Chapter 1 Introduction

1.1 Geological Studies and Gravity and Magnetic Methods.....	2
1.1.1 Geodynamics and Plate Tectonics	2

Chapter 2 Gravity Method

2.1 Introduction.....	7
2.2 Basic Principles.....	7
2.2.1 Forces of Gravity	7
2.2.2 Gravitational Potential and Laplace Equation	8
2.2.3 Gravitational Acceleration (g)	9
2.2.4 Density of Rocks.....	10
2.2.5 Variation of Density with Depth.....	12
2.2.6 Thermal Structure of Lithosphere.....	14
2.2.7 Density – Velocity Relationship	14
2.2.8 Variation of Earth’s Gravity Field with Depth	15
2.2.9 Earth’s Shape and Geoid.....	15
2.3 Instruments and Data Acquisition.....	17
2.3.1 Instruments – Gravimeters and Gradiometers	17
2.3.2 Field Operations and Survey Procedures – Geodynamic Studies and Resource Exploration.....	24
2.3.3 Pre-Processing of Field Data	27
2.3.4 High Resolution Surveys	30
2.4 Corrections and Reduction of Gravity Data.....	31
2.4.1 Earth Tide Correction	31
2.4.2 Latitude Correction	32
2.4.3 Topography / Terrain Correction.....	32
2.4.4 Elevation Correction.....	35
2.4.5 Geoid (Indirect Effect) Correction.....	36
2.4.6 Free Air and Bouguer Anomaly Profiles and Maps (Images)	37
2.5 Post-Processing Analysis and Isostasy	39
2.5.1 Regional and Residual Fields	39
2.5.2 Isostasy	40
2.5.3 Isostatic Compensation and Vertical Crustal Movement.....	42
2.5.4 Isostatic Regional and Isostatic Residual Anomaly-Deccan Trap, India.....	45

2.6	Special Gravity Surveys – Marine, Airborne and Satellite Surveys	46
2.6.1	Eötvös Correction	47
2.6.2	Shipborne Marine Gravity Surveys	47
2.6.3	Airborne Gravity Surveys	48
2.6.4	Airborne Gravity Gradiometry	50
2.6.5	Advantages and Limitations of Airborne Surveys	51
2.6.6	Satellite Gravity and Altimeter Surveys	52
2.6.7	Satellite Geodesy and Gradiometry	54
2.6.8	Global Models of Earth's Geoid and Gravitational Field.....	56
2.6.9	Advantages and Limitations of Satellite Surveys	58
2.6.10	Comparative Study of Different Gravity Surveys	58
2.7	Interpretation.....	59
2.7.1	Qualitative Gravity Signatures of Extensional and Compressional Tectonics – Their Applications and Wilson Cycle	59
2.7.2	Quantitative Interpretation and Modelling: Simple Ideal Models	65
2.7.3	Gravity Field due to Arbitrary Shaped Two Dimensional Models.....	69
2.7.4	Gravity Field due to Three Dimensional Models	69
2.7.5	Ambiguity in Gravity Interpretation	70
2.7.6	Geoid Modeling and Terrain Effect.....	71
2.8	Applications: Gravity Anomaly and Related Maps of India.....	72
2.8.1	Important Maps for Interpretation of Gravity Anomalies.....	72
2.8.2	Gravity Studies in India – Geodynamics and Exploration.....	76
2.8.3	Satellite Gravity and Altimetry Maps – Sea Level Changes in Indian Ocean.....	78
2.9	Field Examples and Gravity Signatures – Extensional Tectonics.....	80
2.9.1	Passive and Active Rift Basins – Godavari and Mahanadi Basin, India and Continental Margin off West Coast of India.....	80
2.9.2	Active Rift Basins – East African Rift System.....	84
2.9.3	Global Examples – Rhine Graben, Europe; Rio Grande Rift, USA, and Baikal Rift, Russia	86
2.10	Compressional (Convergence) Tectonics: Recent Convergent Margins and Subduction Zones.....	90
2.10.1	Continental-Continental Convergence – Himalaya and Tibet and Alps Mountains.....	90
2.10.2	Oceanic-Continental Convergence: Nazca and South American Plates and Andes Mountains	93
2.10.3	Oceanic-Oceanic Plateau/Ridge Convergence: Kermadec Ridge and Trench (Mariana Type Subduction).....	94
2.11	Ancient Collision Zones: Proterozoic and Paleozoic Convergence.....	95
2.11.1	Grenville Province, Canada	96
2.11.2	Appalachian, USA and Caledonian, Europe Orogenies: Wilson Cycle	96
2.12	Comparative Study of Different Gravity and Magnetic Surveys and Expected Anomalies for Different Targets and Temporal Variations in Gravity Field.....	98

Chapter 3 Magnetic Methods

3.1	Introduction and Basic Principles	101
3.1.1	Vectorial Representation.....	102
3.1.2	Geomagnetic Pole and Magnetic Dip Pole	103
3.1.3	Variation of Geomagnetic Elements.....	104
3.1.4	Secular and Transient Variations of Geomagnetic Elements.....	106
3.1.5	Origin of Geomagnetic Field	106
3.1.6	Magnetic Force and Pseudogravity.....	107
3.1.7	Magnetic Field Strength.....	108
3.1.8	Magnetic Moment.....	108
3.1.9	Intensity of Magnetization	108
3.1.10	Magnetic Susceptibility	108
3.1.11	Magnetic Induction (B).....	109
3.1.12	Magnetic Units.....	110
3.1.13	Magnetic Materials	110
3.2	Rock Magnetism and Paleomagnetism	111
3.2.1	Remnant Magnetizations	112
3.2.2	Thermo Remnant Magnetization (TRM) and Curie Point Temperature.....	112
3.2.3	Detrital Remnant Magnetization (DRM).....	113
3.2.4	Chemical Remnant Magnetization (ChRM)	113
3.2.5	Paleomagnetic Studies and Stability Tests	113
3.2.6	Apparent Polar Wander Path (APWP), Continental Drift, Reversal of Earth's Magnetic Field, Magnetostratigraphy, and Catastrophic Events.....	118
3.3	Instruments and Data Acquisition.....	125
3.3.1	Nuclear Precision Magnetometers	125
3.3.2	Optical Pumping Magnetometers	126
3.3.3	Data Acquisition: Ground Surveys	126
3.4	Corrections and Presentation of Magnetic Data.....	127
3.4.1	Diurnal Correction.....	127
3.4.2	Datum and Base Level Corrections	128
3.4.3	International Geomagnetic Reference Field (IGRF) Correction.....	128
3.4.4	Data Presentation	129
3.5	Data Processing.....	130
3.5.1	Regional – Residual Fields	130
3.6	Special Magnetic Surveys.....	131
3.6.1	Marine Magnetic Surveys.....	131
3.6.2	Airborne Multi-Parametric Surveys – High Resolution Surveys and Advantages.....	132
3.6.3	Satellite-Borne Magnetic Surveys (MAGSAT) – India and Himalaya	139

3.7	Interpretation of Magnetic Anomalies	142
3.7.1	Changes in Total Intensity Magnetic Anomaly	142
3.7.2	Qualitative Interpretation	145
3.7.3	Quantitative Interpretation – Characteristic Points and Curve Matching	147
3.7.4	Computation of Magnetic Field Due to Simple Models	150
3.7.5	Automatic Methods of Depth Estimation	154
3.8	Field Examples: Geodynamic Studies and Mineral Exploration	156
3.8.1	Extensional Regimes – Red Sea Rift, Continental Margins of India, Norway and USA, and Proterozoic Rift Basin, USA	156
3.8.2	Convergence Tectonics – Grenville and Appalachian Orogenies, Canada and USA.....	166
3.8.3	Satellite-Airborne Magnetic Map of India (EMAG2)	168
3.8.4	Long Range Airborne Magnetic Profiles – Manglore-Madras, India	170
3.8.5	Mineral Exploration: Airborne Magnetic and Spectrometer Surveys of Chitradurga Schist Belt, India.....	171

Chapter 4 Common Data Processing Methods and Parameter Estimation – Digital Signal Processing

4.1	Regional and Residual Separation	175
4.1.1	Polynomial Approximation.....	176
4.1.2	Applications – A Gravity Profile across Himalayas	176
4.1.3	Finite Element Approach – Gravity Map of Epicentral Zone of Latur Earthquake of 1993	177
4.2	Spectral Analysis	179
4.2.1	Fourier Series Representation and Linear System	179
4.2.2	Discrete Fourier Transform – Fast Fourier Transform and Geophysical Data	183
4.2.3	Fourier Transform of Gravity and Magnetic Fields and Filters.....	185
4.2.4	Analytical Operations in Frequency Domain and Applications	192
4.3	Fourier Transform of Gravity and Magnetic Fields: Layered Model and Basement Relief	198
4.3.1	Applications of Depth Estimates	202
4.3.2	3-Dimensional Basement Relief Model using Harmonic Inversion	205
4.4	Admittance Analysis and Coherence	206
4.4.1	Isostasy in Frequency Domain and Effective Elastic Thickness (EET)	207
4.4.2	Applications – EET, Sedimentary Basins and Backstripping.....	212
4.5	Linear Inversion and Parameter Estimation	219
4.5.1	Least Squares Inversion	220
4.5.2	Generalized Inversion: Singular Value Decomposition and Resolution Matrix	221
4.5.3	Inversion of Gravity Field Due to Simple Bodies (Fault Model)	222
4.5.4	Applications – Godavari Basin, India and Flexural Model	224

4.6	Field Examples: Harmonic Inversion and Geodynamic Studies.....	228
4.6.1	Bouguer Anomaly Map of India – Low and High Pass Filtered Maps and Moho Relief.....	228
4.6.2	Magnetic Crust Based on MAGSAT data	234
4.6.3	Crustal Structure: Faeroe-Shetland Channel, Iceland.....	236
4.6.4	Effective Elastic Thickness – Himalaya and Tibet.....	238
4.7	Field examples: Basement Model and Geological Mapping	239
4.7.1	3-D Basement Relief: Airborne Magnetic Map of North Germany	239
4.7.2	Geological Mapping: Apparent Density Map of Peninsular Shield, India	243
4.7.3	Gravity and Magnetic Investigations in German Continental Deep Borehole (KTB) - Variscan Orogeny	244
Appendix: I Geological Time Scale		249
Appendix: II Some Important Events of Recent Periods (Pleistocene and Holocene).....		250
Appendix: III Heat Flow Map of India.....		251
Appendix IV Seismic Zonation Map of SAARC Countries-Pakistan and Bangladesh		252
Colour Photographs of All Chapters.....		253
Bibliography		261
Index.....		285
