<i>Preface to Second Edition</i>	(vii)
--	-------

Chapter 1

Introduction

1.1 Prime Movers	1
1.2 Sources of Energy	1
1.3 Types of Prime Movers	2
1.4 Force and Mass.....	3
1.5 Pressure	3
1.6 Work.....	4
1.7 Power.....	6
1.8 Energy	7
1.9 Heat	8
1.10 Temperature.....	8
1.11 Units of Heat	8
1.12 Specific Heat Capacity	8
1.13 Interchange of Heat	9
1.14 Change of State	9
1.15 Mechanical Equivalent of Heat	10
1.16 Internal Energy.....	10
1.17 Enthalpy	11
1.18 Efficiency	11
1.19 Statement of First Law of Thermodynamics	13
1.20 Statement of Second Law of Thermodynamics.....	15
<i>Solved Problems</i>	16
<i>Objective Type Questions</i>	20
<i>Answers to Objective Type Questions</i>	21
<i>Short Questions</i>	21

Long Questions 22
Exercises 23

Chapter 2

Fuel and Combustion

2.1	Introduction	25
2.2	Classification.....	25
2.3	Solid Fuels.....	27
2.3.1	Wood	27
2.3.2	Peat.....	28
2.3.3	Lignites or Brown Coal	28
2.3.4	Bituminous Coal.....	28
2.3.5	Anthracite Coal	28
2.3.6	Artificial or Prepared Fuels	29
2.4	Liquid Fuels.....	30
2.4.1	Petrol or Gasoline.....	30
2.4.2	Kerosene.....	30
2.4.3	Alcohol.....	31
2.5	Advantages and Disadvantages of Liquid Fuel over Solid Fuel.....	31
2.6	Gaseous Fuels.....	31
2.6.1	Gaseous Fuels are Classified into two Classes.....	31
2.6.2	Manufactured Gaseous Fuels	32
2.7	Advantages and Disadvantages of Gaseous Fuels.....	34
2.7.1	Advantages of Gaseous Fuels are Listed below	34
2.8	Proximate Analysis and Ultimate Analysis of Coal	35
2.8.1	Proximate Analysis	35
2.8.2	Ultimate Analysis.....	36
2.9	Calorific Value of Fuel.....	36
2.9.1	Gross of Higher Calorific Value- (theoretically).....	36
2.9.2	Net of Lower Calorific Value (Theoretically).....	37
2.9.3	Experimental Determination of Calorific Value of Liquid and Solid Fuel by using Bomb Calorimeter.....	38
2.10	Combustion of Fuel.....	42

<i>Solved Problems</i>	47
<i>Objective Type Questions</i>	55
<i>Answers</i>	57
<i>Fill in the Blanks</i>	57
<i>Questions</i>	58
<i>Exercises</i>	59

Chapter 3

Properties of Gases

3.1 Introduction	61
3.2 Difference between Vapour and Gas.....	61
3.3 Boyle's Law	61
3.4 Charle's Law	63
3.4.1 Charle's law	64
3.5 Combined Gas Law	64
3.6 Unit of Gas Constant 'R'	66
3.7 Universal Gas Constant	67
3.8 Joule's Law of Internal Energy	67
3.9 Specific Heats of a Gas	67
3.10 Relation between two specific heats of a gas and specific gas constant.....	70
3.11 Ratio of Specific Heats.....	71
<i>Solved Problems</i>	71
3.12 Flow and non-flow Processes.....	72
3.13 Various non-flow Processes for a Perfect Gas	73
3.13.1 Constant Volume Process.....	73
3.13.2 Constant Pressure Process.....	75
3.13.3 Isothermal Process.....	77
3.13.4 Adiabatic Process	79
3.13.5 Polytropic Process	84
3.14 Index of Compression or Expansions.....	88
<i>Solved Problems</i>	90

Chapter 4

Properties of Steam

4.1	Introduction	104
4.2	Formation of Steam (Steam generation at constant pressure)	105
4.2.1	Temperature Versus total Heat or Enthalpy Graph during Formation of Steam at °C OR Temperature versus Total Heat Graph during Formation of Steam	107
4.2.2	The formation of Super Heated Steam from Ice at –10 °C	108
4.3	Properties of Steam	110
4.3.1	Work During Steam Formation	116
4.3.2	Internal Latent Heat	118
4.4	Advantages of Super heated Steam	119
4.5	Difference between Dry Steam and Super Heated Steam	120
4.6	Difference between Enthalpy and Entropy of Steam	121
4.7	Difference between Steam and Gas	121
4.8	Thermodynamic Process	122
4.8.1	Constant Volume Process (Isochronic Process)	122
4.8.2	Constant Pressure Process	125
4.8.3	Constant Temperature Process	128
4.8.4	Hyperbolic Process	129
4.8.5	Isentropic Process (Non flow process)	132
4.8.6	Polytropic Process ($Pv^n = C$)	135
4.8.7	Throttling Process (Constant Total heat Process)	137
4.9	Mixing	139
4.10	Super heater	140
4.11	Desuper heating of Steam	141
4.12	Determination of Dryness Fraction of Steam	142
4.12.1	Barrel (Tank) or Bucket Calorimeter	142
4.12.2	Separating Calorimeter	145
4.12.3	Throttling Calorimeter	147
4.12.4	Combined Separating and Throttling Calorimeter	149
4.13	Solved Problem	152
	Questions	197
	Objective Type Questions	198

<i>Answers</i>	198
<i>Fill in the Blanks</i>	199
<i>Answers</i>	199
<i>Exercises</i>	200

Chapter 5

Heat Engines

5.1 Thermal Prime Movers.....	204
5.2 Elementary Heat Engines	204
5.3 Source of Heat	205
5.4 Working Substance.....	205
5.5 Converting Machines	205
5.6 Sink of Heat.....	206
5.7 Classification of Heat Engines	206
5.8 Heat Engine Cycles	206
5.9 Carnot Cycle.....	207
5.10 Carnot Cycle with Vapour.....	209
5.11 Rankine Cycle	210
5.12 Otto Cycle	212
5.13 Diesel Cycle	212
<i>Solved Problems</i>	218
<i>Objective Type Questions</i>	233
<i>Answers</i>	234
<i>Short Questions</i>	235
<i>Long Questions</i>	235
<i>Exercises</i>	236

Chapter 6

Steam Boiler

6.1 Introduction	238
6.2 Classification of Boiler.....	240
6.2.1	240
6.2.2 Methods of Firing.....	240

(xiv) Contents

6.2.3	Method of Circulation of Water	240
6.2.4	Nature of Service.....	241
6.2.5	Pressure of steam.....	242
6.2.6	Nature of Fuel Used	242
6.2.7	Boiler can be Classified on the Bases of Heat Source.....	242
6.2.8	Classification Based on Manufacturer's Trade Name.....	242
6.2.9	According to Axis of the Shell	243
6.2.10	Nature of Draught Boilers	243
6.2.11	Single tube and multi Tube Boilers.....	243
6.2.12	Fluid Used	243
6.2.13	Boiler Shell Material	243
6.3	What Basic Factors will you consider in Selecting a Boiler	243
6.4	What are the Essential Qualities of Good Boiler.....	244
6.5	Comparison	244
6.6	Essential Qualities of Good Boiler	245
6.7	Simple Vertical Boiler.....	246
6.8	Cochran Boiler	249
6.9	Lancashire Boiler	252
6.10	Comparison of Cornish and Lancashire Boilers	255
6.11	Locomotive Boiler.....	255
6.12	Babcock and Wilcox Boiler.....	258
6.12.1	Advantages of High Pressure Boilers	261
6.13	Scotch Boiler (Scotch Marine Fire Tube Boiler).....	262
6.14	Lamont Boiler.....	264
6.15	Benson Boiler	266
6.16	Loffler Boiler.....	269
6.17	Performance of Steam Boilers.....	271
6.17.1	Introduction	271
6.17.2	(i) Equivalent Evaporation	272
6.17.3	Evaporation Rate	272
6.17.4	Actual Evaporation.....	273
6.17.5	Factor of Evaporation.....	273
6.17.6	Heat Loses in Boiler.....	273
6.17.7	Boiler Efficiency	276
6.17.8	Economiser Efficiency	276
6.17.9	Boiler Power.....	277
6.18	Examples	277

6.19 Mountings	294
6.20 Accessories	314
Examples	325
Exercises	344
Objective Type Questions	347
Answers	350
Exercises	350

Chapter 7

Internal Combustion Engines

7.1 Introduction	355
7.2 Classification of I.C. Engines	355
7.3 Engine Details	356
7.4 Important Terms Used in I.C. Engines	359
7.5 Otto Four Stroke Cycle Engine	360
7.6 Diesel Four Stroke Cycle Engine	362
7.7 Difference between Otto Cycle and Diesel Cycle Engine	365
7.8 Two Stroke Cycle Engine	365
7.9 Difference between Two-stroke and Four Stroke Cycle Engines	370
7.10 Indicated Power (ip)	371
7.11 Brake Power (bp)	372
7.12 Efficiencies	372
Examples	373
Objective Type Questions	382
Answers	383
Short Questions	383
Long Questions	384
Exercises	384

Chapter 8

Speed Control

8.1 Introduction	386
8.2 Governors	386
8.2.1 Types of Governors	387

(xvi) Contents

8.2.2	Watt Governor.....	387
8.2.3	Porter Governor.....	388
8.2.4	Proell Governor.....	389
8.2.5	Hartnell Governor.....	389
8.3	I.C. Engine Governing.....	390
8.3.1	Hit and Miss Governing.....	390
8.3.2	Quality Governing.....	391
8.3.3	Quantity Governing.....	391
8.4	Fly Wheel.....	392
Objective Type Questions.....		393
Answers.....		393
Short Questions.....		393
Long Questions.....		394

Chapter 9

Pumps

9.1	Introduction.....	395
9.2	Construction of C.F. Pump.....	395
9.3	Types of Centrifugal Pump or various Methods to Increase the Efficiency of C.F. Pump or What are various methods to convert K.E into P.E.....	398
9.4	Single Stage Pump and Multi-stage Pump.....	400
9.5	Direction of Flow through Impellers.....	401
9.6	Types of Vanes.....	402
9.7	Single and Double Suction Entry to the C.F. Pump.....	403
9.8	Pumps Connected in Series and Parallel Pumps in Series.....	403
9.9	Terms used in C.F. Pumps.....	405
9.10	Specific Speed of Centrifugal Pump.....	408
9.11	Net Positive Suction Head.....	409
9.12	Priming of C.F. Pump.....	410
9.13	Pump Losses.....	413
9.14	Characteristic Curves for C.F. Pump.....	414
9.15	Advantages of C.F. Pump over other type of Pumps.....	416
9.16	Uses of Pumps.....	417

9.17 Rotary Pumps	417
9.18 Types of Rotary Pumps	417
9.19 Application of Rotary Pumps	422
9.20 Reciprocating Pump	422
9.21 Air Vessel or Air Chamber	426
9.22 Double Acting Reciprocating Pump (Piston Pump).....	427
9.23 Single Acting Plunger Pump	427
9.24 Bucket Pump	429
9.25 Comparison between Centrifugal Pump and Reciprocating Pump	430
Solved Problems	431
Questions	436
Exercises	437

Chapter 10

Air Compressors

10.1 Introduction	438
10.2 Air Compressor Terminology.....	438
10.3 Classification of Air Compressors.....	440
10.4 Working of a Single Stage Reciprocating Compressor	442
10.5 Indicated Diagram for Compressor without Clearance	445
10.5.1 Actual Indicator Diagram of a Single-Stage Air Compressor	445
10.6 Effect of Nature of Compression (i.e) n Curve on work Required for Compression	447
10.7 Application of Compressed Air or Air Compressors	448
10.8 Equation for Work Done for Single Stage Reciprocating Air Compressor (without clearance)	449
10.9 Equation for Work done with Clearance	456
10.10 Efficiency of Reciprocating Air Compressor	459
10.11 Comparison between Reciprocating and Rotary compressor	466
10.11.1 Comparison Between Axial and Centrifugal Compressor	467
10.12 Advantages of Multistage Compressions	467
10.13 Working of Two stage Air Compressor with Inter-cooler	468
10.14 Perfect and Imperfect Intercooling in Two stage Air compressor.....	470

(xviii) Contents

10.15	Maintenance of Reciprocating Compressors	473
10.16	Rotary Air Compressor	474
10.16.1	Root Blower Compressor or only Root Blower	475
10.16.2	Vane Type Compressors	476
10.16.3	Centrifugal Compressor	478
10.16.4	Axial Flow Compressor	480
	Solved Problems	482
	Review Questions	499
	Objective Type Question, Choose the Correct Answer	500
	Fill in the Blanks	503
	Answer the objective type Questions	504
	Answers	504
	Exercises	505

Chapter 11

Refrigeration and Air Conditioning

11.1	Refrigeration.....	507
11.2	Refrigeration by Non-Cyclic Processes.....	507
11.3	Refrigerator	507
11.4	Unit of Refrigeration	508
11.5	Refrigerating Effect.....	508
11.6	Co-efficient of Performance of Refrigerator (C.O.P).....	508
11.7	Refrigerator and Heat Pump.....	509
11.8	Refrigerants	510
11.9	Vapour Compression System Versus Vapour Absorption System.....	512
11.10	Application of Refrigeration.....	513
11.11	Classification of Refrigeration System.....	513
11.12	Domestic Refrigerator	514
11.13	Water Cooler	519
11.15	Simple Vapour Absorption System	525
11.16	Practical Absorption System	526
11.17	Air Refrigerator Working on a Bell Coleman Cycle or Reversed Joule or Brayton Cycle	528

11.18 Comparison Between Air Refrigeration and Vapour Compression Refrigeration.....	531
11.19 Vertical Packaged A.C. Unit known as Unitary System or Self-contained Unit	532
11.20 Application of Air Conditioning	534
11.21 Window Air Conditioner.....	535
11.22 Terms in Air Conditioning	538
11.23 Air Conditioning (A.C)	539
11.24 Classification of A.C. Systems.....	540
11.25 Split Air Conditioner	541
Objective Type Questions	547
Answers	548
Questions.....	549

Chapter 12

Production Processes

12.1 Introduction	550
12.2 Turning	550
12.2.1 Turning Operations	550
12.2.2 Geometry of Single Point Cutting Tool	553
12.2.3 Orthogonal and Oblique Cutting	554
12.2.4 Lathe.....	554
12.2.5 Classification of Lathe	556
12.2.6 Specifications of a Lathe	558
12.2.7 Parts of Lathe Machine	558
12.2.8 Types of Operations of Lathe Machine	559
12.3 Casting.....	560
12.3.1 Classification of Casting Process	560
12.3.2 Sand Casting.....	561
12.3.3 Die Casting.....	564
12.3.4 Centrifugal Casting	565
12.3.5 Lost-Wax Precision Casting or Investment Casting.....	565
12.3.6 Special Casting Methods.....	567
12.3.7 Shell Casting/Moulding.....	569
12.3.8 Casting Defects	570
12.3.9 Preventive Methods of Casting Defects	571

(xx) Contents

12.4	Welding.....	572
12.4.1	Types of Grooves	572
12.4.2	Classification of Welding Processes	574
12.4.3	Gas Welding.....	574
12.4.4	Electric Arc Welding.....	575
12.4.5	Shielded Metal Arc Welding (SMAW).....	576
12.4.6	Metal Inert Gas Arc Welding (MIG)/Gas Metal Arc Welding (GMAW)	578
12.4.7	Tungsten Inert Gas Arc Welding (TIG)/Gas	579
	Tungsten Arc Welding (GTAW).....	579
12.4.8	Submerged Arc Welding (SAW)	580
12.4.9	Electroslag Welding (ESW).....	581
12.4.10	Plasma Arc Welding.....	582
12.4.11	Resistance Welding - Spot, Seam, Projection and Flash Welding	583
12.4.12	Unconventional Welding Methods.....	586
12.4.13	Laser Beam Welding	586
12.4.14	Electron Beam Welding	587
12.4.15	Ultrasonic Welding	588
12.4.16	Thermit Welding	589
12.4.17	Welding Allied Processes.....	591
12.4.18	Welding Defects.....	591
12.5	Forming.....	593
12.5.1	High Energy Rate Forming (HERF)	594
12.5.2	Explosive Forming	594
12.5.3	Electro Magnetic Forming (High Velocity Forming).....	594
12.5.4	Electrohydraulic Forming (Electric Discharge Forming).....	594
12.6	Drawing.....	595
12.6.1	Wire Drawing.....	595
12.6.2	Bar Drawing	596
12.6.3	Tube Drawing.....	597
12.7	Forging	597
12.7.1	Types of Forging	598
12.7.2	Open Die Forging.....	598
12.7.3	Closed Die Forging	599
12.7.4	Drop Forging	600
12.7.5	Press Forging.....	601

12.7.6	Upset Forging	601
12.7.7	Defects in Forging and its Remedies	602
12.8	Extrusion	603
12.8.1	Cold Extrusion	605
12.8.2	Impact Extrusion	605
12.8.3	Advantages of Extrusion Process	605
Questions.....		606

Chapter 13

Couplings, Clutches and Brakes

13.1	Introduction	607
13.2	Couplings	607
13.2.1	Rigid Coupling	608
13.2.2	Flexible Coupling	610
13.3	Clutches	614
13.3.1	Function	614
13.3.2	Classification of Clutches	615
13.3.3	Positive Clutches (Dog clutch)	615
13.3.4	Cone Clutch	616
13.3.5	Friction Clutches	617
13.3.6	Multiplate Clutch (Wet Clutch)	618
13.3.7	Centrifugal Clutch	620
13.4	Definition of Brake and Material Used	620
13.4.1	Classification of Brakes	621
13.4.2	Material used for Braking Lining are	621
13.4.3	Uses	621
13.5	Mechanical Brakes	622
13.5.1	Band Brakes	622
13.5.2	Single Block or Shoe Brake	623
13.5.3	Pivoted Block Brake ($2\theta > 60^\circ$)	623
13.5.4	Double Block or Shoe Brake	624
13.5.5	Band and Block Brake	625
13.5.6	Internal Expanding Shoe Brake	625
13.6	Difference between a Brake and a Clutch	626
Objective Type Questions		626
Short Questions.....		627

Chapter 14

Power Transmission System

14.1	Introduction	629
14.2	Power Transmission Elements	632
14.3	Power Transmission Method	632
14.4	Types of Belt Drives.....	633
14.5	Belt Materials	635
14.6	Belt Shapes	635
14.7	Comparison Between Flat Belt Drive and V-belt Drive.....	636
14.8	Belt Drive	637
14.9	Tension in Belt Drive	638
14.10	Creep and Slip in Belt	638
14.11	Length of Belt.....	640
14.12	Ratio of Driving Tension in Belt.....	644
14.13	Calculation for Angle of Lap	646
14.14	Centrifugal Tension in Belt	648
14.15	Chain Drive	649
14.16	Gear Drive	651
14.17	Comparison of Belt Drive, Chain Drive and Gear Drive	655
14.18	Gear Train	656
14.19	Pulleys	659
	Solved Problems.....	663
	Questions.....	676
	Exercises	677

Chapter 15

Important Engineering Materials

15.1	Introduction	679
15.2	Properties of Materials	679
15.3	Mechanical Testing of Engineering Materials.....	683
15.3.1	Tensile Test	683
15.3.2	Hardness	685
15.3.3	Impact Test (Izod and Charpy Test).....	687

15.4	Certain other Important Materials	688
15.5	Ferrous Metals and Alloys.....	689
15.6	Cast Iron	689
15.7	Types of Cast-Iron.....	690
15.8	Wrought Iron.....	691
15.9	Alloys of Cast Iron	692
15.9.1	Effect of various Elements on properties of Cast Iron are	692
15.10	Plain Carbon Steels can be divided into three Classes	692
15.11	Alloy Steel.....	693
15.12	Non-Ferrous Metals and Alloys	694
15.13	Non-Metallic Materials	697
15.14	Classification of Engineering Materials	701
15.14.1	Organic Materials.....	702
15.14.2	Polymer	702
15.14.3	Composites.....	702
15.14.4	Ceramic Materials	703
15.14.5	Plastics.....	703
15.15	Advanced Materials.....	704
15.16	Smart Materials (Materials of the Future)	704
15.17	Biomaterials	705
	Questions.....	705
	Objective Type Questions	705
	Answers.....	706
	Short Questions.....	706
	Steam Tables	709
