

## **CONTENTS**

---

<i>Foreword</i> .....	(vii)
<i>Preface</i> .....	(ix)
<i>Acknowledgement</i> .....	(xi)
<i>Contributors</i> .....	(xiii)

### **CHAPTER 1**

#### **Drug Delivery using Polymeric and other Carrier Systems**

*Y. Singh, M. Chaurasia and Manish K. Chourasia* ..... 1-42

1.1 Introduction.....	1-2
1.2 Basic Methods of Polymeric Nanoparticle Production.....	2-18
1.2.1 Dispersion of Preformed Polymers to Form PNPs..	3-16
1.2.1.1 Emulsification/Solvent Evaporation .....	3-5
1.2.1.2 Nanoprecipitation.....	5-8
1.2.1.3 Salting-Out.....	8-10
1.2.1.4 Dialysis .....	10-12
1.2.1.5 Ionic Gelation Method .....	12-13
1.2.1.6 Preparation of Nanoparticles with a Membrane Contactor.....	13-14
1.2.1.7 New Techniques based on Supercritical or Compressed Fluids .....	15-16
1.2.2 Polymerization of Monomers .....	16-18
1.2.2.1 Emulsion Polymerization .....	17-18
1.3 Nanocrystals.....	18-23
1.3.1 Approaches to Formulating Nanocrystals .....	20-23
1.3.1.1 Precipitation Method.....	20
1.3.1.2 Homogenization Method.....	20-22
1.3.1.3 Pearl/Ball-Milling Technology for the Production of Drug Nanocrystals.....	22
1.3.1.4 Production of Drug Nanocrystal Compounds by Spray-Drying .....	23

**(xvi)      *Contents***

---

1.4 Nanocapsules .....	23-28
1.4.1 Preparation.....	25-28
1.4.1.1 Nanocapsules Formulation by Interfacial Polymerization.....	25-27
1.4.1.2 Nanocapsules Obtained from Preformed Polymers.....	27-28
1.5 Nanofibers.....	28-34
1.5.1 Polymers used for Development of Nanofibers ..	29-30
1.5.2 Electrospinning.....	30-32
1.5.3 Spontaneous Assembly.....	32-33
1.5.4 Temperature Induced Phase Separation .....	33-34
1.6 Nanorods.....	34-37
1.6.1 Synthesis of Nanorods.....	35-37
1.6.1.1 Seed-Mediated Growth .....	35
1.6.1.2 Synthesis of Nanorods at High Temperatures in Organic Solvents .....	36
1.6.1.3 Template Method .....	36
1.6.1.4 Electrochemical Method .....	36-37
1.6.1.5 Zinc Oxide (ZnO) Nanorods .....	37
<i>References</i> .....	37-42

**CHAPTER 2**

**Dendrimers in Drug Delivery**

<i>Umesh Gupta</i> .....	43-71
2.1 Background and Introduction .....	43-46
2.2 Dendrimer Synthesis.....	46-49
2.2.1 Divergent Approach .....	46-47
2.2.2 Convergent Approach.....	47-48
2.2.3 Double Exponential Growth.....	48
2.2.4 ‘Click’ Chemistry Approach .....	48-49
2.3 Molecular Structure and Properties .....	49-51

---

**Contents (xvii)**

2.4 Characterization .....	51-52
2.5 Major Classes of Dendrimers.....	52-57
2.5.1 Polyamidoamine (PAMAM) Dendrimers .....	52-53
2.5.2 Polypropylene(imine) (PPI) Dendrimers.....	53-55
2.5.3 Peptide Dendrimers .....	55-56
2.5.4 Triazine Dendrimers.....	56
2.5.5 Glyco or Carbohydrate Dendrimers .....	56
2.5.6 Tecto Dendrimers .....	56
2.5.7 Chiral Dendrimers .....	57
2.5.8 Miscellaneous.....	57
2.6 Biomedical Applications.....	57-66
2.6.1 Solubilization of Insoluble Drugs.....	57-58
2.6.2 Drug Delivery Applications .....	58-63
2.6.2.1 Controlled and Targeted Drug Delivery .....	59-61
2.6.2.2 Oral Drug Delivery .....	61
2.6.2.3 Transdermal Drug Delivery .....	62
2.6.2.4 Ocular and Pulmonary Drug Delivery .....	63
2.6.3 Applications in Gene Delivery .....	64
2.6.4 Applications as MRI Contrast Agent .....	64-65
2.6.5 Applications in Boron Neutron Capture Therapy (BNCT).....	65-66
2.6.6 Applications in Photodynamic Therapy (PDT) .....	66
<b>References.....</b>	<b>66-71</b>

**CHAPTER 3**

**Liposomes: Manufacturing and Applications**

*Varsha Tilwani, Priyanka Jain, Darshana Jain,  
Nishi Mody and Aviral Jain.....* **72-110**

3.1 Introduction.....	72
3.1.1 Structure of Liposomes .....	73

**(xviii) *Contents***

---

3.1.2	Composition of Liposomes.....	73-75
3.1.2.1	Phospholipids.....	73-75
3.1.2.2	Cholesterol .....	75
3.1.3	Bilayer Properties of Liposomes .....	76
3.2	Method of Preparation of Liposomes .....	76-90
3.2.1	Mechanical Dispersion .....	76-81
3.2.1.1	Hand Shaking Method .....	76-77
3.2.1.2	Non Shaking Method .....	77-78
3.2.1.3	Freeze Drying Method .....	78
3.2.1.4	Micro-Emulsification Method.....	78
3.2.1.5	Sonicated Vesicles .....	78-79
3.2.1.6	French Pressure Cell .....	79-80
3.2.1.7	High Pressure Membrane Extrusion ....	80-81
3.2.2	Solvent Dispersion Methods.....	81-86
3.2.2.1	Ethanol Injection Method.....	82
3.2.2.2	Ether Injection Method .....	82-83
3.2.2.3	Double Emulsion Vesicles .....	83-84
3.2.2.4	Multivesicular Liposomes.....	85
3.2.2.5	Reverse Phase Evaporation Method ....	85-86
3.2.2.6	Stable Plurilamellar Vesicles (SPLV).....	86
3.2.3	Detergent Removal (Depletion) Method .....	86-87
3.2.4	Active Loading.....	87-88
3.2.5	pH Gradient Drug Loading.....	89
3.2.6	Lyophilization of Liposomes.....	89-90
3.3	Liposomes Scale up and Manufacturing Issues .....	90-93
3.3.1	Removal of Traces of Organic Solvents.....	90-91
3.3.2	Protection of Phospholipids from Oxidation .....	91
3.3.3	Removal of Endotoxins .....	91-92
3.3.4	Removal of Un-entrapped Drug .....	92
3.3.5	Sterilization of Liposomes.....	93
3.4	Characterizations of Liposomes.....	93-97
3.4.1	Chemical Analysis .....	93-95
3.4.1.1	Quantitative Determination of Phospholipid .....	93-94

## **Contents (xix)**

---

3.4.1.2	Estimation of Phospholipid Oxidation ..	94-95
3.4.1.3	Quantitation of $\alpha$ -Tocopherol.....	95
3.4.2	Physical Characterization .....	95-97
3.4.2.1	Lamellarity Determination.....	95
3.4.2.2	Size Determination.....	95-96
3.4.2.3	Determination of Residual Organic Phase in Phospholipid Mixtures.....	96
3.4.2.4	Surface Charge of Utilized Lipids .....	96-97
3.4.2.5	Percent Drug Encapsulation.....	97
3.5	Applications of Liposomes .....	97-103
3.5.1	Liposomes used in Antimicrobial Drug Delivery.....	97-99
3.5.1.1	Viral .....	97-98
3.5.1.2	Protozoal .....	98
3.5.1.3	Bacterial .....	98-99
3.5.1.4	Fungal .....	99
3.5.2	Use of Liposomes in Cancer Therapy .....	99-101
3.5.3	Liposomes in Oxygen Transport .....	101
3.5.4	Liposomes in Enzyme Replacement Therapy .....	101
3.5.5	Liposomes in Metal Poisoning .....	101
3.5.6	Liposomes in Diagnostic Applications.....	102
3.5.7	Liposomes to Inhibit Immune Reactions.....	102
3.5.8	Liposomes as Vaccine Carriers .....	102-103
3.6	Stability of Liposomes.....	103-105
3.6.1	Chemical Stability .....	104-105
3.6.2	Physical Stability .....	105
3.7	Conclusion .....	105
	<b>References.....</b>	<b>106-110</b>

## **CHAPTER 4**

### **Carbon Nanotubes and their Applications in Drug Delivery**

***J.G. Meher, Nitin K. Jain and Manish K. Chourasia..... 111-143***

4.1	Introduction.....	111-113
-----	-------------------	---------

4.2 Brief History of CNTs .....	114
4.3 Classification .....	115-117
4.4 Physicochemical Properties of CNTs .....	118-120
4.5 Manufacturing Methods.....	121-124
4.5.1 Production Methods .....	121-123
4.5.1.1 Electric-arc Discharge .....	121-122
4.5.1.2 Catalytic Chemical Vapor Deposition ....	122
4.5.1.3 Laser Ablation.....	122-123
4.5.2 Purification Techniques.....	123-124
4.6 Functionalization of CNTs.....	124-128
4.7 Characterization Parameters .....	128-129
4.7.1 Size, Charge and Size Distribution.....	128
4.7.2 Morphology .....	128-129
4.7.3 Spectroscopic Evaluation .....	129
4.7.4 Miscellaneous Characterization .....	129
4.8 Release of Drug from CNTs .....	129-131
4.9 Fate of CNTs <i>In vivo</i> .....	131-133
4.10 Applications .....	133-138
4.10.1 Role of CNTs in Drug Delivery .....	134-135
4.10.2 Boosting up Immunity and Vaccination .....	136
4.10.3 Gene Delivery.....	136-137
4.10.4 Imaging Tools.....	137-138
4.10.5 Biomedical Applications .....	138
4.11 Toxicity Aspects .....	138-140
4.12 Future Prospects.....	140
<b>References .....</b>	<b>140-143</b>

## CHAPTER 5

### Target Oriented Nano-Carrier based Drug Delivery Systems

**P. Khare, V.K. Pawar and M. Chaurasia .....** **144-165**

5.1 Introduction.....	144-145
-----------------------	---------

5.2 Rationale for Nanocarrier based Targeted Drug Delivery .....	145-150
5.2.1 Passive Targeting .....	147
5.2.2 Active Targeting.....	147-150
5.3 Biological Processes Involved in Drug Targeting by Nanocarriers .....	150-160
5.3.1 Organ and Tissue Targeting .....	150-151
5.3.2 Cellular Targeting.....	151-152
5.3.3 Intracellular Targeting.....	152-154
5.3.4 Cellular Uptake and Processing.....	154-155
5.3.4.1 Cellular Phagocytosis.....	154
5.3.4.2 Cellular Pinocytosis .....	155
5.3.4.3 Receptor-mediated Endocytosis.....	155
5.3.5 Transport across Epithelium.....	156-158
5.3.6 Extravasation.....	158-159
5.3.7 Lymphatic Uptake .....	159-160
5.4 Pharmacokinetic and Pharmacodynamic Considerations .....	160-162
5.4.1 Blood Flow Rate.....	161
5.4.2 Distribution.....	161
5.4.3 Clearance/Excretion .....	161-162
<i>References.....</i>	<b>162-165</b>

## **CHAPTER 6**

### **Pegylation and Long-Circulating Nanoparticles**

***Neha Gupta and Prem N. Gupta..... 166-185***

6.1 Introduction.....	166-168
6.2 Properties of Ideal PEGylating Agent .....	169
6.3 Types of Conjugates .....	170
6.4 Designing PEGylated Conjugates .....	170-172
6.5 Bioactivity of PEGylated Conjugates.....	172-175

**(xxii) *Contents***

---

6.6 Rational of Long Circulation .....	175-177
6.6.1 Passive Targeting .....	175-176
6.6.2 Active Targeting.....	176
6.6.3 Circulating Drug Reservoir in the Blood Compartment .....	177
6.6.4 Artificial Oxygen Delivery Systems .....	177
6.6.5 Blood-Pool Imaging .....	177
6.7 Clearance of Nanoparticles from Body.....	177-178
6.8 Stealth Nanoparticles .....	178-181
6.8.1 Poly(ethylene glycol) Anchored Stealth Nanoparticles.....	179-180
6.8.2 Circulation Kinetics of Stealth Particles.....	180-181
6.8.3 Toxicity of the Long Circulating Pegylated Nanoparticles .....	181
6.9 Conclusion .....	181-182
<b>References .....</b>	<b>182-185</b>

**CHAPTER 7**

**Nanoparticles and Targeted Systems for  
Cancer Diagnosis and Therapy**

***S. Asthana, Nitin K. Jain and Manish K. Chourasia..... 186-216***

7.1 Introduction and Background .....	186-188
7.1.1 Cancer.....	186-187
7.1.1.1 TNM Cancer Staging .....	187
7.1.2 The Challenge of Cancer Therapy .....	187-188
7.1.3 Cancer Nanotechnology .....	188
7.2 Types of Nanoparticles as Delivery Systems.....	189-192
7.2.1 Polymer-based Drug Carriers .....	189-190
7.2.1.1 Polymeric Nanoparticles .....	189-190
7.2.1.2 Polymeric Micelles .....	190
7.2.1.3 Dendrimers.....	190

---

**Contents (xxiii)**

7.2.2	Lipid-based Drug Carriers.....	191
7.2.2.1	Liposomes .....	191
7.2.3	Carbon Nanotubes .....	191-192
7.3	Targeted Delivery of Nanoparticles.....	192-204
7.3.1	Size and Surface Characteristics of Nanoparticles.....	193-194
7.3.1.1	Size.....	193
7.3.1.2	Surface Characteristics.....	194
7.3.2	Passive targeting by Nanoparticles.....	194-196
7.3.2.1	Enhanced Permeability and Retention Effect .....	194-195
7.3.2.2	Tumor Microenvironment.....	196
7.3.3	Active Targeting by Nanoparticles.....	196-204
7.3.3.1	Folate Receptors.....	197-198
7.3.3.2	Targeting through Angiogenesis.....	198-200
7.3.3.3	Targeting to Specific Organs or Tumor Types .....	200-204
7.4	Cancer Diagnosis .....	204-207
7.4.1	Biopsy.....	204
7.4.2	Endoscopy .....	204
7.4.3	Blood Tests.....	204
7.4.4	Diagnostic Imaging .....	205-207
7.4.4.1	Ultrasound .....	205
7.4.4.2	X-rays .....	205
7.4.4.3	X-ray-based Computer-assisted Tomography or CT Scan.....	205
7.4.4.4	Radionuclide Imaging .....	205-206
7.4.4.5	Magnetic Resonance Imaging (MRI).....	206
7.4.4.6	Fluoresce Optical Imaging .....	206-207
7.5	Nanoparticulate Contrast Agents for Imaging .....	207-214
7.5.1	Inorganic Nanoparticles for Imaging.....	208-209
7.5.1.1	Fluorescent Nanoparticles for Optical Imaging .....	208

7.5.1.2 Magnetic Nanoparticles .....	209
7.5.1.3 Raman Probes .....	209-211
7.5.1.4 Colloidal Gold Nano-Rods/ Particles.....	211-212
7.5.2 Targeting Tumor Vasculature for Imaging.....	212-214
<b>References.....</b>	<b>214-216</b>

## CHAPTER 8

### Transdermal Drug Delivery Systems

*D. Mishra and P. Bhatnagar.....* **217-256**

8.1 Introduction.....	217-220
8.1.1 Transdermal Drug Delivery System (TDDS)..	218-219
8.1.1.1 Merits of TDDS .....	219
8.1.1.2 Demerits of TDDS .....	219
8.1.2 Ideal Requirements of Drug for Transdermal Delivery.....	220
8.1.3 Topical v/s Transdermal Delivery .....	220
8.2 Anatomy and Physiology of Human Skin .....	221-223
8.2.1 Subcutaneous Tissue (ST) .....	222
8.2.2 Functions of Human Skin .....	222
8.2.3 Possible Drug Delivery Channels <i>via</i> Skin .....	223
8.3 Factors Affecting TDDS .....	223-225
8.3.1 Physiological Factors .....	223-225
8.3.2 Dosage form Related Factors .....	225
8.3.3 Physicochemical Properties of Enhancers.....	225
8.4 Approaches for TDDS .....	226-229
8.4.1 Membrane Permeation Controlled TDDS .....	226-227
8.4.2 Polymer Matrix Diffusion Controlled TDDS..	227-228
8.4.3 Drug Reservoir Gradient Controlled TDDS.....	228
8.4.4 Microreservoir Dissolution Controlled TDDS .....	229
8.5 Transdermal Patches (TDP).....	230-233
8.5.1 How a TDP Works? .....	230
8.5.2 Conditions in which TDP can be used .....	231

---

**Contents (xxv)**

8.5.3	Conditions in which TDP is not used .....	231
8.5.4	What Care should be taken while Applying a TDP?.....	231
8.5.5	Types of TDP .....	231-233
8.6	Generations of TDP .....	233-234
8.7	Components of TDP .....	234-236
8.7.1	Drug.....	234
8.7.2	Polymer Matrix.....	234
8.7.3	Permeation Enhancers .....	235
8.7.4	Pressure Sensitive Adhesive (PSA).....	235
8.7.5	Backing Laminate.....	235
8.7.6	Release Liner.....	236
8.7.7	Plasticizers.....	236
8.8	Methods of Preparation of TDP .....	236-238
8.8.1	Asymmetric Membrane TPX Method .....	236
8.8.2	Circular Teflon Mould Method .....	237
8.8.3	IPM Membrane Method .....	237
8.8.4	EVAC Membrane Method .....	237-238
8.9	Evaluation of TDP .....	238-241
8.9.1	Moisture Content Study.....	238-239
8.9.2	Tensile Strength Test.....	239-240
8.9.3	<i>In-Vitro</i> Release Study .....	240
8.9.4	Skin Permeation Study .....	240
8.9.5	<i>In-Vivo</i> Study.....	240-241
8.10	Clinical Trial Overview of TDP .....	241
8.11	Marketed TDP.....	241-242
8.12	Current Limitations of TDSS .....	242
8.13	Advancements in TDSS .....	242-253
8.13.1	Iontophoresis .....	243-244
8.13.2	Sonophoresis or Phonophoresis.....	244-245
8.13.3	Electrophoresis .....	245
8.13.4	Skin Ablation.....	246
8.13.5	Microneedle Technique (MN).....	246

**(xxvi)    *Contents***

---

8.13.6 Prodrug Method.....	247
8.13.7 Ion pair Method .....	247-248
8.13.8 Vesicular Systems .....	248-253
8.13.8.1 Transfersomes (TFS).....	249
8.13.8.2 Ethosomes (ES).....	251-252
8.13.8.3 Evaluation of TFS and ES.....	253
8.14 Future Prospects of TDDS .....	254
<i>References</i> .....	254-256

**CHAPTER 9**

**Nanosized Materials used in Diagnosis**

<i>Y. Singh and Manish K. Chourasia</i> .....	257-277
9.1 Introduction.....	257-259
9.2 Nanosized Materials used for Clinical Laboratory Diagnosis.....	259-271
9.2.1 Nanoparticles.....	259-271
9.2.1.1 Gold Nanoparticles .....	259-262
9.2.1.2 Quantum Dots .....	262-264
9.2.1.3 Dendrimers.....	264-266
9.2.1.4 Magnetic Nanoparticles .....	266-267
9.2.1.5 Polymeric Nanoparticles .....	267-269
9.2.1.6 Hybrid Particles .....	270-271
9.3 Carbon Nanotubes.....	271-274
9.4 NANO-BIOCHIP [LAB-ON-CHIP (LOC) Technique] .....	274
9.5 Toxicity Aspects of Nano-Diagnostics .....	275
9.6 Future Outlook .....	275-276
<i>References</i> .....	276-277

**CHAPTER 10**

**Solid Lipid Nanoparticles: A Promising Colloidal Carrier**

<i>D. Mishra, V. Dhote and P. K. Mishra</i> .....	278-301
10.1 Introduction.....	278-281

---

**Contents (xxvii)**

10.2	Solid Lipid Nanoparticles (SLN) .....	281-284
10.2.1	Mechanism of Preparation of SLN.....	282
10.2.2	Advantages of SLN .....	283
10.2.3	Disadvantages of SLN.....	283
10.2.4	Aims of SLN Preparation .....	283-284
10.2.5	Components of SLN .....	284
10.3	Formulation of SLN.....	285-289
10.3.1	High Pressure Homogenization (HPH) .....	285-286
10.3.1.1	Hot HPH .....	285
10.3.1.2	Cold HPH .....	286
10.3.2	Ultrasonic Homogenization.....	286-287
10.3.3	Micro-Emulsion based Method .....	287
10.3.4	Spray Drying Technique .....	288
10.3.5	Supercritical Fluid (SCF) Method .....	288-289
10.4	Ancillary Processing of SLN .....	289-290
10.5	Exsiccation of SLN .....	290
10.6	Characterization of SLN .....	290-293
10.6.1	Particle Size .....	291
10.6.2	Zeta Potential.....	291-292
10.6.3	Drug Content Estimation.....	292
10.6.4	Differential Scanning Calorimetry (DSC).....	292
10.6.5	Fourier Transform Infrared Spectroscopy (FTIR) .....	292
10.6.6	X-ray Diffraction .....	292
10.6.7	<i>In vitro</i> Drug Release .....	293
10.6.8	Stability Studies.....	293
10.7	Route of SLN Administration.....	293-295
10.7.1	Oral Route .....	293-294
10.7.2	Topical Route .....	294
10.7.3	Parenteral Route .....	294-295
10.7.4	Pulmonary Administration .....	295
10.8	Pharmaceutical Applications of SLN.....	295-297
10.8.1	Cosmetics Vehicle .....	296

**(xxviii) *Contents***

---

10.8.2 Drug Carrier .....	296
10.8.3 Gene Delivery.....	296
10.8.4 Targeted Delivery.....	296-297
<b>References.....</b>	<b>297-301</b>

**CHAPTER 11**

**Niosomes Mediated Drug Delivery**

***J.G. Meher, M. Chaurasia and Manish K. Chourasia.... 302-329***

11.1 Introduction.....	302-308
11.1.1 Classification .....	304-306
11.1.1.1 Elastic Niosomes .....	304-305
11.1.1.2 Proniosomes .....	305
11.1.1.3 Discomes .....	305
11.1.1.4 Aspasomes.....	305
11.1.1.5 Surfactant Ethosomes .....	306
11.1.1.6 Bola Surfactant Niosomes .....	306
11.1.2 Advantages and Disadvantages .....	306
11.1.3 Root of Administration.....	307-308
11.1.3.1 Oral.....	307
11.1.3.2 Transdermal.....	307-308
11.1.3.3 Ocular .....	308
11.2 Materials used in Niosomes Preparation.....	309-312
11.2.1 Non-Ionic Surfactants.....	309-311
11.2.2 Additives .....	311-312
11.2.2.1 Cholesterol.....	311
11.2.2.2 Charged Molecules .....	311-312
11.2.3 Dispersion Medium .....	312
11.3 Methods of Preparation of Niosomes .....	312-316
11.3.1 Reverse Phase Evaporation Method.....	312-313
11.3.2 Ether Injection Method.....	313
11.3.3 Trans-Membrane pH Gradient Method .....	313-314
11.3.4 Sonication Method .....	314
11.3.5 Lipid Layer Hydration Method .....	315

## ***Contents (xxix)***

---

11.3.6 Bubbling of Nitrogen Method .....	315
11.3.7 Extrusion Method .....	315
11.3.8 Hand Shaking Method.....	316
11.3.9 High Pressure Homogenization.....	316
11.4 Characterization .....	316-321
11.4.1 Size, Shape and Surface Morphology .....	317-318
11.4.2 Vesicle Charge .....	318
11.4.3 Entrapment Efficiency (EE) .....	318-319
11.4.4 <i>In vitro</i> Drug Release .....	319-320
11.4.5 <i>In vitro</i> Toxicity.....	320
11.4.6 <i>In vivo</i> Studies .....	320-321
11.4.7 Stability .....	321
11.5 Factors affecting the Preparation of Niosomes .....	321-323
11.5.1 Method of Preparation.....	321-322
11.5.2 Effect of Excipients .....	322
11.5.3 Effect of Temperature.....	322-323
11.5.4 Effect of pH of the Dispersion Medium .....	323
11.5.5 Effect of Encapsulated Drug .....	323
11.6 Applications .....	323-326
11.6.1 Controlled/Sustained Drug Delivery .....	324
11.6.2 Modulation of Physicochemical Characteristics of Drug.....	324
11.6.3 Transdermal Delivery.....	324-325
11.6.4 Pulmonary Delivery .....	325
11.6.5 Treatment of Infectious Disease .....	325
11.6.6 Ophthalmic Delivery .....	325
11.6.7 Vaccine Delivery .....	326
11.6.8 Protein and Peptide Delivery.....	326
11.6.9 Cancer Chemotherapy .....	326
11.7 Future Prospects.....	326-327

## CHAPTER 12

### Microparticles as Drug Delivery Systems

*J.G. Meher and Manish K. Chourasia* ..... 330-407

12.1	Introduction.....	330-338
12.1.1	A Brief History of Microparticles .....	333-334
12.1.2	Types of Microparticles.....	334-337
12.1.3	Salient Features and Drawbacks.....	338
12.2	Pharmaceutical Excipients and Active Pharmaceutical Ingredients used in Microparticles .....	338-348
12.2.1	Polymers.....	339-344
12.2.2	Solvents .....	345
12.2.3	Cross Linking Agents.....	346
12.2.4	Stabilizers .....	347
12.2.5	Active Pharmaceutical Ingredients (Core Material) .....	347-348
12.3	Preformulation Aspects in Microparticles .....	348-350
12.3.1	Physicochemical Characteristics of API and excipients .....	349
12.3.2	Inter-Excipients and Drug-Excipients Compatibility.....	349-350
12.4	Microparticles Preparation Techniques .....	350-365
12.4.1	Interfacial Polymerization .....	351-354
12.4.1.1	Dispersion Polymerization .....	351-352
12.4.1.2	Emulsion Polymerization .....	352-353
12.4.1.3	Suspension Polymerization .....	353-354
12.4.2	Emulsion Solvent Evaporation .....	354-356
12.4.2.1	Single Emulsion .....	354-355
12.4.2.2	Double Emulsion.....	355-356
12.4.3	Coacervation Phase Separation .....	356-361
12.4.3.1	Salt Addition.....	357-358
12.4.3.2	Non-Solvent Addition .....	358-359
12.4.3.3	Temperature Change .....	359-360

## **Contents (xxxi)**

---

12.4.3.4	Polymer-Polymer Interaction .....	360
12.4.3.5	Incompatible Polymer Addition ....	360-361
12.4.4	Spray drying and Congealing .....	361-362
12.4.5	Advanced Methods .....	362-365
12.4.5.1	Extrusion Method .....	363
12.4.5.2	Supercritical Fluid Method.....	363
12.4.5.3	Ink-/liquid-jet Technology.....	363-364
12.4.5.4	Microsieve Technology.....	364
12.4.5.5	Microfluidics Technique .....	364-365
12.4.5.6	Electrospray Technique.....	365
12.5	Characterization of Microparticles .....	365-376
12.5.1	Size, Shape, Charge and Surface Morphology .....	365-366
12.5.2	Flow Properties.....	366-367
12.5.3	Thermal Analysis .....	367
12.5.4	Encapsulation Efficiency (EE) .....	367-368
12.5.5	<i>In vitro</i> Drug Release .....	368-369
12.5.6	<i>Ex vivo</i> Drug Permeation.....	369-370
12.5.7	<i>In vitro</i> Toxicity.....	370-371
12.5.8	Specific Analysis based on Type of Microparticles .....	371-372
12.5.9	<i>In vivo</i> Imaging of Microparticles .....	372-373
12.5.10	Stability Studies.....	373-374
12.5.11	<i>In vivo</i> Studies .....	374-375
12.5.12	<i>In vitro-in vivo</i> Correlation (IVIVC) .....	375-376
12.6	Sterilization of Microparticles .....	376-377
12.7	Factors Influencing Microparticle Formulation-Development and Characteristics .....	377-382
12.7.1	Method of Preparation.....	377-379
12.7.2	Pharmaceutical Excipients, API and Other Raw Materials .....	379-381
12.7.3	Temperature.....	381
12.7.4	pH of Solvents .....	381-382

**(xxxii) *Contents***

---

12.8	Scale up in Microparticles .....	382-383
12.9	Pharmaceutical Applications .....	383-398
12.9.1	Sustained, Controlled and Targeted Drug Delivery.....	384-385
12.9.2	Topical and Transdermal Drug Delivery.....	385-386
12.9.3	Nasal and Pulmonary Drug Delivery .....	386-388
12.9.4	Oral Drug Delivery .....	388-391
12.9.5	Parenteral Drug Delivery .....	391-392
12.9.6	Ocular Drug Delivery .....	392-393
12.9.7	Protein and Gene Delivery .....	393-394
12.9.8	Vaccine Delivery.....	394-395
12.9.9	Enzyme and Growth Factor Delivery.....	395-396
12.9.10	Radio Diagnostics.....	396-397
12.9.11	Miscellaneous Applications .....	397-398
12.10	Future Prospectives.....	398
	<b>References.....</b>	<b>398-407</b>
	<b>Index.....</b>	<b>409-420</b>
