<i>Preface</i>	(v)
----------------------	-----

CHAPTER 1

Water Technology

1.1 Introduction.....	2
1.1.1 Sources of Water.....	2
1.1.2 The Common Impurities in Water	3
1.2 Hardness and Causes.....	3
1.2.1 Types of Hardness.....	4
1.2.2 Estimation of Hardness	4
1.2.3 Expression of Hardness and Units	5
1.3 Potable Water.....	7
1.3.1 Sedimentation	8
1.3.2 Filtration.....	9
1.3.3 Sterilization and Disinfection.....	11
1.3.4 IS Specifications of Potable Water	13
1.4 Water for Industries	13
1.4.1 Water for Steam Making, Boiler Feed Water	14
1.5 Boiler Troubles	14
1.5.1 Carry Over – Priming and Foaming.....	14
1.6 Corrosion and Hardness	16
1.7 Sludge, Scale and their Formation	18
1.7.1 Disadvantages of Scale Formation.....	19
1.8 Caustic Embrittlement.....	21
1.9 Methods of Boiler Water Treatment – Softening Methods.....	21
1.9.1 Preliminary Treatments.....	21
1.9.2 Pre-Heating	22
1.9.3 Lime-Soda Process.....	22
1.9.4 Permutit or Zeolite Process	25
1.9.5 Comparison, Merits and Demerits of Lime-Soda and Zeolite Processes.....	27
1.9.6 Ion-Exchange Process (Deionizers or Demineralizers)	27
1.9.7 Comparison of Zeolite and Ion-Exchange Processes.....	29
1.9.8 Membrane Processes (Electro Dialysis, Reverse Osmosis).....	29
1.9.9 Functioning of Reverse Osmosis	31

1.10 Solving of Water Treatment Problems.....	33
1.11 Questions.....	40
1.12 Fill in the Blanks.....	42

CHAPTER 2

Electrochemistry

2.1 Introduction-Concept of Electrochemistry.....	46
2.2 Electrical Conduction.....	46
2.3 Electrical Resistance and Ohms' Law.....	48
2.3.1 Conductance and Specific Conductance.....	49
2.3.2 Equivalent Conductance.....	50
2.3.3 Determination of Cell Constant.....	51
2.3.4 Kohlrausch Equation.....	53
2.4 Ionic Mobilities-Kohlrausch Law.....	55
2.4.1 Applications of Kohlrausch's law.....	56
2.5 Conductometric Titrations.....	62
2.5.1 Titration of a strong acid (HCl) with a strong base (NaOH).....	62
2.5.2 Titration of Weak Acid (CH ₃ COOH) by Strong Base (NaOH).....	63
2.5.3 Conductometric titration of a mixture of a strong (HCl) and a weak acid (CH ₃ COOH) with a strong base (NaOH).....	63
2.6 Introduction to EMF.....	66
2.7 Galvanic Cells, Electrochemical Cells.....	67
2.7.1 Representation of a Cell.....	68
2.7.2 Single Electrode Potential.....	69
2.8 Types of Electrodes.....	73
2.8.1 Gas Electrode-Hydrogen Electrode (Primary Standard).....	74
2.8.2 Reference Electrodes (Secondary Standard).....	74
2.8.3 Ion Selective Electrodes – Glass electrode.....	76
2.9 Nernst Equation Relationship between Cell reaction and EMF.....	80
2.9.1 Nernst Equation - Applications.....	81
2.9.2 Concentrations Cells.....	82
2.9.3 Applications of Concentration Cells.....	83
2.10 Applications of Electrode Potentials – Potentiometric Titrations.....	84

2.11	Battery Chemistry	88
2.11.1	Classification.....	88
2.11.2	Primary Batteries (Non-Rechargeable).....	88
2.11.3	Secondary Batteries	92
2.12	Fuel Cells	94
2.12.1	Proton Exchange Membrane Fuel Cells (PEMFC).....	95
2.12.2	Alkaline Fuel Cells (AFC).....	95
2.12.3	Advantages of Fuel Cells.....	96
2.12.4	Limitations of Fuel Cells.....	97
2.13	Self-Test Questions	97
2.14	Short and Essay Type Questions.....	99

CHAPTER 3

Corrosion and its Control

3.1	Introduction.....	102
3.1.1	Magnitude of the Problem.....	102
3.1.2	Types of Corrosion and their Effects	102
3.1.3	Chemical or Dry Corrosion.....	103
3.1.4	Electrochemical or Wet Corrosion.....	105
3.1.5	Types of Wet Corrosion	106
3.1.6	Comparison of dry corrosion and wet corrosion.....	112
3.2	Factors Affecting Corrosion of Pure Metal.....	112
3.2.1	Nature of Metal	112
3.2.2	Influence of Environmental Conditions on Corrosion Rate.....	114
3.3	Corrosion Control Methods.....	115
3.3.1	Cathodic Protection.....	115
3.4	Surface Protective Coatings	117
3.4.1	Surface Preparation and Methods of Application of Coatings on Metals	117
3.4.2	Metallic Coatings – Galvanizing, Tinning, Cladding and Electroplating.....	118
3.4.3	Inorganic Coatings.....	123
3.5	Organic Coatings.....	123
3.5.1	Paint’s Constituents and their Functions.....	123
3.5.2	Water Paints.....	125

3.6 Questions.....	126
3.7 Objective Questions	128
3.8 Fill in the Blanks	129

CHAPTER 4

High Polymers

4.1 Polymers	132
4.1.1 Monomer, Polymer, Homo and Co polymers	132
4.1.2 Physical and Mechanical Properties & Classification.....	134
4.1.3 Types of Polymerization	135
4.1.4 Addition Polymerization – Chain Growth Polymerization	135
4.1.5 Condensation Polymerization – Step Growth Polymerization.....	137
4.1.6 Polymer Branching	139
4.2 Plastics	139
4.2.1 Plastics as Engineering Materials	140
4.2.2 Types of Plastics	141
4.3 Thermoplastic Resins.....	141
4.3.1 Cellulose Resins.....	142
4.3.2 Non-Cellulose Resins.....	143
4.3.3 Teflon: Tetrafluoroethylene (PTFE)	143
4.3.4 Polyethene (PE)	144
4.3.5 Polystyrene (PS).....	145
4.3.6 PVC.....	145
4.4 Thermosetting Resins and Comparison with Thermoplastics	146
4.4.1 Phenolic Resins - Bakelites.....	147
4.5 Compounding of Plastics	148
4.5.1 Fabrication of Plastics.....	148
4.6 Rubbers	151
4.6.1 Natural Rubber.....	152
4.6.2 Vulcanization	152
4.6.3 Elastomers (Synthetic / Artificial Rubbers).....	153
4.6.4 Rubber as an Engineering Material.....	156
4.7 Questions.....	159
4.8 Objective Questions	160
4.9 Fill in the Blanks.....	160

CHAPTER 5

Fuels

5.1	Introduction.....	162
5.1.1	A Survey of Fuel Resources.....	162
5.2	Classification of Fuels.....	164
5.3	Coal.....	164
5.3.1	Introduction.....	164
5.3.2	Origin.....	165
5.3.3	Coal Classification.....	165
5.4	Analysis of Coal.....	166
5.4.1	Proximate Analysis and its Significance.....	166
5.4.2	Ultimate Analysis.....	167
5.4.3	Significance of analysis of the Constituents.....	169
5.4.4	Calorific Value, HCV and LCV.....	170
5.5	Liquid Fuels.....	171
5.5.1	Sources.....	171
5.5.2	Advantages.....	171
5.6	Petroleum.....	172
5.6.1	Origin.....	172
5.6.2	Indian Resources of Petroleum and Petrochemicals.....	173
5.6.3	Classification of Crude Petroleum.....	175
5.6.4	Petroleum Refining.....	175
5.7	Cracking.....	177
5.7.1	Thermal Cracking.....	177
5.7.2	Catalytic Cracking.....	178
5.8	Refining of Petrol.....	179
5.8.1	Petrol or Gasoline.....	180
5.9	Knocking.....	180
5.9.1	Quality or Rating of Liquid Fuels.....	181
5.9.2	Octane Number & Petrol engine knock.....	181
5.9.3	Cetane Number and Diesel engine knock.....	182
5.9.4	Chemical Structure and Diesel knock.....	182
5.9.5	Anti-knock Agents.....	182
5.10	Gaseous Fuels.....	183
5.10.1	Advantages.....	183
5.10.2	Natural Gas.....	183

5.10.3 Liquefied petroleum gas.....	184
5.10.4 Compressed Natural Gas.....	185
5.11 Combustion.....	186
5.11.1 Spontaneous Combustion.....	186
5.11.2 Some Practical Aspects of Combustion.....	187
5.11.3 Combustion Calculations.....	188
5.12 Problems.....	190
5.13 Examples.....	199
5.14 Questions.....	201
5.15 Self-Test Questions.....	203

CHAPTER 6

Chemistry of Advanced Materials

6.1 Chemistry of Nano-materials.....	206
6.1.1 Introduction.....	206
6.1.2 Preparation of Carbon nanotubes and fullerenes.....	207
6.1.3 Applications of Nano-Materials.....	207
6.2 Liquid Crystals.....	210
6.2.1 Types of Mesophases.....	212
6.2.2 Types of Liquid Crystals.....	212
6.2.3 Nematic Phases.....	214
6.2.4 The Smectic Phases.....	214
6.2.5 Chemical Nature of Liquid Crystals.....	215
6.2.6 Applications of Liquid Crystals.....	216
6.2.7 Future of Liquid Crystals.....	219
6.3 Fibre Reinforced Plastics (FRP).....	219
6.3.1 Nature of Polymers used for FRP.....	220
6.3.2 Industrial Applications of FRP.....	220
6.3.3 General Applications of FRP.....	221
6.4 Biodegradable Polymers.....	221
6.4.1 Introduction.....	221
6.4.2 Standardization and Definitions.....	222
6.4.3 Origin of Polymers and Biodegradability.....	223
6.4.4 Tests of Biodegradability.....	224

6.5	Conducting Polymers.....	225
6.5.1	Doping	226
6.5.2	Conjugation.....	227
6.5.3	Conductivity.....	228
6.5.4	Preparation of Conductive Polymers	228
6.5.5	Classification of Conducting Polymers.....	230
6.5.6	Application of Conducting Polymers.....	230
6.6	Solar Energy.....	233
6.6.1	Solar Heaters.....	234
6.6.2	Solar Cells or Photovoltaic Cells	235
6.6.3	Efficiency and Disadvantages Solar Cells/Solar Energy	236
6.6.4	Solar Reflectors.....	237
6.7	Green House Concepts.....	239
6.8	Greenchemistry	240
6.9	Introduction to Cements.....	242
6.9.1	Manufacture of Portland Cement.....	243
6.9.2	The Setting and Hardening of Portland Cement	243
6.9.3	Decay of Cement Concrete	246
6.10	Questions.....	247
