SECTION – I

THEORIES AND LAWS OF ECONOMICS

CHAPTER 1

Introduction to Engineering Economics

1.1	Engineering Economics	3
1.2	Macro-Economics and Micro-Economics.....	4
1.3	Engineering Economics vs. Theoretical Economics	4
1.4	History of Engineering Economics	5
1.5	Elements of Engineering Economics	5
1.6	Cost Benefit Analysis.....	6
1.7	Standard Operation Procedure for Cost Benefit Analysis.....	6
1.8	History of the Cost Benefit Analysis	7
1.9	Limitations of Cost Benefit Analysis.....	7
1.10	Basic Approaches for Application of Cost Benefit Analysis for Resolving Environmental Problems.....	7
	1.10.1 Cost Oblivious Approach.....	7
	1.10.2 Cost Benefit Approach.....	8
	1.10.3 A Combination of Professional and Personal Ethics	8
1.11	Conclusion	9
	<i>Further Reading</i>	9
	<i>Criteria Questions</i>	9

CHAPTER 2

The Basic Concepts of Economics

2.1	What is Economics?.....	10
2.2	History of Economics.....	10
	2.2.1 Other Definitions of Economics.....	11
2.3	Economic Theory.....	12
2.4	Economic Principles Vary with Society.....	13
2.5	Basic Units of Study on Economics.....	13
2.6	Broad Division of Economics.....	13
2.7	Income.....	13
2.8	Relationship between Income Groups and the Type of Expenditure.....	14
2.9	Personal Income, Disposal Income.....	14
2.10	National Income and Say's Law.....	15
2.11	The Marginal Propensity to Consume.....	15
2.12	Marginal Propensity to Save.....	16
2.13	Wealth vs Standard of Living.....	17
2.14	Human Needs and Economic Wants.....	17
	2.14.1 Characteristics of wants.....	17
	2.14.2 Classification of wants.....	18
	2.14.3 Wants are Flexible.....	18
2.15	Maslow's Theory of Hierarchy of Basic Needs.....	18
2.16	Conclusion.....	19
	<i>Further Reading</i>	19
	<i>Criteria Questions</i>	20

CHAPTER 3

Categories of Economic System

3.1	Introduction.....	21
3.2	Capitalist Economy.....	22
	3.2.1 Main Features of Capitalist Economy.....	22

3.3	Socialist Economy.....	23
3.3.1	The Main Features of Socialist Economy	23
3.4	Mixed Economy.....	23
3.4.1	Can Pure Capitalism or Pure Socialism Exist?	23
3.4.2	The Sense of Ownership in Mixed Economy.....	24
3.5	Problems of an Underdeveloped Economy.....	24
3.6	Market.....	24
3.6.1	Essentials of a Market.....	24
3.6.2	Types of Markets.....	25
3.7	Main Market Forms	25
3.8	Market Situation under Perfect Competition	25
3.9	Market Situation under Monopoly	26
3.9.1	The Features of a Monopoly	26
3.9.2	Distinguishing Features of Monopolistic Competition	26
3.10	Market Situation under Oligopoly	27
3.11	Market Situation under Government Protection	27
3.12	Representative Firm.....	28
3.13	The Role of Planning Commissions in the Socialist Economy.....	28
3.14	Conclusion	28
	<i>Further Reading</i>	28
	<i>Criteria Questions</i>	29

CHAPTER 4

Laws of Demand and Supply

4.1	Introduction.....	30
4.2	Utility.....	30
4.3	Total Utility.....	30
4.4	Types of Economic Utilities.....	31
4.5	Law of Diminishing Utility.....	31
4.6	Marginal Utility.....	31
4.7	Some definitions on Marginal Utility	32

4.8	Equimarginal Utility	33
4.9	Factors Influencing Demand	33
	4.9.1 The above Factors can also be Represented by the Following Relationship	33
4.10	Law of Demand.....	33
4.11	Demand Schedule	33
4.12	Demand Curve	34
4.13	Market Demand Curve.....	34
4.14	Law of Substitution.....	34
4.15	Elasticity of Demand.....	35
	4.15.1 Factors Governing the Elasticity of Demand	35
	4.15.2 Uses of the Concept of Law of Demand	36
4.16	Law of Supply	36
	4.16.1 Factors Influencing Supply	36
	4.16.2 Supply Curve.....	36
4.17	Elasticity of Supply	37
4.18	Aggregate Demand and Aggregate Supply.....	37
4.19	Review of the Definitions for Demand and Supply	38
4.20	Conclusion	38
	<i>Further Reading</i>	39
	<i>Criteria Questions</i>	39

CHAPTER 5

Value and Equilibrium Price

5.1	Economic Laws.....	41
5.2	Commodities	41
5.3	Value	42
	5.3.1 Utility Value.....	42
	5.3.2 Exchange Value	42
	5.3.3 Concept of Value as Applied in Value Engineering ...	42
5.4	Price	43
5.5	Concepts of Pricing.....	43

5.6	Equilibrium Price	44
5.7	Temporary Equilibrium Price	44
5.8	Equilibrium Price under Different Market Conditions	45
	5.8.1 Equilibrium Price under Perfect Competition.....	45
	5.8.2 Equilibrium Price under Monopoly	45
	5.8.3 Equilibrium Price under Monopolistic Competition ...	45
	5.8.4 Equilibrium Price under Oligopoly	46
5.9	Effect of Time on Theory of Pricing.....	46
5.10	Conclusion	47
	<i>Further Reading</i>	47
	<i>Criteria Questions</i>	48

CHAPTER 6

Wealth and Time Value of Money

6.1	Wealth	49
	6.1.1 Classification of Wealth.....	50
6.2	Money	50
	6.2.1 History of Money	51
	6.2.2 Functions of Money	51
	6.2.3 Types of Money	51
	6.2.4 Properties of Money.....	52
	6.2.5 Kinds of Money	52
	6.2.6 Credit Instruments.....	52
6.3	Banking Operations.....	52
	6.3.1 Types of Banks.....	52
	6.3.2 Functions of Banks.....	53
	6.3.3 How the Reserve Bank Controls Credit in the Country.....	53
	6.3.4 Other Functions of Reserve Bank of India.....	53
6.4	Monetary Policy.....	54
	6.4.1 Contractionary and Expansionary Monetary Policies.....	54
	6.4.2 Tools of Monetary Policy.....	54

6.4.3	Fiscal Policy	54
6.4.4	Mudra Loans	55
6.5	Capital Asset Pricing Model (CAPM)	55
6.6	Short-Term Financing and Long-Term Financing	55
6.7	Optimal Capital Structure	55
6.8	Gross Domestic Product (GDP)	55
6.8.1	On the other hand, Gross National Product (GNP)....	56
6.8.2	Net Domestic Product (NDP).....	56
6.9	Cash Reserve Ratio	56
6.9.1	Cash Reserve Ratio (CRR).....	56
6.9.2	Repo Rate	56
6.9.3	Reverse Repo Rate	56
6.9.4	Statutory Liquidity Ratio.....	56
6.10	Money Market.....	57
6.10.1	Share Market	57
6.10.2	Mutual Funds	57
6.11	International Trade and Globalization.....	57
6.12	The Time Value of Money	57
6.13	Simple Interest and Compound Interest	58
6.14	Gradient Series Factor or Gradient Interest Addition	59
6.15	Discrete Compounding and Continuous Compounding.....	59
6.16	Internal Rate of Return (IRR)	60
6.17	Nominal vs. Real Values.....	60
6.18	Modified Internal Rate of Return.....	61
6.19	Expected Rate of Return	61
6.20	Laws of Diseconomies of Scale	61
6.20.1	The Law of Increasing Returns to Scale	61
6.20.2	Law of Diminishing Returns to Scale	62
6.20.3	Law of Constant Returns to Scale	62
6.21	Investment Demand vs. Rate of Interest	63
6.22	Marginal Efficiency of Capital.....	63
6.22.1	Case A, where the Person Borrows Money.....	63
6.22.2	Case B, where the Person Invests his Own Money.....	63

6.23	Relationship Between r , Q , C & I	64
6.24	Investment Multiplier	64
6.25	Exchange	64
	6.25.1 Advantages of Exchange	64
6.26	Taxation Systems	65
6.27	Trade Related Organizations	66
6.28	Conclusion	67
	<i>Further Reading</i>	67
	<i>Criteria Questions</i>	68

CHAPTER 7

Cost Accounting for Engineers

7.1	Why Finance and Cost Accounting for Engineers?	69
7.2	Double-entry Bookkeeping and Trial Balance	70
7.3	Annual Accounts	70
7.4	Balance Sheet	71
7.5	Depreciation, Amortization and Depletion	71
7.6	Depreciation- Methods	72
7.7	Capital Budgeting	74
7.8	Inflation-Adjusted Return of Investment	74
7.9	Cost Accounting	74
7.10	Categories of Cost Accounting	74
7.11	Cost Accounting vs. Financial Accounting	75
7.12	Origin of Cost Accounting	77
7.13	Implicit vs. Explicit Costs	77
7.14	Cash Flow Diagrams	77
	7.14.1 Revenue Dominated Cash Flow Diagram	79
	7.14.2 Cost -Dominated Cash Flow Diagram	79
7.15	Conclusion	79
	<i>Further Reading</i>	79
	<i>Criteria Questions</i>	80

CHAPTER 8

Corporate Social Responsibilities

8.1	Social Responsibility.....	81
8.2	Categories of Social Responsibility	81
8.3	Perspectives of the Social Responsibility.....	81
8.4	Points Favouring Social Involvement of an Organization	82
8.5	Difficulties faced in the Social Involvement of Organizations (or points in favour of efficiency perspective).....	83
8.6	Social Audit.....	83
8.7	Audit Terminology.....	84
8.8	Ethical Audit Procedure	85
8.9	Ethical Audit Reviews.....	85
8.10	Seven Key Features of Ethical Audit	87
8.11	Community Information, Empowerment & Transparency (CIET)	87
8.12	Conclusion	87
	<i>Further Reading</i>	88
	<i>Criteria Questions</i>	88

SECTION – II

PRINCIPLES OF ENGINEERING ECONOMICS

CHAPTER 9

Principles of Management

9.1	Role of Engineers in Management.....	91
9.2	Definitions on Management.....	91
9.3	Skill Types and Roles of Managers	93
9.4	Evolution of Management Thinking	93
9.5	Early Pioneers in Management Thinking – Pre-nineteenth Century.....	93
9.6	Second Phase in the Development of Management thinking Leading to Scientific Management	94

9.7	Concepts of Scientific Management	95
9.8	Specific Aims of Scientific Management.....	96
9.9	Advantages of Scientific Management	96
9.10	Summary of the Features of Management as a System.....	97
9.11	Resistance to Scientific Management	98
9.12	Conclusion	98
	<i>Further Reading</i>	99
	<i>Criteria Questions</i>	99

CHAPTER 10

Factors for Production

10.1	The Concept of Production	100
10.2	Factors of Production	100
10.3	Characteristics of Land	101
10.4	Characteristics of Labour	101
10.5	Functions of Capital	102
	10.5.1 Forms of Capital.....	102
10.6	Characteristics of Machinery	103
10.7	Automation.....	103
10.8	Functions of Entrepreneurship	103
10.9	Conclusion	104
	<i>Further Reading</i>	104
	<i>Criteria Questions</i>	105

CHAPTER 11

Cost of Production

11.1	Introduction.....	106
11.2	Definitions of Terms Related to Production Cost	107
11.3	Explicit and Implicit Costs of Production	108
11.4	Tangible and Intangible Costs of Production.....	109
11.5	Classification of the Tangible Costs	109
	11.5.1 Material Costs	109

11.5.2	Labour Costs	109
11.5.3	Expense Costs	109
11.6	The Philosophy of Fixing of Selling Price	110
11.7	Economic Laws Governing Pricing Policy	111
11.8	Total Cost/Marginal Costs under Long Run/ Short Run Conditions.....	112
11.8.1	Short Run Total Costs	112
11.8.2	Short-run Average and Marginal Costs.....	113
11.8.3	Long Run Average Cost.....	114
11.8.4	Why the average cost curve is always cup shaped? ..	114
11.9	Total Average and Marginal Revenue	114
11.9.1	Total Revenue	115
11.9.2	Average Revenue	115
11.9.3	Marginal Revenue	115
11.9.4	Relationship between TR, AR & MR	115
11.10	Selective Batch Size to Reduce Overall Production Cost.....	115
11.11	Group Technology	116
11.12	Conclusion	117
	<i>Further Reading</i>	117
	<i>Criteria Questions</i>	118

CHAPTER 12

Economies of Scale

12.1	Economies of Scale.....	119
12.2	Types of Economies of Scale.....	120
12.2.1	Size Economies of Scale	120
12.2.2	Technical Economies of Scale	120
12.2.3	Managerial Economies of Scale.....	120
12.2.4	Financial Economies of Scale	120
12.2.5	Network Economies of Scale	120
12.2.6	External Economies of Scale	120
12.2.7	Diseconomies of Scale	121
12.2.8	Factors for the Size of an Undertaking.....	121

12.3	Classes of Industries.....	122
12.4	Factors for the Size of an Undertaking.....	122
12.5	Large Scale Industries	122
	12.5.1 Characteristics of Large-Scale Industry	122
	12.5.2 Advantages of Large-scale Production	122
	12.5.3 Limitations of Large-Scale Industries.....	123
12.6	Small Scale Industries	123
	12.6.1 Characteristics of Small-Scale Industry	123
	12.6.2 Advantages of Small-Scale Industries.....	124
12.7	Cottage Industry	124
12.8	Micro, Small & Medium Enterprises (MSME).....	124
12.9	Benefits of MSME Registration.....	125
12.10	Conclusion	125
	<i>Further Reading</i>	126
	<i>Criteria Questions</i>	126

CHAPTER 13

Demand Forecasting

13.1	Introduction.....	127
13.2	Need for Demand Forecasting	128
13.3	Definitions of Forecasting.....	129
13.4	Basic Steps of Forecasting	130
	13.4.1 Characteristics of a Good Forecast.....	130
	13.4.2 Basic Steps in the Forecasting Process	131
13.5	Short-term, Medium-term and Long-term Forecasts	131
13.6	Market Segmentation	131
13.7	Techniques of Forecasting	132
13.8	Qualitative Forecasting Methods	132
	13.8.1 Opinion Survey	133
	13.8.2 Aided Judgment	133
	13.8.3 Judgmental Bootstrapping.....	134
	13.8.4 Delphi Technique.....	134
	13.8.5 Jury of Executive-opinion	134

13.8.5	Prediction Markets	134
13.8.7	Marketing Trials.....	134
13.8.8	Market Research.....	135
13.8.9	Simulated Interaction	135
13.9	Quantitative Forecasting Methods	135
13.9.1	Discrete Event Simulation.....	136
13.9.2	Continuous Simulation.....	136
13.9.3	Group Method of Data Handling (GMDH).....	136
13.9.4	Reference Class Forecasting	136
13.9.5	Quantitative Analogies.....	136
13.9.6	Game Theory.....	137
13.9.7	Conjoint Analysis.....	137
13.9.8	Causal Models.....	137
13.9.9	Segmentation.....	138
13.9.10	Cross-sectional Forecasting	138
13.10	Trend Analysis or Time Series in Forecasting.....	138
13.10.1	Extrapolation	139
13.11	Seasonal and Cyclic Fluctuations.....	139
13.11.1	Seasonal Fluctuations.....	139
13.11.2	Cyclic Fluctuations.....	139
13.11.3	Random Fluctuations	140
13.12	Least Square Method.....	140
13.12.1	The Least-Squares Straight Line.....	140
13.12.2	The Least-Squares Parabola.....	141
13.12.3	Multiple Regression Least-Squares.....	141
13.13	Moving Average Method.....	141
13.14	Life Cycle Effect on Forecasting	141
13.15	Forecasting Errors	142
13.16	Cost of Forecasting	143
13.17	Tracking Signals in Forecasting.....	143
13.18	International Symposia on Forecasting.....	144
13.19	Conclusion	144
	<i>Further Reading</i>	144
	<i>Criteria Questions</i>	145

CHAPTER 14

Decision Theory

14.1	Significance of Decision Theory for Engineering Economics	146
14.1.1	Synonyms of Decisions.....	146
14.2	Problem Analysis and Decision Making.....	147
14.2.1	Problem Analysis	147
14.2.2	Decision Making.....	148
14.3	Situations Under which Decisions are Taken	148
14.3.1	Decision Making under Certainty	148
14.3.2	Decision Making under Uncertainty	148
14.3.3	Decision Making under Risk.....	148
14.3.5	Decision Making under Conflicts	148
14.4	Classifications of Decisions	149
14.4.1	Organizational and Personal Decisions.....	149
14.4.2	Routine and Strategic Decisions	149
14.4.3	Policy and Operative Decisions	149
14.4.4	Programmed and Non-programmed Decisions	149
14.4.5	Individual and Group Decisions.....	149
14.5	Different Approaches to Decision Making	150
14.5.1	Intuitive Decision Makingx.....	150
14.5.2	Trial and Error Decision Making	150
14.5.3	Follow the Leader Decision Making.....	150
14.5.4	Scientific Decision Making.....	150
14.5.5	Systematic Decision Making.....	151
14.6	Bias in Decision Making.....	152
14.7	Proper Management Decision (PMD) and Proper Engineering Decision (PED)	153
14.8	Information Needed by the Decision Maker.....	153
14.8.1	Operating Data	154
14.8.2	Control Data.....	154
14.8.3	Planning Data.....	154
14.9	Inter-departmental Communication Flow	154

14.10	Lateral Information Flow	154
14.11	Conclusion	155
	<i>Further Reading</i>	155
	<i>Criteria Questions</i>	156

SECTION III

APPLICATIONS OF ENGINEERING ECONOMICS

CHAPTER 15

Total Productive Maintenance

15.1	Introduction.....	159
15.2	TPM is an Application of Engineering Economics.....	160
15.3	History of TPM	160
15.4	The Meaning of TPM.....	161
15.5	Definitions of TPM	161
15.6	The Five Zeros of TPM.....	162
15.7	What can TPM Achieve?	163
15.8	The Three Levels of Autonomous Maintenance in TPM.....	163
15.9	Procedure for the Implementation of TPM	163
15.10	The Structure of TPM	165
15.11	TPM, Terotechnology and Logistics – A Comparison	166
15.12	5S vs TPM.....	166
	15.12.1 A place for everything and everything in its place (PEEP)	167
	15.12.2 Seiso (Shine, sweep or sanitize).....	167
	15.12.3 Cleanliness in the Office Environment	168
15.13	Maintenance Work Sampling.....	168
15.14	Conclusion	168
	<i>Further References</i>	169
	<i>Criteria Questions</i>	169

Chapter 16

Break-Even and Make or Buy Analyses

16.1	Introduction.....	171
16.2	Definitions on Break-Even Analysis.....	172
16.3	Break-even Chart	174
16.4	Break Even Analysis Terminology	174
16.5	Factors for Break Even Point	175
16.6	Formula for Break Even Point	175
16.7	Break Even Point vs. Payback Period	176
16.8	Case Studies of Break Even Analysis as Applicable in Several Situations.....	177
16.8.1	Production Batch Quantity, as illustrated in example 1 below	177
16.8.2	Organizing Seminars as illustrated in example 2 below	177
16.9	Economic Order Quantity	178
16.10	Make or Buy Decision	178
16.11	The Criteria that Influence Our Decision to Produce In-house... ..	179
16.12	The Criteria that Influence Our Decision to Buy or Outsource	179
16.13	Impact of Control needed for the Make-or-buy Decision	180
16.14	Thumb Rule for Outsourcing	181
16.15	Some Definitions on Make-or-buy Decision	181
16.16	Example for Make or Buy Decision.....	182
16.17	Conclusion	183
	<i>Further Reading</i>	183
	<i>Criteria Questions</i>	184

CHAPTER 17

Creativity and Kaizen

17.1	Significance of Creativity in Engineering Economics	186
17.2	The Principles of Creativity	188
17.2.1	Divide and conquer	188

17.2.2	Set Quotas and Deadlines for Yourself.....	188
17.2.3	Let Loose Your Mind.....	188
17.2.4	Two Heads are Better than One	189
17.2.5	Question Each and Every Detail	189
17.3	Six Thinking Hats	190
17.4	What is Kaizen?	190
17.4.1	What is Kaizen's role in Engineering Economics? ...	191
17.5	Why Continuous Improvement?	191
17.6	Significance of Kaizen in Continuous Improvement	192
17.7	How does Kaizen Improve Productivity?	192
17.8	Juran's Methodology.....	192
17.9	Illustrations of Kaizen Application	193
17.10	Umbrella of Kaizen.....	194
17.11	Other Continuous Improvement Techniques	194
17.12	Conclusion	194
	<i>Further Reading</i>	194
	<i>Criteria Questions</i>	195
	<i>Appendix</i>	196

CHAPTER 18

Material Layout Planning

18.1	Material Layout Planning.....	198
18.1.1	Significance of Material Layout Planning	198
18.1.2	Material Layout Planning Applied to Shearing Operations	200
18.2	Case Study in Material layout planning	200
18.2.1	Bill of Materials	200
18.2.2	The Process for Fan Shaped Body	201
18.2.3	Existing Operation Sequence for Producing the Blanks	201
18.2.4	Recommended Material Layout and the Process	202
18.2.5	Summary of Results Achieved.....	205

18.3	Conclusion	206
	<i>Further Reading</i>	206
	<i>Criteria Questions</i>	207

CHAPTER 19

Value Engineering and Engineering Economics

19.1	Significance of Value Engineering to Engineering Economics ..	208
19.2	What is Value Engineering?.....	208
19.3	Definitions of Value Engineering	209
19.4	History of Value Engineering	210
19.5	What is Value?	211
19.6	Value Engineering.....	213
19.7	Objectives of Value Engineering	213
19.8	Functional Value of a Product.....	214
19.9	Methodology of Value Analysis	214
	19.9.1 General Phase.....	215
	19.9.2 Information Phase	215
	19.9.3 Function Phase	215
	19.9.4 Investigation and Creative Phases.....	216
	19.9.5 Evaluation Phase	216
	19.9.6 Recommendation and Follow-up Phases	217
19.10	DARSIRI Methodology for Value Analysis	217
19.11	Function Analysis System Technique (FAST).....	217
19.12	Conclusion	217
	<i>Further Reading</i>	218
	<i>Criteria Questions</i>	219

CHAPTER 20

Plant Location and Layout

20.1	Introduction	220
20.2	Plant Location and Plant Layout.....	220

20.3	City vs Suburban vs Urban Location	221
	20.3.1 Conditions Suggesting a City Location.....	221
	20.3.2 Conditions Suggesting a Suburban Location	221
	20.3.3 Conditions Suggesting a Rural Location.....	221
20.4	Other Factors Controlling Plant Location	222
20.5	Cost Factors and Non-Cost Factors.....	223
	20.5.1 Cost Factors.....	223
20.6	Least Cost Centre Analysis	223
20.7	The Centre-of-gravity Method of Plant Location	224
20.8	Non-cost Factors	224
	20.8.1 Proximity to Raw Materials and Markets	225
	20.8.2 Manpower	226
	20.8.3 Electric Power	227
	20.8.4 Fuel.....	227
	20.8.5 Water.....	227
	20.8.6 Government Policy.....	227
20.9	Illustrations of Typical Non-cost Factors.....	228
	20.9.1 Fish Canning Factory	228
	20.9.2 Oil Refineries	228
	20.9.3 Breweries	228
	20.9.4 Beach Hotels	228
	20.9.5 Airports	228
20.10	Particle Swarm Optimization	228
20.11	Plant Layout	229
20.12	General Rules and Objectives of Successful Plant Layout	230
20.13	Types of Plant Layout	231
	20.13.1 Fixed Position layout.....	231
	20.13.2 Process or Functional Layout.....	231
	20.13.3 Product or Line Layout	231
	20.13.4 Combination Layout.....	232
	20.13.5 Cellular Layout	232
20.14	Group Technology	233
20.15	Conclusion	234
	<i>Further Reading</i>	235
	<i>Criteria Questions</i>	235

CHAPTER 21

Scientific Inventory Control

21.1	Introduction - Relevance of Inventory Control to Engineering Economics	237
21.2	What is Inventory?	237
21.3	Types of Inventories.....	238
21.4	Conditions Leading to Increased Inventory	238
21.5	Costs Involved with Inventories.....	239
21.6	Selective Control in Inventory Management	239
21.7	Scientific Material Planning.....	240
21.8	Classification and Codification	240
21.9	ABC Analysis	241
	21.9.1 Procedure for ABC Analysis.....	243
21.10	Inventory Control Parameters	244
21.11	Economic Order Quantity	245
	21.11.1 Inventory Carrying Costs or Costs Resulting from Owning the item.....	245
	21.11.2 Stock-out or Down Time Costs.....	245
21.12	Two-bin Inventory Control System	247
21.13	Recent Trends in Inventory Control.....	249
21.14	Supplier Partnership	249
21.15	Collaborative Planning, Forecasting and Replenishment (CPFR)	249
21.16	Conclusion	250
21.17	Case Studies	250
	<i>Further Reading</i>	251
	<i>Criteria Questions</i>	251

CHAPTER 22

Machinery Replacement Analysis

22.1	Introduction.....	253
22.2	Why Equipment Replacement?.....	254

22.3	Basic Strategies of Repair/Replacement	254
22.4	Phases of Replacement Analysis.....	255
22.5	Methods of Evaluation	256
22.6	Traditional Methods	256
	22.6.1 Payback Period Method	256
	22.6.2 Total Life Average Method.....	257
	22.6.3 Average Rate of Returns Method.....	257
	22.6.4 Internal Rate of Return (IRR) and Average Rate of Returns (ARR)	257
	22.6.5 Disadvantages of the Traditional Methods.....	257
22.7	Discounted Cash Flow Methods	258
	22.7.1 Net Present Worth (NPW) or Net Present Value (NPV).....	258
	22.7.2 Profitability Index Method.....	258
	22.7.3 Internal Rate of Returns Method.....	259
	22.7.4 Differences between Net Present Worth and Internal Rate of Returns Methods	259
22.8	MAPI Method	259
22.9	Markov Analysis	260
22.10	Conclusion	261
	<i>Further Reading</i>	261
	<i>Criteria Questions</i>	261
