|----------------------|-----|

CHAPTER 1

Aldose Reductase Inhibitors Phyto Constituents

| | |
|---|----|
| 1.1 Introduction..... | 1 |
| Screening Methods for AR Inhibitory Activity..... | 3 |
| <i>In vitro</i> Methods..... | 3 |
| Rat Kidney AR (RKAR) Inhibitory Activity..... | 3 |
| AR Enzyme from Cataracted Human Eye Lens..... | 3 |
| AR Enzyme from Bovine Eyes..... | 4 |
| Human Recombinant AR (HRAR) Inhibitory Activity..... | 4 |
| PL (porcine lens) AR Inhibitory Activity..... | 4 |
| <i>In vivo</i> Methods..... | 4 |
| Estimation of Galactitol Levels in Galactosomic Rat Lens by RP-HPLC..... | 5 |
| Phytochemicals with AR Inhibitory Activity..... | 5 |
| Flavonoids and other Phenolic Compounds..... | 18 |
| Terpenoids..... | 40 |
| Alkaloids..... | 42 |
| Coumarins..... | 43 |
| Tannins..... | 44 |
| Miscellaneous..... | 44 |
| <i>Conclusion</i> | 44 |
| <i>References</i> | 45 |

CHAPTER 2

Aldose Reductase Inhibitors from Plant Extracts

CHAPTER 3

Plants as Antiglycation Agents: Nutraceuticals for the Management of Diabetic Complications

| | | |
|-----|-------------------------------------|----|
| 3.1 | Introduction..... | 69 |
| | Approach for Detection of AGEs..... | 69 |
| | <i>References</i> | 99 |

CHAPTER 4

Plants used in the Management of Diabetic Complications

| | | |
|-----|---------------------------|-----|
| 4.1 | Introduction..... | 107 |
| | Diabetic Nephropathy..... | 112 |
| | Diabetic Neuropathy..... | 117 |
| | Diabetic Cataract..... | 122 |
| | Diabetic Retinopathy..... | 125 |
| | <i>Conclusion</i> | 130 |
| | <i>References</i> | 130 |

CHAPTER 5

Herbal Medicine in Diabetic Foot Complications

| | | |
|-----|---|-----|
| 5.1 | Introduction..... | 139 |
| | Herbal Medicine in Diabetic Foot Complications..... | 140 |
| | <i>References</i> | 144 |
