# CONTENTS

*Preface* ..... (v)  
*Abbreviations* ..... (xix)

## UNIT - 1: Cell: Biology

### Chapter 1: Cell and Organelles

**Plasma Membrane** ..... 4  
    *Structure of Plasma Membrane (Fluid Mosaic Model)* ..... 4  
    *Functions of Plasma Membrane* ..... 6  
**Cytoplasm** ..... 6  
    *Endoplasmic Reticulum (ER)* ..... 7  
    *Ribosomes* ..... 9  
    *Golgi Apparatus or Golgi Complex* ..... 9  
    *Mitochondria* ..... 10  
    *Lysosomes* ..... 11  
    *Peroxisomes* ..... 12  
    *Proteasomes* ..... 12  
    *Cytoskeleton* ..... 13  
**Nucleus** ..... 15  
**Review Questions** ..... 19  
**Multiple Choice Questions** ..... 20

### Chapter 2: Genome

**Genome Organization** ..... 21  
    *Packaging of DNA by Histone Proteins to form Chromatin* ..... 21  
    *Types of DNA depending on Reassociation Rate* ..... 23  
    *Organization of Genes* ..... 24  
    Protein Coding Genes ..... 24  
    Repetitious DNA ..... 25  
**Gene Expression and its Regulation** ..... 27

<b>Gene Mapping</b> .....	<b>38</b>
<i>Genetic Mapping</i> .....	38
<i>Physical Mapping</i> .....	40
<b>Review Questions</b> .....	<b>41</b>
<b>Multiple Choice Questions</b> .....	<b>42</b>

### Chapter 3: Necrosis and Autophagy

<b>Necrosis</b> .....	<b>45</b>
<i>Definitions and General Features</i> .....	45
<i>Characteristic Features of Necrosis</i> .....	46
<i>Different types of Necrosis (Morphological Patterns of Necrosis)</i> .....	46
<i>Morphological Changes in Nucleus during Cell Death</i> .....	48
<b>Autophagy</b> .....	<b>49</b>
<i>Definitions and General Features</i> .....	49
<i>Types of Autophagy</i> .....	50
<i>Macroautophagy</i> .....	50
<i>Microautophagy</i> .....	51
<i>Chaperone-Mediated Autophagy (CMA)</i> .....	51
<i>Digestion of Cell Organelles, Endogenous Substances and</i> <i>Exogenous Pathogens</i> .....	51
<i>Involvement of Genes in Autophagy</i> .....	52
<i>Steps involved in Autophagy (Mechanism of Autophagy)</i> .....	52
<i>Blockade of Autophagy</i> .....	54
<i>Physiological and Pathological Role of Autophagy</i> .....	54
<b>Review Questions</b> .....	<b>56</b>
<b>Multiple Choice Questions</b> .....	<b>57</b>

### Chapter 4: Apoptosis

<b>Definition and General Features</b> .....	<b>59</b>
<i>Morphology of Apoptosis</i> .....	60
<b>Early Stage</b> .....	<b>60</b>
<b>Late Stage</b> .....	<b>60</b>
<i>No Inflammation during Apoptosis</i> .....	60
<i>Characteristic Features of Apoptotic Cell Death</i> .....	61
<i>Mechanisms of Apoptosis</i> .....	62

<b>Extrinsic (Death Receptor) Pathway</b> .....	<b>62</b>
<b>Intrinsic (Mitochondrial) Pathway</b> .....	<b>63</b>
<b>Perforin-Granzyme System</b> .....	<b>65</b>
<b>Execution (Common) Pathway</b> .....	<b>66</b>
<i>Caspases</i> .....	67
<i>Laboratory Methods to Detect Apoptosis</i> .....	68
<b>Physiological Role of Apoptosis</b> .....	<b>69</b>
<b>Pathophysiological Role of Apoptosis</b> .....	<b>70</b>
<b>Review Questions</b> .....	<b>71</b>
<b>Multiple Choice Questions</b> .....	<b>72</b>

## **Chapter 5: Gene Sequencing**

<b>Definitions and General Features</b> .....	<b>75</b>
<b>Maxam–Gilbert Sequencing (Chemical Cleavage)</b> .....	<b>75</b>
<b>Sanger’s Chain Termination Method</b> .....	<b>78</b>
<b>Differences between Maxam-Gilbert and Sanger Method</b> .....	<b>80</b>
<b>Automated Fluorescence Sequencing</b> .....	<b>81</b>
<b>Applications of Gene Sequencing</b> .....	<b>82</b>
<b>Review Questions</b> .....	<b>82</b>
<b>Multiple Choice Questions</b> .....	<b>83</b>

## **Chapter 6: Cell Cycle and Regulation**

<b>Definitions and General Features</b> .....	<b>85</b>
<i>Stages of Cell Cycle</i> .....	86
<i>Interphase</i> .....	86
<i>M Phase (Mitotic Segregation)</i> .....	87
<i>Cell Cycle Control</i> .....	88
<i>Cyclins</i> .....	88
<i>Cyclin-Dependent Kinases</i> .....	89
<i>Cyclin-Dependent Kinase Inhibitors</i> .....	90
<b>Review Questions</b> .....	<b>91</b>
<b>Multiple Choice Questions</b> .....	<b>91</b>

## UNIT - 2: Genomic and Proteomic Tools

### Chapter 7: Recombinant DNA Technology

<b>Definition and General Features .....</b>	<b>95</b>
<b>Different Steps of Recombinant DNA Technology .....</b>	<b>95</b>
<i>Isolation/Extraction of Target DNA/RNA .....</i>	<i>96</i>
<i>Selection of Cloning Vector .....</i>	<i>97</i>
<i>Plasmids .....</i>	<i>99</i>
<i>Joining the DNA Segments by Ligases .....</i>	<i>106</i>
<i>Application of Recombinant DNA Technology .....</i>	<i>118</i>
<b>Review Questions .....</b>	<b>120</b>
<b>Multiple Choice Questions .....</b>	<b>122</b>

### Chapter 8: Gel Electrophoresis

<b>Introduction and General Features .....</b>	<b>125</b>
<b>Basic Concepts in Electrophoresis .....</b>	<b>126</b>
<b>Gels .....</b>	<b>127</b>
<i>Agarose Gel .....</i>	<i>127</i>
<i>Polyacrylamide Gels .....</i>	<i>130</i>
<b>Horizontal vs Vertical Electrophoretic System .....</b>	<b>131</b>
<b>Sample Preparation .....</b>	<b>132</b>
<b>Buffer Systems .....</b>	<b>133</b>
<i>Ornstein and Davis Model of Discontinuous Buffer System .....</i>	<i>133</i>
<i>SDS-PAGE (Discontinuous Buffer system) .....</i>	<i>135</i>
<b>Detection Methods .....</b>	<b>135</b>
<i>Detection of Nucleic Acids (DNA or RNA) .....</i>	<i>135</i>
<i>Detection of Proteins .....</i>	<i>136</i>
<b>Isolation of Nucleic Acids or Proteins from Electrophoresis Gel .....</b>	<b>137</b>
<i>Passive Diffusion .....</i>	<i>137</i>
<i>Electroelution .....</i>	<i>138</i>
<i>Continuous Elution .....</i>	<i>139</i>
<b>Review Questions .....</b>	<b>139</b>
<b>Multiple Choice Questions .....</b>	<b>140</b>

**Chapter 9: Gene Therapy**

<b>Introduction and General Features</b> .....	<b>143</b>
<b>Types of Gene Therapy</b> .....	<b>143</b>
<i>In Vivo Gene Therapy</i> .....	143
<i>Ex Vivo Gene Therapy</i> .....	144
<i>Somatic Cells Gene Therapy</i> .....	144
<i>Germ Line Therapy</i> .....	144
<b>Methods of Gene Delivery</b> .....	<b>145</b>
<i>Viral Vectors</i> .....	145
<i>Non-Viral Vectors</i> .....	151
<b>Applications of Gene Therapy</b> .....	<b>156</b>
<b>Review Questions</b> .....	<b>161</b>
<b>Multiple Choice Questions</b> .....	<b>162</b>

**Chapter 10: Polymerase Chain Reaction**

<b>Definition and General Features</b> .....	<b>165</b>
<b>Requirements for Polymerase Chain Reaction</b> .....	<b>166</b>
<b>Steps Involved in Polymerase Chain Reaction</b> .....	<b>170</b>
<i>Denaturation</i> .....	170
<i>Annealing</i> .....	170
<i>Extension</i> .....	170
<i>Cyclical</i> .....	171
<b>Efficiency of PCR</b> .....	<b>172</b>
<b>Different Types of Polymerase Chain Reaction</b> .....	<b>172</b>
<i>Reverse Transcriptase-Polymerase Chain Reaction (RT-PCR)</i> .....	172
<i>Real Time-Polymerase Chain Reaction (RT-PCR)</i> .....	172
<i>Allele Specific PCR</i> .....	173
<i>Inverse PCR (IPCR)</i> .....	173
<i>Anchored PCR</i> .....	174
<i>Asymmetric PCR</i> .....	175
<b>Applications of Polymerase Chain Reaction</b> .....	<b>175</b>
<b>Review Questions</b> .....	<b>177</b>
<b>Multiple Choice Questions</b> .....	<b>177</b>

**Chapter 11: ELISA and Micro Array Technique**

<b>ELISA</b> .....	<b>179</b>
<i>Definition and General Features</i> .....	179
<i>Types of ELISA</i> .....	180
<b>Direct ELISA</b> .....	<b>180</b>
<b>Indirect ELISA</b> .....	<b>182</b>
<b>Sandwich ELISA</b> .....	<b>185</b>
<b>Competitive ELISA</b> .....	<b>188</b>
Applications of ELISA .....	191
<b>Microarray Technology</b> .....	<b>192</b>
<i>Definition and General Features</i> .....	192
<i>Principle of Microarray Analysis</i> .....	193
<i>Procedure of Microarray Analysis</i> .....	194
<i>Applications of Microarray Technology</i> .....	195
<b>Review Questions</b> .....	<b>196</b>
<b>Multiple Choice Questions</b> .....	<b>197</b>

**Chapter 12: Western Blotting**

<b>Definitions and General Features</b> .....	<b>199</b>
<b>Transfer Methods</b> .....	<b>200</b>
<i>Diffusion Blotting</i> .....	200
<i>Capillary Blotting</i> .....	200
<i>Vacuum Blotting</i> .....	201
Electrophoretic Blotting .....	201
<i>Semidry Blotting</i> .....	202
<i>Bidirectional Blotting</i> .....	203
<b>The Blotting Procedure</b> .....	<b>203</b>
<b>Membranes used for Blotting</b> .....	<b>204</b>
<b>Detection Systems</b> .....	<b>205</b>
Applications of Western Blotting .....	208
<b>Review Questions</b> .....	<b>208</b>
<b>Multiple Choice Questions</b> .....	<b>209</b>

## UNIT - 3: Pharmaco-genomics

### Chapter 13: Gene Mapping and Genetic Variations

<b>Genes Mapping and Cloning of Genes .....</b>	<b>213</b>
<i>Definitions and General Features .....</i>	<i>213</i>
Biochemical Approach (Functional Cloning) .....	214
Positional Cloning .....	<b>215</b>
<b>Genetic Variations and Role in Pharmacology .....</b>	<b>216</b>
<i>Definitions and General Features .....</i>	<i>216</i>
<i>Genetic Polymorphism .....</i>	<i>217</i>
<i>Single Nucleotide Polymorphism (SNP) .....</i>	<i>217</i>
<i>Pharmacogenetics and Pharmacogenomics .....</i>	<i>219</i>
<i>Potential Applications of Pharmacogenetics/Pharmacogenomics .....</i>	<i>219</i>
<b>Genetic Variations in G-Protein Coupled Receptors .....</b>	<b>221</b>
<i>Introduction and General Features .....</i>	<i>221</i>
<i>Genetic Variations in N-terminal Domain .....</i>	<i>221</i>
<i>Changes in Receptor Binding Affinity .....</i>	<i>222</i>
<i>Variations in Down-Regulation of Receptors .....</i>	<i>222</i>
<i>Variations in Transmembrane Domains .....</i>	<i>222</i>
<i>Variations in Intracellular Loop Domains .....</i>	<i>223</i>
<i>Variations in C-Terminal Domain .....</i>	<i>223</i>
<i>Variations in Non-Coding Regions .....</i>	<i>224</i>
<b>Review Questions .....</b>	<b>224</b>
<b>Multiple Choice Questions .....</b>	<b>225</b>

### Chapter 14: Polymorphisms Affecting Drug Metabolism and Drug Transporters

<b>Definition and General Features .....</b>	<b>227</b>
<i>Variations in Phase I Metabolism .....</i>	<i>227</i>
<i>Cytochrome P450 2D6 .....</i>	<i>227</i>
<i>Cytochrome P450 2C19 (CYP2C19) .....</i>	<i>229</i>
<i>Cytochrome P450 2C9 (CYP2C9) .....</i>	<i>230</i>
<i>CYP3A4 and CYP3A5 .....</i>	<i>230</i>
<i>Variations in Phase II Metabolism .....</i>	<i>231</i>
<i>N-Acetyltransferases .....</i>	<i>231</i>

<i>Thiopurine Methyltransferase (TPMT)</i> .....	231
<i>UDP Glucuronyltransferases (UGTs)</i> .....	231
<b>Genetic Variations in Drug Transporters</b> .....	<b>231</b>
<i>Definition and General Features</i> .....	231
<i>ABC Transporters</i> .....	232
<i>Solute Carrier (SLC) Transporters</i> .....	233
<b>Review Questions</b> .....	<b>234</b>
<b>Multiple Choice Questions</b> .....	<b>235</b>
 <b>Chapter 15: Proteomics Sciences</b>	
<b>Proteomics</b> .....	<b>237</b>
<i>Definition and General Features</i> .....	237
<i>Types of Proteomics</i> .....	238
<i>Techniques and Steps involved in Proteomics</i> .....	239
<i>Applications of Proteomics</i> .....	241
<b>Genomics</b> .....	<b>242</b>
<i>Definition and General Features</i> .....	242
<i>Genome Analysis</i> .....	242
<i>Different Areas of Genomics</i> .....	243
<i>Applications of Genomics</i> .....	244
<b>Metabolomics</b> .....	<b>245</b>
<i>Definition and General Features</i> .....	245
<i>Type of Metabolites</i> .....	246
<i>Techniques and Steps involved in Metabolomics</i> .....	246
<i>Applications of Metabolomics</i> .....	248
<b>Nutrigenomics</b> .....	<b>248</b>
<i>Definitions and General Features</i> .....	248
<i>Common Examples of Nutrigenomics</i> .....	249
<i>Potential Applications of Nutrigenomics</i> .....	249
<b>Functionomics</b> .....	<b>250</b>
<i>Definitions and General Features</i> .....	250
<i>Potential Applications</i> .....	250
<b>Review Questions</b> .....	<b>250</b>
<b>Multiple Choice Questions</b> .....	<b>251</b>

## UNIT - 4: Immuno-therapeutics, Cell Culture and Biosimilars (Immunotherapeutic Agents and Biosimilars)

### Chapter 16: Immunotherapeutics and Biosimilars

<b>Immunotherapeutic Agents</b> .....	<b>255</b>
<i>Definition and General Features</i> .....	255
<i>Types of Immunotherapeutic Agents in Clinical Practice</i> .....	256
<i>Monoclonal Antibodies</i> .....	256
<i>Production of Monoclonal Antibodies</i> .....	256
<i>Humanization of Antibodies</i> .....	257
<i>Types of Monoclonal Antibodies</i> .....	258
<i>Fusion Proteins</i> .....	261
<i>Recombinant Cytokines</i> .....	261
<i>Soluble Cytokine Receptors</i> .....	262
<i>Cellular Therapy</i> .....	262
<b>Biosimilars</b> .....	<b>263</b>
<i>Definitions and General Features</i> .....	263
<i>Common Biologics in Medicine</i> .....	263
<i>Approval to Market Biosimilars</i> .....	263
<i>Examples of Approved Biosimilars</i> .....	264
<b>Review Questions</b> .....	<b>265</b>
<b>Multiple Choice Questions</b> .....	<b>266</b>

### Chapter 17: Animal Cell Culture

<b>Brief History of Animal Cell Culture</b> .....	<b>269</b>
<i>Type of Animal Cells</i> .....	270
<b>Culture Systems for Cell Growth and Basic Equipments used in Cell Culture Laboratory</b> .....	<b>271</b>
<i>Anchorage Dependent Culture System and Equipments</i> .....	272
<i>Anchorage Independent Culture System and Equipments</i> .....	273
<b>Types of Cell Cultures</b> .....	<b>275</b>
<i>Primary Cell Cultures</i> .....	275
<i>Secondary Cell Cultures</i> .....	276
<i>Transformed Cell Cultures</i> .....	277

<b>Culture Media</b> .....	<b>278</b>
<b>Counting the Cells in Animal Cell Culture</b> .....	<b>279</b>
<i>Haemocytometer</i> .....	280
<i>Coulter Counter</i> .....	281
<b>Pattern of Cell Growth</b> .....	<b>282</b>
<b>Storage of Cells</b> .....	<b>283</b>
<b>Characterization (Monitoring) of Cell Lines</b> .....	<b>283</b>
<i>Monitoring Cell Lines for Genetic Stability</i> .....	283
<i>Karyotyping</i> .....	283
<i>Obtaining Pattern of Isozymes (Zynography)</i> .....	284
<i>Fluorescent Labeled Antibodies</i> .....	284
<i>Monitoring Cell Lines for Cell Contamination</i> .....	285
<i>Applications of Animal Cell Culture</i> .....	<b>285</b>
<b>Review Questions</b> .....	<b>288</b>
<b>Multiple Choice Questions</b> .....	<b>288</b>

## **Chapter 18: Assays and Flow Cytometry** *(Principles and Applications )*

<b>Cell Viability Assays</b> .....	<b>291</b>
<i>Definitions and General Features</i> .....	291
<i>Tetrazolium Reduction Assays</i> .....	291
<i>Resazurin Reduction Assay (Alamar Blue)</i> .....	293
<i>Propidium Iodide based Cell Viability Assay</i> .....	294
<i>Protease Activity based Viability Assay</i> .....	294
<i>ATP Assay</i> .....	295
<i>Evans Blue and Trypan Blue Test</i> .....	295
<i>Applications of Cell Viability Assays</i> .....	296
<b>Calcium Influx Assays</b> .....	<b>296</b>
<i>Chemiluminescence Method</i> .....	296
<i>Fluorescence Method</i> .....	297
<i>Application of Calcium Assays</i> .....	298
<b>Glucose Uptake Assays</b> .....	<b>298</b>
<i>Definitions and General Features</i> .....	298
<i>Measurement of Glucose uptake using Radiolabeled 3-o-methylglucose</i> .....	299
<i>Measurement of glucose uptake using radio-labeled 2-deoxyglucose</i> .....	299

<i>Measurement of Glucose uptake by Detecting Intensity of Fluorescence</i> .....	299
<i>Application of Glucose uptake Assays</i> .....	300
<b>Flow Cytometry</b> .....	301
<i>Definition and General Features</i> .....	301
<i>Principle</i> .....	301
<i>Working</i> .....	303
<i>Applications</i> .....	305
<b>Review Questions</b> .....	306
<b>Multiple Choice Questions</b> .....	307

## UNIT - 5: Cell Signaling

### Chapter 19: Receptors and Secondary Messengers

<b>Receptors</b> .....	311
<b>Classification of Receptor Family</b> .....	312
<i>G-Protein Coupled Receptors</i> .....	312
<i>Ligand Gated Ion Channels (Ionotropic Receptors)</i> .....	312
<i>Receptor Tyrosine Kinase (Enzyme-Linked Receptor)</i> .....	313
<i>Nuclear Receptors</i> .....	314
<i>G-Protein Coupled Receptors</i> .....	315
<i>Structural Features of G-Protein Coupled Receptors</i> .....	315
<i>Signal Transduction</i> .....	316
<i>G-Protein Coupled Effector Systems</i> .....	317
<b>Second Messengers</b> .....	318
<i>Inositol Trisphosphate (IP<sub>3</sub>)</i> .....	318
<i>Biosynthesis inside the Cells</i> .....	318
<i>IP<sub>3</sub> Signaling Pathway</i> .....	319
<i>Diacylglycerol (DAG)</i> .....	319
<i>Signaling Pathway</i> .....	319
<i>Clinical Uses of Protein Kinase C Modulators</i> .....	320
<b>Nitric Oxide</b> .....	320
<i>Introduction and Brief History</i> .....	320
<i>Synthesis of NO by Nitric Oxide Synthase</i> .....	321
<i>Key Targets of NO</i> .....	321

<i>Physiological Functions of NO</i> .....	322
<i>Pathophysiological Role of NO</i> .....	323
<i>Clinical Uses of Drugs Modulating Nitric Oxide</i> .....	324
<b>Calcium Signaling</b> .....	<b>324</b>
<i>Introduction and Historical Development</i> .....	324
<i>Channels and Proteins Modulating Calcium Levels inside the Cytoplasm</i> .....	324
<i>Calcium as Secondary and Tertiary Messenger</i> .....	326
<i>Intracellular Signaling Cascade</i> .....	326
<b>Review Questions</b> .....	<b>329</b>
<b>Multiple Choice Questions</b> .....	<b>330</b>
 <b>Chapter 20: Intracellular Signaling Pathways</b>	
<b>cAMP</b> .....	<b>333</b>
<i>Definition, Synthesis and Degradation</i> .....	333
<i>Signaling Pathway</i> .....	334
<i>Physiological Functions of cAMP</i> .....	335
<i>Clinical Uses of cAMP Modulators</i> .....	336
<b>cGMP</b> .....	<b>336</b>
<i>Definition, Synthesis and Degradation</i> .....	336
<i>Signaling Pathway</i> .....	337
<i>Clinical uses of cGMP Modulators</i> .....	338
<i>JAK-STAT Signaling</i> .....	338
<i>Mechanisms Involved in JAK-STAT Signaling</i> .....	339
<i>Inhibitors of JAK-STAT Signaling</i> .....	341
<i>Functional Significance of JAK-STAT Signaling and</i> <i>Clinical uses of Inhibitors</i> .....	341
<i>Mitogen-Activated Protein Kinase (MAP Kinase)</i> .....	342
<b>Activation Cascade of MAP Kinase (Three-Kinase Module)</b> .....	<b>342</b>
<i>Inactivation of MAP Kinases</i> .....	343
<b>Types of MAP Kinases</b> .....	<b>343</b>
<i>Clinical Applications of MAP Kinase Modulators</i> .....	344
<b>Review Questions</b> .....	<b>345</b>
<b>Multiple Choice Questions</b> .....	<b>346</b>
 <b>Answers</b> .....	 <b>349</b>
 <b>Index</b> .....	 <b>353</b>
