CONTENTS

Preface ..... (xiii)
Acknowledgement ..... (xv)

Chapter 1

Systems of Units

Foot-Pound-Second (FPS) System 1
Units of Length 1
Thou 1
Inch 1
Hand 2
Foot 2
Cubit 2
Yard 2
Pace 2
Fathom 3
Rod 3
Chain 3
Furlong 3
Mile 3
Nautical mile 4
Units of Mass or Weight 5
Grain 5
Scruple 5
Pennyweight 5
Dram 5
Ounce 6
Pound 6
Stone 6
Hundredweight 6
Ton 6

Unit of Time (Second) 7
International System of Units (SI) 7
Equivalence of units between SI (CGS) and other Systems of Measurement 10
Measurement of Volume 10
Conversion between the Systems 12
Equivalence between Different Systems 17
Conversion of Temperature 21
Calculation Involving Units 23
Exercise **26**

Chapter 2

Measurements of Mass and Volume

Measurement of Weight 30
Measurement of Volume 31
Aliquot Method of Weighing and Measuring 32
Weighing by the Aliquot Method 32
Percentage of Error in Weighing 35
Percentage of Error in Measuring Length 36
Measurement of Area 38
Surface Area 50
Measuring Volume by the Aliquot Method 54
Percentage Error 55
Percentage of Error in Volumetric Measurement 55
Exercise **60**

Chapter 3

Fundamental Calculations

Fractions 64
Percent 67
Exponential Notation 68
Ratio and Proportion 70
Ratio 70
Proportion 71
Variation 73

Logarithm 74
Alligation 79
Significant Figures 85
Rounding of Figures and Rules for Rounding 86
Estimation 87
Exercise **89**

Chapter 4

Density, Specific Gravity and Specific Volume

Density 93
Use of Density to Determine Alcohol Content 94
Specific Gravity 105
Determination of Specific Gravity of Liquid 107
Density of Solid 110
Determination of Density of Powder 112
Computation of Weight Using Specific Gravity and Volume 113
Computation of Volume using Specific Gravity and Weight 114
Applications of Specific Gravity in Pharmacy 115
Specific Volume 116
Exercise **117**

Chapter 5

Calculation Related to Capsule Filling, Suppository Molds, Dry Powders and Doses

Calculation Related to Capsule Filling 121
Calibration of Suppository Molds 127
Calculation and Preparation of Suppositories 128
Calculation Related to Dry Powders for Oral Use 129
Calculation Related to Dry Powders for Parenteral Use 131
Calculation Related to Dose 133
Dose 134
Routes of Drug/Dose/Dosage Form Administration 136

Measurement of Dose 136
Teaspoon and Tablespoon 136
The Drop as a Unit of Measure 137
Low-Dose and High-Dose Therapies 138
Dose Calculation 140
Exercise **145**

Chapter 6

Calculation involving Isotonic Buffer Solutions

Clinical Consideration of Tonicity 150
Preparation of Isotonic Solutions 151
Physical and Chemical Consideration 151
Calculations of the i Factor 156
Calculation of Tonicic Agent Required [Using Sodium Chloride Equivalent (E value)] 157
Preparation of Isotonic Solutions (Using an Isotonic Sodium Chloride Solution) 160
Calculation of Tonicic Agent Required (Using Freezing Point Depression Data) 161
Calculations using Freezing Point Data 162
Buffers and Buffer Solutions 163
Applications of Buffers 163
Buffer Equation 164
Application of the Buffer Equation 165
Calculation of pKa Value of a Weak Acid with known Dissociation Constant 165
Calculation of pH Value of Buffer System 166
Calculation of Volume to Prepare Buffer Solution 168
Change in pH with Addition of an Acid or Base 170
Exercise **175**

Chapter 7

Calculation involving Electrolyte Solutions

Milliequivalents 180
Calculations of Milliequivalents 180

Millimoles and Micromoles 192
Osmolarity 195
Calculations of Milliosmoles 196
Water and Electrolyte Balance in the Body 200
Exercise **206**

Chapter 8

IV Infusions, Enternal and Parenteral Nutrition, BMI, Food Nutrition Level

Parenteral Preparation 209
Injections 209
Intravenous (IV) Infusions 210
Administration Set 211
Enteral and Parenteral Nutrition 213
Parenteral Nutrition 214
Nutritional Requirements 216
Fluid Requirements 216
Caloric Requirements 216
Carbohydrate Requirements 219
Protein Requirements 221
Lipid (Fat) Requirements 221
Fiber Requirements 222
Calculations of Enteral Nutrition 222
Calculations Related to Parenteral Nutrition 226
Body Mass Index (BMI) 230
Determination of BMI 231
Exercise **237**

Chapter 9

Bioavailability and Pharmacokinetics

Availability of Drug from 242
Dosage Form and Delivery System
Plotting and Interpreting Dissolution Data 242
Calculations of Bioavailability and Bioequivalence 244

'Bioequivalent Dose' of 'Bioinequivalent' Dosage Forms 245
Plotting and Interpreting a Plasma-Drug Concentration vs. Time Curve 248
Calculations involved in Pharmacokinetics 251
Plasma Concentration of Unbound Drugs vs. Bound Drugs 251
Total Amount of Drug Administered, Apparent Volume of Distribution and Plasma Concentration of Drug 252
Elimination Half-Life and Elimination Rate Constant 258
Exercise **261**

Chapter 10

Radiopharmaceuticals

Radioactivity 266
Units of Radioactivity 268
Exercise **271**

Chapter 11

Calculations Related to Plant Extracts and Drug Molecule

Extract, Fluidextract and Tincture 274
Fluidextracts 274
Tinctures 274
Determination of Ethanol-Soluble Extractives 277
Determination of Water-Soluble Extractives 278
Determination of Saponification Value 278
Determination of Iodine value 281
Determination of Acid Value 283
Determination of Acetyl Value 285
Calculation of Retention Factors (Rf) for Thin Layer Chromatography 286
Calculation of Chemical Moiety and Equivalency 287
Exercise **293**

Chapter 12

Biostatistics

Mean, Median and Mode 297
Coefficient of Skewness 305
Probability 308
Correlation and Regression 323
Degree of Correlation 325
Significance Test of Coefficient of Correlation 325
Regression Analysis 327
Significance Test for Regression Coefficient 331
Test of Significance 336
One and Two-Tailed Test of Hypothesis 337
Comparison of Means of Two Large Samples (The Sample are Independent) 337
t-test for Paired Samples 340
Chi-Square Test 342
Analysis of Variance 347
One-way Classification 347
Two-Way Classification 353
Rejection of Data 364
Chauvenet's Criterion 364
Thompson-τ Method 366
Exercise **370**

Chapter 13

Dissolution Tests

Preparation of Standard Calibration Curve 375
Kinetics of Drug Release 388
Noyes-Whitney Rule 388
Nernst & Brunner Film Theory 388
Modeling of Release Kinetic 389
First order model 390
Higuchi Model 392
Hixson-Crowell Model 395

Korsmeyer-Peppas Model 396
Baker-Lonsdale Model 398
Weibull Model 398
Hopfenberg Model 399
Gompertz Model 399
Linear or First Order Regression Model 400
***Appendix* 1:** Atomic Weight of Elements 401
***Appendix* 2:** Density of Water at various Temperatures 405
***Appendix* 3:** Common Logarithms 408
***Appendix* 4:** 412
