

CONTENTS

<i>Foreword</i>	(vii)
<i>Preface to the Second Edition</i>	(ix)
<i>Thanksgiving</i>	(xi)
<i>Abbreviations</i>	(xxi)

SECTION - 1 BASICS

Chapter 1	Overview of Manufacture of Cement	1-10
Chapter 2	Types of Cements - Their Properties and Uses	11-17
Chapter 3	Processes of Manufacturing of Cement	18-23
Chapter 4	Selection of Process and Machinery	24-29
Chapter 5	Raw Materials, Additives and Fuels	30-37
Chapter 6	Taking up the Design of a Cement Plant	38-46
Chapter 7	Technical Concepts Process Flow Charts	47-58
Chapter 8	Technical Concepts Conversion Factors	59-65
Chapter 9	Technical Concepts Design Margins to Arrive at Capacities	66-68
Chapter 10	Technical Concepts Running Hours in Various Sections	69-74
Chapter 11	Technical Concepts Sectional and Individual Capacities	75-86
Chapter 12	Process Gases	87-89
Chapter 13	Storages	90-95
Chapter 14	Machinery Schedules	96-99
Chapter 15	Drawing Specifications for Inviting Offers	100-101
Chapter 16	Properties of Materials that Affect Sizing and Selection of Machinery	102-103
Chapter 17	Expansion	104-111

SECTION - 2 MACHINERY USED IN MAKING CEMENT

Chapter 1	Quarrying Operations	1-6
Chapter 2	Crushers	7-14
Chapter 3	Stacker Reclaimer Systems	15-20

(xiv) Contents

Chapter 4	Grinding Mills	21-29
Chapter 4a	Ball Mills	30-36
Chapter 4b	Vertical Mills	37-46
Chapter 4c	Roller Press	47-52
Chapter 5	Screens, Separators and Classifiers	53-66
Chapter 6	Blending Systems	67-75
Chapter 7	Metering Systems for Raw Meal and Coal	76-82
Chapter 8	Preheaters	83-93
Chapter 9	Calciners	94-107
Chapter 10	Kilns	108-117
Chapter 11	Clinker Coolers	118-127
Chapter 12	Pollution Control	128-144
Chapter 13	Cement Mills and Cement Storage	145-152
Chapter 14	Packing of Cement	153-158
Chapter 15	Despatches of Cement, Bagged and in Bulk and Despatches of Clinker	159-166
Chapter 16	Material Handling Systems	167-181
Chapter 17	Fans	182-192
Chapter 18	Compressors and Blowers	193-199
Chapter 19	Motors	200-202
Chapter 20	Gearboxes	203-205

SECTION - 3 TECHNOECONOMIC FEASIBILITY STUDIES

Chapter 1	Investment Decision	1-2
Chapter 2	Setting up a Cement Plant Techno-Economic Feasibility Studies	3-14
Chapter 3	What should the T.E.F.S Contain	15-16
Chapter 4	Demand Forecast and Market	17-20
Chapter 5	Limestone Deposits	21-26
Chapter 6	Environment	27-31
Chapter 7	Infrastructural Facilities	32-37
Chapter 8	Manpower Requirements	38-44
Chapter 9	Implementation Schedule	45-52
Chapter 10	Erection	53-56
Chapter 11	Commissioning	57-61
Chapter 12	Capital Costs of the Project	62-75
Chapter 13	Costs of Production	76-85
Chapter 14	Profitability and Investment Analysis	86-89

Chapter 15	Executive Summary and Conclusion	90-90
Chapter 16	Factors Governing the Size of a Cement Plant	91-93

SECTION - 4 CIVIL DESIGN AND CONSTRUCTION

Chapter 1	Civil Design and Civil Engineering	1-11
Chapter 2	Non-Factory Buildings	12-13
Chapter 3	Design Aspects of some of the Non-Factory Building	14-19
Chapter 4	Colony, Guest Houses and Clubs	20-24
Chapter 5	Storages, Silos, Bins and Hoppers	25-30
Chapter 6	Water Supply	31-38

SECTION - 5 ELECTRICALS AND INSTRUMENTATION

Chapter 1	Electrical Systems, General	1-15
Chapter 2	Power Distribution and Cables	16-32
Chapter 3	Power Consumption and Its Calculation	33-40
Chapter 4	Instrumentation and Process Control	41-64
Chapter 5	Lighting	65-66
Chapter 6	Communications	67-68
Chapter 7	Quality Control and Laboratory	69-71
Chapter 8	Computer in Cement Industry	72-74

SECTION - 6 LAYOUTS AND DETAILED ENGINEERING

Chapter 1	Cement Plants General Layouts	1-43
Chapter 2	Departmental Layouts	44-46
Chapter 3	Layouts of Crushing Plants	47-59
Chapter 4	Auxiliaries in Crushing Section	60-62
Chapter 5	Storage of Crushed Lime Stone and Stacker Reclaimer Systems	63-72
Chapter 6	Layouts of Raw Mills and Separators	73-99
Chapter 7	Maintenance of Mills	100-106
Chapter 8	Layouts of Coal Mills	107-112
Chapter 9	Conveying of Raw Meal / Pulversied Coal / Cement	113-118
Chapter 10	Batch Blending and Storage Systems for Raw Meal	119-124
Chapter 11	Continuous Blending Systems	125-131
Chapter 12	Kiln Feed Systems	132-136
Chapter 13	Pyroprocessing Section	137-138
Chapter 14	Preheaters Lepol Grate	139-141
Chapter 15	Cyclone Preheaters	142-166
Chapter 16	Preheater Fan	167-174
Chapter 17	Calciners	175-186

(xvi) *Contents*

Chapter 18	Tertiary Air Duct, Dust Chamber and Connecting Duct	187-196
Chapter 19	Rotary Kiln	197-226
Chapter 19A	Coal and Oil Metering and Firing Systems	227-236
Chapter 20	Clinker Coolers - Planetary Coolers	237-239
Chapter 21	Grate Coolers	240-251
Chapter 22	Clinker Coolers, Collecting Spillage and Product	252-261
Chapter 23	Cooling Air Fans	262-268
Chapter 24	Clinker Coolers - Cooler Vent and Dust Collectors	269-277
Chapter 25	Other Clinker Coolers	278-280
Chapter 26	Clinker Conveying and Storage	281-299
Chapter 27	Handling Coal and Gypsum	300-305
Chapter 28	Handling Slag to make Slag Cements	306-313
Chapter 29	Handling Fly Ash to Make Pozzolana Portland Cement	314-321
Chapter 30	Cement Mills	322-334
Chapter 31	Cement Storage	335-338
Chapter 32	Cement Storage and Packing	339-344
Chapter 33	Bags Godown	345-348
Chapter 34	Layout of Packing Plant and Dispatches	349-357
Chapter 35	Simultaneous Loading of Trucks and Wagons	358-363
Chapter 36	Bulk Loading by Road and by Rail	364-367
Chapter 37	Bulk Loading of Clinker	368-376
Chapter 38	Exporting Cement	377-383
Chapter 39	Import of Coal	384-384
Chapter 40	Railway Siding	385-390
Chapter 41	Venting	391-404
Chapter 42	Chutes	405-415
Chapter 43	Ducts	416-453
Chapter 44	Chimneys	454-458
Chapter 45	Pipelines and Supports for Compressed Air and Pneumatic Conveying Pipe Lines	459-464
Chapter 46	Oil Lubrication and Cooling Water Systems	465-471
Chapter 47	Bed Plates	472-476
Chapter 48	Foundations and Load Data	477-482
Chapter 49	Civil Drawings and Design of Departmental Buildings	483-484
Chapter 50	Working Platforms	485-488
Chapter 51	Conveyor Gantries	489-494
Chapter 52	Lifts, Hoists and Lifting Tackles	495-499
Chapter 53	Safety	500-508
Chapter 54	Sampling	509-511

Chapter 55	Refractories	512-526
Chapter 56	Insulation and Lagging	527-528
Chapter 57	Fans	529-531
Chapter 58	Compressors and Blowers	532-533
Chapter 59	Good Housekeeping	534-535
Chapter 60	Co-generation	536-538

SECTION - 7 SELECTING AND ORDERING MACHINERY

Chapter 1	Ordering Machinery	1-2
Chapter 2	Formulating Enquiries ENQS	3-6 7-13
Chapter 3	Technical Data Sheets TDS 1-8	14-15 16-29
Chapter 4	Evaluation	30-32
Chapter 5	Critical Operational and Design Parameters	33-35
Chapter 6	Time Factor	36-36

SECTION - 8 SUSTAINABLE DEVELOPMENT

Chapter 1	Sustainable Development	1-3
Chapter 2	Blended Cements & Designing Cement Plants to make Blended Cements	4-9
Chapter 3	Alternate Fuels and Raw Materials	10-18
Chapter 4	Co-Generation	19-22

SECTION - 9 WEB PAGES**(Web Page 1)**

1. General
2. Psychrometry
3. Properties of Materials
4. Specific Heats
5. Hardness and Grindability
6. Temperatures and Pressures
7. Slopes and Gradients
8. Comparison of Sieves Blaines and Wagner
9. Fuels Calorific Values
10. Combustion and Products of Combustion
11. Kiln Gases
12. Drying

(xviii) Contents

13. Quality Control Formulae
14. Log Mean Temperature Difference
15. Heat Balances
16. Quarry Equipment
17. Crushers, Screens
18. Grinding Media
19. Ball Mills
20. Vertical Mills
21. Separators
22. Fan Laws
23. Preheaters
24. Kilns
25. Burners
26. Grate Coolers
27. Materials Handling Mechanical Conveyors
28. Pneumatic Conveyors
29. Vent Volumes and Dust Burdens
30. Log Log, Semi Log Sheets
31. Motors
32. Gearboxes

(Web Page 2)

CALCULATIONS

- | | |
|---------------|--|
| W2.C1 | Workout for Arriving at Capacity of AF Firing System |
| W2.C2 | Workout for Calculating Nett Heat Available from Waste Gases |
| W2.C3 | Heat Content of Waste Gases at Different Inlet and Outlet Temperatures |
| W2.C4 | Design of Coal Firing Pipe with Ventury |
| W2.C5 | Calculation of Pressure Drop in a Branched Circuit |
| W2.C6 | Balancing in a Simple Parallel Circuit |
| W2.C7 | Sizing Silo for Clinker |
| W2.C8 | Sizing Continuous Blending Silo |
| W2.C9 | Sizing Storage Silo for Cement |
| W2.C10 | Calculation of Dimensions of Clinker Storage |
| W2.C11 | Sp. Gas Volume from Preheater |
| W2.C12 | Vent Air from Clinker Cooler in nm^3/kg Clinker |

FIGURES

W2.F.1	Nomogram Showing Relation between Carbonates and Loss of Ignition
W2.F.2.1	Nomogram for Calculating various Moduli
W2.F.2.2	
W2.F.3.1	Pertinent Capacities in TPD OPC, PPC, BFSC etc
W2.F.3.2	Pertinent Capacities in TPD of Gypsum, Iron ore, Clay
W2.F.4	Capacity of a Calciner Kiln for
W2.F.5	Nomogram for Calculating Capacity of Linear Stock Pile
W2.F.6	Nomogram for Calculating Capacity of Linear Stock Pile for Coal
W2.F.7	Hourly Capacities

TABLES

W2.T.1	Cement to Clinker Ratios
W2.T.2	Capacity in MTPA from Capacity in TPD for OPC and Blended Cements
W2.T.3	Factors for Blended Cements
W2.T.4	Overall Cement Clinker Ratios for Different Proportions of Blended Cements
W2.T.5	Conversion and Multiplying Factors
W2.T.6	Running Hours in Various Sections
W2.T.7	Working out Sectional Capacities
W2.T.8	Capacities of Cement Mills making Blended Cements
W2.T.9	Desirable Storages in Cement Plants
W2.T.10	Storages in a Plant of 10000 TPD Capacity

SECTION 10 - SOURCES

	Sources	1-1
1.	Reference Books	2-2
2.	Technical Periodicals	3-3
3.	Reference Manuals	4-4
4.	Sources of Plates	5-8
5.	Sources of Layouts	9-9
6.	Sources of Text and Figures	10-15

SECTION 11 - RECOMMENDED READING

1.	Recommended Reading Books/Reports/Articles	1-1
2.	Recommended Sources of Data on Cement Production and Capacity	2-2
