Chapter 1 **Measurement Systems – An Overview and Basic Concepts** **1**

1.1	Introduction	4
1.2	The Process of Measurement	4
1.3	Scope of Instrumentation	7
1.4	Jargon of Instrumentation	9
1.5	Basic Principles of Measurement	9
	1.5.1	Direct Comparison 9
	1.5.2	Indirect Comparison 10
1.6	Complexity of Measurement Methods	10
	1.6.1	Primary Measurement 10
	1.6.2	Secondary Measurement 11
	1.6.3	Tertiary Measurement 11
1.7	Applications of Measuring Instruments	12
	1.7.1	Instruments for Monitoring 12
	1.7.2	Instruments for Controlling 12
	1.7.3	Instruments for Experiments and Analysis 12
1.8	Generalized Input-Output Model of Measurement System	13
	1.8.1	Stages of the Measuring System 16
1.9	Types of Inputs	20
	1.9.1	Desired Inputs 20
	1.9.2	Interfering Inputs 20
	1.9.3	Modifying Inputs 20
1.10	Classification of Instruments	21
	1.10.1	Manual and Automatic Instruments 21
	1.10.2	Active (Self-operated) and Passive (Power-operated) Instruments 21
	1.10.3	Self-contained and Remote Indicating Instruments 22
	1.10.4	Deflection and Null Output Instruments 22
	1.10.5	Analog and Digital Instruments 23
	1.10.6	Detecting, Recording, Monitoring and Controlling Instruments 23
	1.10.7	Mechanical, Electrical and Electronic Instruments 24

- 1.11 Objectives of Instrumentation 25
 - Summary 26**
 - Key Concepts 27**
 - Review Questions 29**
 - Multiple Choice Questions 31**
 - Answers 33**

Chapter 2 **Characteristics of Instruments**

35

- 2.1 Introduction 38
- 2.2 Static and Dynamic Quantities 38
- 2.3 Static Characteristics 39
 - 2.3.1 Range 40
 - 2.3.2 Span 40
 - 2.3.3 Accuracy 40
 - 2.3.4 Precision 40
 - 2.3.5 Calibration 41
 - 2.3.6 Drift 42
 - 2.3.7 Sensitivity 42
 - 2.3.8 Threshold 44
 - 2.3.9 Resolution 44
 - 2.3.10 Tolerance 44
 - 2.3.11 Readability and Least Count 44
 - 2.3.12 Backlash 44
 - 2.3.13 Zero Stability 44
 - 2.3.14 Stiction (Static Friction) 44
- 2.4 Dynamic Characteristics 45
 - 2.4.1 Speed of Response and Measuring Lag 45
 - 2.4.2 Fidelity and Dynamic Error 46
 - 2.4.3 Overshoot 46
 - 2.4.4 Dead Time and Dead Zone 46
 - 2.4.5 Frequency of Response 46
- 2.5 Modeling for Dynamic Performance 46
- 2.6 Systems of Various Orders 49
 - 2.6.1 Zero Order System 49
 - 2.6.2 First Order System 50
 - 2.6.3 Second Order System 50
- 2.7 Standard Test Signals 52
 - 2.7.1 Step Signal 52
 - 2.7.2 Ramp Signal 52
 - 2.7.3 Parabolic Signal 52
 - 2.7.4 Simple Harmonic Input (Sinusoidal) 53
 - 2.7.5 Impulse Signal 53
- 2.8 Dynamic Response of First Order System 54
 - 2.8.1 Unit Step Response of First Order System (Step Input) 54
 - 2.8.2 Unit Ramp Response of First Order System (Ramp Input) 60
 - 2.8.3 Harmonic Sinusoidal Response of First Order System 61

2.9 Dynamic Response of Second Order System 62
 2.9.1 Step Response of Second Order System 63
 2.9.2 Harmonic/Sinusoidal Response of Second Order System 64

Multiple Choice Questions 71
Answers 73

Chapter 3 Inaccuracies in Instruments 75

3.1 Introduction 78
 3.2 Terminology 78
 3.2.1 Terms used to Describe Inaccuracy in the Instrument 78
 3.3 Error of Measurement and Measurement of Error 79
 3.3.1 Error of Measurement 79
 3.3.2 Measurement of Errors 81
 3.4 Error 82
 3.5 Sources/Causes of Error 82
 3.6 Classification of Errors 83
 3.7 Random Errors (or Precision or Accidental Error) 85
 3.7.1 Disturbance in the Equipment 86
 3.7.2 Fluctuating Experimental or Environmental Conditions 86
 3.8 Systematic Error (or Bias Error) 87
 3.8.1 Calibration Error 87
 3.8.2 Gross Errors or Human Errors 88
 3.8.3 Operational Errors 89
 3.8.4 Observation Errors 90
 3.8.5 Equipment Defects and Instrumental Errors 90
 3.8.6 Inherent Defects 91
 3.8.7 Misusing or Mishandling Errors 92
 3.8.8 Loading Errors 92
 3.9 Illegitimate Errors 93
 3.9.1 Blunders and Chaotic Errors 93
 3.10 Other Errors 93
 3.10.1 Backlash 94
 3.10.2 Mechanical Friction 94
 3.10.3 Hysteresis 94
 3.10.4 Drift 94
 3.10.5 Reading Error 95
Summary 95
Key Concepts 96
Review Questions 98
Multiple Choice Questions 98
Answers 100

Chapter 4 **Transducers and Measurement of Displacement** **101**

- 4.1 Introduction 104
- 4.2 Classification of Transducers 104
- 4.3 Mechanical Transducers 108
- 4.4 Electromechanical Transducers 111
 - 4.4.1 Merits 111
 - 4.4.2 Classification of Electromechanical Transducers 112
- 4.5 Resistive Type Transducers 112
 - 4.5.1 Variable Resistance Transducers 113
 - 4.5.2 Sliding Contact Devices – The Pots 114
 - 4.5.3 The Resistance Strain Gauges 116
 - 4.5.4 Thermistors 116
- 4.6 Inductive Type Transducers 117
 - 4.6.1 Non-Self-Generating Variable Self Inductance-Single Coil Type Transducer 118
 - 4.6.2 Non-Self-Generating Variable Self Inductance Two Coil (or Single Coil with Center Tap) Type Transducer 118
 - 4.6.3 Non-Self-Generating Variable Mutual Inductance Two Coil Transducer 119
 - 4.6.4 Non-Self-Generating Variable Mutual Inductance Three Coil Transducer 120
 - 4.6.5 Self Generating Type Inductive Transducers 121
 - 4.6.6 Eddy Current Transducers 122
 - 4.6.7 Magnetometer Search Coil 123
- 4.7 Capacitive Transducers 124
- 4.8 Piezoelectric Transducers 127
- 4.9 Photoelectric Effects 128
 - 4.9.1 Photo Emissive 128
 - 4.9.2 Photo Conductive Transducers 129
 - 4.9.3 Photo Voltaic Cells 131
- 4.10 Hall Effect 131
- 4.11 Magnetostrictive Transducer 132
- 4.12 Ionization Transducers 133
- 4.13 Digital Displacement Transducers 133
 - Summary 135**
 - Key Concepts 136**
 - Review Questions 137**
 - Multiple Choice Questions 138**
 - Answers 140**

Chapter 5 **Measurement of Temperature** **141**

- 5.1 Introduction 146
- 5.2 Basic Concepts of Temperature 146
- 5.3 Measurement of Temperature 148
 - 5.3.1 Temperature Measuring Instruments 149

- 5.4 Measurement of Temperature by Changes in Physical Dimensions 152
 - 5.4.1 Measurement of Temperature by Expansion of Solids 152
 - 5.4.2 Measurement of Temperature by using Expansion of Liquids 155
- 5.5 Pressure Thermometers 157
- 5.6 Electrical Effects on Temperature 162
 - 5.6.1 Thermo Resistive Elements 162
 - 5.6.2 Fundamentals of Thermo Electricity 162
 - 5.6.3 Laws of Thermo-Electric Power 165
- 5.7 Measurement of Temperature by Electrical Methods 166
 - 5.7.1 Resistance Temperature Detector (RTD) or Electrical-Resistance Thermometers 166
 - 5.7.2 Thermistors (Thermal Resistors) 170
 - 5.7.3 Thermocouples 173
- 5.8 Semiconductor Junction Temperature Sensors 180
- 5.9 The Linear Quartz Thermometer 181
- 5.10 Thermometers using Changes in Emitted Thermal Radiation-Pyrometers 181
- 5.11 Types of Pyrometers 184
 - 5.11.1 Total Radiation Pyrometer 184
 - 5.11.2 Optical Pyrometer or Disappearing Filament Pyrometer or Monochromatic Brightness Radiation Thermometer 185
 - 5.11.3 Infrared Pyrometer 187
- 5.12 Temperature Measurement by Changes in Chemical Phase 188
 - Summary 189**
 - Key Concepts 190**
 - Review Questions 192**
 - Multiple Choice Questions 194**
 - Answers 195**

Chapter 6**Measurement of Pressure****197**

- 6.1 Introduction 200
- 6.2 Definitions And Terminology 200
 - 6.2.1 Atmospheric Pressure (P_A) 201
 - 6.2.2 Absolute Pressure (P_{ABS}) 201
 - 6.2.3 Gauge Pressure ($P > P_A$) 201
 - 6.2.4 Vacuum Pressure ($P_A > P$ or $P < P_A$) 201
 - 6.2.5 Relation between Absolute, Gauge, Atmospheric and Vacuum Pressure 201
 - 6.2.6 Static Pressure 202
 - 6.2.7 Total or Stagnation Pressure 202
 - 6.2.8 Dynamic or Impact or Velocity Pressure 202
- 6.3 Classification of Pressure Measuring Devices 203
- 6.4 Dead Weight Tester 204

- 6.5 Manometers 206
 - 6.5.1 Piezometer 207
 - 6.5.2 U-Tube Manometer 208
 - 6.5.3 Single Column Manometer 210
 - 6.5.4 U-Tube Differential Manometer 213
 - 6.5.5 Inverted U-tube Differential Manometer 215
- 6.6 Mechanical Displacement Type Gauges 217
 - 6.6.1 Ring Balance Manometer 217
 - 6.6.2 Bell Type Pressure Gauges 218
- 6.7 Bourdon Tube Pressure Gauge 219
 - 6.7.1 Tip Travel of Bourdon Tube 221
 - 6.7.2 Errors and their Rectification (in Bourdon Tube) 222
 - 6.7.3 Bourdon Tube Shapes and Configurations 222
- 6.8 Elastic Diaphragm Gauges 223
- 6.9 Bellows Gauges 226
- 6.10 Strain Gauge Pressure Cells 229
- 6.11 The McLeod Gauge 231
 - 6.11.1 Formula for Errors 233
- 6.12 Thermal Conductivity Gauges 235
 - 6.12.1 Pirani Gauge 235
 - 6.12.2 Thermocouple Type Conductivity Gauge 237
 - 6.12.3 Ionization Gauge 238

Summary 239
Key Concepts 239
Review Questions 241
Numerical Problems 243
Multiple Choice Questions 244
Answers 246

- 7.1 Introduction 252
- 7.2 Nature of Flow 252
- 7.3 Classification of Flow Measurements 253
- 7.4 Primary or Quantity Methods 254
 - 7.4.1 Tilting Trap Meter 254
 - 7.4.2 Positive Displacement Meters 254
- 7.5 Flow (Obstruction) Meters 258
 - 7.5.1 Venturi Meter 259
 - 7.5.2 Orifice Meter or Orifice Plate 262
 - 7.5.3 Flow-Nozzle Meter 265
 - 7.5.4 Variable Area Meter or Rotameter 266
- 7.6 Turbine Meters 269
- 7.7 Magnetic Flow Meters 271
- 7.8 Vortex Shedding Flow Meters 272

- 7.9 Measurement of Fluid Velocities 273
 - 7.9.1 Total - Pressure Probe (Pitot Static Tube) 273
 - 7.9.2 Direction - Sensing Probes or Yaw-Angle Probe 275
- 7.10 Anemometers 276
 - 7.10.1 Hot Wire Anemometers 276
 - 7.10.2 Hot Film Anemometers 280
- 7.11 Measurement by Scattering 280
 - 7.11.1 Laser Doppler Anemometry 281
- 7.12 Ultrasonic Anemometry 284
- 7.13 The Interferometer 284
 - 7.13.1 The Schlieren 285
- 7.14 The Shadow Graph 286
- 7.15 Calibration of Flow Measuring Devices 286
- 7.16 Flow-Visualization Techniques 287
 - 7.16.1 Dye Injection 288
 - 7.16.2 Chemical Precipitates 288
 - 7.16.3 Smoke Trails and Smoke Wire 288
 - 7.16.4 Hydrogen Bubble Visualization 288
 - 7.16.5 Laser Induced Fluorescence 288
- Summary 289**
- Key Concepts 289**
- Review Questions 291**
- Multiple Choice Questions 293**
- Answers 295**

Chapter 8 | **Measurement of Liquid Level** | **297**

- 8.1 Introduction 301
- 8.2 Measurement of Liquid Level 301
- 8.3 Classification of Liquid-Level Measurement Methods 301
- 8.4 Direct Liquid Level Measurement Devices 302
 - 8.4.1 Sight Glass Tube 302
- 8.5 Float Gauges 304
 - 8.5.1 Float-Tape Liquid Level Gauges 304
 - 8.5.2 Float Shaft Liquid Level Gauge 305
- 8.6 Indirect Liquid Level Measurement Devices 306
- 8.7 Hydrostatic Pressure Devices (Bubbler or Purge System) 307
 - 8.7.1 Hydrostatic Pressure Devices for Open Tanks 308
 - 8.7.2 Hydrostatic Pressure Devices for Closed Tanks: Bubbler or Purge System 309
- 8.8 Electric Liquid Level Sensors 311
 - 8.8.1 Rheostat Operated by a Float 311
 - 8.8.2 Capacitive Liquid Level Sensor 312
- 8.9 Gamma Ray Liquid Level Sensor 314
- 8.10 Ultrasonic Liquid Level Gauge 315

- 8.11 Inductive Methods or Magnetic Level Indicator 316
- 8.12 Cryogenic Fuel Level Indicator 317
 - Summary 319**
 - Key Concepts 319**
 - Review Questions 320**
 - Multiple Choice Questions 321**
 - Answers 323**

Chapter 9

Measurement of Speed

325

- 9.1 Introduction 329
- 9.2 Classification of Tachometers 329
- 9.3 Mechanical Tachometers 330
 - 9.3.1 Revolution Counter and Timer 330
 - 9.3.2 Tachoscope 331
 - 9.3.3 Hand Speed Indicator (Modified Tachoscope) 331
 - 9.3.4 Slipping Clutch Tachometer 332
 - 9.3.5 Centrifugal Force Tachometer 333
 - 9.3.6 Vibrating Reed Tachometer 333
- 9.4 Electrical Tachometers 335
 - 9.4.1 Drag Cup Tachometers (Automobile Speedometers) 335
 - 9.4.2 Commutated Capacitor Tachometer 336
 - 9.4.3 Tacho Generators 337
 - 9.4.4 Inductive Pick up Tachometer 340
 - 9.4.5 Capacity Type Pick-up Tachometer 341
 - 9.4.6 Photo Electric Tachometer 342
 - 9.4.7 Stroboscope 343

Chapter 10

Measurement of Vibration and Acceleration

353

- 10.1 Introduction 356
- 10.2 Vibration Measurement 356
- 10.3 Transducers used in Vibration Measurement 357
 - 10.3.1 Fixed Reference Type Transducer 357
 - 10.3.2 Seismic Type Transducer 359
- 10.4 List of Transducers/Instruments used to Measure Vibration/Acceleration 360
 - 10.4.1 Piezo Electric Accelerometer 361
 - 10.4.2 Seismic Displacement Sensing Accelerometer 362
 - 10.4.3 Strain - Gauge Accelerometer 363
 - 10.4.4 Capacitance Vibration Sensor/Accelerometer 364

- 10.4.5 Variable Induction Type Accelerometer 366
- 10.4.6 LVDT - Accelerometer 367
- 10.4.7 Reed Type Vibrometer 368
- 10.4.8 Vibration Measurement using Stroboscope 369
- 10.5 Factors Affecting the Choice of Transducers 370
- 10.6 Calibration of Vibration Transducers 371
- 10.7 Servo Accelerometer 371
- 10.8 Digital Accelerometer 374
- Summary 376**
- Key Concepts 377**
- Review Questions 378**
- Multiple Choice Questions 379**
- Answers 381**

Chapter 11**Measurement of Force, Torque and Power****383**

- 11.1 Introduction 387
- 11.2 Methods of Measurement of Force 387
 - 11.2.1 Direct Method 387
 - 11.2.2 Indirect Method 388
- 11.3 Equal Arm Balance 388
- 11.4 Unequal Arm Balance 389
- 11.5 Pendulum Scale (Multi-Lever Type) 391
- 11.6 Elastic Force Meter (Proving Ring) 393
- 11.7 Strain Gauge Load Cell 393
- 11.8 Hydraulic Load Cell 395
- 11.9 Pneumatic Load Cells 396
- 11.10 Measurement of Torque and Power 397
 - 11.10.1 Definitions of Torque and Power 398
 - 11.10.2 Relation between Torque and Power 398
- 11.11 Dynamometers 399
 - 11.11.1 Mechanical/Prony Brake Dynamometer 399
 - 11.11.2 Hydraulic Dynamometer 400
 - 11.11.3 Eddy Current Dynamometer 401
 - 11.11.4 Electrical Generator Type 402
 - 11.11.5 Driving Dynamometer 402
 - 11.11.6 Transmission Dynamometer 402
- 11.12 Torsion Meter 406
 - 11.12.1 Mechanical Torsion Meter 406
 - 11.12.2 Optical Torsion Meter 407
 - 11.12.3 Electrical Torsion Meters
(Torque Measurement using Slotted Discs) 408
 - 11.12.4 Strain Gauge Torsion Meter 409
(Strain Gauges on Rotating Shafts) 409

Chapter 12 **Strain and Stress Measurement** **417**

12.1 Introduction 420
12.2 Fundamentals of Stress and Strain 421
12.3 Strain Measurement 423
 12.3.1 Positive Strain 423
 12.3.2 Negative Strain 423
12.4 The Electrical Resistance Strain Gauge 424
 12.4.1 The Metallic Resistance Strain Gauge 424
12.5 Types of Strain Gauges 427
 12.5.1 Unbonded Strain Gauge 427
 12.5.2 Bonded Strain Gauges 428
12.6 Selection and Preparation of Bonded Strain Gauge 432
 12.6.1 Surface - Preparation and Mounting of Strain Gauges 432
 12.6.2 Grid Materials 433
 12.6.3 Backing, Base or Carrier Material 433
 12.6.4 Bonding Materials or Cements (Adhesive) 434
 12.6.5 Factors Affecting Selection of Bonded Metallic Strain Gauges 435
12.7 Temperature Compensation 435
12.8 Temperature Compensation using an Adjacent Arm Compensating Gauge 436
 12.8.1 Self Temperature Compensation 439
12.9 Gauge Rosettes (Multiple Grids) 440
12.10 Wheatstone Bridge Circuit 447
 12.10.1 One Active Strain Gauge (Quarter Bridge) or Tension Measurement using Strain Gauge 448
 12.10.2 Two Active Strain Gauges (Half Bridge) or Tension and Compression Measuring Strain Gauges 449
 12.11 Calibration 450
 12.12 Applications of Strain Gauges 451

Answers 457

Chapter 13 **Measurement of Viscosity and Surface Tension** **459**

13.1 Introduction 462
13.2 The Jargon of Viscosity 462

13.3	Classification of Viscometers	464
13.4	Capillary Tube Viscometer	465
13.5	Efflux Viscometers	466
	13.5.1 Redwood Viscometer	466
	13.5.2 Saybolt Viscometer	467
	13.5.3 Engler Viscometer	468
13.6	Falling Sphere Viscometer	469
13.7	Rotating Cylinder Viscometers	471
	13.7.1 Rotating Cylinder Viscometer (Concentric Cylinders Type)	471
	13.7.2 Rotating Cylinder Electrical Viscometer	472
13.8	Surface Tension	473
13.9	Measurement of Surface Tension	475
	13.9.1 Effects of Surface Tension	475
	13.9.2 Methods of Measuring Surface Tension	476
	13.9.3 Instruments used to Measure Surface Tension	476
13.10	Du Noüy Ring Tensiometer	477
13.11	Du Noüy-Padday Tensiometer	477
13.12	Wilhelmy Plate Tensiometer	478
13.13	Bubble Pressure Tensiometer	478
13.14	Goniometer/ Tensiometer	479
13.15	Some More Methods	479
	13.15.1 Spinning Drop Method	479
	13.15.2 Drop Volume Method	480
	13.15.3 Capillary Rise Method	480
	13.15.4 Stalagmometric Method	480
	13.15.5 Sessile Drop Method	480
	13.15.6 Vibrational Frequency of Levitated Drops Method	480
	13.15.7 Resonant Oscillations of Spherical/ Hemispherical Liquid Drop Method	480
	Summary	481
	Key Concepts	482

Chapter 14**Measurement of Humidity/
Dampness and Density/Specific Gravity****487**

14.1	Introduction	491
14.2	Terminology	491
14.3	List of Instruments used to Measure Humidity	492
14.4	Psychrometers (Wet and Dry Bulb Thermometers)	493
14.5	Sling Psychrometer	493

14.6	Absorption Hygrometers	495
	14.6.1 Mechanical Humidity Sensing Absorption Hygrometer	495
	14.6.2 Electrical Humidity Sensing Absorption Hygrometer	497
14.7	Dew Point Meter	498
14.8	Fundamentals of Density and Specific Gravity	500
14.9	Instruments to Measure Specific Gravity and Density	501
14.10	Pycnometer	501
14.11	Hydrometers	503
	14.11.1 Simple Hydrometer	503
	14.11.2 Photo-Electric Hydrometer	504
14.12	Differential Type Bubbler Systems	506
	14.12.1 Differential Type Bubbler System with Two Vessels Attached by a Manometer and Reference Column Method	506
	14.12.2 Differential Type Bubbler System with Single Vessel Attached and Pressure Gauge	507
14.13	Special Applications of Hydrometers	508
	Summary	509
	Key Concepts	509
	Review Questions	511
	Multiple Choice Questions	512
	Answers	514

15.1	Introduction	518
15.2	Basic Components of a Control System	518
15.3	Control Systems Terminology	518
15.4	Types of Control Systems	521
	15.4.1 Open Loop Control Systems (Non- Feedback Systems)	521
	15.4.2 Closed Loop or Feedback Control Systems	523
	15.4.3 Advantages of Feedback Control Systems	524
	15.4.4 Positive and Negative Feedback	528
15.5	Differences between Open Loop and Closed Loop Systems	531
15.6	Servo Mechanism	532
15.7	Requirements of a Control System	534
	15.7.1 Stability	534
	15.7.2 Accuracy	534
	15.7.3 Speed of Response	534
15.8	Control Systems – Case Studies	534
	15.8.1 Speed Control System in Automobiles	535
	15.8.2 Speed Control System in IC Engines	537
	15.8.3 Temperature Control System of the Passenger Compartment of a Car	538
	15.8.4 Automatic Tank-Level Control System	540

15.8.5 Liquid Level Control System (Automatic and Manual) 540

15.8.6 Feedback System in Nature – Biological System 541

15.8.7 Position Control System –
Missile Launching and Guidance System 542
