

Contents

<i>Preface</i>	(xv)
----------------------	------

CHAPTER 1: INTRODUCTION

1.1 The Electrical Power System	1
1.2 Network Models	3
1.3 Faults and Analysis	3
1.4 The Primitive Network	4
1.5 Power System Stability	5
1.6 Deregulation	5
1.7 Renewable Energy Resources	6

CHAPTER 2: GRAPH THEORY

2.1 Introduction	7
2.2 Definitions	7
2.3 Tree and Cotree	9
2.4 Basic Loops	9
2.5 Cut-Set	10
2.6 Basic Cut-Sets	10
<i>Worked Examples</i>	12
<i>Problems</i>	16
<i>Questions</i>	17

CHAPTER 3: INCIDENCE MATRICES

3.1 Element Node Incidence Matrix	19
3.2 Bus Incidence Matrix	20
3.3 Branch-Path Incidence Matrix K	21
3.4 Basic Cut-Set Incidence Matrix	22
3.5 Augmented Cut-Set Incidence Matrix \tilde{B}	23
3.6 Basic Loop Incidence Matrix	24
3.7 Augmented Loop Incidence Matrix	25
3.8 Network Performance Equations	26
<i>Worked Examples</i>	29
<i>Problems</i>	33
<i>Questions</i>	33

CHAPTER 4: NETWORK MATRICES

4.1 Introduction	35
4.2 Network Matrices	35
4.2.1 Network Matrices by Singular Transformations	35
4.2.2 Network Matrices by Non-Singular Transformation	40
4.3 Bus Admittance Matrix by Direct Inspection	46
<i>Worked Examples</i>	50
<i>Problems</i>	69
<i>Questions</i>	70

CHAPTER 5: BUILDING OF NETWORK MATRICES

5.1 Introduction	71
5.2 Partial Network	71
5.3 Addition of a Branch	73
5.3.1 Calculation of Mutual Impedances	74
5.3.2 Calculation of Self Impedance of Added Branch Z_{ab}	76
5.3.3 Special Cases	77
5.4 Addition of a Link	78
5.4.1 Calculation of Mutual Impedances	79
5.4.2 Computation of Self-impedance	80
5.4.3 Removal of Elements or Changes in Element	83
5.5 Removal or Change in Impedance of Elements with Mutual Impedance	84
<i>Worked Examples</i>	88
<i>Problems</i>	113
<i>Questions</i>	114

CHAPTER 6: SYMMETRICAL COMPONENTS

6.1 The Operator “a”	116
6.2 Symmetrical Components of Unsymmetrical Phases	117
6.3 Power in Sequence Components	119
6.4 Unitary Transformation for Power Invariance	120

CHAPTER 7: THREE-PHASE NETWORKS

7.1 Three-Phase Network Element Representation	123
7.1.1 Stationary Network Element	125
7.1.2 Rotating Network Element	125
7.1.3 Performance Relations for Primitive Three-Phase Network Element	126
7.2 Three Phase Balanced Network Elements	126
7.2.1 Balanced Excitation	126
7.2.2 Transformation Matrices	128

7.3 Three-Phase Impedance Networks.....	129
7.3.1 Incidence and Network Matrices for Three-Phase Networks.....	129
7.3.2 Algorithm for Three-Phase Bus Impedance Matrix	130
<i>Summary of the Formulae</i>	136
<i>Worked Examples</i>	138
<i>Problems</i>	150
<i>Questions</i>	150

CHAPTER 8: SYNCHRONOUS MACHINE

8.1 The Two-Axis Model of Synchronous Machine.....	153
8.2 Derivation of Park’s Two Axis Model.....	155
8.3 Synchronous Machine Analysis	157
8.3.1 Voltage Relations–Stator or Armature	158
8.3.2 Flux Linkage Relations	159
8.3.3 Inductance Relations	159
8.3.4 Flux Linkage Equations.....	162
8.4 The Transformations	162
8.5 Stator Voltage Equations.....	164
8.6 Steady-State Equation	165
8.7 Steady-State Vector Diagram.....	166
8.8 Reactances.....	167
8.9 Equivalent Circuits and Phasor Diagrams.....	170
8.9.1 Model for Transient Stability	170
8.10 Transient State Phasor Diagram.....	172
8.11 Power Relations	174
8.12 Synchronous Machine Connected through an External Reactance.....	176
<i>Worked Examples</i>	178
<i>Problems</i>	180
<i>Questions</i>	180

CHAPTER 9: LINES AND LOADS

9.1 Lines.....	181
9.1.1 Short Lines	181
9.1.2 Medium Lines.....	181
9.1.3 Long Lines.....	181
9.2 Transformers	184
9.2.1 Transformer with Nominal Turns Ratio.....	184
9.2.2 Phase Shifting Transformers	186
9.3 Load Modeling	188
9.3.1 Constant Current Model	191

(x) Contents

9.3.2	Constant Impedance Model	192
9.3.3	Constant Power Model	193
9.4	Composite Load	193
9.4.1	Dynamic Characteristics	194
9.5	Induction Machine Modeling	194
9.6	Model with Mechanical Transients	195
9.6.1	Power Torque and Slip	197
9.6.2	Reactive Power and Slip	198
9.6.3	Synchronous Motor	204
9.7	Rectifiers and Inverter Loads	205
9.7.1	Static Load Modeling for Load Flow Studies	205
9.7.2	Voltage Dependence of Equivalent Loads	205
9.7.3	Derivation for Equivalent Load Powers	206
	<i>Worked Examples</i>	209
	<i>Problems</i>	210
	<i>Questions</i>	210

CHAPTER 10: POWER FLOW STUDIES

10.1	Necessity for Power Flow Studies	211
10.2	Conditions for Successful Operation of a Power System	212
10.3	The Power Flow Equations	212
10.4	Classification of Buses	214
10.5	Bus Admittance Formation	215
10.6	System Model for Load Flow Studies	217
10.7	Gauss-Seidel Method	219
10.8	Gauss-Seidel Iterative Method	220
10.8.1	Acceleration Factor	221
10.8.2	Treatment of a PV Bus	222
10.9	Newton-Raphson Method	224
10.9.1	Rectangular Coordinates Method	225
10.9.2	The Polar Coordinates Method	227
10.10	Sparsity of Network Admittance Matrices	231
10.11	Triangular Decomposition	231
10.12	Optimal Ordering	233
10.13	Decoupled Methods	235
10.14	Fast Decoupled Methods	236

10.15	Load Flow Solution using Z Bus.....	237
10.15.1	Bus Impedance Formation	237
10.15.2	Addition of a Line to the Reference Bus	238
10.15.3	Addition of a Radial Line and New Bus	238
10.15.4	Addition of a Loop Closing Two Existing Buses in the System	239
10.15.5	Gauss – Seidel Method using Z-bus for Load Flow Solution.....	240
10.16	Convergence Characteristics	240
10.17	Comparison of Various Methods for Power Flow Solution.....	241
	<i>Worked Examples</i>	243
	<i>Problems</i>	276
	<i>Questions</i>	286

CHAPTER 11: SHORT CIRCUIT ANALYSIS

11.1	Per Unit Quantities	289
11.2	Advantages of Per Unit System	290
11.3	Three Phase Short Circuits.....	291
11.4	Reactance Diagrams.....	292
11.5	Percentage Values	292
11.6	Short Circuit kVA	293
11.7	Importance of Short Circuit Currents.....	294
11.8	Analysis of R-L Circuit.....	295
11.9	Three-Phase Short Circuit on Unloaded Synchronous Generator.....	296
11.10	Effect of Load Current or Prefault Current	299
11.11	Reactors.....	299
11.11.1	Construction of Reactors	300
11.11.2	Classification of Reactors	300
	<i>Worked Examples</i>	303
	<i>Problems</i>	329
	<i>Questions</i>	329

CHAPTER 12: UNBALANCED FAULT ANALYSIS

12.1	Sequence Impedances	331
12.2	Balanced Star Connected Load	331
12.3	Transmission Lines	333
12.4	Sequence Impedances of Transformer	334
12.5	Sequence Reactances of Synchronous Machine	335
12.6	Sequence Networks of Synchronous Machines	335
12.6.1	Positive Sequence Network	336
12.6.2	Negative Sequence Network.....	336
12.6.3	Zero Sequence Network.....	337

(xii) Contents

12.7	Unsymmetrical Faults	339
12.8	Assumptions for System Representation.....	339
12.9	Unsymmetrical Faults on an Unloaded Generator	339
12.10	Line-to-Line Fault	342
12.11	Double Line-to-Ground Fault.....	345
12.12	Single-Line-to-Ground Fault with Fault Impedance	348
12.13	Line-to-Line Fault with Fault Impedance	349
12.14	Double Line-to-Ground Fault with Fault Impedance.....	350
	<i>Worked Examples</i>	352
	<i>Problems</i>	365
	<i>Questions</i>	365

CHAPTER 13: POWER SYSTEM STABILITY

13.1	Elementary Concepts.....	367
13.2	Illustration of Steady State Stability Concept	368
13.3	Methods for Improving Steady State Stability Limit	369
13.4	Synchronizing Power Coefficient	369
13.5	Short Circuit Ratio and Excitation System.....	370
13.6	Transient Stability	371
13.7	Stability of a Single Machine Connected to Infinite Bus.....	371
13.8	The Swing Equation.....	372
13.9	Equal Area Criterion and Swing Equation	376
13.10	Transient Stability Limit	378
13.11	Frequency of Oscillations.....	379
13.12	Critical Clearing Time and Critical Clearing Angle	380
13.13	Fault on a Double-Circuit Line	383
13.14	Transient Stability when Power is Transmitted During the Fault.....	384
13.15	Fault Clearance and Reclosure in Double-Circuit System.....	385
13.16	First Swing Stability.....	386
13.17	Solution to Swing Equation Step-by-Step Method	386
13.18	Factors Affecting Transient Stability	389
	13.18.1 Effect of Voltage Regulator.....	390
13.19	Excitation System and the Stability Problem.....	391
13.20	Dynamic Stability	393
	13.20.1 Power System Stabilizer	394
13.21	Small Disturbance Analysis	394
13.22	Node Elimination Methods	397

13.23 Other Methods for Solution of Swing Equation.....	399
13.23.1 Modified Euler's Method.....	399
<i>Worked Examples</i>	401
<i>Problems</i>	420
<i>Questions</i>	420
INDEX	421
