*Preface to second edition* .....(xvii)

*Preface to first edition* .....(xix)

## Chapter 1

### Introduction to medicinal chemistry

Chronology of drug introductions.....	2
Development of various classes of drugs.....	6

## Chapter 2

### General principles of drug action

Definition of drugs.....	9
Classification of drugs.....	9
Characteristics of different routes of drug administration.....	11
Sites of drug action.....	12
Mode of drug action.....	12
Mechanism of drug action.....	13
Drug receptor interactions.....	14

## Chapter 3

### Physicochemical and Stereochemical properties of organic medicinal agents

Solubility.....	21
Partition coefficient.....	24
Dissociation constants (pKa).....	26
Ionization of drugs.....	27
Hydrogen bonding.....	28
Molar refractivity (MR).....	32
Drug shape.....	32
Complexation.....	32
Surface activity.....	34

---

Protein binding.....	35
Bioisosterism .....	36

## Chapter 4

### Quantitative structure-activity relationship

Introduction.....	40
QSAR parameters .....	40
Biological activity = F (Physicochemical properties).....	41
QSAR methods .....	42
Applications.....	48
Case study.....	48
Advantages of QSAR.....	49
Disadvantages of QSAR.....	49

## Chapter 5

### Drug design

Introduction .....	50
Methodology for drug design .....	51
The molecular basis of drug specificity.....	54

## Chapter 6

### Combinatorial chemistry

Introduction.....	55
Combinatorial synthesis.....	55
Applications of combinatorial chemistry.....	59

## Chapter 7

### Sulphonamides or sulpha drugs

Chemotherapy.....	60
Mechanism of action.....	61
Classification .....	62

---

SAR of sulphonamides .....	63
Crystalluria .....	64
Sulphanilamide .....	64
Sulfadiazine .....	64
Sulphathiazole.....	65
Sulphamethoxazole.....	65
Sulphaphenazole .....	66
Sulphadimethoxine .....	66
Sulphaguanidine .....	67
Phthalylsulphathiazole.....	67
Succinylsulphathiazole .....	68
Sulphacetamide.....	68
Sulphasalazine .....	69
Trimethoprim-sulphamethoxazole.....	69
Mechanism of action .....	70

## Chapter 8

### Penicillins

History of antimicrobial therapy.....	72
Summary.....	72
$\beta$ -Lactam antibiotics .....	73
Mode of action.....	73
Penicillins .....	75
Classification .....	75
General characteristics.....	75
Structure-activity relationships (SAR).....	76
Mechanism of action.....	77
Stability.....	77
Side effects.....	78
Natural penicillins.....	78
Semi-synthetic penicillins.....	79
Ampicillin.....	79
Penicillinase-resistant penicillins.....	81
$\beta$ -lactamase inhibitors.....	86
Mechanism of action.....	86

---

## Chapter 9

### Cephalosporins

Introduction.....	87
Mode of action.....	88
Stability of cephalosporins.....	89
Structure-activity relationships.....	90
Classification.....	93

## Chapter 10

### Aminoglycosides

Chemistry.....	108
Streptomycin.....	112
Structure activity relationship (SAR).....	112
Dihydrostreptomycin sulfate.....	113
Neomycin.....	114
Kanamycin.....	114
Amikacin.....	115
Gentamicin sulphate.....	116
Tobramycin.....	116

## Chapter 11

### Tetracyclines

Introduction.....	118
Tetracycline.....	119
Chlortetracycline (Aureomycin or 7-Chlortetracycline).....	120
Oxytetracycline.....	121
Demeclocycline.....	121
Meclocycline.....	122
Doxycycline.....	122
Minocycline.....	123

## Chapter 12

### Macrolides

Erythromycin .....	125
Chemistry.....	125
Clarithromycin.....	126
Azithromycin .....	126
Roxithromycin .....	127
Dirithromycin .....	128

## Chapter 13

### Polypeptide and miscellaneous group of antibiotics

Bacitracin.....	130
Gramicidin .....	131
Miscellaneous antibiotics.....	131
Rifampicin or rifampin .....	137
Mechanism of action.....	137
Rifabutin .....	138
Chloramphenicol.....	139

## Chapter 14

### Urinary antiseptics

The agents of urinary tract infections .....	141
Signs and symptoms .....	141
Drugs for urinary tract infections.....	141
Quinolones.....	142

## Chapter 15

### Anti-tubercular drugs

Introduction.....	151
General features .....	151
First-line drugs.....	153
Antibiotics.....	158
Drugs for the treatment of mycobacterium avium complex (MAC) .....	159

## Chapter 16

### Antileprotic drugs

Leprosy .....	161
Signs of leprosy .....	161
Other signs of leprosy include .....	161
Diagnosis of leprosy .....	162
Classification .....	162
Drugs for the treatment of leprosy .....	162

## Chapter 17

### Antimalarials

Structural activity relationship of quinoline anti-malarials.....	167
Cinchonine .....	169
Primaquine (8-Aminoquinoline analogue) .....	172
Biguanides .....	176

## Chapter 18

### Anti-protozoal drugs

Antiamoebic durgs.....	180
Classification of antiamoebic drugs.....	180
Alkaloids.....	181
Halogenated hydroxyquinolines .....	181
Mechanism of action.....	183
Antigiardial drugs .....	186
Leishmanicides .....	189

## Chapter 19

### Anthelmintics

Albendazole .....	193
Pyrantel pamoate.....	195
Piperazine .....	196
Praziquantel .....	197
Levamisole.....	198

## Chapter 20

### Antifungal agents

Introduction.....	199
Classification of antifungal agents.....	199
Individual members .....	199
Amphotericin B .....	200
Nystatin.....	201

## Chapter 21

### Antiviral agents

Viral-replication.....	212
General approaches for treating viral infections.....	213
Ideal properties of antiviral drugs.....	214
Nucleic acid synthesis inhibitors or nucleoside antimetabolites.....	214
Host cell penetration inhibitors.....	219
Reverse transcriptase inhibitors.....	219
RNA synthesis inhibitors.....	223
Protein processing inhibitors .....	223
Interferons.....	225

## Chapter 22

### Anticancer drugs

Characteristics of cancer cells.....	227
Classification DNA-alkylating-agents.....	230
Mechanism of action of anti cancer drugs.....	259
Miscellaneous anti-cancer drugs.....	260

## Chapter 23

### Gastrointestinal agents

Emetics .....	262
Antiemetics.....	262
Purgatives .....	267
Diarrhoea .....	270

---

Adsorbents .....	272
Anti ulcer drugs .....	272
Herbal medicines .....	279
Anti-haemorrhoids .....	279

## Chapter 24

### Cardiovascular agents

Cardiotonics .....	281
Cardiac arrhythmia .....	284
Antihypertensive agents .....	294
Sympathetic nerve blockers .....	297
Vasodilators .....	300
Arterial and venular vasodilators .....	303
$\alpha$ -adrenergic blockers .....	303
$\beta$ -blockers .....	305
Calcium channel blockers .....	314

## Chapter 25

### Coagulants and anticoagulants

Blood coagulation .....	322
Anticoagulants .....	324

## Chapter 26

### Diagnostic agents

Radiopaque agents .....	329
-------------------------	-----

## Chapter 27

### Chemistry of vitamins

Introduction to vitamins .....	334
Classification .....	334
Difference between fat-soluble and water-soluble vitamins .....	335

---

**Chapter 28****Steroids**

Introduction.....	349
Classification .....	349
Systematic nomenclature of steroids .....	350
Stigmasterol .....	351
Steroid hormones .....	354
Androgens.....	354
Natural androgens.....	355
<b>Essay and short type <i>questions</i>.....</b>	<b>371</b>
<b>References .....</b>	<b>379</b>
<b>Index.....</b>	<b>381</b>
