<b>Foreword</b> .....	<b>(vii)</b>
<b>Prologue</b> .....	<b>(ix)</b>
<b>Preface</b> .....	<b>(xi)</b>
<b>Acknowledgements</b> .....	<b>(xiii)</b>

## Chapter 1: Nano Science and Technologies

1.1 Concepts of Nano Science and Nanotechnologies .....	1
1.1.1 Introduction.....	1
1.1.2 What is Nano Science? .....	2
1.1.3 What are Nano Technologies?.....	2
1.1.4 Definition of Nanotechnology .....	3
1.1.5 How Laws of Physics differ at the Nano Scale-Quantum Size Effects .....	4
1.1.6 Quantum Size Effects on Physical Properties.....	7
1.1.7 What is Nano Chemistry?.....	11
1.2 Classification of Nano Materials.....	12
1.2.1 Natural/Non Engineered Nano Materials.....	13
1.2.2 Engineered Nano Structured Materials.....	17
1.3 History of Nano Technology.....	20
1.4 Unique Physico-Chemical, Mechanical, Electrical, Optical and Magnetic Properties of Nano Materials .....	21
1.4.1 Reasons for Nano Materials Exhibiting different Properties from Bulk.....	21
1.4.2 More % Surface Atoms in Nano Systems.....	22
1.4.3 Unique Physical Properties of Nano Materials .....	23
1.4.4 Summary of Importance of Properties of Nano Materials and their Applications .....	41
1.5 Current Industrial Applications of Nano Technologies .....	42
1.5.1 Improving Product Performance.....	43
1.6 Engineering Principles and Initiatives of Nano Technology.....	44
1.6.1 Process Engineering, Design and Manufacturing.....	44
1.6.2 Fabrication Techniques for Engineered Nano Materials .....	44
1.6.3 Precision Engineering .....	47
1.6.4 Convergence of Top-Down and Bottom-up Techniques .....	48
1.6.5 Characterisation .....	49
1.7 Future Nano Technologies .....	50
1.7.1 Precision Engineering.....	50
1.7.2 Integrated Chip Technologies (ICT).....	50
1.7.3 Optics.....	51

1.7.4	Transport.....	51
1.7.5	Medical.....	51
1.7.6	The Chemical Industry.....	51
1.7.7	The Information and Communication Technology Industry.....	52
1.7.8	Molecular Manufacturing.....	52
1.8	Safety and Health Risks of Nano Materials.....	53
1.8.1	Potential Areas for Concern.....	53
1.8.2	Environmental Effects of Nanotechnology.....	53
1.8.3	Nano Particles Impact on Human Health.....	54
	<b>References.....</b>	<b>56</b>
	<b>Recommended Reference Materials Books.....</b>	<b>58</b>
	<b>Web Sites.....</b>	<b>58</b>

## Chapter 2: Carbon Nanotube Technologies (CNT)

2.1	Introduction.....	61
2.2	History of Discovery of Fullerenes and Carbon Nano-Tubes and their Salient Features.....	62
2.2.1	Fullerenes.....	62
2.2.2	Carbon Nanotubes.....	63
2.2.3	Carbon Nano Buds.....	67
2.2.4	Carbon Nano fibers.....	67
2.3	Special Properties of Carbon Nanotubes.....	69
2.3.1	Chemical Reactivity.....	69
2.3.2	Electrical Conductivity.....	69
2.3.3	Thermal Conductivity.....	70
2.3.4	Optical Activity.....	71
2.3.5	Mechanical Strength.....	73
2.4	Carbon NanoTubes Growth Mechanism.....	74
2.4.1	Multiple Growth Mechanisms in Operation (37-41).....	74
2.4.2	Role of Hydrogen Flow Rate on the Growth of CNT.....	75
2.4.3	The Role of Reaction Temperature.....	76
2.5	Production Methods for Carbon Nanotubes and Carbon Nanofibers.....	76
2.5.1	Introduction.....	76
2.5.2	Arc Discharge.....	77
2.5.3	Laser Ablation.....	81
2.5.4	Chemical Vapour Deposition (CVD).....	82
2.6	Characterization Techniques for Nanotubes.....	86
2.7	Purification Techniques of CNT.....	86
2.7.1	Oxidation.....	86
2.7.2	Acid Treatment.....	87
2.7.3	Ultra Sonication.....	87

2.7.4	Magnetic Purification .....	87
2.7.5	Micro filtration.....	87
2.7.6	Cutting .....	88
2.7.7	Functionalisation.....	88
2.7.8	Chromatography .....	89
2.8	Important Industrial and Bio-Medical Applications of Carbon Nanotubes (CNTs) .....	89
2.8.1	Composites .....	89
2.8.2	Field Emission .....	91
2.8.3	Electrochemistry .....	92
2.8.4	Electronics .....	94
2.8.5	Recent Research on Some Special Applications of CNTs.....	95
2.8.6	Current Hurdles on the Application of CNTs .....	98
	<b>References.....</b>	<b>99</b>

### **Chapter 3: Nano/Micro Fabrication Technologies**

3.1	Nano/Micro Fabrication Techniques -Introduction.....	105
3.2	Nano/Micro Fabrication Techniques.....	106
3.2.1	Top-Down Approach .....	107
3.2.2	Bottom-up Methods for Nano Fabrication.....	132
	<b>References.....</b>	<b>157</b>

### **Chapter 4: Micro Electro Mechanical Systems (MEMS) and Nano Electro Mechanical Systems (NEMS)**

4.1	Micro Electro Mechanical Systems (MEMS) and Nano Electro Mechanical Systems (NEMS) .....	161
4.1.1	Introduction.....	161
4.1.2	Functional Elements of MEMS .....	162
4.1.3	Inter Dependence of MEMS and Nano Technologies .....	163
4.1.4	Overview and History of Development .....	163
4.1.5	MEMS - Applications .....	165
4.1.6	MEMS Markets .....	171
4.2	Micro Fabrication Techniques for MEMS .....	172
4.2.1	Micro Fabrication Techniques .....	172
4.2.2	MEMS Manufacturing Technologies .....	173
4.3	Industrial Process Control .....	180
4.4	Challenges and Future Development .....	181
4.4.1	Challenges.....	181
4.4.2	The Future of MEMS.....	182

4.5 Nano Electro Mechanical Systems (NEMS).....	185
4.5.1 Generic Applications of NEMS.....	185
4.5.2 Technical Hurdles for NEMS.....	187
4.5.3 Nano Fabrication Techniques for NEMS.....	187
<b>References.....</b>	<b>189</b>

## **Chapter 5: Quality Control, Standards and Meteorology for Nano-Technology**

5.1 Quality Control in Nano-Technology.....	193
5.1.1 Introduction.....	193
5.1.2 Classification of Nanostructures According to Dimensionality.....	193
5.2 Standards for Nano Technology.....	195
5.2.1 Need for Nano Standards and Current Challenges.....	195
5.2.2 Current Status.....	196
5.2.3 Calibration.....	199
5.2.4 Traceability.....	199
5.2.5 Tolerance.....	199
5.3 Nano Metrology.....	200
5.3.1 Introduction.....	200
5.3.2 History of SEM & AFM Development.....	201
5.3.3 Atomic Force Microscope (AFM).....	201
5.3.4 Scanning Electron Microscopy (SEM).....	202
5.3.5 Comparison of AFM and SEM Techniques.....	204
5.3.6 Scanning Tunneling Microscope (STM).....	210
5.3.7 Transmission Electron Microscopy (TEM).....	210
<b>References.....</b>	<b>211</b>

## **Chapter 6: Applications of Polymers/Organics, Liquid Crystals, Nano-Composites and Ferro-Fluids in Nano Technology**

6.1 Applications of Polymers/Organics in Nano Technology.....	213
6.1.1 Polymer in Top-Down Nanotechnology.....	214
6.1.2 Polymer in Bottom-Up Nano-Technology.....	216
6.1.3 Application of Organic Polymer based Nanofibers.....	216
6.1.4 Supra Molecular Polymers.....	218
6.1.5 Application of Polymers in Nano Medicine.....	219
6.1.6 Challenges for application of Polymers in Nanotechnology.....	221
6.1.7 Fuel Cell Applications.....	222
6.1.8 Application of Liquid Crystals and Flexible Flat Panel Display.....	222
6.2 Nano-Composites.....	232
6.2.1 Nano Composite Materials.....	232
6.2.2 Clay Composites.....	233

---

6.2.3	Polymer Composites .....	234
6.2.4	Carbon Nanotube-Reinforced Composites .....	238
6.2.5	Nanofiber-reinforced Composites.....	239
6.2.6	Metal Matrix Nano-Composites .....	240
6.3	Defense Applications of Nano Composites .....	241
6.3.1	High Performance Fibre/Fabrics.....	242
6.3.2	Ballistic Protection.....	242
6.3.3	Microwave Absorbers.....	242
6.3.4	Refractive Index Tuning .....	243
6.4	Application of Ferro-Fluids in Nano Technology .....	243
6.4.1	What are Ferro-fluids? .....	243
6.4.2	Forces involved in the formation of FF .....	243
6.4.3	Surfacted Ferro-fluids (SFF).....	244
6.4.4	Ionic ferro-fluids( IFF).....	245
6.4.5	Magnetic Behavior of Ferro-fluids .....	246
6.4.6	Ferromagnetic Materials.....	248
6.4.7	Ferro-fluids Applications.....	249
6.4.8	Current and Future Ferro-fluid Technologies.....	252
	<b>References.....</b>	<b>257</b>

## **Chapter 7: Role of Surface and Colloid Chemistry in Nano-Technology**

7.1	Colloids .....	267
7.1.1	Introduction.....	267
7.1.2	Types of Colloids.....	268
7.1.3	Colloidal Surfaces and Interfaces .....	269
7.1.4	Colloidal Dispersions-Characteristic Features.....	271
7.1.5	Mechanisms for Reduction of Overall Surface Energy .....	275
7.1.6	Inter Molecular Forces and Colloidal Forces.....	275
7.2	Liquid Phase (Colloidal Phase) Synthesis for Production of Nanostructured Materials/Nanoparticles .....	292
7.2.1	Methods for Production of Nano Systems .....	293
	<b>References.....</b>	<b>298</b>

## **Chapter 8: Molecular Manufacturing, Future Nano Technologies and Dexler-Smalley Debate**

8.1	Molecular Manufacturing.....	299
8.1.1	What is Molecular Manufacturing? .....	299
8.1.2	How the Precise Control the Sequence and/or Position of the Reactions at Atomic or Molecular Lever can be Achieved? .....	300
8.1.3	Molecular Manufacturing Importance in Future Nanotechnologies.....	302
8.1.4	Benefits of Molecular Manufacturing.....	302

8.1.5	Potential Negative Effects of Molecular Manufacturing .....	303
8.1.6	Different Possible Approaches for Realizing Molecular Manufacturing ...	304
8.1.7	Integrated Molecular Manufacturing .....	306
8.1.8	Molecular Manufacture - Enabling Tools/Technologies .....	306
8.2	Self Assembly in Production of Molecular/ Nano Structures-Bottom-Up Methods .....	309
8.2.1	Chemical Synthesis.....	309
8.2.2	Self Assembly.....	310
8.2.3	Positional Assembly .....	313
8.2.4	Challenges in Self Assembly .....	315
8.3	Current Practice and Applications of Nano Bio Systems/Bio Nano Technology .....	315
8.3.1	Approaches for Constructing Bio Nano Systems .....	315
8.3.2	Recent Developments .....	317
8.4	Drexler-Smalley Debate - Realistic Projections on Molecular Nano Technology.....	320
8.4.1	Essence of Drexler – Smalley Debate on Molecular Manufacturing.....	320
8.4.2	K. Eric. Drexler’s Future Projections on Molecular Manufacturing .....	321
8.4.3	Exchange of Letters between Smalley and Drexler in Chemical and Engineering News.....	322
8.4.4	Commentary on Public Perception of Nanotechnology.....	324
8.4.5	Molecular Manufacturing Present: Overview:.....	325
	<b>References.....</b>	<b>325</b>

## Chapter 9: Semiconductors, Nano Size Effects and Moore’s Law

9.1	Semiconductor Materials and their Properties .....	329
9.1.1	Semiconductors.....	330
9.2	Semiconductor Devices.....	338
9.3	Growing Silicon Demand for Semiconductors .....	339
9.3.1	Poly-silicon Manufacturers.....	339
9.3.2	Global Demand for Silicon .....	340
9.3.3	Poly Silicon Production .....	341
9.4	Nano Size (Quantum) Effects on Semiconductors.....	341
9.4.1	Difference in Energy Band Gap in Bulk Semiconductors and Nano Sized Semiconductors.....	341
9.5	Moore's law .....	344
9.5.1	Nano Fabrication Techniques and Moore’s Law .....	346
9.5.2	Status of Moore's law.....	346
9.5.3	Prospects to Replace Si Electronics.....	347
	<b>References.....</b>	<b>348</b>

## **Chapter 10: Quantum Computing**

10.1 Quantum Theory .....	351
10.1.1 The Essential Elements of Quantum Theory are .....	351
10.2 Quantum Devices .....	351
10.3 Quantum Computing .....	351
10.3.1 Quantum Computer.....	352
10.3.2 Quantum Decoherence.....	354
10.3.3 A Comparison of Classical and Quantum Computing.....	355
10.3.4 Superposition .....	356
10.3.5 Entanglement .....	356
10.3.6 Choosing your Qubit.....	357
10.3.7 Quantum Programming.....	358
10.3.8 The Problems - and Some Solutions.....	359
10.3.9 Quantum Dots as Qubits in Quantum Computing .....	360
<b>References.....</b>	<b>361</b>

## **Chapter 11: Quantum Dots, Nano-Photonics and their Applications**

11.1 Quantum Dots .....	363
11.1.1 Introduction.....	363
11.1.2 Structure of Quantum Dots .....	363
11.1.3 Quantum Confinement in QDs.....	364
11.1.4 Size Dependent Fluorescence in QDs .....	365
11.1.5 Modeling Quantum Confinement.....	366
11.1.6 Optical and Electronic Properties of Quantum Dots.....	366
11.1.7 Quantum Dot Materials.....	367
11.1.8 Quantum Dot Synthesis Techniques .....	368
11.1.9 Core-Shell Quantum Dots .....	372
11.1.10 Types of Core-Shell Quantum Dots .....	373
11.1.11 Choosing a Shell Material for Type-I Systems .....	374
11.1.12 CdSe-ZnS Core-Shell System.....	374
11.1.13 General Applications of Quantum Dots.....	375
11.1.14 Potential Defense Applications of Quantum Dots .....	377
11.1.15 Quantum Dots for Biological and Medical Applications.....	378
11.2 Nano Photonics .....	386
11.2.1 Introduction.....	386
11.2.2 Photonic Crystals .....	386
11.2.3 Theory of Nano Photonics .....	389
11.2.4 Fabrication of Photonic Crystals.....	391
11.2.5 Applications of Nano Photonics .....	393
<b>References.....</b>	<b>394</b>

## Chapter 12: Thin Films

12.1	Introduction.....	399
12.2	Applications of Thin Films .....	400
12.2.1	Optical Coatings .....	400
12.2.2	Photovoltaic .....	400
12.2.3	Thin films in Semiconductors.....	402
12.2.4	Photo Electrochemical Cells (PEC).....	403
12.2.5	Optoelectronics.....	403
12.2.6	Flat Panel Displays .....	403
12.2.7	Data Storage.....	404
12.2.8	Super Capacitor .....	404
12.2.9	Gas Sensors.....	404
12.3	Thin Film Deposition Processes.....	405
12.3.1	Physical Vapour Deposition (PVD).....	406
12.3.2	Chemical and Electrochemical Methods for Thin Film Deposition .....	419
12.3.3	Electro Chemical Deposition for Thin Films.....	421
12.4	Plasma Deposition/Plasma Enhanced Surface Modification (11-14) .....	431
12.4.1	Polymer Surface Modification Techniques .....	431
12.4.2	Advantages of Plasma Surface Modification or Polymerization .....	432
12.4.3	Mechanism.....	432
12.4.4	Classification of Plasma Enhanced Surface Modification Process.....	432
12.5	Nano Structured Thin Films by Colloidal Phase Synthesis .....	434
12.5.1	Colloidal Phase Methods for Thin Films .....	435
12.6	Characterization of Thin Film .....	437
12.6.1	<i>In-situ</i> Characterization Techniques-Quartz Crystal Microbalance.....	437
12.6.2	<i>Ex-situ</i> Thin Film Characterization Techniques .....	438
12.6.3	Sheet Resistivity .....	438
12.6.4	Optical Transmission.....	438
12.6.5	Compositional Analysis.....	439
12.6.6	Mechanical Testing.....	439
	<b>References.....</b>	<b>439</b>

## Chapter 13: Nano-Bio-Info-Cogno (NBIC) Convergent Technologies

13.1	Introduction.....	441
13.1.1	What are Convergent Technologies?.....	441
13.2	Synergic Interplay of Intersecting Technologies in CT .....	443
13.3	The Synergistic Interplay of Technologies in NBIC Convergent Technologies .....	443
13.4	Definition and Scope of Various Convergent Technologies as per International Scientific Organizations.....	444
13.4.1	Enabling Technologies .....	445

13.5 Major Thrust Areas and Overall Potential of Converging Technologies .....	446
13.6 Future Visions for Unique & Significant Applications of Convergent Technologies for improvement of Human Performance and Quality of Life.....	447
13.7 Limits of Convergent Technologies.....	450
13.8 Strategies for Effective Realization of Benefits of Convergence Technologies for the Improvement Human Performance and Quality of Life.....	451
<b>References .....</b>	<b>453</b>

## **Chapter 14: Opportunities and Challenges in Newly Emerging Nano- Technologies and Strategies for their Utilization for Sustainable Development**

14.1 Opportunities and Issues/Concerns in the Application of Nano Technologies.....	455
14.1.1 Opportunities .....	455
14.1.2 Concerns/Issues .....	455
14.2 Challenges in the Application of Nano Technologies.....	456
14.2.1 Grand Challenges.....	456
14.2.2 Emerging Nanotechnologies–Specific Challenges/Barriers/Solutions in their Application in Various Fields .....	457
14.3 Nanotechnology-Sustainable Processes-Materials and Resources.....	457
14.3.1 Manufacturing using Integrated Nanodevices .....	458
14.3.2 Designing and Manufacturing Nano-Materials .....	458
14.3.3 Optimization of Nano Materials Engineering Process – Concept to Product/Application .....	458
14.3.4 Materials Selection, Preparation and Fabrication.....	460
14.3.5 Processing, Properties, and Performance.....	460
14.3.6 Product/Application.....	460
14.4 Possible Nano based Solutions for Addressing the Challenges .....	461
14.5 Impact of Nano Technologies on Various Industries and Challenges .....	461
14.5.1 Nano Informatics .....	461
14.5.2 Telecom and Datacom .....	462
14.5.3 Impact of Nanotechnologies on Energy Technologies .....	462
14.5.4 Impact of Nano Technologies on Environment.....	463
14.5.5 Impact of Nanotechnologies on Water Purification and Global Drinking Water Supply .....	465

## **(xxiv) Contents**

---

14.5.6	Role of Nano Technologies on Global Sustainable Agriculture – Optimization of Production and Distribution of Agriculture Products.....	465
14.5.7	Nano Technologies in Health Care, Medicine, Bio-Diagnostics .....	466
14.5.8	Risk Assessment for Nano Materials .....	466
14.5.9	Exposure Assessment of Nanomaterials .....	466
14.5.10	Risk Management of Carbon Nanotubes .....	467
14.5.11	Nanotechnology Implications in Natural and Global Processes .....	468
14.6	Global Challenges in Nano Technologies Application .....	469
14.6.1	Global Collaboration in Nanotechnology Applications for Meeting Development Challenges .....	469
14.6.2	International Competition for Developing Cutting Edge Nano Technologies .....	470
14.6.3	Global Governance to Promote Nanotechnology for Development .....	470
14.6.4	Challenges for Developing Countries in Promotion of Nanotechnologies for Development.....	471
14.7	Important Strategies to be Adopted for Realizing the Benefits of Newly Emerging Nano Technologies and Addressing the Challenges in their Implementation for Sustainable Growth .....	471
14.7.1	Funding by Government and Private Industries and Global Collaboration in Nanotechnology Applications for Meeting Development Challenges.....	471
14.7.2	Private/Industry Participation in Nano Technology Growth .....	473
14.8	Educational Challenges and Research Funding in Promotion of Nano Technologies .....	474
14.8.1	Development of an Inter-agency Group to Foster Research, Curricula, and Evaluation .....	474
14.8.2	Creation of Scientific and Technological Infrastructure for Advanced Nano Technology Research.....	475
14.8.3	Interdisciplinary Training on Nano Technologies .....	475
14.9	Safety and Regulatory Issues Need to be Addressed on the Application of Nano Technologies.....	475
14.9.1	Public Engagement on the Use of Nanotechnology .....	476
14.9.2	Communication Efforts on Health, Safety, and Environmental Guidelines .....	476
14.10	Policy Issues on Nanotechnology .....	476
14.11	India's Research Initiatives in Nanotechnologies and Specific Challenges .....	477
14.12	Careers Opportunity in Nanotechnology.....	478
14.12.1	Major Categories of Nanotechnologies for Career Opportunities .....	478
14.12.2	Scope of Applications of Nano Technologies .....	479
14.12.3	What are Major Career Areas/Fields in India? .....	479
14.12.4	Great Potential for Future Career Opportunities in Material Processing Informatics and Quantum Computation .....	479

14.12.5	Current Career Opportunities in Nano Technologies .....	480
14.12.6	Indian Scenario .....	481
14.12.7	What Education is needed and in which Fields? .....	481
14.12.8	Remuneration.....	481
14.12.9	Eligibility .....	481
	<b>References .....</b>	<b>482</b>

## **Chapter 15: Laboratory Exercises**

15.1	Introduction.....	487
15.2	Experiment -1 Testing of Natural Materials for Nano-Structures.....	487
15.2.1	Natural Nano Materials to be Tested .....	487
15.3	Experiment 2: Testing Self Assembly in Liquid Crystals and Effect of Temperature .....	493
15.4	Experiment 3: Sensor Applications of Localized Surface Plasmon Resonances (LSPR) in Colloid Nano Particles.....	498
15.5	Experiment 4: Testing Super Hydrophobic Materials.....	515
15.6	Experiment 5: Application of Ferro-Fluids .....	522
15.7	Experiment 6: Synthesis and Characterization of CdSe Quantum Dots .....	532
15.7.1	Theory .....	532
15.7.2	Particle in Box Model for Explaining Quantum Mechanical behavior and Resultant Fluorescence Spectra of QDS .....	533
15.7.3	Synthesis of Quantum Dots .....	534
15.7.4	Preparation of CdSe Quantum Dots.....	536
15.7.5	Spectral Characterization of QDs and Determination of Sizes.....	536
15.7.6	Data Analysis: Determination of the Size of the QDs .....	537

<b>Questions .....</b>	<b>541</b>
------------------------	------------

<b>Index.....</b>	<b>559</b>
-------------------	------------
