*Preface* ..... (xiii)

## **Chapter 1 Establishment of a Standard Agricultural Meteorological Observatory**

<b>1.1</b>	Introduction	<b>1</b>
<b>1.2</b>	Basic aspects of agricultural meteorological observations	<b>2</b>
<b>1.2.1</b>	Physical climatic variables	<b>3</b>
<b>1.2.2</b>	Biological variables	<b>3</b>
<b>1.2.3</b>	Scale of observations	<b>3</b>
<b>1.2.4</b>	Extent of observations	<b>4</b>
<b>1.3</b>	Agricultural meteorological stations	<b>4</b>
<b>1.3.1</b>	Classification	<b>4</b>
<b>1.3.2</b>	Selection and layout of a station site	<b>5</b>
<b>1.3.3</b>	Layout plan of an agricultural meteorological observatory	<b>6</b>
<b>1.3.4</b>	Hours of observation	<b>6</b>
<b>1.3.5</b>	Precautions	<b>9</b>
<b>1.4</b>	Instruments for an ideal agrometeorological observatory	<b>9</b>
<b>1.5</b>	Networks of agrometeorological stations	<b>12</b>
<b>1.5.1</b>	Networks	<b>12</b>
<b>1.5.2</b>	Inspection and Supervision of Stations	<b>13</b>
<b>1.5.3</b>	Fixed agrometeorological stations	<b>13</b>
<b>1.5.4</b>	Mobile stations	<b>14</b>
<b>1.5.5</b>	Agricultural Mesoclimatological surveys	<b>14</b>
<b>1.5.6</b>	Complementary observations to describe special mesoclimatic processes	<b>15</b>
<b>1.5.7</b>	Detailed physical observations of a non- routine or non permanent character (Agricultural micrometeorological research)	<b>15</b>
<b>1.6</b>	Observations to be carried out at agricultural meteorological stations	<b>16</b>
<b>1.6.1</b>	Observations of physical environment	<b>16</b>

1.7	Synoptic charts and weather reports	17
1.7.1	Synoptic report	18
1.7.2	Synoptic chart/ Weather map	18
1.7.3	The duties of the observer	18

## **Chapter 2 Solar Radiation**

2.1	Introduction	21
2.1.1	Importance of solar radiation on Crop Production	21
2.2	Energy budget	22
2.3	Instruments to measure solar radiation	24
2.3.1	Solarimeters	25
2.3.2	Tube solarimeters	25
2.3.3	Net radiometers	26
2.3.4	Pyrano albedometers	26
2.3.5	Radiometers	27
2.3.6	PAR Sensors or Quantum Sensors	28
2.3.7	Infrared radiometers	28
2.4	Field experiments on solar radiation	28
2.4.1	Measurement of short wave radiation in a crop canopy	28
2.4.2	Measurement of different components of solar radiation	29
2.4.3	Measurement of intercepted solar radiation in a crop canopy	31
2.4.4	Measurement of different components of solar radiation-A	32
2.4.5	Measurement of various components of solar radiation-B	34
2.4.6	Measurement of various components of photosynthetically active radiation	36
2.4.7	Estimation of radiation use efficiency (RUE)	37
2.5	Measurement	38
2.5.1	Measurement of incoming PAR (PAR <sub>o</sub> )	38
2.5.2	Measurement of transmitted PAR (TPAR)	38
2.5.3	Determination of intercepted PAR (IPAR)	38
2.5.4	Measurement of reflected PAR (RPAR <sub>o</sub> and RPAR <sub>c</sub> ) (canopy + soil)	38
2.5.5	Measurement of reflected PAR by soil (RPAR <sub>s</sub> )	39

2.5.6	Determination of reflected PAR by canopy	39
2.5.7	Determination of absorbed PAR (APAR)	39
2.6	Frequently Asked Questions	39
2.7	Some important precautions in solar radiation measurements	40
2.8	Conversion factors for solar radiation	41
2.9	Sunshine	42
2.9.1	Cambell stokes Sunshine recorder	42

### **Chapter 3 Temperature**

3.1	Air Temperature	45
3.1.1	Introduction	45
3.1.2	Importance of air temperature in crop production	45
3.1.3	Methods and principles of temperature measurement	45
3.1.4	Growing degree days	46
3.1.5	Helio thermal units	47
3.1.6	Photo thermal units	47
3.1.7	Heat use efficiency	48
3.1.8	Photo thermal use efficiency	48
3.1.9	Helio thermal use efficiency	48
3.1.10	Thermo photo ratio	48
3.1.11	Pheno thermal index	48
3.1.12	Daily mean temperature	49
3.1.13	Types of temperature transducer	50
3.1.14	The Theory of heat flow	51
3.2	Instruments to measure air temperature	52
3.2.1	Maximum thermometer	52
3.2.2	Minimum thermometer	53
3.2.3	Dry bulb thermometer	54
3.2.4	Wet bulb thermometer	54
3.2.5	Thermograph	55
3.2.6	Thermocouples	56
3.2.7	Thermopiles	59
3.2.8	Resistance temperature detectors	60
3.2.9	Thermistors	61
3.2.10	Sonic thermometers	61

3.3	Experiment on measurement of air temperature on crop canopy	61
3.4	Soil temperature	64
3.4.1	Introduction	64
3.4.2	Importance of soil temperature on crop production	64
3.4.3	Heat transfer from plant leaves	64
3.5	Instruments to measure soil temperature	65
3.5.1	Mercury thermometers	65
3.5.2	Measurement of soil temperature in a cropped field with mercury thermometers	67
3.5.3	Liquid in glass thermometers	67
3.5.4	Surface temperature	68
3.5.5	Radiation thermometers	68
3.5.6	Bimetallic thermometers	69
3.5.7	Heat flux plates	69
3.5.8	Measurement of soil heat flux	69
3.6	Experiment 1. Measurement of soil heat flux by soil heat flux plates	71
3.7	Measurement of soil temperature and heat flux in cropped field	72

## **Chapter 4 Rainfall**

4.1	Introduction	75
4.2	Measurement of rainfall	75
4.2.1	Symon's rain gauge	75
4.2.2	Natural syphoning self recording rain gauge	76
4.2.3	Tipping bucket rain gauge	77
4.2.4	Other recorders	78
4.2.4.1	Intensity recorders	78
4.2.4.2	Snow gauges	78
4.2.4.3	Wetness detectors	78
4.2.5	Measurement of dew	78
4.2.5.1	Dew gauge	78
4.3	Rainfall analysis	79
4.3.1	Ranking order method	79
4.3.2	Co-efficient of variation (%)	82

4.3.3	Initial probability	83
4.3.4	Conditional probability	84
4.3.5	Jeevananda reddy method	84
4.3.6	Return period	86
4.3.7	Markov-chain analysis	86
4.4	Length of growing period	88
4.4.1	Introduction	88
4.4.2	Cropping season when water is not a sever constraint	88
4.4.2.1	Length of the cropping season under rainfed conditions	89
4.4.2.2	Starting of rainy season	89
4.4.2.3	Rainfall distribution	90
4.4.2.4	Logistics and use of rainfall characters	90
4.4.2.5	Mean decade rainfall and cropping systems	90
4.4.2.6	Extremes of rainfall and technological options	91
4.4.2.7	Estimates of probable rainfall and agriculture	91
4.4.2.8	End of the rainy season	92
4.4.2.9	Rainfall patterns	92
4.4.2.10	Sequential nature of rainfall	92
4.4.2.11	Nature of the soil with regard to water holding capacity	93
4.4.3	Climatic water balance models	94
4.4.3.1	Application of water balance technique	95
4.4.4	Crop specific water balance models	96

## **Chapter 5 Humidity**

5.1	Introduction	99
5.2	Importance of humidity	99
5.3	Measurement of humidity	100
5.3.1	Mass and volume based measures	101
5.3.2	Saturation based measures	102
5.3.3	Wet and dry bulb hygrometer	102
5.3.4	Assmans psychrometer	103
5.3.5	Hair hygrometer	105
5.3.6	Electric hygrometers	105
5.3.7	Hair hygrograph	106
5.3.8	Stevenson's screen	106
5.3.9	Other methods	107

(x) | *Contents*

---

5.3.9.1	Dew point method	107
5.3.9.2	Change of physical dimensions	107
5.3.9.3	Change in concentration of a solution	107
5.3.9.4	Changes in electrical properties of materials	107
5.3.9.5	Infrared gas analyzer	108
5.3.9.6	Change in resonant frequency of a quartz crystal	108
5.4	Calculation of actual vapor pressure, dew point temperature, relative humidity and vapor pressure deficit	108
5.4.1	With Stevensons Screen wet and dry bulb thermometers	108
5.4.2	With Assman Psychrometer wet and dry bulb thermometer	109
5.4.3	Vapor Pressure Deficit	109
5.5	Experiments	111
5.5.1	Measurement of relative humidity in a maize crop	111
5.5.2	Measurement of vapour pressure at different sites	113

## **Chapter 6 Pressure and Wind**

6.1	Pressure	115
6.1.1	Introduction	115
6.2	Instruments to measure pressure	115
6.2.1	Mercurial Barometers	115
6.2.2	Aneroid barometers	117
6.2.3	Aneroid barograph	117
6.3	Units of measurements	118
6.3.1	Experiment on pressure	118
6.4	Wind	120
6.4.1	Introduction	120
6.4.1.1	History of wind	120
6.4.2	Significance or importance of wind	121
6.4.2.1	Harmful effects of wind	121
6.5	Wind direction	121
6.5.1	Wind vane	122

<b>6.6</b>	Measurement of wind velocity	<b>123</b>
<b>6.6.1</b>	Robinson's cup anemometer	<b>124</b>
<b>6.6.2</b>	Bridled or Torque Anemometers	<b>125</b>
<b>6.6.3</b>	Pressure tube anemometer	<b>126</b>
<b>6.6.4</b>	Digital anemometer	<b>126</b>
<b>6.6.5</b>	Other anemometers	<b>126</b>
<b>6.6.5.1</b>	Force Anemometers	<b>126</b>
<b>6.6.5.2</b>	Pressure anemometers	<b>127</b>
<b>6.6.5.3</b>	Mechanical Anemometers	<b>127</b>
<b>6.6.5.4</b>	Thermal Anemometer or Thermoelectric Anemometers	<b>127</b>
<b>6.6.5.5</b>	Sonic anemometer	<b>127</b>
<b>6.7</b>	Experiments on wind	<b>128</b>
<b>6.7.1</b>	Effect of wind on pulse seed germination in different situation	<b>128</b>
<b>6.7.2</b>	Experiment on measurement of wind speed with digital anemometer	<b>130</b>

## **Chapter 7 Evapotranspiration**

<b>7.1</b>	Evaporation	<b>133</b>
<b>7.1.1</b>	Introduction	<b>133</b>
<b>7.1.2</b>	Measurement of evaporation	<b>133</b>
<b>7.1.2.1</b>	U.S.W.B Class A open pan evaporimeter (mesh covered fixed point gauge)	<b>134</b>
<b>7.1.2.2</b>	Sunken Screen Evaporimeter	<b>137</b>
<b>7.1.2.3</b>	Evaporograph	<b>139</b>
<b>7.1.3</b>	Experiment on measurement of evaporation in crop canopy	<b>140</b>
<b>7.2</b>	Transpiration	<b>141</b>
<b>7.2.1</b>	Measurement of transpiration	<b>141</b>
<b>7.3</b>	Evapotranspiration	<b>142</b>
<b>7.3.1</b>	Computation of potential evapotranspiration approaches	<b>143</b>
<b>7.3.1.1</b>	Thornthwait formulae	<b>143</b>
<b>7.3.1.2</b>	Blaney criddle method	<b>144</b>
<b>7.3.1.3</b>	Modified blaney criddle method	<b>144</b>
<b>7.3.1.4</b>	Penman equation	<b>144</b>
<b>7.3.1.5</b>	Modified penman method	<b>146</b>
<b>7.3.1.6</b>	Papadakis method	<b>147</b>

7.3.1.7	Haregreaves method	147
7.3.1.8	Evapotranspiration from energy balance	148
7.3.1.9	Penman combination approach	149
7.3.1.10	Evapotranspiration from Remotely sensed canopy temperature	151

## **Chapter 8 Weather Health Indices**

8.1	Weather Health	155
8.1.1	Murthy's "Weather Health" concept	155
8.1.2	The Murthy's "Daily Weather and Agriculture" Concept	156
8.1.3	Murthy's Comparison Concept	156
8.1.4	Growing Degree Days	157
8.1.5	The Canonical form for Calculating GDD	157
8.2	Preparation and dissemination of Agrometeorological Advisory Bulletins	159
8.2.1	Introduction	159
8.2.2	Weather Forecasts for Agriculture	159
8.2.2.1	Types of Weather Forecasts and their Applications in Agriculture	159
8.2.2.2	Weather Forecasts for Agriculture	160
8.2.3	Agrometeorological Advisory Services	164
8.2.4	Information requirement for AAS preparation	167
8.2.4.1	Non- Spatial Information	167
8.2.4.2	Spatial Information	169
8.2.5	Information Bank for AAS unit	169
8.2.6	R&D in relevant areas and utilisation of the results	172
8.3	Field Exercise on "MURTHY'S DAILY WEATHER AGRICULTURE"	174
	<i>References</i>	179
	<i>Index</i>	187
	<b>About the Authors</b>	191
