Contents

Preface ..... **(vii)**

CHAPTER 1

Introduction to Biostatistics

Biostatistics 1

Applications of Biostatistics in Pharmacy 2

Specific Applications of Biostatistics in Pharmacy Research 2

CHAPTER 2

Research Methodologies - I
(Concepts, Literature Survey and Protocols)

Research and Its Importance 5

Importance of Research 6

Research in PG and PhD Programmes in Pharmacy 7

The Role of Research Guide 7

Qualities of an Ideal Research Guide 8

The Role of Research Students 8

Literature Survey 8

Importance of Literature Survey 9

Sources for Literature Survey 9

Primary Sources 9

Secondary Sources 9

Tertiary Sources 10

Process of Literature Survey/Search 10

Literature Search Techniques 10

Searching by a Phrase 10

Boolean Searching 11

Truncation and Wild Card Searching 11
Focused Searching 11
After Initial Search 11
Start Reading 12
Keep Searching 12
Research Protocol 12
Need for a Research Protocol 12
Elements of a Research Protocol 13
Statistics and Its Importance in Research 13
Thrust Areas of Research in Pharmacy 14

CHAPTER 3

Research Methodologies - II
(Designs for Preclinical and Clinical Studies)

Criteria of a Study Design 17
Types of Study Designs 18
Observational Studies 18
Descriptive Study 18
Types of Descriptive Studies 18
Case Report 18
Case Series 18
Cross Sectional Study 19
Ecological Correlation Study 19
Application and Uses of Descriptive Studies 19
Case Control Study 20
Selection of Cases and Controls 20
Applications of Case Control Study 20
Advantages 20
Cohort Study 20
Experimental Studies 21
Animal Studies 21
Human Studies 22
Clinical Trials 22
Error and Biases 22
Strategies to Eliminate Errors and Biases 22

Error and Its Measurement 24
Methodologies and Protocols 26
Specific Protocols for Various Types of Studies 27

Determination of Sample Size 30
Specifications needed to Calculate Sample Size 30
For Testing difference between Two Proportions 32
Without Considering the Power of the Test 32
Considering the Power of the Test 32

CHAPTER 4

Basic Concepts of Biostatistics

Types of Data 33
Qualitative 33
Quantitative 34
Classification of Data 34
Primary Data 35
Secondary Data 35
Collection of Primary Data 35
Questionnaire 35
Relative Advantages of Primary Data 35
Population and Sample 36
Sample 36
Types of Samples 37
Objectives of Sampling 37
Variables 37

Statistical Error 38
Types of Error 38
Array 38
Statistical Tables 39
Parts of a Table 40
Essential Features of a Good Table 40
Parameter and Statistic 41

Presentation and Analysis of Data 42
Frequency Distribution 42
Frequency Distribution Tables and Graphs 43
Diagrams 44
Bar Diagram 44
Frequency Polygon 47
Frequency Curve 47
Characteristics of a Frequency Distribution 48

CHAPTER 5

Measures of Central Tendency and Dispersion

Introduction 51

Arithmetic Mean 51
Median 53
Mode 54
Selection of the Appropriate Measure of Central Tendency 54
Other Measures of Central Tendency 55
Geometric Mean 55
Harmonic Mean 56
Examples of Harmonic Mean (HM) 56

Measures of Dispersion 57
Range 57
Mean Deviation 57
Variance and Standard Deviation 59
Alternative Method of Calculating Standard Deviation 61
Coefficient of Variation 63

CHAPTER 6

Tests of Significance

Principle of Tests of Significance 66
Procedure of Tests of Significance or Steps Involved in Tests of Significance 67
Types of Errors and Level of Significance 67
Z - test of Significance 68
Worked-out Examples 69

t-test of Significance 74
Worked-Out Examples 76
Pooled Variance 79
F-test of Significance 81
χ^2 TEST (Chi-square Test of Significance) 82
Applications of Chi-square test 82
Application of Chi-square for Testing Goodness of Fit 83
Calculation of Chi-Square 83
Chi-Square Table 85
Chi-Square Table 85
Chi-Square Table 86

CHAPTER 7

Analysis of Variance

ANOVA One Way Classification 88

ANOVA One Way – Worked-out Examples 89
Extension of ANOVA 90

ANOVA Two Way Classification 95
Examples 96

ANOVA Two Way Classification 97
Worked out Example 97

ANOVA Three Way Classification 105

CHAPTER 8

Research Methodologies – III
(Designs for Laboratory Investigations)

Criteria of a Good Design 108
Objectives 110
Plan of the Work 110
Replication 111
Randomisation 112
Principle of Local Control 112
Completely Randomised Design (CRD) 112
Analysis of Data 113

Randomised Block Design (RBD) 114
Applications 114
Latin Square Design (LSD) 115
Applications 115

CHAPTER 9

Research Methodologies - IV
(Factorial Experiments)

2^2 Factorial Experiments 118
Analysis of Data 120
Computation of Factorial Effect Totals-Yates' Method 121
ANOVA Table 123

CHAPTER 10

Research Methodologies - V
(Doe and Optimization)

Quality by Design (QbD) 126
Application of QbD in Pharmaceutical Industry 126
Design of Experiment (DoE) 126

Types of Experimental Design Methods 127
Factorial Designs 127
Fractional Factorial Design (FFD) 127
Plackett-Burman Designs (Hadamard Designs) 128
Central Composite Design (Box-Wilson Design) 128
Box-Behnken Designs 128
Taguchi Design 128
Mixture Design 128
Model Development for Optimization 128

Validation of Model Developed 129
Software for Designs and Optimization 129
Design Expert 130
Choice of Computer Software Package 131

Screening Designs- Plackett Burman Method 132
Plackett Burman Designs 132

Optimization by Factorial Designs and
Multiple Regression
(A Novel Approach for Pharmaceutical Formulation Development) 135
Optimization by Factorial Design..... 136
Full Factorial Design (FFD) 136
Case Studies of Optimization Using Factorial Design 137
Estimation of Optimized Levels of the Factors 141

CHAPTER 11

Non-Parametric Tests of Significance

Types of Non-Parametric Tests 144
Advantages of Non-Parametric Tests 145
Disadvantages of Non-Parametric Methods 145
Uses of Non-Parametric Methods..... 146

The Sign Test for Paired Data 147
One Sample Sign Test 149
Worked-out Examples 152
Rank Sum Tests..... 154
Mann-Whitney U-Test..... 154

Kruskal-Wallis Test or H-Test 158

Practice Exercise 162
Answers 165

Spearman's Rank Correlation Test 165
Spearman's Rank Correlation 165
Rank Correlation Coefficient..... 166
Advantages of Rank Correlation Coefficient 166

Kolmogorov-Smirnov Test 169
K-S Statistic..... 169
Answers 172

Median Test for Two Independent Samples..... 173
Test Statistic 173

Wilcoxon Signed - Rank Test 174
Wilcoxon Signed Rank Test - Large Samples Test 176

CHAPTER 12

Correlation, Regression and Probit Analysis

Properties and Interpretation of 'r' 180
Scatter Diagram 181
Causation and Correlation 181
Worked-out Examples 181
Coefficient of Rank Correlation 182
Regression Analysis 183
Method of Least Squares 184

Multiple Regression 185
Linear Regression between Three Variables 185
Examples of Multiple Regression 186

Probit Analysis and its Applications 186
A Typical Dose-Response Curve 187
Determination of LD_{50} 187
Determination of ED_{50} 188

CHAPTER 13

Research Methodologies - VI (Patentable Research in Pharmacy)

IPR and Patents 191
Patents 191
Copyrights 191
Trademarks 191
Industrial Designs 192
Patents and Patentable Research 192
Object of Patent Grant System 192
Requirements of Patentability 192
Novelty 193
Non- obviousness 193
Industrial Applicability 193
Impact of Process Patents 193
Impact of Product Patents 193
Changes Observed after Product Patent 193

Procedure for Obtaining Patent 194
Application 194
Provisional Specification 194
Complete Specification 194
Examination Report 195
Time for Compliance 195
Gazette Publication 195
Objections 195
Patent Certificate Issue 195
Examples of Patentable Research in Pharmacy 196
Conclusion 200
