<i>Preface</i>	(v)
<i>Acknowledgement</i>	(vii)

Chapter 1: Propositional Calculus

1.1	Statements and Notations	2
1.1.1	Subject and Predicate.....	3
1.1.2	Notation	3
1.2	Connectives and Truth Tables	4
1.2.1	Negation of a Statement.....	5
1.2.2	Conjunction (or meet).....	6
1.2.3	Disjunction (or join)	7
1.2.4	Notation	9
1.2.5	Draw Truth Table for “ $p \uparrow q$ ”.....	10
1.2.6	Draw the Truth Table for “ $p \downarrow q$ ”.....	10
1.2.7	Statement Formulas and Truth Tables.....	10
1.2.8	Implication (or Conditional Statement)	11
1.2.9	Biconditional (or Double Implication)	13
1.2.10	Construction of the Truth Table for $p \Leftrightarrow q$	13
1.2.11	Well Formed Formulas	13
1.2.12	The Operation \oplus or Δ	15
1.3	Tautology and Contradiction	16
1.3.1	Tautology.....	16
1.3.2	Contradiction (or Fallacy).....	19
1.3.3	Contingency.....	20
1.4	Equivalence of Statements/ Formulas	22
1.4.1	Statements/Formulas.....	22
1.4.2	Equivalent Formulas.....	23
1.5	Duality Law and Tautological Implication.....	27
1.5.1	Duality Law	27
1.5.2	Tautological Implications	27
1.5.3	Converse	28
1.5.4	Inverse	28
1.5.5	Contrapositive.....	28
1.5.6	Some Implications	28

(x) **Contents**

1.6	Normal Forms.....	30
1.6.1	Decision Problem	31
1.6.2	DNF	31
1.6.3	How to Find DNF	31
1.6.4	CNF	32
1.6.5	Principal Disjunctive Normal Form (PDNF).....	32
1.6.6	Black Box Method (to find PDNF)	33
1.6.7	Principal Conjunctive Normal Form (PCNF).....	35
1.6.8	How to Find PCNF (by using truth table or through PDNF).....	35
1.7	The Theory of Inference for Statement Calculus.....	39
1.7.1	Tautology.....	40
1.7.2	Validity using Truth Table.....	40
1.7.3	Rules of Inference.....	40
1.7.4	Some Implications	41
1.7.5	Some Equivalences	41
1.8	Consistency of Premises and Indirect Method of Proof	44
1.8.1	Indirect Method of Proof.....	45
	Exercises	47

Chapter 2: Predicate Calculus

2.1	Predicate Logic	52
2.1.1	Predicate	52
2.1.2	2-place Predicate	53
2.1.3	m-place Predicate.....	54
2.1.4	Connectives	54
2.2	Statement Functions, Variables and Quantifiers.....	55
2.2.1	Combined Statements (or Connectives)	56
2.2.2	Quantifiers	56
2.2.3	Universal Quantifier	56
2.2.4	Existential Quantifier.....	57
2.2.5	The Universe of Discourse	57
2.3	Free and Bound Variable.....	60
2.4	Inference Theory for the Predicate Calculus	64
2.4.1	Universal Specification (US).....	64
2.4.2	Universal Generalization (UG).....	64
2.4.3	Existential Specification (ES).....	65
2.4.4	Existential Generalization (EG).....	65
2.4.5	Formulas with More than One Quantifier.....	69
	Exercises	70

Chapter 3: Number Theory

3.1	Properties of Integers	73
3.1.1	Properties of Integers	73
3.1.2	\mathbb{Z} (the set of Integers)	74
3.2	Division Algorithm (or Division Theorem)	74
3.3	Greatest Common Divisor (GCD)	74
3.4	Euclidian Algorithm	75
3.5	Least Common Multiple	76
3.6	Testing for Prime Numbers	77
3.7	Fundamental Theorem of Arithmetic (or Unique Factorization Theorem)	77
3.8	Modular Arithmetic	79
3.9	Fermats Theorem	80
3.9.1	Corollary	81
	<i>Exercises</i>	82

Chapter 4: Mathematical Induction

4.1	The Principle of Mathematical Induction	86
4.1.1	The Principle	86
	<i>Exercises</i>	90

Chapter 5: Set Theory

5.1	Sets	91
5.1.1	Set	91
5.1.2	Sub Set	92
5.1.3	Equity of Sets	93
5.1.4	Powerset	93
5.1.5	Notations	94
5.2	Operations on Sets	94
5.2.1	Union and Intersection	94
5.2.2	Properties of Union and Intersection	94
5.2.3	Symmetric Difference	94
5.2.4	Set Complement	94
5.2.5	Cartesian Product	95
5.2.6	Disjoint Sets	96
5.2.7	Distributive Laws	96
5.2.8	Properties Related to Set Operations	96
5.2.9	Venn Diagrams	97

(xii) *Contents*

5.3	Principle of Inclusion and Exclusion.....	104
5.3.1	Principle.....	104
5.4	Relations, Binary Operations on Relations and Properties of Binary Relations... ..	108
5.4.1	Domain and Range	109
5.4.2	Notation	109
5.4.3	Some Binary Operations on Relations.....	110
5.4.4	Properties of Relations.....	110
5.4.5	Composition of Relations	111
5.4.6	Notation	111
5.5	Relation Matrix and the Graph of a Relation.....	113
5.5.1	Some Properties of Relation Matrices	114
5.5.2	Pictorial Representation.....	114
5.5.3	Properties of the Graph of a Relation	115
5.6	Partition, Covering of a Set; and Equivalence Relations.....	116
5.6.1	Equivalence Relations	120
5.6.2	Equivalence Class.....	120
5.7	Transitive Closure.....	128
5.7.1	Properties of Transitive Closure	129
5.7.2	Representation of Closure Relations in the Form of Matrices.....	129
5.8	Compatibility Relations	131
5.8.1	Definition: (Maximal Compatibility Block).....	132
5.8.2	Composition of Binary Relation.....	132
5.9	Partial Order Relations	133
5.9.1	Zorn's Lemma	137
	<i>Exercises</i>	143

Chapter 6: Functions

6.1	Definition and Examples of Functions	148
6.2	Types of Functions (including Bijective Functions).....	150
6.2.1	Observation.....	151
6.2.2	Geometric Interpretation.....	151
6.2.3	Properties	152
6.2.4	Some Rules on Floor and Ceiling Functions	152
6.3	Composition of Functions and Inverse Functions	154
6.3.1	Observation.....	155
6.3.2	Notation	157
6.3.3	Definition.....	161

6.4	Permutation Functions	164
6.5	Recursive Functions	169
	6.5.1 Theorem: (Recursion Theorem)	170
	6.5.2 Observation.....	172
	<i>Exercises</i>	174

Chapter 7: Graph Theory - I

7.1	Basic Concepts of Graphs.....	176
	7.1.1 Example (Utilities Problem).....	178
	7.1.2 Observation.....	184
	7.1.3 Example: Konigsberg Bridges (or Seven Bridges).....	184
	7.1.4 Properties of Konigsberg Bridges Graph.....	185
7.2	Subgraphs	189
	7.2.1 Observations	190
7.3	Matrix Representation of Graphs.....	193
	7.3.1 Incidence Matrices.....	194
7.4	Isomorphic Graphs	198
	<i>Exercises</i>	200

Chapter 8: Graph Theory - II

8.1	Paths and Circuits	205
	8.1.1 Corollary.....	207
8.2	Eularian Graphs	208
	8.2.1 Corollary.....	209
8.3	Hamiltonian Graphs.....	209
	8.3.1 Some Basic Rules for Constructing Hamiltonian Paths and Cycles... 210	
	8.3.2 Corollary.....	211
	8.3.3 Example (City-Route Puzzle).....	211
	8.3.4 Example (The Seating Arrangement Problem).....	212
	8.3.5 Travelling – Salesman Problem.....	214
8.4	Multiple Graphs.....	216
	<i>Exercises</i>	217

Chapter 9: Graph Theory - III

9.1	Planar Graphs	221
	9.1.1 Observation.....	222

(xiv) *Contents*

9.2	Euler's Formula	231
9.2.1	Corollary	232
9.3	Graph Colouring, Covering and Chromatic Numbers	233
9.3.1	The Scheduling Problem.....	235
9.3.2	Rules for Graph Coloring	235
	<i>Exercises</i>	238

Chapter 10: Graph Theory - IV

10.1	Fundamental Concepts of Trees	241
10.1.1	Note (Formation of Components).....	243
10.1.2	Some Properties of Trees.....	244
10.1.3	Corollary	245
10.2	Directed Trees.....	248
10.3	Binary Trees and Decision Trees.....	250
10.3.1	Lemma	252
10.4	Spanning Trees and Properties	255
10.5	Algorithms for Spanning Trees	259
10.5.1	Breadth-First Search Algorithm (BFS): (for a Spanning Tree)	259
10.5.2	Depth-First Search Algorithm (DFS): (for a Spanning Tree).....	260
10.5.3	Minimal Spanning Trees.....	260
10.5.4	Kruskal Algorithm: (Finding Shortest Spanning Tree)	260
10.5.5	Prim's Algorithm	261
	Exercises	273

Chapter 11: Algebraic Structures

11.1	Some Algebraic Properties	278
11.2	Lattice as an Algebraic System.....	279
11.2.1	Properties of Lattices	280
11.3	Algebraic Systems with One Binary Operation.....	281
11.4	Properties of Binary Operations	282
11.4.1	Result	283
11.5	Semi Groups and Monoids	284
11.5.1	Observation.....	286
11.5.2	Result	287
11.5.3	Observations	288

11.6 Homomorphism of Semi Groups and Monoids.....	290
11.6.1 Definition.....	290
11.6.2 Result.....	291
11.6.3 Observation.....	292
11.6.4 Fundamental Theorem of Homomorphism.....	295
<i>Exercises</i>	297

Chapter 12: Algebraic Structures (Groups and Rings)

12.1 Fundamental Concepts in Group Theory.....	300
12.1.1 Result.....	303
12.2 Subgroups.....	311
12.2.1 Notation	313
12.3 Cosets.....	317
12.3.1 Remark.....	318
12.3.2 Theorem (Lagranges Theorem)	319
12.3.3 Remark.....	319
12.4 Rings.....	320
12.4.1 The Pigeon Hole Principle.....	322
<i>Exercises</i>	324

Chapter 13: Permutations and Combinations

13.1 Basic Counting Principles.....	325
13.1.1 Sum Rule	325
13.1.2 General Rule for Counting Event (or Sum Rule)	326
13.1.3 Product Rule	327
13.1.4 Indirect Counting.....	328
13.1.5 One to One Correspondence	329
13.1.6 Applications to Computer Science	329
13.2 Permutations	332
13.2.1 Fundamental Principles of Counting	332
13.2.2 Permutations of Distinct Things	333
13.2.3 Permutations with Repetitions.....	334
13.2.4 Dearrangements	336
13.3 Circular Permutations, Restricted Permutations.....	337
13.3.1 Circular Permutations	338
13.3.2 Clockwise and Anticlockwise Permutations.....	338
13.3.3 Restricted Permutations.....	340

13.4	Combinations and Restricted Combinations.....	342
13.5	The Pigeonhole Principle and its Applications.....	352
13.5.1	The Extended Pigeonhole Principle.....	352
	Exercises	353

Chapter 14: Binomial Theorem

14.1	Binomial and Multinomial Coefficients	355
14.1.1	Pascal’s Triangle.....	355
14.1.2	Properties of Binomial Coefficients or Combinatorial Identities	356
14.1.3	Multinomial Coefficients.....	359
14.1.4	Multinomial Theorem.....	359
14.1.5	Multinomial Theorem – An Explanation.....	361
14.1.6	How to Find Number of Solutions of the Equation	361
14.2	Generating Functions of Permutations and Combinations	365
14.2.1	The Concept “Generating Function”	365
14.2.2	Properties of Generating Functions with Respect to Sum and Derivative.....	370
14.3	The Principle of Inclusion – Exclusion	380
14.3.1	Result.....	380
14.3.2	Principle of Inclusion–Exclusion for n-sets.....	382
14.3.3	Result.....	383
	Exercises	387

Chapter 15: Recurrence Relations

15.1	Generating Function of Sequences	389
15.1.1	Generating Functions.....	389
15.2	Partial Fractions (Definition).....	393
15.2.1	Partial Fractions.....	393
15.3	Calculating Coefficient of Generating Functions	397
15.3.1	Remark.....	398
15.3.2	Some Formulas (Special Cases of Binomial Theorem).....	398
15.3.3	Geometric Series.....	399
15.3.4	A List of Formulas.....	401
15.4	Recurrence Relations and Formation of Recurrence Relation.....	403
15.4.1	Examples of Recurrence Relations	403
15.4.2	Some More Examples.....	403
15.4.3	Solutions of Recurrence Relations.....	404
	Exercises	406

Chapter 16: Some Methods of Solving Recurrence Relations

16.1	Solving Linear Homogeneous Recurrence Relations by Substitution Method.....	409
16.1.1	Substitution Method.....	409
16.1.2	First Order Recurrence Relation.....	410
16.2	Generating Functions and the Method of Characteristic Roots.....	414
16.2.1	The Shifting Properties of Generating Functions.....	414
16.2.2	Sketch of the Method of Generating Functions.....	419
16.2.3	The Method of Characteristic Roots.....	422
16.3	Solving Inhomogeneous Recurrence Relations.....	424
16.3.1	Method.....	424
	<i>Exercises</i>	436
	Bibliography	439
