

## Contents

Preface to Fourth Edition ..... (vii)

### CHAPTER - 1 | Bonding in Solids

---

1.1	Introduction .....	1
1.2	Types of Bonding .....	3
1.2.1	Ionic Bond .....	3
1.2.2	Lattice Energy in Ionic Solids .....	5
1.2.3	Ionic Radii and Coordination Number .....	7
1.2.4	Properties of Ionic Crystals .....	9
1.3	Covalent Bond and Covalent Crystals	
1.3.1	Covalent Bonds in Crystals .....	10
1.3.2	Properties of Covalent Crystals .....	11
1.4	Metallic Bonding .....	12
1.4.1	Nature of Metallic Bonding .....	12
1.4.2	Properties of Metallic Bonding .....	13
1.5	Hydrogen Bonding .....	13
1.6	Secondary (Van der Waals) Bonding .....	15
1.7	Cohesive Energy .....	17
1.8	Born Repulsive Exponent .....	20
	<b>Questions</b> .....	<b>21</b>
	<b>Objective Questions</b> .....	<b>22</b>

### CHAPTER - 2 | Crystallography and Crystal Structures

---

2.1	Introduction .....	27
2.2	Space Lattice .....	29
2.3	Two-dimensional Lattice .....	30
2.4	Crystal Systems and Bravais Lattices .....	33

2.5	Crystal Planes and Miller Indices .....	35
2.6	Representation of Directions in a Crystal .....	40
2.7	Interplanar Spacing .....	43
	2.7.1 Separation Between Successive Planes .....	43
2.8	Cubic Crystal Systems .....	45
2.9	Atomic Packing Fraction in Crystal .....	47
	2.9.1 Simple Cubic Structure .....	47
	2.9.2 BCC Structure .....	47
	2.9.3 FCC Structure .....	49
	2.9.4 Diamond Structure .....	51
	2.9.5 Hexagonal Close Packed Crystal Structure .....	53
2.10	Sodium Chloride (Rock Salt) Structure .....	54
2.11	Zinc Sulphide Structure .....	55
2.12	CsCl Structure .....	55
	<b>Questions</b> .....	<b>56</b>
	<b>Objective Questions</b> .....	<b>57</b>

### CHAPTER - 3 | X-Ray Diffraction

---

3.1	Basic Principles .....	61
3.2	Bragg Law .....	61
3.3	Laue Method .....	63
3.4	Powder Method .....	65
3.5	Difference in the Diffraction Pattern of fcc and bcc Crystals .....	70
3.6	X-ray Diffractometer .....	71
3.7	Applications of X-ray Diffraction (XRD) .....	72
	<b>Questions</b> .....	<b>74</b>
	<b>Objective Questions</b> .....	<b>75</b>

### CHAPTER - 4 | Defects in Crystals

---

4.1	Introduction .....	78
4.2	Point Defects .....	79
	4.2.1 Vacancies .....	79
	4.2.2 Impurities: Substitutional and Interstitial .....	80
	4.2.3 Frenkel Defects .....	81
	4.2.4 Equilibrium Concentration of Schottky Defects in Metals .....	82

4.3	Study of Existence of Points Defects in crystals .....	84
4.4	Line Defects .....	84
	4.4.1 Theoretical Shear Stress .....	84
	4.4.2 Edge Dislocation .....	86
	4.4.3 Screw Dislocation .....	87
	4.4.4 Burger's Vector and Burger's Circuit .....	88
4.5	Two dimensional Defects or Surface Defects .....	91
	4.5.1 Surfaces .....	91
	4.5.2 Grain Boundaries .....	91
	4.5.3 Twin Boundaries .....	93
	4.5.4 Microcracks .....	93
	4.5.5 Phase Boundaries .....	93
4.6	Volume Defects .....	94
	4.6.1 Voids .....	94
	<b>Questions .....</b>	<b>96</b>
	<b>Objective Questions .....</b>	<b>98</b>

## CHAPTER - 5 | Elements of Statistical Mechanics

---

5.1	Introduction .....	102
5.2	Statistical Mechanics .....	103
	5.2.1 What is statistical mechanics? .....	103
	5.2.2 The characteristics or features of a 'system' .....	104
5.3	Maxwell-Boltzmann distribution .....	106
	5.3.1 Particles of Maxwell-Boltzmann (MB) distribution .....	106
	5.3.2 MB Statistics .....	107
	5.3.3 M.B Distribution Function .....	108
	5.3.4 Maxwell – Boltzmann distribution of energy .....	110
5.4	Bose-Einstein (BE) Statistics .....	110
	5.4.1 Introduction .....	110
	5.4.2 A Case Study of MB and BE Statistics .....	111
	5.4.3 Bose-Einstein Statistics .....	113
	5.4.4 Bose-Einstein Distribution Function .....	114
5.5	Fermi-Dirac (FD) Statistics .....	116
	5.5.1 The characteristic features or postulates Fermi-Dirac statistics: .....	116
5.6	Black Body Radiation Law .....	120
	5.6.1 Early Models .....	120
	5.6.2 Wien's Displacement law .....	121
	5.6.3 Rayleigh-Jeans Radiation Law .....	121
	5.6.4 Failure of Rayleigh-Jean's Law .....	123

5.7	Planck's Black Body Radiation Law .....	123
5.7.1	Max Planck's Modification .....	123
5.7.2	Derivation of Planck's Black Body Radiation Law .....	124
5.7.3	Wien's Displacement Law .....	125
5.8	Planck's Black Body Radiation Law on the Basis of BE Statistics .....	127
5.8.1A	Characteristics of Photon gas .....	127
5.8.1B	Number of Energy States .....	128
5.8.1C	Planck's Radiation Law .....	128
5.9	Electron Theory .....	129
5.9.1 A	Metals .....	129
5.9.2 B	The Free Electron .....	129
5.9.2	Electrons are Quantum Particles .....	130
5.9.3	Electrons as Fermions .....	131
5.9.4	Fermi-Dirac Distribution in the Case of Electron Gas .....	132
5.9.5	Density of States .....	133
5.10	Fermi Energy .....	134
5.10.1	Expression for Fermi energy of a metal .....	134
5.10.2	Electron – Energy distribution .....	135
5.10.3	Occupation of Energy Levels .....	135
5.11	Summary of the Three Statistical Functions – A Comparison .....	136
	<b>Questions .....</b>	<b>136</b>
	<b>Objective Questions .....</b>	<b>138</b>

## CHAPTER - 6 | Principles of Quantum Mechanics

---

6.1	Introduction .....	145
6.2	Dual Nature of Wave-Particle .....	146
6.2.1	de Broglie's Hypothesis .....	146
6.2.2	Characteristics of Matter Waves .....	148
6.3	Relativistic Mass, and Matter Waves .....	148
6.4	Davisson and Germer Experiment (1927) .....	150
6.5	G. P. Thomson Experiment (1928) .....	153
6.6	Heiserberg's Uncertainty Principle .....	155
6.7	Schrodinger Wave Equation .....	159
6.8	Time-Dependent Schrodinger Equation .....	159
6.9	The Time-independent Schrodinger Equation .....	162

6.10	Physical Significance of Wave Function .....	163
6.11	Postulates of Wave Mechanics or Quantum Mechanics .....	164
6.12	Particle in One Dimensional Potential Box .....	166
	<b>Questions and Problems .....</b>	<b>171</b>
	<b>Objective Questions .....</b>	<b>173</b>

## CHAPTER - 7 | Band Theory of Solids

---

7.1	Introduction .....	178
7.2	Electron in a Periodic Potential .....	178
	7.2.1 Formation of Energy Bands .....	179
	7.2.2 Periodic potential and Bloch Theorem .....	180
7.3	The Kronig - Penney Model .....	182
7.4	Origin of Energy Band Formation in Solids .....	185
7.5	Concept of Effective Mass of an Electron and Hole .....	186
	7.5.1 Energy and Velocity of an Electron .....	186
	7.5.2 Effective Mass of the Electron .....	187
7.7	Classification of Metals, Conductors Semiconductors and Insulators .....	189
	<b>Questions .....</b>	<b>191</b>
	<b>Objective Questions .....</b>	<b>193</b>

## CHAPTER - 8 | Semiconductor Physics

---

8.1	Introduction .....	196
8.2	Electron and Hole Densities .....	200
	8.2.1 Fermilevel and Carrier Concentration in Intrinsic Semiconductors ..	200
	8.2.2 Carrier Concentration .....	201
	8.2.3 Fermi Level Intrinsic Semiconductors .....	202
	8.2.4 Intrinsic Concentration .....	203
8.3	Carrier Concentration in Extrinsic Semiconductors .....	204
8.4	Currents in Semiconductors .....	209
	8.4.1 Drift Current .....	209
	8.4.2 The conductivity of and intrinsic semiconductor .....	210
	8.4.3 Diffusion Currents .....	211

8.5	Equation of Continuity .....	212
8.6	Einstein's Relation .....	214
8.7	Direct and Indirect Band-Gap Semiconductors .....	214
8.8	Hall Effect .....	215
	<b>Questions</b> .....	<b>222</b>
	<b>Objective Questions</b> .....	<b>224</b>

## CHAPTER - 9 | Physics of Semiconductor Devices

---

9.1	Introduction .....	229
9.2	Fabrication of pn Junction Diodes .....	231
	Formation of P-N Junction .....	231
	Formation of depletion layer .....	231
	Equilibrium in a pn Junction Diode .....	233
	Balance of drift and diffusion .....	233
	Calculation of Diode Current-Voltage Relationship .....	234
	Majority and Minority Carrier Currents .....	235
9.3	Volt-ampere Characteristics of pn junction Diode .....	235
	Forward biased diode .....	236
	Under forward bias .....	237
	Reverse biased diode .....	238
	Under reverse bias .....	239
	Voltage-Current characteristic of a diode: .....	240
	Break down voltage in the reverse bias: .....	241
	Approximate diode models: .....	241
	Photo diodes .....	242
	Light emitting diode .....	244
	Liquid crystal display: Principles and Applications .....	247
	<b>Questions</b> .....	<b>251</b>
	<b>Objective Questions</b> .....	<b>252</b>

## CHAPTER - 10 | Dielectric Properties

---

10.1	Introduction .....	254
	10.1.1 Dielectric Medium Between the Plates of a Capacitor .....	255
	10.1.2 Atomic View of a Dielectric Polarization .....	257
10.2	Electric Flux Density, Electrical Field and .....	258
10.3	Polar and Non-Polar Dielectrics .....	260

10.4	Electronic, Ionic and Orientation Polarization .....	261
10.5	Internal Field in a Dielectric Medium and Clausius - Mosotti Equation .....	262
10.6	Electronic Polarisability .....	265
10.7	Orientation Polarization .....	268
10.8	Behaviour of Dielectric in Alternating Fields .....	272
10.8.1	Dielectric Loss and Dielectric Relaxation .....	273
10.8.2	Frequency Dependence of Electronic Polarizability .....	275
10.9	Frequency Dependence of Dielectric Constant Over a Wide Frequency Range .....	277
10.10	Ferroelectricity and Piezoelectricity .....	278
10.10.1	Ferroelectricity .....	278
10.10.2	Important Characteristics of ferroelectric Materials .....	280
10.10.3	Piezoelectricity .....	284
10.10.4	Piezoelectric Materials .....	287
10.10.5	Applications of Piezoelectrics .....	288
10.11	Pyroelectricity .....	291
	<b>Questions .....</b>	<b>294</b>
	<b>Objective Questions .....</b>	<b>296</b>

## CHAPTER - 11 | Magnetic properties

---

11.1	Introduction .....	303
11.2	A Magnetic Material in an External Magnetic Field: The Three Vectors B, H and M Field .....	306
11.3	Origin of Magnetic Moment of Atoms .....	308
11.4	Diamagnetism .....	311
11.5	Paramagnetism .....	316
11.5.1	Magnetic moment .....	316
11.5.2	Langevin's Classical Theory of Paramagnetism .....	317
11.5.3	Quantum approach .....	320
11.6	Ferromagnetism .....	322
11.6.1	The Characteristics Associated with Ferromagnetism .....	322
11.6.2	Molecular Field-Weiss Domain Model .....	324
11.6.3	Temperature Dependence of Spontaneous Magnetization .....	325
11.6.4	Curie-Weiss Law .....	327
11.6.5	Exchange Energy .....	328
11.6.6	Domains and Magnetization .....	330
11.6.7	Hysteresis Loop .....	330

11.6.8	Magneto Crystalline Anisotropy .....	334
11.6.9	Magnetostriction .....	335
11.6.10	Applications of Ferromagnetic Materials .....	335
11.7	Antiferromagnetism .....	337
11.8	Ferrimagnetism .....	338
11.8.1	Ferrites .....	338
11.8.2	Structure of Ferrites .....	339
11.8.3	Susceptibility of ferrites .....	341
11.8.4	Characteristics of Ferrites .....	341
11.8.5	Applications of Ferrites .....	343
11.9	Maxwell's Equations .....	345
11.10	Faraday's Law .....	354
11.11	Ampere's Law .....	354
11.12	Displacement Current .....	355
	<b>Questions</b> .....	<b>357</b>
	<b>Objective Questions</b> .....	<b>359</b>

## CHAPTER - 12 | Lasers

---

12.1	Introduction .....	365
12.2	Characteristics of Lasers .....	366
12.2.1	Coherence and Monochromaticity .....	367
12.2.2	Directionality .....	367
12.2.3	Speckle nature .....	367
12.3	Principle of Laser Emission .....	368
12.3.1	Spontaneous and Stimulated Emissions .....	368
12.3.2	Einstein Coefficients .....	369
12.3.3	Light Amplification and Laser oscillations .....	371
12.3.4	Laser Oscillations .....	372
12.4	Population Inversion .....	373
12.5	Methods for Producing Population Inversion .....	374
12.6	Solid State Laser - Ruby Laser .....	375
12.7	Gas Lasers .....	377
12.7.1	He-Ne laser .....	377
12.7.2	The CO <sub>2</sub> laser: .....	379
12.7.3	Other gas lasers : .....	382
