<i>Preface</i>	(vii)
----------------------	-------

Part I

CHAPTER 1

Matrices	3
1.1 Introduction	3
1.2 Definition of Matrix	3
1.3 Echelon Form of a Matrix	20
1.4 Rank of a Matrix.....	20
1.5 Normal Form or Canonical Form	30
1.6 Simultaneous Linear Equations	43
1.7 Eigen Values and Eigen Vectors	70
1.8 Cayley-Hamilton Theorem	94

CHAPTER 2

Complex Numbers	112
2.1 Introduction	112
2.2 Complex Number	113
2.3 Equality of Complex Numbers	113
2.4 Algebra of Complex Numbers.....	114
2.5 Properties of Addition of Complex Numbers	114
2.6 Properties of Multiplication of Complex Numbers	115
2.7 Modulus of a Complex Number	117
2.8 Conjugate of a Complex Number	117
2.9 Argument or Amplitude of a Complex Number.....	118
2.10 Polar Form of a Complex Number	120
2.11 Properties of Moduli.....	121
2.12 Properties of Conjugates.....	123
2.13 Properties of Argument	125

2.14	Any Root of an Imaginary Number is an Imaginary Number	126
2.15	Square Root of a Complex Number	126
2.16	Cube Roots of Unity	127
2.17	De Moivre's Theorem	129
2.18	nth Roots of Unity	130
2.19	Properties of nth Roots of Unity	131
2.20	Argand Plane and Geometrical Representation of Complex Numbers	131
2.21	Geometrical Representation of some Complex Numbers	132
2.22	Hyperbolic Functions	153
2.23	Gregory's Series	170
2.24	Summation of Series	181

CHAPTER 3

Theory of Equations..... 196

3.1	Introduction	196
3.2	Theory of Equation.....	196
3.3	Establish Cardon's Method of Solving Cubic Equation.....	198
3.4	Obtain the Reducing Cubic of the Biquadratic Equation $ax^4 + 4bx^3 + 6cx^2 + 4dx + e = 0$	199
3.5	Find out the Relation between the Roots of the Biquadratic and Euler's Cubic	202
3.6	Establish a Relation between the Roots of the Biquadratic and the Reducing Cubic	203
3.7	State Descarte's Rule of Signs.....	205
3.8	State and Prove Factor Theorem	205
3.9	The Imaginary Roots of an Equation with Real Coefficients always occur in Conjugate Pair	206
3.10	Apply Descarte's Rule of Sign to Discuss the Nature of the Roots of the Equation	207
3.11	Find the Minimum Number of Imaginary Roots which the Equation $2x^7 - x^4 + 4x^3 - 5 = 0$ must Possess.....	208
3.12	Empirical Law	236
3.13	Curve Fitting.....	236
3.14	Graphical Method.....	236

3.15	Determination of other Empirical Laws Reducible to Linear Form.....	236
3.16	Principle of Least Squares	239
3.17	Method of Least Squares	240
3.18	Change of Scale	244

Part II

CHAPTER 4

Successive Differentiation..... 253

4.1	Definitions and Notations.....	253
4.2	Formulae for n^{th} Derivative of some Standard Functions.....	269
4.3	Rules for finding n^{th} Derivatives	279
4.4	Method of Determination of the n^{th} Derivative of an Algebraic Rational Function.....	281
4.5	Some Important Results	283
4.6	Power Series	302
4.7	Taylor's (Infinite) Series [Elementary Treatment].....	302
4.8	Maclaurin's Series [Elementary Discussion].....	304
4.9	Expansions based on Algebraic and Trigonometrical Series	306
4.10	Differentiation and Integration of Power Series.....	306
4.11	Working Rule for Selection of Method for Expansion.....	307

CHAPTER 5

Partial Differentiation..... 322

5.1	Functions of Two Real Variables.....	322
5.2	Partial Derivatives	322
5.3	Partial Derivatives of Second and Higher Orders.....	325
5.4	Total Differential	341
5.5	Total Differential Co-efficient.....	343
5.6	An Important Result	344
5.7	Differentiation of Implicit Functions.....	344
5.8	Homogeneous Function.....	345
5.9	Euler's Theorem on Homogeneous Functions of Two Independent Variables.....	346

5.10	Euler’s Theorem on Homogeneous Function of Three Independent Variables	348
5.11	Extension of Euler’s Theorem in the Cases of Any Number of Independent Variables	351
5.12	To obtain the following Results if u be a Homogenous Function of Two Independent Variables x and y and of Degree n	351
5.13	Laplace’s Equation	353
5.14	An Interesting Observation	353
5.15	Jacobian	354
5.16	Exact Differential	374
5.17	An Important Theorem	375
5.18	Maxima and Minima of Functions of Two Variables	380
5.18.1	Lagrange’s Method of Undetermined Multipliers	384
CHAPTER 6		
	Reduction Formulae	394
CHAPTER 7		
	Curve Tracing	433
CHAPTER 8		
	Areas of Plane Curves (Quadrature)	454
CHAPTER 9		
	Lengths of Plane Curves (Rectification)	496
CHAPTER 10		
	Volumes and Surfaces of Solids of Revolution	534
CHAPTER 11		
	Centroid (Centre of Gravity) and Moment of Inertia	580

CHAPTER 12

Beta and Gamma Functions..... 617

CHAPTER 13

Multiple Integrals..... 634

13.1 Change of Order of Integration (Change of Variables) 643
 13.1.1 Changing from Cartesian to Polar co-ordinates 643
 13.1.2 Change of Order of Integration 646
 13.2 Triple Integration..... 650

CHAPTER 14

Vector Calculus 661

14.1 Vector Differentiation..... 661
 14.1.1 Vector Point Function and Vector Field 661
 14.1.2 Differentiation of a Vector 662
 14.1.3 Application to Space Curves 663
 14.2 Gradient of Scalar Function..... 664
 14.2.1 The Vector differential Operator ‘DEL’ or ‘NABLA’, denoted
 as ‘ ∇ ’ is defined by..... 664
 14.2.2 Gradient..... 664
 14.2.3 Physical significance of ‘grad ϕ ’ 664
 14.2.4 Directional Derivative..... 665
 14.2.5 Some basic properties of the Gradient 665
 14.3 The Divergence of a Vector Function 673
 14.3.1 Definition 673
 14.3.2 Physical Significance of the Divergence..... 673
 14.3.3 Some properties of Divergence..... 673
 14.3.4 Solenoidal Vectors 674
 14.4 Curl of a Vector Function 679
 14.4.1 If A is a Differential Vector Function, then curl A is defined
 as, $\text{curl } A = \nabla \times A$ 679
 14.4.2 Physical Significance of Curl..... 680
 14.4.3 Irrotational Vector 680

14.4.4	Properties	680
14.4.5	Conservative Vector Field.....	681
14.5	Laplacian Operator ∇^2	689
14.5.1	Definition	689
14.5.2	Vector Identities	689
14.5.3	Operation of ∇ on Product of Two Functions	692
14.6	Vector Integration.....	697
14.6.1	Ordinary Integration of Vectors.....	697
14.6.2	Line Integrals	698
14.6.3	Physical Applications.....	699
14.6.4	Theorem	699
14.7	Surface Integrals.....	714
14.7.1	Definition	714
14.7.2	Definition of Surface Integral as the Limit of a Sum.....	716
14.7.3	Evaluation of a Surface Integral.....	716
14.7.4	Physical Interpretation of Surface Integrals.....	717
14.8	Volume Integrals	726
14.8.1	Expression of Volume Integral as the Limit of a Sum.....	726
14.9	Green's Theorem in the Plane	732
14.9.1	Green's Theorem	732
14.9.2	Vector Notation of Green's Theorem	733
14.9.3	Physical Interpretation of Green's Theorem.....	734
14.9.4	Application of Green's Theorem to the Evaluation of Area of a Simple Closed Curve.....	734
14.10	Gauss Divergence Theorem.....	746
14.11	Stoke's Theorem.....	759

Part III

CHAPTER 15

Fourier Series	779
15.0 Introduction	779

15.1	Periodic Functions	779
15.1.1	Even and Odd Functions	780
15.2	Fourier Series	784
15.2.1	Introduction	784
15.2.2	Trigonometric Series	784
15.2.3	Theorem	784
15.2.4	Fourier Series	787
15.2.5	Convergence of Fourier Series	787
15.2.6	Dirichlet's Theorem	787
15.2.7	Summary	788
15.3	Change of Interval [Functions with Arbitrary Periods]	813
15.3.1	Euler's formulae for functions having a period ' $2l$ ' where l is any Positive Number	813
15.4	Fourier Series of Even and Odd Functions	826
15.4.1	Even functions	826
15.4.2	Odd functions	827
15.5	Half Range Series	836
15.5.1	Half Range Sine Series	836
15.5.2	Half Range Cosine Series	837

Part IV

CHAPTER 16

Differential Equations of First Order and their Applications 853

16.1	Introduction	853
16.2	Formation of an Ordinary D.E.	855
16.3	The Differential Equations of the First Order and of the First Degree	860
16.3.1	Separation of Variables	860
16.3.2	Homogeneous Equations	863
16.3.3	Non-Homogeneous Differential Equations	868
16.4	Linear Differential Equations	874
16.4.1	Non-linear Differential Equation of First Order	880

16.5	Exact Differential Equations	886
16.5.1	Integrating Factors	888
16.5.2	First Method to find an Integrating Factor	889
16.5.3	Second Method to Find the Integrating Factor.....	890
16.5.4	Third Method to Find the Integrating Factor	892
16.5.5	Fourth Method to Find the Integrating Factor.....	894
16.5.6	Fifth Method for Finding Integrating Factor.....	896
16.6	Equations of First Order but of Higher Degree	899
16.6.1	Equations which can be solved for p.....	899
16.6.2	Equations Solvable for y	906
16.6.3	Equation Solvable for x.....	906
16.6.4	Clairaut's Equation.....	916
16.6.5	Lagrange's Equations.....	919
16.6.6	Equations reducible to Clairaut's Form	920
16.7	Applications to Geometry, Law of Natural Growth and Newton's Law of Cooling	922
16.8	Applications to Electrical Circuits.....	929
16.9	Applications to Heat Conduction (or Heat Flow) Problems.....	930
16.10	Applications to Problems of Newton's Law of Cooling	932
16.11	Applications to Problems on Chemical Reactions.....	933

CHAPTER 17

	Higher Order Linear Differential Equations and their Applications	935
17.1	Linear Differential Equation.....	935
17.1.1	Complementary Function (C.F)	936
17.2	Particular Integral	942
17.2.1	Methods of finding P.I.	945
17.3	Cauchy's Homogeneous Linear Equation	962
17.4	Legendre's Linear Equation	967
17.5	Linear Differential Equations of Second Order-Method of Variation of Parameters.....	970

17.6	Applications.....	975
17.6.1	Bending of Beams	975
17.6.2	Boundary Conditions	977
17.6.3	Electrical Circuits.....	987
17.6.4	Simple Harmonic Motion.....	996

CHAPTER 18

Partial Differential Equations..... 1004

18.1	Partial Differential Equations	1004
18.1.1	Introduction.....	1004
18.1.2	Formation of a Partial Differential Equation by the Elimination of Arbitrary Constants	1005
18.2.	Formation of the Partial Differential Equations by the Elimination of Arbitrary Functions	1008
18.3	First Order linear Partial Differential Equations	1013
18.3.1	Lagrange's Equation.....	1013
18.3.2	Multipliers Method to solve the Lagrange's Partial Differential Equations	1018
18.4	Non-linear Partial Differential Equations of Order One.....	1025
18.4.1	Definitions.....	1025
18.4.2	Standard Form I : (Equations involving p and q only).....	1026
18.4.3	Standard Form II	1030
18.4.4	Standard Form III	1034
18.4.5	Standard Form –IV (CLAIRAUT’S TYPE)	1037

CHAPTER 19

Solution of Partial Differential Equations 1070

19.1	Partial Differential Equations – Applications.....	1070
19.1.1	Some of the important partial differential equations which occur in the study of Engineering and Physical problems are	1070
19.2	One-dimensional Wave Equation.....	1074

19.3	One Dimensional Heat Equation	1086
19.4	Heat Equation with Non-homogenous Boundary Conditions	1099
19.5	Two Dimensional Heat Flow (Laplace Equation in Two Dimensions)....	1107

CHAPTER 20

Solution in Series 1116

20.1	Ordinary and Singular Points of a Differential Equation	1116
20.2	Working Rule when $x = 0$ is a Singular Point	1116
20.3	Solution of Differential Equation in a Series when $x = 0$ is an Ordinary Point. i.e., when P_0 does not Vanish for $x = 0$	1125

Part V

CHAPTER 21

Functions of a Complex Variable 1131

21.1	Introduction	1131
21.1.1	Complex Numbers	1131
21.1.2	The Four Fundamental Operations of Complex Numbers	1132
21.1.3	Graphical Representation of Complex Numbers	1132
21.1.4	Polar Form or Mod-Amp Form of Complex Numbers	1133
21.1.5	Some More Properties of Moduli and Arguments	1135
21.1.6	De Moivre’s Theorem.....	1136
21.1.7	Vector Representation of Complex Numbers	1136
21.1.8	Loci of ‘z’	1137
21.1.9	Point Sets [Regions in z – plane]	1144
21.1.10	The Extended z – plane	1148
21.2	Functions, Limits and Continuity	1148
21.2.1	Variables and Functions.....	1148
21.2.2	Single and Multiple – valued Functions	1149
21.2.3	Inverse Functions	1149
21.2.4	Transformations	1149
21.2.5	Limits	1150

21.2.6	Theorems on Limits (Without Proof).....	1151
21.2.7	Continuity	1153
21.2.8	Theorems on Continuity (without proof)	1154
21.3	Differentiability – Analytic Functions	1157
21.3.1	Differentiability-Derivative.....	1157
21.3.2	Differentiability \Rightarrow Continuity	1158
21.3.3	Elementary Properties of Derivatives	1158
21.3.4	Analytic Functions	1160
21.3.5	Cauchy – Riemann Equations [C – R Equations]	1160
21.3.6	Cauchy – Riemann Equations in Polar Coordinates	1163
21.3.7	Complex Form of C – R Equations.....	1164
21.3.8	Harmonic Functions	1164
21.3.9	Harmonic Conjugates.....	1165
21.3.10	Singular Point (Singularity)	1165
21.3.11	Maximum – Modulus Theorem	1165
21.4	Methods of Construction of an Analytic Function $f(z) = u + iv$	1179
21.4.1	Method of finding v given u	1179
21.4.2	To Find u Given v	1180
21.4.3	Milne – Thompson Method.....	1180
21.4.4	Given $(u - v)$ or $(u + v)$, to find $f(z)$	1181
21.4.5	Application of Analytic Functions	1181
21.5	Elementary Functions	1197
21.5.1	Polynomial Functions.....	1197
21.5.2	Rational Algebraic Functions	1197
21.5.3	Exponential Function, (e^z)	1197
21.5.4	Trigonometric Functions.....	1198
21.5.5	Hyperbolic Functions.....	1199
21.5.6	Logarithmic Function: (Inverse of Exponential Functions).....	1201
21.5.7	Inverse Trigonometric Functions	1202
21.5.8	Inverse Hyperbolic Functions	1203
21.5.9	The Exponential Functions, z^a	1204

CHAPTER 22

Complex Integration 1206

22.1 Introduction of Line Integral 1206
 22.1.1 Properties of Contour Integrals 1207

22.2 Curves and Regions 1215
 22.2.1 Definitions 1215
 22.2.2 Cauchy’s Integral Theorem (Cauchy’s Theorem) 1216
 22.2.3 Cauchy’s Theorem for Doubly Connected Regions 1217
 22.2.4 Cauchy’s Integral Formulae (C.I.F.) 1218
 22.2.5 Cauchy’s Integral Formula for Multiply Connected Region 1220

22.3 Complex Variable 1250
 22.3.1 Absolute Convergence 1250
 22.3.2 Uniform Convergence 1250
 22.3.3 Power Series 1250
 22.3.4 Taylor’s Theorem 1251
 22.3.5 Laurent’s Theorem 1252

22.4 Zeros of an Analytic Function 1255
 22.4.1 Singularity of a Function 1256

22.5 Contour Integration 1258
 22.5.1 Introduction – Residue of $f(z)$ 1258
 22.5.2 Residue at a Pole of Order m 1258
 22.5.3 Residue at a Simple Pole ($m = 1$) 1259
 22.5.4 Evaluation of Integrals using Residues 1260
 22.5.5 Cauchy’s Residue Theorem 1261

22.6 Application of Residue Theorem to Evaluate Some Real Definite Integrals 1267
 22.6.1 Type I: Integration around a Unit Circle 1267

CHAPTER 23

Fourier Transforms 1276

23.1 Integral Transforms 1276
 23.1.1 Definition of Integral Transform 1276
 23.1.2 Fourier Integral Theorem 1277
 23.1.3 Fourier Sine and Cosine Integrals 1279
 23.1.4 Complex Form of Fourier Integrals 1280

23.2	Fourier Transforms	1287
23.2.1	Definitions	1287
23.2.2	Fourier Cosine Transforms	1288
23.2.3	Fourier Sine Transforms	1288
23.2.4	Properties of Fourier Transforms	1290
23.3	Finite Fourier Transforms	1304
23.4	Convolution Theorem.....	1310
23.4.1	Convolution of Two Functions	1310
23.4.2	Parseval's Identity	1311
23.5	Applications of Fourier Transforms in Initial and Boundary Value Problems	1320

CHAPTER 24

Laplace Transforms 1338

24.1	Introduction	1338
24.1.1	Definition	1338
24.1.2	Conditions for L.T to exist.....	1339
24.1.3	Linearity Property	1339
24.1.4	First Shifting, Second Shifting and Change of Scale Properties.....	1340
24.1.5	Laplace Transforms of Standard Functions	1341
24.1.6	Multiplication by “t”	1346
24.1.7	Division By ‘t’	1349
24.1.8	Laplace Transform of Derivatives	1352
24.1.9	Laplace Transform of Integrals.....	1354
24.1.10	Laplace Transforms of Periodic Functions	1357
24.1.11	Laplace Transform of the Unit Step Function (Heavisides Unit Function)	1364
24.1.12	Heaviside Shift Theorem.....	1364
24.1.13	Dirac Delta Function (Unit Impulse Function)	1365
24.2	Inverse Laplace Transforms	1368
24.2.1	Table of Inverse Transforms	1369
24.2.2	Method of Partial Fractions.....	1372
24.2.3	First Shifting Theorem	1376

24.2.4	Second Shifting Theorem.....	1379
24.2.5	Change of Scale Property.....	1383
24.2.6	Inverse Laplace Transform of Derivatives.....	1386
24.2.7	Inverse Laplace Transform of Integrals.....	1387
24.2.8	Multiplication by powers of s.....	1387
24.2.9	Division by powers of 's'.....	1387
24.2.10	Theorem.....	1388
24.2.11	Convolution.....	1389
24.2.12	Convolution Theorem (Convolution Property).....	1390
24.2.13	Application of Laplace Transform to Solutions of Ordinary Differential Equations.....	1412

CHAPTER 25

Z-Transforms and Applications 1422

25.1	Introduction.....	1422
25.2	Z-transform.....	1422
25.3	Properties of Z-Transforms.....	1423
25.4	Theorem.....	1429
25.5	Change of Scale.....	1429
25.6	Shifting Property.....	1430
25.7	Inverse Z-Transform.....	1431
25.8	Solution of Difference Equations.....	1432
25.9	Multiplication by K.....	1433
25.10	Division by K.....	1434
25.11	Initial Value.....	1434
25.12	Final Value.....	1434
25.13	Partial Sum.....	1435
25.14	Convolution.....	1436
25.15	Convolution Property of Casual Sequence.....	1436
25.16	Transform of Important Sequences.....	1438
25.17	Final Value Theorem.....	1440
25.18	By Binomial Expansion and Partial Fraction.....	1444
25.19	Partial Fractions.....	1447
25.20	Inversion by Residue Method.....	1457
25.21	Solution of Difference Equation.....	1462
