<i>Acknowledgement</i>	(vii)

CHAPTER 1

Operations Research – An Overview

1.0 Introduction.....	3
1.1 Origin and Development of OR Models.....	3
1.2 Operations Research: Some Definitions.....	4
1.3 Phases (or Steps) of Operation Research Method (Modeling).....	5
1.4 Operation Research Models: Classification.....	7
1.4.1 Classification Based on Structure.....	7
1.4.2 Classification Based on Purpose and Nature.....	7
1.4.3 Based on Certainty.....	8
1.4.4 Based on Time Reference.....	8
1.4.5 Based on Method of Solution.....	8
1.5 Application Models of Operation Research.....	8
1.6 Significance and Applications of OR in Industrial Problems.....	9
1.7 Characteristic Features of Operations Research Model (or Merits of Operations Research Models).....	11
1.7.1 Distinct Direction in Decision Making.....	11
1.7.2 Scientific Approach.....	11
1.7.3 Objective Orientation.....	11
1.7.4 Inter - Disciplinary Team Approach.....	11
1.7.5 Compatible to Digital Computer.....	11
1.7.6 Consideration of All Factors.....	11
1.8 Limitations (Demerits) of Operations Research.....	11
1.8.1 Impossibility and Infeasibility.....	12
1.8.2 For Intangible Situations.....	12
1.8.3 Distance Between Managers (Decision Maker) and Operation Researcher.....	12
Review Questions.....	12
Objective Type Questions.....	13
Fill in the Blanks.....	16
Answers.....	16

CHAPTER 2

Formulation of Linear Programming Problems

2.0 Introduction	19
2.1 Formulation	19
2.2 Major Assumption of LLP	42
Practice Problems	43
Review Questions	48
Objective Type Questions	49
Fill in the Blanks	51
Answers	52

CHAPTER 3

Graphical Solution of LPP

3.0 Introduction	55
3.1 Merits and Demerits of Graphical Solutions	55
3.2 Graphical Solution Procedure	55
3.3 Redundant Constraint	60
3.4 Different Types of Solutions	63
3.5 Locating Feasible Region	64
3.6 Types of Feasible Regions	65
3.7 Types of Optimal Solutions	67
Solved Problems	69
Practice Problems	74
Additional Problems	79
Review Questions	82
Objective Type Questions	83
Fill in the Blanks	85
Answers	86

CHAPTER 4

Simplex Method

4.0 Introduction	89
4.1 Simplex Algorithm	89
4.2 Some Special Cases	101
4.2.1 Unbounded Solution	102
4.2.2 Multiple Optimal Solutions	103
4.2.3 Unique Solution	105
4.2.4 Infeasible Solution	108
Practice Problems	109
Additional Problems	114

4.3	Simplex Method: Using Surplus & Artificial Variables	118
4.3.1	Big - M Method	118
4.3.2	Two - Phase Method	125
4.4	Degeneracy in Simplex Method	143
4.4.1	Tie for Entering Variable (i.e., Key Column)	148
4.4.2	Unrestricted Variables in LLP	149
4.4.3	Equality Constraints in LLP (or Mixed Constraints)	149
4.5	Concept of Duality in Simplex	152
4.5.1	Conversion of Primal to Dual or Dual to Primal	155
4.5.2	Comparison between Primal & Dual	162
4.5.3	Advantages & Applications of Duality	163
4.5.4	Shadow Price	163
	Practice Problems	164
	Additional Problems	170
	Practice Problems in Duality	173
	Review Questions	183
	Review Questions in Duality	185
	Objective Type Questions	186
	Fill in the Blanks	189
	Answers	190

CHAPTER 5

Transportation Problem

5.0	Introduction	193
5.1	Formulation	193
5.2	Transportation Problem Formulated as an LPP	194
5.3	Transportation Algorithm: Solution Method	195
5.3.1	Maximisation Case in Transportation Problems	195
5.3.2	Unbalanced Transportation Problem	196
5.3.3	Degeneracy in Transportation Problem	197
5.4	Unbalanced Transportation Problem	197
5.4.1	North West Corner Method	199
5.4.2	Vogel's Approximation Method (VAM) or Penalty Method	207
5.4.3	Least Cost Entry Method (Matrix Minima Method)	217
5.5	North West Corner Method	225
5.5.1	Stepping Stone Method	225
5.5.2	MODI Method	232

5.6	Vogel's Approximation Method (VAM) or Penalty Method.....	255
5.6.1	Degeneracy in the Initial Solution	255
5.6.2	Degeneracy in the Subsequent Iterations.....	257
5.7	Least cost Entry Method (Matrix Minima Method).....	260
5.7.1	Multiple Optimal Solution or Alternate Optimal Solution	260
5.7.2	Restricted TP	262
5.7.3	Conditional TP.....	264
	Practice Problems.....	270
5.7.4	Trans-shipment Problem.....	279
	Review Questions.....	282
	Objective Type Questions.....	283
	Fill in the Blanks	287
	Answers.....	288

CHAPTER 6

Assignment Problem

6.0	Introduction.....	291
6.1	The Assignment Algorithm.....	291
6.2	Variations in Assignment Problem	302
6.2.1	Maximisation Case in AP	302
6.2.2	Unbalanced Assignment Problem.....	306
6.2.3	Multiple Optimal Solution.....	309
6.2.4	Restricted (or Prohibited) Assignment	311
6.2.5	Conditional Assignment	313
6.2.6	Crew Assignment Problem.....	322
6.2.7	Travelling Salesman Problem (or Routing Problem).....	325
6.2.8	A Transportation Problem as Assignment Problem.....	327
	Practice Problems.....	329
	Additional Problems.....	344
	Review Questions.....	354
	Objective Type Questions.....	355
	Fill in the Blanks	359
	Answers.....	360

CHAPTER 7

Inventory Management

7.0	Introduction.....	363
7.1	Classification of Inventory	363
7.2	The Operating Doctrine.....	364
7.3	The Inventory Costs	364

7.4 Terminology used in Inventory	365
7.5 Inventory: Significance (Advantages of Inventory).....	365
7.6 Objectives of Inventory	366
7.7 Functions of Inventory	367
7.8 Factors Affecting Inventory	368
7.9 Concept of Economic Order Quantity (EOQ).....	368
7.10 Inventory Models	370
7.11 Model - 1: Wilson Harris Simple EOQ.....	370
7.12 Model - 2: Continuous and Non-uniform Demand (Consumption).....	376
Practice Problems.....	376
7.13 Model - 3: With Continuous Production (Supply) Rate.....	378
Practice Problems.....	383
7.14 Model - 4: Deterministic Model with shortages	385
Practice Problems.....	390
7.15 Model - 5: With Finite Replenishment and Shortages Allowed	392
Practice Problems.....	394
7.16 Model - 6: With Price Breaks or Quantity Discounts	395
Practice Problems.....	398
7.17 Stochastic or Probabilistic Models of Inventory Control.....	400
7.18 Model - 7: Single Period Probabilistic Model with Instantaneous Demand without Setup Cost.....	401
Practice Problems.....	402
7.19 Inventory Control Approaches	404
7.20 Stores Management & Selective Inventory Control.....	405
Review Questions.....	409
Objective Type Questions	411
Fill in the Blanks	418
Answers.....	420

CHAPTER 8

Queue Models (Waiting Lines)

8.0 Introduction	423
8.1 Terminology	423
8.2 When Does A queue Result?.....	424
8.3 Costs Associated with Waiting Lines (Queuing)	424
8.4 Queue System: Salient Features.....	425
8.5 Queuing Models: Kendall - Lee Notations.....	430
8.6 Parameters of Queue System.....	432
8.7 Axioms of Poisson Process	432

8.8	Operating Characteristics of Queue System.....	432
8.9	Model - 1: (M/M/1): (∞ /FIFO).....	434
	Practice Problems.....	441
8.10	Model - 2: (M/M/1): (∞ /SIRO).....	448
8.11	MODEL - 3: (M/M/1): (N/FCFS).....	448
	Practice Problems.....	450
8.12	Model - 4: (M/M/S): (∞ /FIFO).....	450
	Practice Problems.....	454
	Review Questions.....	456
	Objective Type Questions.....	457
	Fill in the Blanks.....	460
	Answers.....	462

CHAPTER 9

Companion Booklet of Operations Research

9.0	Introduction.....	465
9.1	Sequencing of n Jobs X 1 Machine.....	465
9.2	Sequencing of n Jobs X 2 Machines: Johnson's Rule.....	466
	9.2.1 Assumptions for n Jobs X 2 Machines Sequencing.....	467
	9.2.2 The Rule.....	467
	Practice Problems.....	477
9.3	Sequencing n Jobs X 3 Machines: Jackson's Rule.....	483
9.4	Sequencing n Jobs X m Machines.....	491
	Practice Problems.....	493
9.5	Sequencing of 2 Jobs X n Machines.....	499
	Practice Problems.....	501
	Review Questions.....	504
	Objective Type Questions.....	505
	Fill in the Blanks.....	510
	Answers.....	511

Chapter 10

Replacement Analysis

10.0	Introduction.....	515
10.1	Failure Patterns.....	515
	10.1.1 Definition.....	515
	10.1.2 Behaviour of Machines.....	515
	10.1.3 Failures based on the Volume of Failure.....	518
	10.1.4 Types of Failures based on the Mode of Failure.....	518

10.2	Failure Costs.....	519
10.3	Types of Replacement Problems.....	521
10.4	Type - 1: Replacement Policy when Money Value does not Change with Time	521
	Practice Problems.....	528
10.5	Replacement Policy for items When Money Value Changes with Time.....	532
	Practice Problems.....	538
10.6	Group Replacement.....	543
	Practice Problems.....	548
	Review Questions.....	552
	Objective Type Questions	553
	Fill in the Blanks	556
	Answers.....	558

CHAPTER 11

Game Theory

11.0	Introduction.....	561
11.1	Theory of Games: The Terminology used	561
	11.1.1 Properties of a Game.....	561
	12.1.2 Definitions of Terms used.....	562
11.2	Types of Games.....	563
	11.2.1 With Reference to Number of Players	563
	11.2.2 With Reference to Nature of Out Comes.....	563
	11.2.3 With Reference to Certainty	563
	11.2.4 With Reference to Value of the Game	564
11.3	Two Person-zero Sum Games or Rectangular Games	564
	11.3.1 Assumptions of the Game.....	565
	11.3.2 Solving Two Person-zero Sum Games	565
11.4	Dominance Principle.....	570
11.5	Games without Saddle Points Mixed Strategy	577
11.6	Graphical Solutions.....	584
11.7	Linear Programming Method.....	589
11.8	Distinction between Deterministic and Probabilistic Games	594
11.9	Limitations of Game Theory	595
11.10	Flow Chart of Game Theory	595
	Practice Problems.....	596
	Review Questions.....	609
	Objective Type Questions	610
	Fill in the Blanks	615
	Answers.....	616

CHAPTER 12

Dynamic Programming

12.0 Introduction	619
12.1 The Approach & Algorithm	619
12.2 Salient Features & their Definitions of DPP	620
12.3 Characteristics of DPP	621
Practice Problems	636
Review Questions	640
Objective Type Questions	640
Fill in the Blanks	642
Answers	642
