

Contents

<i>Foreword</i>	(xv)
<i>Preface to Second Edition</i>	(xvii)
<i>About the Author</i>	(xix)

Chapter 1

Climatology of Hailstorm

1.1	Geographical Distribution of Hailstorm	2
1.2	Global Climatology of Severe Hailstorm.....	5
	1.2.1 Seasonality in Severe Hailstorm	7
	1.2.2 Diurnal Variation in Severe Hailstorms.....	14
1.3	Regional Climatology of Hailstorms	16
	1.3.1 Canada.....	16
	1.3.2 United States	17
	1.3.3 South America	19
	1.3.4 Africa	20
	1.3.5 Europe.....	21
	1.3.6 China.....	23
	1.3.7 Australia.....	24
1.4	Hailstorms over India.....	25
1.5	Seasonal Variation of Hailstorm in India.....	28
1.6	Hail Path, Hail Streak and Hailswath.....	55
1.7	Duration of Hail Fall.....	58
1.8	Duration of Hail Damage.....	59
	<i>References</i>	59

Chapter 2

Hailstones

2.1	Classification of Hail	64
2.2	Hail.....	64
	2.2.1 Graupel or Soft Hail or Snow Pellets.....	67
	2.2.2 Small Hail	69
	2.2.3 Ice Pellets (American Sleet).....	69

2.3	The Shapes of Hailstone	69
2.4	Size of the Hailstone	74
2.4.1	Large Stones	78
	<i>References</i>	82

Chapter 3

Hail Sampling and Analysis

3.1	Hailstone Sampling	86
3.1.1	Hailstone Collection	86
3.2	Measurement of Shape and Size of Hail	88
3.3	Instruments Related to Hailfall	92
3.4	Hailstone Examination	98
3.5	Storing of Hail Stones	103
3.6	Aerodynamic Forces, Stability and Position during Free Fall	104
3.7	Method of obtaining thin Sections	107
3.8	The Structure of Air Bubble and their Significance.....	113
3.9	The Structure of Ice Portion of Hail.....	114
3.10	Painter and Schaefer Method for Internal Examination.....	115
3.11	The Structure of Water Caverns.....	116
	<i>References</i>	117

Chapter 4

Convection and Thunderstorm Formation

4.1	Convection	120
4.1.1	Gutman Model of Cell	120
4.1.2	Lebedev Model of Cell	121
4.1.3	Mull and Kulshreshtha Model	122
4.1.4	Ludlum Model of Cumulus Convection	122
4.2	The Concept of Buoyancy	123
4.2.1	Parcel Theory	125
4.2.2	Entrainment.....	127
4.2.3	Hydrometer Loading.....	127
4.3	Computation of Ascending Velocity.....	128

4.4	Thunderstorm.....	134
4.4.1	Formation of Thunderstorm.....	135
4.5	Parts of Matured Thunderstorm.....	138
4.6	Downdraft.....	140
4.6.1	Definitions.....	140
4.6.2	Types of Downdraft.....	141
4.6.3	Downdraft Initiation Hypotheses.....	143
4.6.4	Structure of Precipitation Downdraft.....	145
4.6.5	Numerical Analysis of Downdraft.....	146
4.7	Types of Thunderstorms.....	147
4.8	Movement of Thunderstorm Stochastic Approach.....	149
	<i>References</i>	152

Chapter 5

Hail Growth and Hailstorm

5.1	Precipitation Process Chain.....	156
5.2	Mechanism of Hail Growth.....	157
5.3	Vertical Wind Shear and Tilt.....	159
5.4	Commonly used Nomenclatures Related to Hailstorm.....	161
5.5	Hail Size on surface.....	161
5.5.1	Fawbush and Miller Technique of Possible Hail Size.....	162
5.6	Numerical Simulations of Hailstorms.....	165
5.6.1	Technique of Hailstorm, Prediction by Convective Diagnostic Procedure (CDP).....	166
5.7	Cave Channel Hypothesis.....	168
5.8	Echoes Associated with Hailstorm on Radar.....	169
5.9	Satellite observation of Hailstorm.....	174
5.10	Structure of Hailstorm.....	176
5.11	Stability Indices.....	183
5.12	Pressure and Humidity Dip.....	184
	<i>References</i>	185

Chapter 6**Hailstorm over North-East India**

6.1	Favourable Conditions for Hailstorm Occurrence	191
6.2	Vertical Wind Shear	200
6.3	Humidity Parameter	201
6.4	Radar Study of Hailstorm over Gauhati	203
	<i>References</i>	206

Chapter 7**Hailstorm over North West India**

7.1	Favourable Condition for Hailstorm Occurrence	212
7.2	Vertical Wind Shear	227
7.3	Humidity Parameter	228
	<i>References</i>	233

Chapter 8**Hailstorm over Central India**

8.1	Favourable Condition for Hailstorm Occurrence	240
8.2	Vertical Wind Shear	249
8.3	Humidity Parameter	250
8.4	Radar Study of Hailstorm over Kamptee	252
	<i>References</i>	256

Chapter 9**Hailstorm over South Peninsular India**

9.1	Favourable Conditions for Hailstorm Occurrence	259
9.2	Vertical Wind Shear	267
9.3	Humidity Parameter	267
	<i>References</i>	270

Chapter 10**Hailstorm Modification and Control**

10.1	Sulakvelidze Hypothesis of Hail Control	272
10.2	Seeding in Atmosphere	273

10.3	Seeding Strategy	276
10.3.1	Sandwich Seeding.....	276
10.3.2	Super Sandwich Seeding.....	276
10.4	Seeding Technology.....	277
10.4.1	Ground based Dispersion.....	277
10.4.2	Base Dispersion by Aircraft.....	278
10.4.3	Lateral Delivery System by Firing Rockets from Aircraft	280
10.4.4	Top-down Delivery System by Dropping Pyrotechnic Cartridges from Aircraft	281
10.4.5	Direct Injection by Firing Rockets from Ground from Static Location	283
10.4.6	Direct Injection by Firing Rocket, Transported by the Helicopter below the cloud and fired vertically from the Ground.....	287
10.5	Why Success in Hail Control Mostly Eluded	287
10.6	National Initiative on Climate Resilient Agriculture (NICRA) on Hail Control	291
10.6.1	Stage I: Locating the Cloud by Radar which has Potential to grow in to Hailstorms	292
10.6.2	Stage II: Transporting AgI and NaCl Rockets by Helicopter below the base of the Cloud on Ground	292
10.6.3	Stage III: Firing the AgI and NaCl Rockets vertically upward into the Cloud from the Ground Level	294
10.6.4	Stage IV: Appropriate level release of the AgI Pyrotechnic cartridges in cold region of cloud and spray common salt's appropriately milled powder in the warm region of the cloud	294
10.6.5	Stage V: Recover the Helicopter back to Base	295
10.7	The Environmental Impact of Using Silver Iodide as a Cloud Seeding Agent	295
10.8	Future Prospects.....	297
	<i>References</i>	298

Chapter 11**Damage Due to Hail and Risk Cover**

11.1 Hail Impact Energy	307
11.2 Damage to Property	308
11.3 Loss of Life	310
11.4 Damage to Automobiles	311
11.5 Damage of Aircrafts.....	312
11.5.1 Effect of Hailstone on Aircraft in Flight.....	314
11.5.2 Hail outside Thunderstorms.....	315
11.6 Roof Top Damage by Hail Fall.....	316
11.7 Protection against Hail Damage to the Crops	320
11.8 Assessing the risk of Hail Damage and Insurance Cover	321
<i>References</i>	324

Appendix - A

Damage due to Hailstorms in India during 1986-91	329
--	-----

Appendix - B

Meteorological Definitions and Indices Related to Thunderstorm I. Skew-T– Log P Structure	335
II. Levels	337
(a) Lifting Condensation Level (LCL)	337
(b) Convective Condensation Level (CCL).....	337
(c) Level of Free Convection (LFC).....	337
(d) Equilibrium Level (EL)	337
III. Meteorological Variables	338
(a) Temperatures	338
1. Potential Temperature (Θ)	338
2. Equivalent Temperature (T_e).....	339
3. Equivalent Potential Temperature (Θ_e).....	340
4. Saturated Equivalent Potential Temperature (Θ_{es}).....	340
5. Wet Bulb Temperature (T_w).....	340
6. Wet Bulb Potential Temperature (Θ_w)	340

(b) Vapor Pressures	
1. Vapor Pressure (e)	340
2. Saturation Vapor Pressure (e_s)	340
(c) Mixing Ratios	
1. Mixing ratio (w).....	341
2. Saturated Mixing Ratio (w_s)	341
IV. Stability Indices	
(a) K-Index	341
(b) Lifted Index (LI)	341
(c) Showalter Index (SI).....	342
(d) Total Totals Index (TT)	342
(e) Convective Available Potential Energy (CAPE)	342
(f) Convective Inhibition (CIN).....	342
(g) Downdraft Convective Available Potential Energy (DCAPE).....	342 340
(h) Cap Strength	343
(i) Summary of Index Values	343
V. Cloud Layers	344
VI. Atmospheric Mixing.....	344
VII. Atmospheric Static Stability.....	345
(a) Using Lapse Rates	346
(b) Using Potential Temperature	346
(c) Using the Saturation Equivalent Potential Temperature.....	346
VIII. Wind Shear.....	346
IX. Remarks on skew-t.....	346
X. Damage Scale	347
XI. Brightness Temperature.....	350
Colour plates	351
Author Index	357
Index.....	361
