Foreword (vii)

Preface (ix)

Part - I

Pharmacognosy

CHAPTER 1

Pharmacognosy: Scope and History 3

Introduction	5
Scope	5
History	6
Alternative Systems of Medicine	7
Ayurveda System	7
Siddha System	8
Unani System	8
Homeopathy System	9
Chinese System	10
Kampo System	10
Aromatherapy	11
Naturopathy	11
Yoga	11
Crude Drugs: Classification	12
Sources of Crude Drug	14

CHAPTER 2

Plant Morphology and Anatomy 15

Plant Morphology	17
Roots	17
Stems	17
Leaves	17
Flower	20
Seed	21
Fruit	21
Bark	21
Wood	22

Plant Anatomy	23
Tissue Systems in Plants	23
Anatomy of Plant Parts	27
Leaf	28
Root	29
Stem	30
Fruit	31
Seed	31
Bark	32
Wood	32

CHAPTER 3

Basics in Microscopy 33

Microscope	35
Electron Microscope	38
Sample Preparation	39
Microscopical Aids	40
Camera Lucida	40
Micrometer	41
Microtome	42

CHAPTER 4

Cell: Organelles and Inclusions 45

Cell	47
Cell Contents	49
Cell Organelles and their Functions	49
Cell Inclusions	51
Starch Grains	51
Calcium Crystals	52
Pollen Grains	53
Aleurone Grains	54
Pigments	54
Gums and Mucilage	54
Amino Acids	54
Proteins	56
Enzymes	56
Vitamins	56

Nucleic Acids	56
Sugars	57
Lipids	57
Phenolic Compounds	58
Tannins	58
Resins	59
Alkaloids	59
Glycosides	59
Terpenoids	59

CHAPTER 5

Plant Physiology and Biochemistry

Introduction	63
Photosynthesis-Calvin Cycle	63
Glycolysis	65
Krebs Cycle	68
Oxidative Phosphorylation	69
Other Physiological Processes	69
Biosynthesis	71
Shikimic Acid Pathway	74
Acetate Pathway	74
Isprenoid Pathway/Mevalonate Pathway	77
Amino acid Biosynthesis	80
Glycoside Biosynthesis: Cardioactive Sterol Biosynthesis, Antraquinone Glycoside Biosynthesis	81
Alkaloid Biosynthesis: Indole, Tropane, Quinoline, Opium, Alkaloid Biosynthesis	83
Elucidation of Biosynthetic Pathway	88

CHAPTER 6

Plant Taxonomy 93

Taxonomy	95
Nomenclature	96
Classification	96
Types of Classification	99
Artificial	99
Natural	99

Phylogenetic	100
Phenetic	100
Clasdistic	100
Molecular	101
Herbarium	101

CHAPTER 7

Chemotaxonomy 105

Introduction	107
History	107
Principles of Chemotaxonomy	107
Stages of Chemotaxonomic Investigations	108
Applications of Chemotaxonomy	108
Alkaloids	108
Flavonoids	111

CHAPTER 8

Families 115

Apocynaceae	117
Compositae	118
Convolvulaceae	119
Leguminosae	119
Labiatae	121
Rubiaceae	121
Rutaceae	122
Scrophulariaceae	123
Solanaccae	123
Umbelliferae	124

CHAPTER 9

Cultivation 127

Introduction	129
Cultivation and Collection Practices	129
Harvesting and Collection	129
Drying	130
Garbling	130
Packaging	130
Storage	130

Factors Affecting Cultivation	131
Exogenous/Extrinsic Factors	131
Climate: Temperature, Light Radiation, Humidity, Day Length	131
Soil and Soil Fertility	131
Altitude and Latitude	133
Age of Plant/Stage of Development	133
Fertilizers	133
Pests and Pest Control	134
Allelopathy	134
Endogenous/Intrinsic Factors	134
Selection	135
Mutation	135
Polyploidy	135
Hybridization	136
Chemo Demes	137
Plant Growth Regulators	137
Plant Diseases	144
Pest and Pest Control	148
Natural Pesticides	153

CHAPTER 10

Good Agricultural and Collection Practices [GACP] 155

Section 1: General Introduction and Glossary	157
Section 2: Good Agricultural Practices for Medicinal Plants	157
Identification/Authentication of Cultivated Medicinal Plants	157
Seeds and Other Propagation Materials	158
Site Selection	158
Personnel	158
Ecological Environment and Social Impact	158
Soil	158
Climate	158
Irrigation and Drainage	158
Cultivation	158
Plant Maintenance and Protection	158
Harvest	158

Section 3: Good Collection Practices for Medicinal Plants	159
Permission to Collect	159
Technical Planning	159
Selection of Medicinal Plants for Collection	159
Collection	159
Personnel	159
Section 4: Common Technical Aspects of GACP	159
Post-harvest Processing	159
Inspection and Sorting	159
Primary Processing	159
Drying	159
Specific Processing	160
Processing Facilities	160
Bulk Packaging and Labelling	160
Storage and Transportation	160
Equipment	160
Quality Assurance	160
Documentation	160
Personnel (growers, collectors, producers, handlers, processors)	160
Section 5: Other Relevant Issues	160
Ethical and Legal Considerations	160
Intellectual Property Rights and Benefits-Sharing	160
Threatened and Endangered Species	160

CHAPTER 11

Quality Control of Crude Drugs 161

Evaluation of Crude Drugs	163
Adulteration	163
Types of Adulteration	163
Terminologies Related to Adulteration	164
Adulterants of Various Crude Drugs	164
Standardization of Crude Drugs	168
Need of Standardization	169
WHO Guidelines	170
Preliminary Evaluation	171
Morphological Evaluation	172

Microscopical Evaluation	173
Physical Evaluation	181
Physicochemical Evaluation	182
Chemical Evaluation	186
Biological Evaluation	187
WHO Biological Evaluation	187
Swelling Index Determination	187
Foam Index Determination	187
Hemolytic Index Determination	187
Bitterness Value Determination	189
Total Tannin Value Determination	190
Toxicological Evaluation	190
Microbial Contamination	190
Aflatoxin Determination	191
Radioactive Contamination	191
Pesticide Residue Determination	191
Heavy Metal Determination	191
Pharmacological Evaluation	192
Advanced Analytical Evaluation	193
Chromatography	193
Spectroscopy	201

CHAPTER 12

WHO Guidelines for Safety and Toxicity of Herbal Drugs 209

Background	211
Goals	211
Objectives	211
Ethical Considerations	211
Non-clinical Studies	211
Pharmacodynamic Studies	212
Pharmacological Studies	212
Toxicological Studies	212
Systemic Toxicity Tests	212
Local Toxicity Tests	216
Special Toxicity Tests	216
Alternatives to Animal Testing	217

Part - II

Phytochemistry

CHAPTER 13

Natural Product Chemistry 221

Occurrence and Distribution

Biosynthesis

Functions

Classification and Chemistry

Uses

Extraction and Chemical Tests of following Phytochemical Classes:

Carbohydrates 223

Lipids 233

Amino Acids 242

Proteins 245

Nucleic Acids 249

Enzymes 251

Glycosides 265

Essential Oils 296

Alkaloids 320

Tannins 336

Resins 341

Minerals 344

Surgical Sutures 346

Fibers 347

CHAPTER 14

Pharmacognostic Account of Crude Drugs 351

Carbohydrates 355

Agar, Algin, Acacia, Tragacanth, Starch, Pectin,
Guar Gum, Honey, Chitin, Isapgol, Carrageenan

Lipids 365

Arachis Oil, Castor Oil, Chaulmoogra Oil, Corn Oil,
Cocoa Butter, Kokum Butter, Linseed Oil, Neem Oil,
Olive Oil, Safflower Oil, Sesame Oil, Shark liver Oil,
Spermaceti, Wool Fat

Glycosides	371
Antraquinone Glycosides	371
Senna, Aloe, Cascara, Rhubarb	
Cardiac Glycosides	379
Digitalis, Stropanthus, Thevetia, European Squill, Indian Squill	
Saponin Glycosides	387
Liquorice, Dioscorea, Brahmi, Ginseng, Senega, Quillia, Gokhru	
Cyanogenetic Glycosides	397
Bitter Almond, Wild Cherry Bark	
Isothiocyanate Glycosides	398
Black Mustard, White Mustard	
Flavonoid Glycosides	399
Silymarin, Gingko, Buck Wheat	
Coumarine and Furano Coumarine Glycosides	402
Visnaga, Ammi, Psoralea Fruit, Cantharides, Vannila	
Phenol Glycosides	405
Bearberry	
Steroidal Glyco Alkaloids	405
Kantakari	
Bitter Glycosides	407
Gentian	
Terpenoides (Essential Oils)	408
Monoterpenoids	408
Gaultheria, Palmarosa, Citronella Oil, Musk, Chenopodium, Eucalyptus, Lemon Grass Oil, Mentha, Spearmint Oil, Caraway, Cardamom, Coriander, Dill, Fennel, Lemon, Orange, Cassia, Cinnamon, Nutmeg	
Sesquiterpenoides	424
Clove, Sandal Wood, Valerian	
Alkaloids	427
Indole Alkaloids	427
Ergot, Nux Vomica, Physostigma, Rauwolfia, Vinca	
Tropane Alkaloids	438
Belladonna, Datura, Hyoscyamus, Stramonium, Dubosia, Coca	
Isoquinoline Alkaloids	444
Opium, Curare, Ipecacuanha	

Quinoline Alkaloids	448
Cinchona, Camptotheca	
Pyridine Alkaloids	452
Lobelia, Areca Nut, Tobacco	
Amine Alkaloids	454
Ephedra, Colchicum	
Steroidal Alkaloids	457
Kurchi, Veratrum	
Glyco Alkaloid	460
Ashwagandha	
Purine Alkaloids	462
Tea, Coffee	
Diterpene Alkaloid	463
Aconite	
Quinazoline Alkaloid	464
Vasaka	
Resins	465
Ipomoea, Podophyllum, Kaladana, Colocynth, Benzoin, Myrrh, Storax, Tar, Guggul, Boswellia, Colophony, Peru Balsam, Tolu balsam, Lac, Asafoetida, Ginger, Cannabis, Turmeric	
Tannins	474
Myrobalan, Behara, Arjuna, Tannic Acid, Amla, Ashoka, Black Catechu, Pale Catechu, Pterocarpus	

CHAPTER 15

Extraction and Isolation of Phytoconstituents 481

Introduction	483
Factors Affecting Extraction of Crude Drugs	483
Methods of Extraction	483
Methods of Purification	486
Isolation Process	488
Andrographolide	488
Asiaticosides/Madecassosides	489
Atropine	490
Berberine	491
Caffeine	491
Digoxin	492

Diosgenin	493
Emetine	494
Ephedrine	494
Ergometrine	495
Ergotamine	496
Eugenol	496
Forskolin	497
Gymnemic acid	497
Guggulosterone	498
Ginsenoside	499
Glycyrrhetic Acid	500
Hesperidin	501
Menthol	502
Pectin	502
Piperine	502
Podophylotoxin	503
Quinine and Quinidine	503
Rutin	504
Senosides	505
Solanine	506
Solasodine	507
Tannic acid	508
Taxol	508
Withanolides	509

Part - III

Phytopharmacology

CHAPTER 16

Screening Methods for Plant Drugs 511

Introduction	515
Anti-inflammatory Activity	517
Hypoglycemic Activity	518
Antidiabetic Activity	518
Antiulcer Activity	519
Hepatoprotective Activity	520
Diuretic Activity	521

Psychopharmacological Activity	522
Antidepressant Activity	522
Anticonvulsant Activity	522
Anti Alzheimer's Activity	523
Immunomodulatory Activity	525
Antimicrobial Screening	527
Antiviral Activity	530
Antioxidant Activity	523
Anti Fertility Activity	536
Anticancer Activity	537
Cardiotonic Activity	538

CHAPTER 17

Phytopharmacology 539

Introduction	541
Plants acting on CNS	541
Anti-inflammatory Plants	543
Hepatoprotective Plants	546
Antidiabetic Plants	548
Anti HIV Plants	550
Anticancer Plants	552
Plants acting on CVS	554
Immunomodulating / Adaptogenic / Antistress Plants	557
Antiviral Plants	559
Antiobesity Plants	561
Antipyretic Plants	563
Antimicrobial Plants	564

Part - IV

Herbal Drug Technology

CHAPTER 18

Processing of Herbal Raw Materials and Dosage Forms 569

Introduction	571
Processing of Herbal Raw Material	571
Collection	571

Harvesting	571
Drying	572
Garbling	574
Packing	574
Storage	574
Pulverisation	575
Extraction and Drying of Herbal Extracts	576
Processing of Herbal Dosage Forms	576
Manufacturing Process Development	576
Control of Critical Steps and Intermediates	577
Characterization of Active Constituents and Impurities	577
Quality Control	577
Validation of Analytical Procedures	577
Container Closure System	577
Stability Studies	577
Herbal Tablets	578
Herbal Capsules	580
Herbal Semisolid Dosage Forms	581
Herbal Liquids	582

CHAPTER 19

Current Good Manufacturing Practices for Herbal Medicines 587

Introduction	589
Organization and Personnel	590
Buildings and Facilities	590
Storage Areas	591
Equipments	591
Control of Components, Containers and Closures	592
Production and Control Procedures	593
Master Formula Records	594
Packaging and Labeling Control	595
Laboratory Control	595
Stability Controls	596
Holding and Distribution Records	596
Complaint Files	597
Returned and Salvaged Drug Products	597

CHAPTER 20

Traditional Drugs and Derived Formulation 599

- Ayurvedic Dosage Forms 601
 - Bhasma 601
 - Asava and Aristha 602
 - Leha (Avaleha/Paka) 603
 - Churna 603
 - Taila 604
 - Gutika/Vati 604
 - List of Common Ayurvedic Drugs 605
- Unani Dosage Forms 609
 - Sufoof (Powder): Sunoon or Manjan, Barood, Kohal, Zarur 609
 - Habb (Pills) 609
 - Qurs (Tablet) 610
 - Kushta (Calx) 610
 - Shiyaf (Suppositories) 610
 - Marham (Ointment) 610
 - Laoq (Linctus) 610
 - Majun (Confection) 611
- Homeopathic Dosage Forms 611
 - Medicated Pellet or Globule 611
 - Triturate Tablets 611
 - Compressed Tablets 612
 - Medicated Tablets 612
 - Oral Liquid Dosage Forms 612

CHAPTER 21

Herbal Cosmetics 613

- Introduction 615
- Classification 616
 - Skin Cosmetics 616
 - Hair Cosmetics 619
 - Mouth Cosmetics 620
 - Shaving Cosmetics 620

Lip Cosmetics	620
Eye Cosmetics	621
Nail Cosmetics	621
Quality Control and Evaluation of Herbal Cosmetics	621
Plants used in Cosmetic Formulations	625

Part - V

Pharmaceutical Biotechnology

CHAPTER 22

Pharmaceutical Biotechnology 631

Introduction to Biotechnology	635
Plant Tissue Culture (PTC)	635
Introduction	635
Historical Development	635
Basics of Plant Tissue Culture	637
Totipotency	637
Explant	637
Callus	637
Plant Regeneration	637
Factors Affecting Vascular Differentiation	638
Plant Growth Regulators	638
Cyclic AMP	638
Chemical Factor	638
Physical Factor	638
Elicitors	638
Precursors	639
Plant Tissue Culture Establishment	640
Media	640
Media Preparation	642
Explant Selection and Surface Sterilization	643
Callus Culture/Solid Medium Culture	643
Suspension Culture/Liquid Medium Culture	643
Growth Profile for PTC	642

Culture Growth Measurement: Fresh and Dry Weight Measurement, Cell Counts, Packed Cell Volume, Cell Viability Test, Protein Content, Mitotic Index, Plating of Cell Suspension	645
Types of Culture: Meristem Culture, Root Culture, Shoot Tip Culture, Anther Culture, Ovary Culture, Seed Culture, Embryo Culture, Protoplasts Culture, Protoplast Fusion, Hairy Root Culture	646
Plant Tissue Culture Applications	650
To Study Respiration and Metabolism	650
To Study Proliferation and Organ Function	650
Single Cell Culture of Higher Plant Cells	650
Genetic Transformation	650
Production of Disease Free and Disease Resistant Plant	650
Germplasm Storage	651
Embryo Rescue	651
Somaclonal Modification	651
Production of Haploids	651
Production of Artificial Seeds	651
Clonal Propagation	651
Micro Propagation	652
Mutant Selection	652
Somatic Hybridization	652
Cloning	652
Production of Secondary Metabolites	652
Biotransformation	653
Transgenic Plants and Gene Transfer	655

Part - VI

Selected Topics in Pharmacology

CHAPTER 23

Recent Trends in Pharmacognosy 661

Problems and Prospects of Discovering New Drugs from Higher Plants	665
Bioavailability and Herbal Drugs	666
Phytoequivalence and Herbal Drugs	669
Pharmacovigilance and Herbal Drugs	670
Herbal Drug Interaction	672
Stability Studies of Herbal Products	675

High-Throughput Screening (HTS)	678
High Content Screening (HCS)	679
Ethnopharmacognosy	679
Conservation of Medicinal Plants	680
Herbal Drug Regulatory Affairs	684

CHAPTER 24

Photosensitizing Plants, Plant Allergens, Fungal Toxins and Poisonous Plants 689

Photosensitizing Plants	691
Introduction	691
Photosensitizing Reaction	691
Clinical Findings	691
Classification of Photo Sensitizers	691
Photosensitizing Plants as Therapeutic Agents	692
Examples of Photosensitizing Plants	693
Plant Allergens	695
Introduction	695
Process of Allergy	695
Types of Reactions	695
Examples of Plant Allergens	696
Plant Allergens as Therapeutic Agents	698
Fungal Toxins	698
Introduction	698
Properties	698
Types	698
Examples of Fungal Toxins	699
Poisonous Plants of India	700
Introduction	700
Classification of Poisonous Plants	700
Alkaloid	700
Proteins	703
Essential Oils	704
Calcium Oxalate Crystals	705
Fixed Oils	705
Glycosides	706

CHAPTER 25

Marine Drugs 709

- Introduction 711
- Marine Drugs
 - Cardiovascular System 712
 - Anticancer 715
 - Anti-inflammatory 716
 - Antimicrobial 717
 - Antibiotic 718
 - Anthelmintic 719
 - Toxins 722

CHAPTER 26

Plant Sweeteners and Bitters 723

- Plant Sweeteners 725
 - Introduction 725
 - Classification 725
 - Examples of Natural sweeteners: Glycyrrhizin, Neohesperidin, Stevioside and Rebaudioside, Thaumatin, Monellins, Phyllodulcin, Abrusoside 726
- Plant Bitters 729
 - Introduction 729
 - Classification and Examples: Glycosides, Diterpenoids, Triterpenoids, Sesquiterpenoids/Lactone, Phenolics, Chromones, Coumarins, Coumarone 730

CHAPTER 27

Nutraceutical 735

- Introduction 737
- Why Nutraceuticals 737
- Market Scenario of Nutraceuticals 737
- Regulatory Concepts 737
- Classification 738
- Future Scope 741

CHAPTER 28

**Medicinal and Aromatic Plants: National Economy,
Industry and Institutes involved in Research 743**

- Medicinal Plants: National and International Trade 745
- Aromatic Plants: National and International Trade 746
- Herbal Cosmetics: National and International Trade 748
- Prospectus of Herbal Medicines and Cosmetics 749
- Industries and Institutes Involved in Herbal Research 749

CHAPTER 29

Natural Product Drug Delivery 755

- Introduction 757
- Methods of Drug Discovery 757
 - Traditional Drug Design 757
 - Rational Drug Design 757
- Role of Natural Products in Drug Discovery 758
- Natural Chemicals as Lead Molecules from Different Sources 758
- Natural Chemicals as Raw Material for Semi Synthesis 764

CHAPTER 30

Herbal Medicines and Intellectual Property Rights 769

- Intellectual Property Rights (IPR) 771
 - History 771
 - Types of IPS 771
 - Patent 771
 - Copyright 772
 - Industrial Design 772
 - Trademark 772
 - Trade Secret 772
 - Geographical Indication 772
- Patent 772
 - Types of Patent 773
 - Preparation of Patent Proposal 774
 - Indian Patent Act, 1970 775
- Traditional Knowledge (TK) of Medicines 777
- Existing IPR Loop Holes for Traditional Medicines 777
- New IPR Solutions for Traditional Medicines 778
- What is Next? 780

ANNEXURE 1

Pharmacological Classification of Crude Drugs 783

ANNEXURE 2

**Cultivation Technology of
Selected Medicinal and Aromatic Plants 803**

ANNEXURE 3

Multiple Choice Questions 839

ANNEXURE 4

Question Bank 883

References 893

Index 911
