<i>Prologue</i> .....	(ix)
<i>Preface to Second Edition</i> .....	(xi)
<i>Acknowledgements</i> .....	(xiii)

## Chapter 1: Air Pollution: Sources and Effects

---

1.1 Introduction .....	1
1.1.1 Definition of air pollution .....	1
1.1.2 Air pollution due to natural sources.....	2
1.1.3 Air pollution due to anthropogenic activities.....	2
1.1.4 Top-ten gases in anthropogenic air pollution.....	2
1.1.5 Composition of air .....	4
1.1.6 Concentration units of air pollutants.....	4
1.2 Classification of Air-pollutants, their Sources of Emission and Air Quality Standards ...	10
1.2.1 Classification .....	10
1.2.2 Emission sources of air pollutants .....	11
1.2.3 Cycling of air pollutants.....	18
1.3 Physico-Chemical Characteristics, Sources and Effects of Primary Air Pollutants.....	19
1.3.1 Particulate pollutants.....	19
1.3.2 Sulphur oxides .....	27
1.3.3 Removal mechanisms of sulphur oxides.....	33
1.3.4 Nitrogen oxides.....	47
1.3.5 Carbon monoxide.....	56
1.3.6 Hydrocarbons.....	64
1.3.7 Ammonia .....	67
1.3.8 Organic lead.....	70
1.3.9 Hydrogen sulphide.....	73
1.3.10 Fluorides .....	75
1.3.11 Radon.....	79
1.4 Secondary Air Pollutants-Photochemical Reactions – Ozone –PAN-Photochemical Smog.....	82
1.4.1 Ozone and photochemical smog.....	82
1.4.2 Conditions for photochemical smog .....	83
1.4.3 Sequence of photochemical reactions in photochemical smog .....	85

**(xvi) Contents**

---

1.4.4	Role of hydrocarbons in photochemical smog.....	87
1.4.5	Formation of free radicals in air.....	87
1.4.6	Hydroxyl and hydroperoxyl radicals in the atmosphere .....	88
1.4.7	Inorganic products from smog .....	93
1.4.8	Adverse effects of photochemical smog .....	94
1.4.9	Short - and long-term effects .....	94
1.4.10	Effects on plants.....	95
1.4.11	Effects on materials .....	96
1.4.12	US-National trends in ozone levels.....	97
	<b>Questions.....</b>	<b>98</b>
	<b>References .....</b>	<b>99</b>

**Chapter 2: Indoor Air Pollution**

---

2.1	Introduction .....	103
2.2	Sources of Indoor Air Pollution.....	103
2.2.1	Combustion appliances .....	104
2.2.2	Consumer products .....	106
2.2.3	Cigarette (or tobacco) Smoke .....	107
2.2.4	Building materials.....	108
2.3	Some Factors Influencing Indoor Air Quality .....	108
2.3.1	Permeability of structures .....	109
2.3.2	Ventilation .....	109
2.3.3	Meteorological factors .....	109
2.4	An Indoor Air Quality Model .....	109
2.5	Indoor Air Pollution in Underdeveloped and Developing Countries.....	112
2.5.1	Fuel combustion.....	112
2.5.2	Food processing .....	114
2.6	Indoor Air Pollution-Health Effects.....	114
2.7	Strategies to be adopted to Reduce Serious Health and Environmental Problems caused by Indoor Air Pollution.....	116
	<b>Questions.....</b>	<b>117</b>
	<b>References .....</b>	<b>117</b>

**Chapter 3: Air Pollution-Episodes-Preventive Measures-Air Quality  
Management Approaches, Emission Inventories,  
Present Global and National Scenarios**

---

3.1	Air Pollution Episodes.....	119
3.1.1	Meuse valley episode of Belgium in 1930.....	120

3.1.2	Donora episode of Pennsylvania, USA in 1948.....	120
3.1.3	London episodes .....	121
3.1.4	Poza Rica disaster of Mexico in 1950.....	121
3.1.5	TCDD accident at Sevesco, Italy in 1978 .....	122
3.1.6	Bhopal gas tragedy of India in 1984 .....	122
3.1.7	The Chernobyl nuclear disaster in 1986 .....	124
3.1.8	Impact all over the world .....	126
3.2	Air Pollution–Preventive Measures .....	127
3.2.1	WHO air quality guidelines .....	127
3.2.2	International agencies role in global air pollution preventive measures .....	128
3.3	Air Quality Management-Approaches .....	130
3.3.1	Approaches with control measures at source .....	130
3.3.2	Clean air implementation plan approach .....	131
3.3.3	Emissions inventory; comparison with emission standards .....	131
3.3.4	Assessment of emission flows and emission factors.....	131
3.3.5	Estimation of gaseous pollutant emissions from fuel composition .....	132
3.3.6	Estimation of NO <sub>x</sub> , HC and heavy metals emission from fuel composition ..	134
3.3.7	Air pollutant concentrations Inventory; Comparison with air quality standards .....	134
3.3.8	Air quality assessment .....	135
3.3.9	Pollution indices in air monitoring.....	135
3.3.10	Inventory of effects on public health and the environment; causal analysis .....	139
3.3.11	Control measures; cost of control measures.....	140
3.3.12	Fundamental control measures for industries .....	140
3.3.13	Modification or change of the industrial process or equipment.....	140
3.3.14	Modifications in processes, as well as in plant layout .....	141
3.3.15	Adequate housekeeping and storage .....	141
3.3.16	Adequate disposal of wastes .....	141
3.3.17	Maintenance.....	141
3.3.18	Work practices .....	141
3.3.19	Control measures in vehicle emissions .....	142
3.3.20	Cost of public health and environmental effects; cost-benefit analysis .....	142
3.3.21	Enforcement plan, resource commitment .....	144
3.3.22	Projections for the future .....	144
3.3.23	Strategies for follow-up .....	144
3.3.24	Role of environmental impact assessment .....	144
3.3.25	Prevention of significant deterioration.....	145
3.4	Air Pollution Preventive Measures Implemented by Different Countries .....	146
3.4.1	Air pollution preventive measures in USA .....	146

(xviii) Contents

---

3.4.2	Air pollution preventive measures in UK .....	149
3.4.3	Air pollution preventive measures in China.....	150
3.4.4	Air pollution preventive measures in India .....	155
3.5	Air Pollution Trends - Global Scenario .....	178
3.5.1	Global emissions of air pollutants.....	178
3.5.2	Global urban air pollution trends .....	178
3.5.3	Key trends from 2008-2013 .....	180
3.5.4	Air quality trends in USA .....	182
3.5.5	Air pollution scenario in India .....	183
	<b>Questions.....</b>	<b>188</b>
	<b>References .....</b>	<b>189</b>

**Chapter 4: Air Pollution and Global Climatic Changes**

---

4.1	Introduction .....	194
4.2	Global Warming .....	194
4.2.1	The greenhouse effect.....	194
4.2.2	The radiation balance of the earth.....	195
4.2.3	Earth's temperature without the greenhouse effect.....	197
4.2.4	Energy flows between the earth's surface, its atmosphere, and outer space...	198
4.2.5	Past temperatures and carbon dioxide/methane levels.....	201
4.2.6	Current trends in the levels of atmospheric secondary gases; their relative contributions to global warming.....	202
4.2.7	Other greenhouse gases – methane, CFCs, water vapour, nitrous oxide .....	212
4.2.8	Predicted effects of global warming .....	216
4.2.9	Global warming: control measures being taken.....	221
4.3	Stratospheric Ozone Depletion .....	222
4.3.1	The ozone layer.....	222
4.3.2	Relative penetration of different types of UV radiation from sunlight .....	223
4.3.3	Atmospheric UV penetration shields .....	224
4.3.4	How the ozone is produced.....	225
4.3.5	Ozone distribution and temperature profile in the atmosphere .....	225
4.3.6	Destruction of ozone By CFCs and other gases.....	226
4.3.7	Anthropogenic sources of ozone-destroying chemicals.....	227
4.3.8	Gases that increase ozone levels .....	229
4.3.9	Antarctic ozone depletion .....	229
4.3.10	Typical happenings in the winter months leading to the ozone hole over the antarctic.....	232
4.3.11	Arctic ozone hole .....	232
4.3.12	Effects of ozone depletion .....	234

4.3.13	Effects on Air Quality .....	236
4.3.14	Effects on aquatic ecosystems .....	237
4.3.15	Effects on biogeochemical cycles .....	238
4.3.16	Effects on materials .....	238
4.3.17	Solutions to protect the ozone layer .....	238
4.4	Acid Rain .....	240
4.4.1	What is acid rain? .....	240
4.4.2	Dry or gas phase conversion .....	240
4.4.3	Chemicals involved in acid rain .....	241
4.4.4	Acid rain-global scenario .....	245
4.4.5	Impact of acid rain .....	249
4.4.6	Acid rain: control measures .....	258
	<b>Problems</b> .....	<b>258</b>
	<b>Questions</b> .....	<b>260</b>
	<b>References</b> .....	<b>260</b>

### **Chapter 5: Meteorological aspects of Dispersion of Air Pollutants**

---

5.1	Atmosphere and Changes in the Global Climate .....	262
5.1.1	The structure of the atmosphere .....	262
5.1.2	Global air circulation and biomes .....	264
5.1.3	Frontal weather .....	271
5.2	Air Pollutants and Influence of Meteorological Factors on their Removal/Transportation .....	275
5.2.1	Influence of air pollution on climate .....	275
5.2.2	Particulate matter and sunlight .....	275
5.2.3	Moisture, humidity and air pollutants .....	275
5.2.4	Transport and removal of air pollutants .....	276
5.3	Meteorological aspects of Air Pollution Dispersions .....	278
5.3.1	Adiabatic lapse rate .....	278
5.3.2	Pressure versus altitude .....	279
5.3.3	Temperature versus altitude .....	280
5.3.4	Effect of humidity .....	284
5.3.5	Atmospheric stability .....	286
5.3.6	Temperature inversions .....	288
5.3.7	Mixing height .....	293
5.3.8	Ventilation coefficient .....	295
5.3.9	Effect of wind speed, direction, and topographic effects on dispersion of pollutants .....	298
5.3.10	Topographic effects .....	299

(xx) Contents

---

5.3.11	Dust domes and heat islands .....	301
5.3.12	Weather maps .....	302
5.3.13	Pollutant wind roses: Pollutant-wind correlation .....	307
5.3.14	Plume characteristics and plume behaviour .....	309
5.4	Air Pollution Dispersion Models .....	314
5.4.1	Air pollution dispersion modelling .....	314
5.4.2	Flow and turbulence models .....	315
5.4.3	Area source deterministic models .....	315
5.4.4	Lagrange models .....	316
5.4.5	K-models .....	316
5.4.6	Gaussian plume model .....	321
5.4.7	Gaussian puff model .....	345
5.5	Air Pollution Computer Dispersion Models .....	346
5.5.1	Photochemical modeling .....	346
5.5.2	Other models .....	347
5.5.3	Screening and refined computer models for dispersion of air pollutants .....	350
5.5.4	Multiple cell models or urban air shed models for the application of Gaussian plume model for area sources .....	352
5.5.5	Mobile and line source modelling .....	354
5.5.6	Models frequently used in air permit applications-screening techniques .....	355
	<b>Problems</b> .....	<b>368</b>
	<b>Questions</b> .....	<b>369</b>
	<b>References</b> .....	<b>370</b>

**Chapter 6: Air Pollution Sampling and Analysis**

---

6.1	Planning a Sampling Program for Emission Testing .....	378
6.1.1	Emission sampling .....	379
6.1.2	Designing a sampling program .....	379
6.1.3	Preliminary site inspection .....	380
6.1.4	Numbers of samples and sampling times .....	380
6.1.5	Sampling emissions for particles .....	381
6.1.6	Sampling emissions for gases .....	381
6.1.7	Sampling organic emissions with solid sorbents .....	382
6.1.8	Sampling organic emissions with bags/containers .....	383
6.1.9	Detection limits .....	383
6.1.10	Continuous emission monitoring .....	384
6.1.11	Sampling checklist .....	385
6.2	Planning a Ambient Air Quality Sampling Program .....	385
6.2.1	Determination of physical parameters of air .....	386
6.2.2	Experimental methods for sample collection and estimation of air pollutants from ambient air /emission sources .....	389

6.3 Particulate Sampling .....	390
6.3.1 Gravitational method .....	390
6.3.2 Filtration .....	391
6.3.3 Inertial collectors .....	393
6.3.4 Thermal precipitators .....	395
6.3.5 Determination of particle size .....	396
6.3.6 Chemical analysis of particulate matter .....	398
6.4 Sampling and Collection of Gaseous Air Pollutants .....	403
6.4.1 Grab sampling .....	404
6.4.2 Absorption in liquids .....	405
6.4.3 Adsorption on solid materials .....	405
6.4.4 Freeze out sampling .....	405
6.4.5 Stack sampling of gaseous pollutants .....	407
6.4.6 Isokinetic sampling for particulates .....	409
6.4.7 Analysis of gaseous air pollutants .....	413
6.4.8 Sulphur dioxide .....	413
<b>Questions</b> .....	<b>434</b>
<b>References</b> .....	<b>434</b>

**Chapter 7: Air Pollution Control: General Source Correction Methods and Particulate Control Technologies**

---

7.1 Sources Correction Methods .....	436
7.1.1 Raw material changes .....	436
7.1.2 Process changes or modification or replacement of process equipment .....	438
7.1.3 Operational changes .....	439
7.2 Particulate Control Technologies .....	443
7.2.1 Principles of particulate control .....	443
7.2.2 Devices that remove particles .....	444
7.2.3 Stokes' law .....	445
7.2.4 Collection efficiency .....	453
7.3 Particulate Control Equipment: Types of Equipment in Use .....	454
7.3.1 Gravitational settling chambers .....	455
7.4 Cyclone Separators and Electrostatic Precipitators .....	468
7.4.1 Cyclone separators .....	468
7.4.2 Electrostatic precipitators (ESPs) .....	479
7.5 Gas Filtration for Particulate Removal .....	498
7.5.1 Major types of gas filters .....	498
7.5.2 The performance efficiency .....	498
7.5.3 Depth filters .....	498

## (xxii) Contents

---

7.5.4	Fabric filters.....	499
7.5.5	Theory of filtration.....	500
7.5.6	Inertial impaction.....	500
7.5.7	Direct interception.....	501
7.5.8	Diffusion.....	502
7.5.9	Classification of fabric filters.....	504
7.5.10	Design aspects of fabric filters.....	509
7.5.11	Design of cleaning cycle.....	510
7.5.12	Determination of pressure drop.....	510
7.5.13	Compressor power.....	512
7.6	Particulate Liquid Scrubbers.....	512
7.6.1	Principle.....	512
7.6.2	Commercial wet scrubbers.....	513
7.6.3	Water requirements.....	514
7.6.4	Collection mechanisms of scrubbers.....	515
7.6.5	Spray towers.....	516
7.6.6	Centrifugal scrubbers.....	518
7.6.7	Packed beds and plate column scrubbers.....	519
7.6.8	Venture scrubbers.....	521
7.7	Summary of Particulate Emission Control Techniques.....	524
	<b>Problems.....</b>	<b>526</b>
	<b>Questions.....</b>	<b>527</b>
	<b>References.....</b>	<b>528</b>
	<b>Suggested References.....</b>	<b>529</b>

## Chapter 8: Air Pollution Control Technologies for Gaseous Pollutants

---

8.1	Control of Gaseous Pollutants.....	532
8.2	Removal of Pollutants by Absorption.....	532
8.2.1	Principle.....	532
8.2.2	Removal of pollutants by absorption of gases by moving liquid drops.....	533
8.2.3	Theory of absorption of gases by moving liquid drops.....	534
8.2.4	Scrubbing medium.....	536
8.3	Gaseous Pollutant Control Systems based on Absorption in a Liquid.....	538
8.3.1	Criteria for low cost and effective absorption equipment.....	538
8.3.2	Packed towers.....	539
8.4	Design consideration for a Countercurrent Absorption Column.....	540
8.4.1	Height of the column.....	542
8.4.2	Solvent rate and column diameter.....	546

8.5 Removal of Gaseous Pollutants by Adsorption on Solids .....	546
8.5.1 Introduction.....	546
8.5.2 Gaseous pollutant control systems based on adsorption on solids.....	549
8.5.3 Fluidized adsorbers.....	552
8.5.4 Design of adsorption process.....	553
8.5.5 Pressure drop across fixed adsorption beds and expansion of fluidized beds.....	557
8.6 Gaseous Pollutant Control by Combustion.....	558
8.6.1 Methods of destruction of organic vapors by combustion.....	558
8.6.2 The value and composition of combustion products.....	560
8.6.3 Heat of combustion.....	561
8.6.4 Direct flame incineration .....	567
8.6.5 Flares .....	569
8.6.6 Thermal incineration.....	570
8.6.7 Thermal incineration with recuperation.....	572
8.6.8 Catalytic incineration.....	572
8.6.9 Adsorption and incineration.....	574
<b>Problems.....</b>	<b>576</b>
<b>Questions.....</b>	<b>577</b>
<b>References .....</b>	<b>578</b>
<b>Suggested References .....</b>	<b>579</b>

## Chapter 9: Air Pollution Control Technologies for Oxides of Sulphur

9.1 Introduction Control/Removal Technologies for SO <sub>x</sub> .....	580
9.1.1 Reducing SO <sub>x</sub> levels through dilution by increasing stack height .....	580
9.1.2 Use of alternative fuels .....	580
9.1.3 Extraction of sulphur from fuels (fuel desulphurization).....	581
9.1.4 Coal gasification .....	582
9.1.5 Liquefaction.....	585
9.1.6 Reduction of sulphur in combustion process.....	588
9.2 Flue Gas Desulphurization (FGD).....	590
9.2.1 Classification of flue gas desulphurization systems.....	590
9.2.2 Catox process.....	594
9.2.3 Adsorption of metal oxides.....	595
9.2.4 Westvaco oxidation reduction process.....	595
9.2.5 Lurgi's adsorption process .....	596

**(xxiv) Contents**

---

9.2.6 Alkalized alumina process .....	597
9.2.7 Shell process with CuO/CuSO <sub>4</sub> .....	598
9.2.8 Wet scrubbing methods .....	599
9.2.9 Regenerative processes .....	602
9.2.10 Wet-dry systems .....	605
<b>Questions</b> .....	<b>607</b>
<b>References</b> .....	<b>608</b>
<b>Suggested References</b> .....	<b>608</b>

**Chapter 10: Air Pollution Control Technologies for Oxides of Nitrogen**

---

10.1 Emission of Nitrogen Oxides.....	611
10.1.1 NO <sub>x</sub> sources .....	611
10.1.2 Thermal NO .....	612
10.1.3 Fuel NO <sub>x</sub> .....	612
10.1.4 Conversion of organic nitrogen compounds in fuels to NO <sub>x</sub> .....	612
10.1.5 Prompt NO .....	613
10.1.6 Temperature wise formation of different kinds of NO <sub>x</sub> .....	613
10.2 Control Technologies for Nitrogen Oxide Emissions.....	617
10.2.1 Nitrogen oxide control by modification of combustion processes.....	618
10.2.2 Reducing process temperature .....	618
10.2.3 Burner design modifications for NO <sub>x</sub> control .....	619
10.2.4 Recirculation of the flue gases.....	620
10.3 Combustion Process Modification.....	621
10.3.1 Two-stage combustion process .....	621
10.3.2 Reducing residence time .....	622
10.3.3 Lowering the combustion air temperature by injection of water and steam .....	622
10.3.4 Internal combustion reciprocating engines .....	622
10.4 Efficiency of NO <sub>x</sub> Control Technologies used for Stationary Internal Engines .....	623
10.5 Chemical Reduction of NO <sub>x</sub> .....	623
10.5.1 Selective non-catalytic reduction.....	623
10.5.2 Selective catalytic reduction (SCR ) of NO .....	624
10.5.3 Oxidation of NO .....	625
10.5.4 Removal of nitrogen from combustion .....	625
10.5.5 Selection of proper method for industrial operations.....	625
10.6 NO <sub>x</sub> Abatement System in Gas Turbines.....	626
10.6.1 NO <sub>x</sub> control by effluent gas treatment .....	626
10.6.2 Scrubbing methods for effluent gas treatment for reduction of NO <sub>x</sub> .....	626
10.6.3 Absorption by liquids.....	626
10.6.4 Magnesium hydroxide scrubbing.....	627
10.6.5 Tyco process .....	629

10.6.6 Adsorption on solids .....	630
10.6.7 Reduction/decomposition process for NO <sub>x</sub> in flue gases .....	630
10.6.8 Reduction with natural gas.....	631
10.6.9 Selective catalytic reduction for removal of NO <sub>x</sub> from flue gases.....	632
<b>Questions.....</b>	<b>636</b>
<b>References .....</b>	<b>637</b>
<b>Suggested References .....</b>	<b>637</b>

**Chapter 11: Control Technologies for Volatile Organics,  
Hydrocarbons and Hydrogen Sulphide**

11.1 VOC Treatment Technologies .....	639
11.1.1 Sources of Volatile Organic Compounds (VOC).....	639
11.2 Control Measures for VOCs by Reduction of Leakages or Working Losses .....	641
11.2.1 Filling, breathing and emptying losses .....	641
11.2.2 Special seals for leakage control.....	641
11.3 Adsorption, Condensation and Combustion Techniques for Reducing/Controlling VOC Emissions .....	643
11.3.1 Adsorption techniques .....	643
11.3.2 Breakthrough performance .....	644
11.3.3 Adsorption system for pre-concentration.....	644
11.3.4 Control by condensation .....	645
11.4 Control by Oxidation/combustion.....	648
11.4.1 Biological oxidation.....	648
11.4.2 Thermal and catalytic oxidation.....	648
11.5 Selection of Suitable VOC control Technology-Chart .....	654
11.5.1 VOC control technologies–specific applications to boilers, furnaces, flares .....	654
11.6 Catalytic Converters for Automobiles for Reduction of VOCs from Transportation Sector.....	658
11.6.1 VOCs from automobiles .....	658
11.7 Control of Hydrogen Sulphide.....	659
11.7.1 Introduction.....	659
11.7.2 Sources of H <sub>2</sub> S .....	659
11.7.3 Threshold Levels of Hydrogen Sulfide in ambient air .....	660
11.7.4 H <sub>2</sub> S Treatment Technologies.....	660
<b>Questions.....</b>	<b>663</b>
<b>References .....</b>	<b>663</b>

**Chapter 12: Air Pollution by Automobiles and its Control Technologies**

---

12.1	VOCs from Automobiles.....	665
12.1.1	Petrol engines.....	665
12.1.2	Diesel engines.....	668
12.2	Origin of Air Pollutants in Automobiles.....	669
12.2.1	Carbon monoxide.....	669
12.2.2	Nitrogen oxides (NO <sub>x</sub> ).....	669
12.2.3	Sulphur dioxide (SO <sub>2</sub> ).....	670
12.2.4	Hydrocarbons (HC).....	670
12.2.5	Lead.....	670
12.2.6	Soot.....	671
12.2.7	Composition of Auto Exhaust Pollutants and Corresponding Engine Conditions.....	671
12.3	Control of Automobile Pollution at Source.....	676
12.3.1	Evaporation emission control.....	676
12.4	Exhaust Gas Treatment Devices-Catalytic Oxidation Converters.....	682
12.4.1	US clean air act and catalytic converters development.....	682
12.4.2	Catalytic converters for destruction of auto exhaust pollutants.....	683
12.4.3	Dual way and three way catalytic converters.....	686
12.4.4	Three way catalytic converter (TWC).....	687
12.4.5	Reactions in 3-way catalysts reactors.....	688
12.4.6	Latest design of a three-way catalytic converter.....	688
12.4.7	Modern TWC with oxygen sensors.....	689
12.4.8	Light-off Temperatures of Three Way Catalytic Converters.....	691
12.5	Automobile Air Pollution---Indian Scenario (15-18).....	692
12.5.1	Types of automobiles on Indian roads.....	692
12.5.2	Growth rate of automobiles.....	692
12.5.3	Increased air pollution levels in Indian urban areas due to automobiles.....	693
12.5.4	Reasons for air pollution from automobiles in India (as per Automobile and pollution in India Govt of India Report 2016-Jan).....	694
12.5.5	Emission norms/standards in India.....	694
12.5.6	Measures to tackle air pollution from automobiles in India.....	695
	<b>Questions.....</b>	<b>695</b>
	<b>References.....</b>	<b>696</b>
	<b>Suggested References.....</b>	<b>697</b>

**Chapter 13: Noise Pollution**

---

13.1	What is Noise Pollution?.....	699
13.1.1	Definition of noise.....	699
13.1.2	Comparison of air and noise pollution.....	701

---

13.2	Characteristics of Sound .....	701
13.2.1	Sound pressure, power and intensity.....	702
13.3	Effects of Noise on People.....	713
13.3.1	Normal hearing–Frequency range and sensitivity.....	713
13.3.2	Repeated interference with sleep .....	713
13.3.3	Effects on communication .....	713
13.3.4	Physiological responses .....	713
13.3.5	Epidemiological studies .....	714
13.3.6	Noise rating system.....	716
13.4	Propagation of Noise in Ambient Air .....	719
13.4.1	Variation of character of wave radiation with varying distance from a sound source.....	719
13.4.2	Directivity .....	720
13.4.3	Effects of atmospheric conditions on noise transmission .....	722
13.4.4	Basic point source model for noise transmission outdoors .....	722
13.4.5	Indoor noise propagation .....	723
13.5	Noise sources .....	724
13.5.1	Traffic noise.....	724
13.5.2	Highway vehicle noise.....	725
13.5.3	Prediction of traffic noise levels .....	727
13.5.4	Sources of noise from industry and controlling measures .....	728
13.6	Noise Control Measures .....	729
13.6.1	Noise control.....	729
13.6.2	Enclosures.....	729
13.6.3	Screen the receiver.....	729
13.6.4	Ear protection.....	730
13.6.5	Control of noise during transmission.....	730
13.6.6	Separation .....	730
13.6.7	Absorbing materials.....	730
13.6.8	Barriers and panels.....	731
13.6.9	Control of industrial noise source by design changes in equipment .....	731
13.6.10	Noise control criteria .....	735
13.6.11	Indian Govt. noise pollution and control rules.....	737

**Chapter 14: Prediction and Assessment of Impacts on the Air Environment**

---

14.1	Air Quality Impact Assessment .....	743
14.1.1	Basic information on air pollution .....	743
14.1.2	Air pollution sources.....	743
14.1.3	Air pollution effects (human health, material damage, climatic and aesthetic effects).....	744
14.2	Generalized Approach for Assessment of the Impact of Air Pollution.....	745
14.2.1	The following are six main steps in the proposed model for EIA study on air environment.....	745
14.2.2	Step 1: Evaluation and identification of sources and quantity of air pollutant emissions from different phases of the proposed activity .....	745
14.2.3	Step 2: Detailed evaluation of existing ambient air quality meteorological conditions and natural quality existing in the project area.....	747
14.2.4	Step 3: Examination of appropriate air quality emission regulation laws and air quality standards to be maintained as per local, state and central government notifications .....	749
14.2.5	Step 4: Carrying out impact assessment using mass-balance, mathematic modelling and other qualitative approaches.....	749
14.2.6	Step 5: Assessment of significance of impacts of predicted beneficial and detrimental effects.....	754
14.2.7	Step 6: Development of appropriate mitigation or remediation plans for reducing adverse Impacts.....	755
14.3	Detailed Methodology for Air Pollution Dispersion Modeling Approaches for Assessment of Air Quality Impacts (AQI) for a Specific Study Area (19-91) .....	756
14.3.1	Various key steps in air pollution dispersion modeling approach for air quality impact assessment for a specific study area.....	756
14.3.2	Input data collection.....	756
14.3.3	Dispersion modelling.....	766
14.4	Approved dispersion Models for Air Quality Assessment for Typical Urban Areas.....	767
14.4.1	Advanced dispersion models for specialist application .....	768
14.4.2	Processing dispersion model output data .....	770
14.4.3	Application of GIS for presentation of Air Quality Impact .....	773
