

# CONTENTS

**Foreword** ..... (vii)

**Preface** .....(ix)

## **CHAPTER 1: THE OCEANS**

1.1	Composition of Sea Water	1
1.2	The Exchange of Earth Materials between Sea and Atmosphere	2
1.3	The Cryosphere	4
1.3.1	Sea Icing	5
1.4	Some Physical Properties of Sea Water	6
1.5	Energy Exchange Processes between Sea and Atmosphere Interface	7

## **CHAPTER 2: OCEAN CURRENTS**

2.1	Introduction	9
2.2	Motion of the Sea and the Effect of Wind on Ocean Currents	10
2.3	Ocean Currents caused by Density Differences	11
2.4	Ocean Currents	12
2.5	Indian Ocean Currents	13
2.6	Some Definitions and Explanation of Terms	14

## **CHAPTER 3: GEOPHYSICAL PROPERTIES OF OCEANS AND EARTH**

3.1	Introduction	17
3.2	Major Oceans	18
3.3	Sea Floor Features	20
3.3.1	Basin	21

## **CHAPTER 4: DISTRIBUTION OF TEMPERATURE**

### **SALINITY AND DENSITY**

4.1	Distribution of Sea Surface Temperature (SST) and Salinity (S)	23
4.2	Dependence of Density, Salinity ( $\beta_s$ )	24
4.3	Structure of Sea Surface Temperature (SST) Salinity (S) and Temperature	25
4.4	Equation of State of Water	25
4.5	Water Masses of the Oceans	28
4.6	The Water Masses of the Indian Ocean	29
4.6.1	Distribution of Oxygen in Indian Ocean	29
4.7	Distribution of Temperature and Salinity in Bay of Bengal	29

**CHAPTER 5: OCEAN MIXED LAYER AND THERMOCLINE**

5.1 Oceanic Mixed Layer and Thermocline ..... 31  
5.2 Mixed Layers ..... 32  
5.3 Density, Potential Temperature and Neutral Density ..... 35  
5.4 Neutral Surface and Density ..... 36  
5.5 Observed Mean Ocean Circulation ..... 37

**CHAPTER 6: STABILITY**

6.1 Static Stability ..... 39  
6.2 Dynamic Stability and Richardson’s Number ( $R_i$ ) ..... 41  
6.3 Double Diffusion and Salt Fingers ..... 42

**CHAPTER 7: OCEANIC HEAT BUDGET**

7.1 Introduction ..... 45  
7.2 Buoyancy ( $b$ ) ..... 45  
7.3 Ocean Heat Budget Equation ..... 47  
7.4 Heat Flux ..... 48  
7.5 Sensible Heat Flux ( $Q_s$ ), Heat through Sea Surface ..... 48  
7.6 Indirect Calculation of Fluxes – Bulk Formulas ..... 50  
    7.6.1 Meridional Ocean Heat Transport ( $H^\lambda$ ) ..... 51  
7.7 The Ocean Heat Budget ..... 52  
    7.7.1 Meridional Heat Transport - Note ..... 53  
7.8 Adiabatic Process ..... 53

**CHAPTER 8: FRICTION AND TURBULENCE**

8.1 Frictional Stresses due to Turbulent Motion ..... 57  
8.2 Frictional Forces due to Turbulent Motion ..... 60  
8.3 Influence of Stability ( $E$ ) on Turbulence ..... 60  
8.4 Horizontal Turbulence ..... 61  
8.5 Friction ..... 62  
    8.5.1 Boundary Friction ..... 62  
8.6 The Energy Equation when Friction is not Zero ..... 64  
8.7 Viscous Force (Dissipation) ..... 65

**CHAPTER 9: FLUID STATICS**

9.1 Mass Force or Body Force ..... 68  
9.2 Surface Force ..... 68  
9.3 Equilibrium Equations of Fluid ..... 69  
9.4 Equilibrium Condition under the Action of Mass Forces ..... 69  
9.5 Hydrostatic Equation ..... 70  
    9.5.1 Gibbs Function ..... 71  
    9.5.2 Mechanical Equilibrium ..... 71

9.5.3 Archimede’s Principle .....	72
9.5.4 Ideal and Real Fluids .....	72
9.5.5 Inviscid Fluid.....	72
9.6 Relative Density or Specific Gravity of a Material .....	73
9.7 Fluid Kinematics .....	73

**CHAPTER 10: FLUID DYNAMICS**

10.1 Velocity of a Fluid Particle .....	75
10.2 Path Lines or Trajectories .....	77
10.3 Difference between the Streamlines and Path Lines .....	77
10.4 Velocity, Acceleration and Speed .....	77
10.5 Methods of Hydrodynamical Problems.....	78
10.6 Relation between the Local and Individual Time-rate .....	80
10.7 Acceleration and Advection.....	81
10.8 Lagrangian Method.....	82
10.9 Some Definitions of Hydrodynamics.....	82
10.10 Velocity Potential.....	83
10.11 Equipotential Lines .....	85
10.12 Stream Function ( $\psi$ ).....	86
10.13 Some Properties of Streamlines .....	87
10.14 Dimensional Flow Representation .....	89
10.15 Principal Forces in Ocean Dynamics .....	90
10.16 Comparison of Ocean Circulation with that of Atmospheric Circulation.....	90
10.17 Ocean Flows (Currents and Waves).....	91
10.18 Oscillatory Flows Generated by Waves.....	92

**CHAPTER 11: EQUATION OF CONTINUITY OR CONSERVATION OF MASS**

11.1 Equation of Continuity – Alternate Method.....	95
11.2 Conservation of Mass in Fluid Mechanics .....	97
11.2.1 An Incompressible Fluid .....	99
11.3 Equation of Continuity for Incompressible Fluid Flow (another method).....	100
11.4 Equivalent Forms of Equation of Continuity .....	101
11.5 The Equation of Continuity in Lagrangian Method .....	103
11.6 Conservation of Mass and Salt in an Ocean Basin.....	104

**CHAPTER 12: EQUATIONS OF MOTION**

12.1 Euler’s Equation of Motion for a Perfect Fluid.....	109
12.2 Absolute and Relative Velocity .....	112
12.3 Momentum Equation.....	114
12.4 Derivation of Pressure Gradient.....	117
12.5 Derivation of Coriolis Term.....	118

12.6	Equations of Motion Applied to the Oceans .....	120
12.7	Alternate Method of Equations of Motion .....	122
12.8	The Dynamic Energy Equation .....	124

**CHAPTER 13: FIELDS**

13.1	Field Variables .....	127
13.2	Scalar Fields .....	127
13.3	Vector Field .....	128
13.4	Equi-scalar Surface(s) .....	128
13.5	The Pressure Field .....	129
13.6	Dynamic Meter (D) .....	131
13.7	Some Mathematical Definitions .....	132

**CHAPTER 14: EKMAN LAYER – INTRODUCTION**

14.1	Ocean Surface Ekman Layer .....	135
14.2	Ekman Mass Transport ( $M_{EK}$ ) .....	138
14.3	Ekman’s Constants .....	140
14.4	Ekman Layer Depth ( $D_{EK}$ ) .....	141
14.4.1	Ekman Volume Transport .....	141
14.5	Ekman Pumping .....	142
14.6	Ekman Transport Convergence .....	143

**CHAPTER 15: WIND DRIVEN OCEAN CIRCULATION**

15.1	Sverdrup’s Theory of the Ocean Circulation .....	147
15.2	Some Uncertainties in Sverdrup’s Relations .....	150
15.3	Stommel’s Theory of Western Boundary Currents .....	150
15.4	Munk’s Solution .....	153
15.5	Ageostrophic Ocean Flow .....	156
15.6	Fluid Dynamics on the Beta-Plane or Ekman Pumping .....	157
15.7	Langmuir Circulation .....	158
15.8	Inertial Currents .....	159

**CHAPTER 16: GEOSTROPHIC MOTION**

16.1	Geostrophic Flow .....	163
16.1.1	Boussinesq Approximation .....	164
16.1.2	Geostrophic Equation and Thermal Wind Relation .....	165
16.1.3	Thermal Wind in Pressure Coordinates .....	167
16.2	Surface Geostrophic Currents .....	168
16.2.1	Pressure Distribution – Geostrophic Stream Function .....	169
16.2.2	The Main Features of Ocean Models .....	169
16.2.3	Geostrophic Equation x, y Direction Components under Normal Condition .....	172
16.2.4	Thermal Wind Relations .....	173
16.2.5	Thermal Wind in Pressure Coordinates, another Approach .....	174

16.3	Geostrophic Currents .....	176
16.3.1	The Horizontal Pressure Gradient Force Acting on unit Volume of Sea Water .....	177
16.3.2	Geostrophic Equation in Baroclinic Conditions .....	179
16.3.3	Surface Geostrophic Currents.....	180
16.4	Ocean Surface Structure and Geostrophic Flow .....	181
16.5	The Taylor-Proudman Theorem.....	183
16.6	Consequences of Taylor-Proudman Theorem.....	185
16.7	Limitations of the Geostrophic Equations Ocean Currents .....	186
16.7.1	Two-Layer Ocean.....	187
16.7.2	Cyclonic and Anticyclonic Eddy in Geostrophic Circulation....	188
16.7.3	Margules Theory .....	191
16.7.4	Application of Margules theory to the Gulf Stream .....	192
16.8	Transformation of Equation of Motion .....	193
16.9	Alternate Proof of Bernoulli's Theorem .....	196
16.10	The Fluid Dynamics for the Fly of a Plane .....	197

**CHAPTER 17: THE VORTICITY IN OCEAN**

17.1	The Vorticity in Ocean.....	201
17.2	Ocean Currents and Atmospheric Wind.....	202
17.3	Absolute Vorticity.....	202
17.4	Vorticity Equation.....	202
17.5	Helmholtz's Vorticity Equation .....	206
17.6	The Helmholtz Theorem .....	208
17.7	Kelvin Waves.....	209
17.8	Rossby Waves.....	209
17.9	Rossby Wave Properties .....	210
17.10	Barotropic Flow .....	211
17.11	Baroclinic Flow.....	211

**CHAPTER 18: GEOPHYSICAL HYDRODYNAMICS**

18.1	The Helicity Invariant .....	213
18.2	Equations of an Ideal Compressible Fluid .....	216
18.3	Isentropic Motion of a Compressible Fluid.....	218
18.4	Ertel Invariant .....	220
18.5	The Equations of Shallow-Water Theory.....	221
18.6	Alternate Method .....	222
18.7	The Rossby – Obukhov – Potential Vortex in Shallow-Water Theory ....	223
18.7.1	Lagrangian Invariant .....	224
18.8	The Obukhov – Charney Basis .....	225
18.8.1	The Concept of Geophysical Flow for a Barotropic Atmosphere .....	228
18.8.2	Fundamental Properties of Geophysical Flows .....	228

**(xviii) Contents**

---

18.8.3	The Criterion of Incompressibility of Rotating Fluid .....	229
18.8.4	Geophysical Flows are a Quasi – Two Dimensional .....	230
18.9	Thermal Wind .....	232
18.9.1	Shallow-Water Theory for Barotropic Atmosphere (Rotating Ideal Fluid of Constant Density) .....	234
18.10	The Advection Equation .....	237
18.11	Numerical Solution .....	238

**CHAPTER 19: THE DEEP OCEAN CIRCULATION**

19.1	Heat, Freshwater and Buoyancy Fluxes .....	243
19.2	Thermohaline Circulation as the Circulation of Temperature and Salt .....	243
19.3	Importance of the Deep Circulation .....	244
19.4	Important Consequences of Deep Ocean Circulation .....	244
19.5	Diapycnal Downwelling or Buoyancy Loss Process .....	245
19.6	Diapycnal Upwelling or Buoyancy Gain Process .....	246
19.7	Density Thermohaline Circulation–Discussion .....	246
19.8	Bjerknes Theorem .....	247
19.8.1	Vertical Convection Currents .....	248
19.9	Convection Currents .....	248
19.10	The Bjerknes Hypothesis .....	249
19.11	Equatorial Ocean Process .....	249

**CHAPTER 20: THE ROLE OF OCEAN IN CLIMATE FLUCTUATION**

20.1	Worlds Land Utilization (1990) .....	252
20.2	Role Factors (Importance) of Ocean in Climate Variability .....	253
20.3	Present and Past Radioactivity of the Earth .....	254

**CHAPTER 21: THE SUN**

**CHAPTER 22: THE EARTH-ATMOSPHERIC SYSTEM**

**CHAPTER 23: IMPACT OF THE OCEAN ON CLIMATE**

23.1	Distribution of Physical Properties in Oceans .....	265
23.2	Climatic Controls .....	265
23.3	Components of Climate System .....	268
23.4	Climate System or Earth System .....	269

**CHAPTER 24: GEOLOGICAL TIME SCALE**

24.1	Milankovitch Cycles .....	274
------	---------------------------	-----

**CHAPTER 25: OCEAN WAVES**

25.1	Ocean Surface Waves .....	281
25.2	Plane Waves in Three Dimensions .....	284

**CHAPTER 26: TIDES**

26.1	Mathematical Features of Waves .....	293
26.2	Types of Fluid (Liquid) Waves .....	296
26.3	Wave Profile of small Elevation Surface Waves .....	297
26.4	Tidal Currents .....	298
26.5	Tsunamis .....	299
	26.5.1 Historic Tsunamis.....	300
26.6	Storm Surges .....	303

**CHAPTER 27: NUMERICAL MODELS**

27.1	Ocean Models .....	308
27.2	Global Ocean Models.....	309
27.3	NWP in India .....	310
27.4	Numerical Models in Oceanography.....	311
27.5	HYCOM (Hybrid Coordinate Ocean Model).....	312
27.6	Strom Surge Models .....	312
27.7	Assimilation Models .....	313
	<b>Summary .....</b>	<b>314</b>
	 <b>Some Basic Concepts in Modeling.....</b>	 <b>317</b>
	<b>Appendix .....</b>	<b>323</b>
	<b>References .....</b>	<b>357</b>
	<b>Index .....</b>	<b>359</b>
