second Shifting and Change of Scale Properties 721
7.1.5 Laplace Transforms of standard functions 723
7.1.6 Multiplication by 't' 728
7.1.7 Division By 't' 730
7.1.8 Laplace Transform of Derivatives 733
7.1.9 Laplace Transform of Integrals 736
7.1.10 Laplace Transforms of Periodic Functions 739
7.1.11 Laplace transform of the unit step function (Heavisides unit function) 746
7.1.12 Heaviside shift theorem: 746
7.1.13 Dirac delta function (Unit impulse function) 747
7.2 Inverse Laplace Transforms 750
7.2.1 Table of inverse transforms 752
7.2.2 Method of partial fractions: 755
7.2.3 First Shifting Theorem 759
7.2.4 Second Shifting Theorem 763
7.2.5 Change of Scale Property 767
7.2.6 Inverse Laplace Transform of Derivatives 770
7.2.7 Inverse Laplace Transform of Integrals 771
7.2.8 Multiplication by powers of 's' 771

7.2.9 Division by powers of 's' 772
7.2.10 Theorem 772
7.2.11 Convolution 773
7.2.12 Convolution Theorem (convolution property) 774
7.2.13 Application of Laplace Transform to Solutions of Ordinary Differential Equations 797
Summary 806
Solved University Questions (JNTU) 809

CHAPTER - 8 | Vector Calculus

8.1 Vector Differentiation 870
8.1.1 Vector Point function and vector field 870
8.1.2 Differentiation of a vector 870
8.1.3 Application to space curves 871
8.2 Gradient of Scalar Function 872
8.2.1 The Vector differential operator 'DEL' or 'NABLA', denoted as '∇ ' is 872
8.2.2 Gradient 873
8.2.3 Physical significance of 'grad ϕ'
8.2.4 Directional Derivative 873
8.2.5 Some basic properties of the gradient 874
8.3 The Divergence of a Vector Function 882
8.3.1 Definition 882
8.3.2 Physical significance of the divergence 882
8.3.3 Some properties of Divergence 883
8.3.4 Solenoidal vectors 884
8.4 Curl of a Vector function 884
8.4.1 If A is a differential vector function, then curl A is defined as, curl A = $\nabla \times A$
8.4.2 Physical significance of curl 889
8.4.3 Irrotational Vector 890
8.4.4 Properties 890
8.4.5 Conservative vector field 891
8.5 Laplacian Operator :∇^2 899

8.5.1 Definition 899
8.5.2 Vector Identities 899
8.5.3 Operation of ∇ on product of two functions 902
8.6 Vector Integration
8.6.1 Ordinary integration of vectors 907
8.6.2 Line Integrals 908
8.6.3 Physical applications 909
8.6.4 Theorem 909
8.7 Surface Integrals
8.7.1 Definition 924
8.7.2 Definition of surface integral as the limit of a sum 926
8.7.3 Evaluation of a surface integral 926
8.7.4 Physical interpretation of surface integrals 927
8.8 Volume Integrals 936
8.8.1 Expression of volume integral as the limit of a sum 937
8.9 Green's Theorem In The Plane 943
8.9.1 Green's Theorem 943
8.9.2 Vector notation of Green's theorem 944
8.9.3 Physical interpretation of Green's theorem 945
8.9.4 Application of Green's theorem to the evaluation of area of a simple closed curve 945
8.10 Gauss Divergence Theorem 957
8.11 Stoke's Theorem 970
Summary 986
Solved University Questions (JNTU) 988
